The ceremonies for receiving novices, clothing monks in the manys (the "little habit") and in the "great and angelic habit" come next, the appointing of a priest to be confessor (πενηθησιακός) and the manner of hearing confessions, prayers to be said over persons who take a solemn oath, for those who incur canonical punishments, and for those who are absolved from them. Then comes a collection of prayers for various necessities. A long hymn to Our Lady for "forgiveness of sins", written by a monk, Euthymius, follows, and we come to the rites of espousal, marriage (called the "crowning", γυναίκα, from the most striking feature of the ceremony), the prayers for taking off the crowns eight days later, the rite of second marriages (called, as by us, "bigamy", γυναίκα, in which the persons are not crowned), and the very long antiphon of the sick (τῷ ἀσύνθετῳ), performed normally by seven priests. Next, blessings for new churches and antimons (the corporals which they use for the Liturgy; it is really a kind of portable altar), the ceremony of washing the altar on Maundy Thursday, erection of a Staurogion (exempt monastery), the short blessing of waters (γάζα), and the great one (used on the Epiphany) followed by an antemural, which contains a blessing for bishops and afterwards. After one or two more ceremonies, such as a curious rite of kneeling (καθάρσις, otherwise a rare gesture in the Eastern Churches) on the evening of Whitsunday, exorcisms, prayers for the sick and dying, come the burial services for laymen, monks, priests. Then follows a vestment, and miscellaneous prayers and hymns (marked χαίρε δάφης), canons of penance, against earthquakes, for time of pestilence, and war, and two addressed to Our Lady. More prayers for various occasions end the book. In the "Apostoles" (the Epistles) and Gospels for the chief feasts (these are taken from the two books that contain the whole collection of liturgical lessons), and lastly the arrangement of the court of the eucenaemical patriarch in choir, with rubrical directions for their various duties during the Liturgy. The chapter is found, of course, only in the Orthodox book.

It will be seen, then, that the Euchologia is the handbook for bishops, priests, and deacons. It contains only the short responses of the choir, who have to use their own choral books (Triodion, Pentekonton, Octoechos, Parakletike, Menologion). The Euchologia, in common with all Byzantine service-books, suffers from an amazing want of order. One discerns a certain fundamental system in the order of its chief parts: but the shorter services, blessings, prayers, hymns, etc. are thrown together higgledy-piggledy.

The first printed edition was published at Venice in 1526. The Orthodox official edition in Greek is printed (as are all their books) at the Phoenix press (Φιλοτέμος) at Venice (7th ed., edited by Spiridon Zerbas, 1895). There is also an Athenian edition and one of Constantinople. The churches that use other liturgical languages have pressures generally at the capital of the country, St. Petersburg, Bukarest, Jerusalem) for their translations. Provost Alexis Malzow of the Russian Embassy Church at Berlin has edited the Euchologia in Old Slavonic and German notes (Vienna, 1861, reprinted at Berlin, 1892). Unitas use the Propaganda edition and have a compendium (μικρόν εὐχολόγιον) containing only the Liturgies, Apostles and Gospels, baptism, marriage, unction, and confession (Rome, 1872). J. Goar, O.P., edited the Euchologia with very complete notes, explanations, and illustrations (Euchologia...
Eudists, or Society of Jesus and Mary, an ecclesiastical society instituted at Caen, France, 25 March, 1643, by the Venerable Jean Eudes. The principal works of the society are the education of priests in seminaries and the giving of missions. The end which Father Eudes assigned to his society made him decide not to introduce religious vows. He was persuaded that, better than religious, priests finding in the very dignity with which they were invested the reason and means of rising to eminent perfection, were in a position to inspire young clerics with a high idea of the priesthood and of the sanctity which it required. He also felt that bishops would not so willingly give their seminaries over to priests who were not entirely subject to them. Father Eudes shared the opinions of Cardinal de Bérulle and Father Olier, who did not think it proper to admit religious vows in the orders which they founded. Even St. Vincent de Paul did so only after great hesitation and on the condition, ratified by the sovereign pontiff, that the Mission should not form a religious order, properly so called, but an ecclesiastical society.

The Society of Jesus and Mary is not, therefore, a religious order, but an ecclesiastical body under the immediate jurisdiction of the bishops, to aid in the formation of the clergy. It is composed of postulants who are admitted after a probation of three years and three months. There are also lay brothers employed in temporal affairs, but who do not wear the ecclesiastical habit. To develop the spirit of Jesus Christ in the members of the society, Father Eudes caused to be celebrated every year in his seminaries the feast of the Holy Priesthood of Jesus Christ and of all Holy Priests and Levites. After the feast of the Sacred Hearts of Jesus and Mary it is one of the principal in the community. The solemnity begins on 13 November and is celebrated with an octave. It thus serves as a preparation for the renewal of the clerical promises on 21 November, the feast of the Presentation of the Blessed Virgin. As early as 1649 Father Eudes had prepared an Office proper to the feast. Some years later the feast and office were adopted by the Sulpician Fathers. Although not a religious order, the Society of Jesus and Mary is subject to discipline which does not differ from that of orders with simple vows. The administration is modelled on that of the Oratory to which Father Eudes had belonged for twenty years. The supreme authority resides in a general assembly which names the superior general and which is called, at intervals, to control his administration. It alone can make permanent laws. In the intervals between the general assemblies, the superior general, named for life, exercises full authority in matters spiritual and temporal. He has the right to name and depose general superiors, to fix the number of members, to make the annual visit, to admit, and, in case of necessity, to dismiss, subjects, to accept or to give up foundations, and, in general, to perform, or at least to authorize, all important acts. He is aided by assistants, named by the general assembly, who have a deciding vote in temporal affairs, and a consulting vote only in other questions.

During the lifetime of Father Eudes, the society founded seminaries at Caen (1643), Coutances (1650), Lisieux (1653), Rouen (1658), Evreux (1667), and Reims (1670). These were all "grand" seminaries; Father Eudes never thought them to be first. He admitted, however, besides clerical students, priests with newly granted benefices who came for further study, those who wished to make retreats, and even lay students who followed the courses of the Faculty of Theology. After his death directors were
appointed for the Seminaries of Valognes, Avranches, Dol, Senlis, Blois, Domfront, and Sceiz. At Rennes, Rouen, and some other cities seminaries were conducted for students of a poorer class who were called to exercise the ministry in country places. These were sometimes called "little" seminaries. The Jesuits were admitted early and made both their pro- fane and ecclesiastical studies. During the French Revolution, three Jesuits, Fathers Hébert, Potier, and Lefranc, perished at Paris in the massacres of September, 1792.

The cause of their beatification with that of some other victims of September has been introduced in Rome. Father Hébert was the confessor of King Louis XVI, and shortly before his death he made the king promise to consecrate his kingdom to the Sacred Heart if he escaped from his enemies. After the Revolution the society had great difficulty in establishing itself again, and it was only in the second half of the nineteenth century that it began to prosper. Too late to take over again the direction of seminaries formerly theirs, the Jesuits entered upon missionary work and secondary education in colleges. The "Law of Associations" (1906) brought about the ruin of the establishments which they had in France. Before the revolution, they had a college in Belgium and in Spain, they direct seminaries at Carthage, at Antioch, at Pamploa, at Pamád (South American), and at San Domingo, West Indies. In Canada they have the Vicariate Apostolic of the Gulf of St. Lawrence, a seminary at Halifax, N. S., a college at Church Point, N. S., and at Caraquet, N. B., and a number of other establishments less important. They number about fifteen establishments and about one hundred and twenty priests in Canada. In France, where the majority still remains, the Jesuits continue to preach missions and to take part in various other works.

CHARLES LEBRUN.

Eudocia (Eudoksia)._Eulia Eudocia, sometimes wrongly called Eudoxia, was the wife of Theodosius II; died c. 460. Her original name was Athanas, and she was the daughter of Leontius, one of the last pagans to teach rhetoric at Athens. Malalas and the other Byzantine chroniclers make the most of the romantic story of her marriage. Leontius when dying left nearly all his property to his two sons. To Athanas he bequeathed only 100 pieces of gold with the explanation that she who would not need more, since she was already richer than that of all women came to Constantinople to dispute this will, and was there seen by Pulcheria, the elder sister of Theodosius II, who ruled for him till he should be of age. The emperor had already expressed his wish to marry (he was just twenty years old); both he and Pulcheria were greatly delighted with Athanas. Malalas (op. cit., p. 353) enlarges on her beauty. She was instructed in the Christian Faith and baptized by the Patriarch Atticus. On 7 June, 421, she married Theodosius. At her baptism she had taken the name Eudocia. Pulcheria took charge of her education in the department that was expanded, where Alexander the Great had cut the famous knot, and stood perhaps at the modern Yürme, in the vilayet of Angora. Others, however, identify Eudoxia with Akkilaion, whose site is unknown, and place Germe at Yürme.

Eudoxias, a titular see of Galatia Secunda in Asia Minor, suffragan of Pessinus. Eudoxias is mentioned only by Heroeles (Synecdemus, 698, 2) and Parthey (Notit. episc. I, VIII, IX). Two bishops are known, Aquilas in 451 and Momas in 536 (Lequien, Or. christ., I, 495). Another is spoken of in the life of St. Theodore of Syce, about the end of the sixth century. The original name of the town is unknown, Eudoxias being the name given to it in honour either of the mother or of the daughter of Theodosius II. It was perhaps a less important town than that of Eudoxia in Thessaly, where, however, the dialogue of Alexander the Great was composed. It is mentioned in the fourth century in connection with the church which bore its name. The name is found in a missal of the eleventh century in which it appears to have been added at a late date to a manuscript from a former church.

Eugænus, SAINT (Eugenius; Fr. Oyand, Oyan), fourth Abbot of Condat (Jura), b. about 418, at Izernore, Ain, France-Comté; d. 1 Jan., 490, at Condat.

He was instructed in reading and writing by his Dulcet, and received the tonsure and the tonsure and the

blessing of St. Peter ad Vincula was built to receive this chain (Brev. Rom., 1 Aug., Lec. 4-6).

In 441 Eudocia fell into disgrace through an unjust suspicion of infidelity with Paulinus, the "Master of the Offices". Paulinus was murdered and Eudocia banished. In 442 she went back to Jerusalem and there died. She was buried under the Armenian Monastery.

Eudocia, forgotten by the world, spent her last years in good works and quiet meditation at the holy places of Jerusalem. She was buried in the church of St. Stephen, built by her outside the northern gate. Byzantine history offers few so strange or picturesque stories as that of the little pagan Athenian who, after having been mistress of the civilized world, ended her days as an ardent mystic, almost a nun, by the tomb of Christ. Eudocia wrote much poetry. As empress she composed a poem in honour of her husband's victory over the Persians; later at Jerusalem she wrote an essay, a paraphrase of a great part of the Bible (warmly praised by Photius, Bibliotheca, 183), a life of Christ in homeric hexameters, and three books telling the story of Sts. Cyprian and Justina (a legend about a converted magician that seems to be one version of the Faust story; see Th. Zahn, "Cyriakus von Antiochien und die deutsche Faustage", 1887). The extant fragments of these poems were edited by A. Ludwig, "Eudocia Augustae . . carminum graecorum reliqua" (Leipzig, 1897). See also fragments in P. G., LXXV, 582 sqq.

Another Byzantine empress of the same name (d. 404), like the above often wrongly called Eudoxia, daughter of the Frank general Bauto, and wife of Emperor Arcadius, was the cause of the first and second exile of St. John Chrysostom. After the fall of the eunuch Eutropius this beautiful but proud and aversive woman dominated Arcadius. She was the mother of Pulcheria and Theodosius II. The homily against her attributed to St. John Chrysostom (P. G., LIX, 483) is not genuine. C. Tillemont, "Hist. des Empereurs" (Paris, 1771), V, 735.

Malalas, Chronographia (ed. Rendtorf; Bonn, 1831); repr. in P. G., XXIV, 9-790, pp. 353-358; Socrates, H. E., VII, xxi, 47; Evagrius, H. E., I, xxv; Wiseman, Eudoxius: Gemälde des oströmischen Kaisers Theodosius II. (Worms, 1871); Greco-Syropoulos, Athens, Geschichte einer byzantinischen Kaiserin (Leipzig, 1892); Drumm, Athanas in Figures Byzantinae (Paris, 1896, pp. 25-49), i. ii.

ADRIAN FORTESCUE.
father, who had become a priest, and at the age of seven was given to Sts. Romanus and Lupicinus to be educated at Condut, in the French Jura. Thenceforth he never left the monastery. He imitated the example of the above-named saints with such zeal that it is said that he could recite St. Romanus’ Life in only two hours once, and after more. Eugendus acquired much learning, read the Greek and Latin authors, and was well versed in the Scriptures. He led a life of great austerity, but out of humility did not want to be ordained priest. Abbot Minimus made him his condutor, and after the former’s death (about 496) Eugendus became his successor. He always remained the humble religious that he had been before, a model for his monks by his penitence and piety, which God deigned to acknowledge by miracles. After the monastery, which St. Romanus had built of wood, was destroyed by fire, Eugendus erected another of stone, and improved the community life; thus far the brethren had lived in separate cells after the fashion of the Eastern ascetics. He built a beautiful church in honour of the holy Apostles Peter, Paul, and Andrew, and enriched it with precious relics. The order, which had been founded on the rules of the Oriental monasteries, took on more of the active character of the Western brethren; the rule of Tarnate is thought to have served as a model. Constat began to flourish as a place of refuge for all those who suffered from the misfortunes and afflictions of those eventful times, a school of virtue and knowledge amid the surrounding darkness, an oasis in the desert. When Eugendus felt his end approaching he had his breast anointed by a priest, took leave of his brethren, and died quietly after five days.

A few years after his death, his successor, St. Vitalis, consecrated a church over his tomb, to which numerous pilgrims travelled. A town was founded, which was called, after the saint, Saint-Oyand de Joux, and which retained that name as late as the sixteenth and seventeenth centuries, while its former name of Constat passed into oblivion. But when St. Claudius had, in 687, resigned his Diocese of Besançon and had died, in 690, as twelfth abbot, the number of pilgrims who visited his grave was so great that, since the thirteenth century, the name Saint-Claude came more and more into use and has to-day superseded the other. The feast of St. Eugenius was at first transferred to 18 June in the Dioceses of Besançon and Saint Claude and is now celebrated on 1 Jan.

_Acta SSA.,_ January, 1, 49–54; _Mon. Germ. Hist. SS. Res. Meron._, 113, 154, et al. Eudian, who wrote this text of his biography, is said to have been an unauthentic: _Annotia Bollandiana._ XVII, 367; _Mabillon._, _Acta SS._, _ord. s. Bened.,_ 1, 570–76.

GABRIEL MEER.

**EUGENE I-IV, POPES.**—EUGENE I, Saint, was elected 10 Aug., 654, and d. at Rome, 2 June, 657. Because he would not submit to Byzantine dictation in the matter of Monothelitism, St. Martin I was forcibly carried off from Rome (18 June, 653) and kept in exile till his death (September, 656). What happened in Rome after his departure is not well known. For a time the Church was governed in the manner usual in those days during a vacancy of the Holy See, or during the absence of its occupant, viz., by the archbishop, the archdeacon, and the priory of the canons in a particular position and the notaries. Three years and two months a successor was given to Martin in the person of Eugene (10 Aug., 654). He was a Roman of the first ecclesiastical region of the city, and was the son of Rufinianus. He had been a cleric from his earliest years, and is set down by his biographer as distinguished for his gentleness, not only in his personality, but also in his works, and his love of charity and generosity. With regard to the circumstances of his election, it can only be said that if he was forcibly placed on the Chair of Peter by the power of the emperor, in the hope that he would follow the imperial will, these calculations miscarried; and that, if he was elected against the will of the reigning pope in the first instance, Pope Martin subsequently acquiesced in his election (Ep. Martini vi in _P. L._, _LXXVII_.)

One of the first acts of the new pope was to send legates to Constantinople with letters for the Emperor Constant II, informing him of his election, and presenting a profession of faith. The emperor allowed himself to be deceived, or gained over, and brought back a synodical letter from Peter, the new Patriarch of Constantinople (656–666), while the emperor’s envoy, who accompanied them, brought offerings for St. Peter, and a request from the emperor that Eugene should enter into communion with the Patriarch of Constantinople. Peter’s letter proved to be written in the most obscure style, and avoided making any specific declaration as to the number of “wills or operations” in Christ. When its contents were communicated to the clergy and people in the church of St. Mary Major, they not only rejected the letter with indignation, but would not allow the pope to leave the basilica until he had promised that he would not on any account accept it (656). So furious were the Byzantine officials at this contemptuous rejection of the wishes of their emperor and patriarch that they threatened Eugene with a rejection of the gifts of the state of politics allowed it, they would roast Eugene, and all the talkers at Rome along with him, as they had roasted Pope Martin I (Disp. inter _S. Maxim. et Theod._ in _P. L._, CXXIX, 564). Eugene was saved from the fate of his predecessor by the advance of the Moslems who now defeated Constantine IV at the naval battle of Phoenix (655). It was almost certainly this pope who received the youthful St. Wilfrid on the occasion of his first visit to Rome (c. 654). He went thither because he was anxious to know “the ecclesiastical and monastic rites which were in use there” (Gibbon). At Rome he gained the appointment of archdeacon Boniface, a counsellor of the apostolic pope, who presented him to his master. Eugene “placed his blessed hand on the head of the youthful servant of God, prayed for him, and blessed him” (Bede, _Hist. Eccles._, V, 19; _Edius, In vit. Wil.,_ c. _v._). Nothing more is known of Eugene, except that he consecrated twenty-one bishops for different parts of the world, and that he was buried in St. Peter’s. In the Roman Martyrology he is reckoned among the saints of that day.

EUGENE II, elected 6 June, 824; d. 27 Aug., 827. On the death of Paschal I (Feb.–May, 824) there took place a divided election. The late pope had wished to endeavour to curb the rapidly increasing power of the Roman nobility, who, to strengthen their position against him, had turned for support to the Frankish power. When he died these nobles made strenuous efforts to replace him by a candidate of their own; and despite the fact that the clergy put forward a candidate likely to continue the policy of Paschal the nobles were successful in their attempt. They secured the consecration of Eugene, archpriest of St. Sabina on the Aventine, although by a decree of the Roman Council of 709, under Stephen IV, they had no right to select his successor. The fact is stated, in earlier editions of the _Liber Pontificalis_, to have been the son of Boemund; but in the recent and better editions his father’s name is not given. Whilst archpriest of the Roman Church he is credited with having fulfilled most conscientiously the duties of his calling, and was well known to his gentleness, and the ancient church of St. Sabina with mosaics and with metal work bearing his name, which were intact in the sixteenth century. Eugene is described by his biographer as simple and humble, learned and eloquent, handsome and generous, a lover of peace, and wholly occupied with the thought of doing what was pleasing to God.
The election of Eugene II was a triumph for the Franks, and they resolved to improve the occasion. Emperor Louis the Pious accordingly sent his son Lothair to Rome to strengthen the Frankish influence There was a check, however, on the preceding night when the Roman nobles, who had banded together in the Palatinate (Francia), were recalled, and their property was restored to them. A concordat or constitution was then agreed upon between the pope and the emperor (824). This "Constitutio Romana," in nine articles, was drawn up seemingly with a view of advancing the imperial pretensions in the city of Rome, but at the same time of checking the power of the nobles. It decreed that those who were under the special protection of the pope or emperor were to be inviolable, and that proper obedience be rendered to the pope and his officials; that church property be not plundered after the death of a pope; that only those to whom the right had been given by the decree of Stephen IV, in 769, should take part in papal elections; that two commissioners (missi) were to be appointed, the one by the pope and the other by the emperor, who should report to them how justice was administered, so that any faults in its administration might be corrected by the emperor, or, in the event of his not doing so, by the pope; that the people should be judged according to the law (Roman, Salic, or Lombard) they had elected to live under; that its property be restored to the Church; that robbery with violence be put down; that the emperor was in charge of the chief clergy, who should appear before him to be admonished to do their duty; and, finally, that all must obey the Roman pontiff. By command of the pope and Lothair the people had to swear that, saving the fidelity they had promised the pope, they would obey the Emperors Louis and Lothair; would not be made contrary to the canons; and would not suffer the pope-elect to be consecrated save in the presence of the emperor's envoys.

Seemingly before Lothair left Rome, there arrived ambassadors from Emperor Louis, and from the Greeks concerning the image-question. At first the Greek emperor, Michael II, showed himself tolerant towards the image-worshippers, and their great champion, Theodore the Studite, wrote to him to exhort him "to unite us [the Church of Constantinople] to the head of the Churches of God, viz. Rome, and through the three Patriarchs, and in accordance with ancient custom to refer any doubtful points to the decision of Old Rome (II, lxxvi; cf. II, cxxix)." But Michael soon forgot his tolerance, bitterly persecuted the image-worshippers, and endeavored to secure the co-operation of Louis the Pious. He also sent envoys to the pope to consult him on certain points connected with the worship of images (Einhard, Annales, 824). Before taking any steps to meet the wishes of Michael, Louis sent to ask the pope's permission for a number of his bishops to assemble, and make a selection of passages from the Fathers to elucidate the question the Greeks had put before them. The leave was granted, but the bishops who met at Paris (825) were incompetent for their work. Their collection of extracts from the Fathers was a mass of confused and ill-digested lore, and both the Greeks and the Latins, when they wished the books to be translated, were based on a complete misunderstanding of the decrees of the Second Council of Nicaea (cf. P. L., XC VIII, p. 1293 sqq.). Their labors do not appear to have accomplished much; nothing at any rate is known of their consequences.

In 826 Eugene held an important synod of sixty-two bishops, in which thirty-eight disciplinary decrees were issued. One or two of its decrees are noteworthy as showing that Eugene had at heart the advance of learning. Not only were ignorant bishops and priests to be suspended till they had acquired sufficient learning to perform their sacred duties, but it was decreed that, as in some localities there were neither masters nor zeal for learning, masters were to be attached to the episcopal palaces, cathedral churches and other places, to give instruction in sacred and profane literature (can. xxxiv). To help the work of the conversion of the North, Eugene wrote commending St. Ansgar, the Apostle of the Scandinavians, and his companions "to all the sons of the Catholic Church" (Jaffé, 2564). Coins of this pope are extant bearing his name and that of Emperor Louis. It is supposed, for no document records the fact, that, in accordance with the custom of the time, he was buried in St. Peter's.

**HORACE K. MANN.**

**EUGENE III**, BLESSED (BERNARDO PIGNATELLI), born in the neighbourhood of Pisa, elected 16 Feb., 1145; d. at Tivoli, 8 July, 1153. On the very day that Pope Lucius II succumbed, either to illness or wounds, the Sacred College, foreseeing that the Roman populace would make a determined effort to forestall the new pontiff to abdicate his temporal power and swear allegiance to the *Senatus Populus Romanus*, hastily buried the deceased pope in the Lateran and withdrew to the remote cloister of St. Cesarius on the Appian Way. Here, presumably, they chose a candidate outside their body, and unanimously chose the Cistercian monk, Bernard of Pisa, abbot of the monastery of Tre Fontane, on the site of St. Paul's martyrdom. He was enthroned as Eugene III without delay in St. John Lateran, and since residence in the rebellious city was impossible, the pope and his cardinals fled to the country. Their rendezvous was the monastery of Farfa, where Eugene received the episcopal consecration. The city of Viterbo, the hospitable refuge of so many of the afflicted medieval popes, opened its gates to welcome him; and thither he proceeded to await developments. Though powerless in face of the Roman mob, he was assured by embassies from all the European powers that he possessed the sympathy and affectionate homage of the entire Christian world.

Concerning the parentage, birth-place, and even the original name of Eugene, each of his biographers has advanced a different opinion. All that can be affirmed as certain is that he was born in the territory of Pisa. Whether he was of the noble family of Pignatelli, and whether he received the name of Bernardo in baptism or only upon entering religious life, must remain uncertain. He was educated in Pisa, and after his ordination was made a canon of the cathedral. Later he held the office of *vice-dominus* or steward of the temporalities of the diocese. In 1130 he came under the magnetic influence of St. Bernard of Clairvaux; five years later when the saint returned home from the Synod of Pisa, the *vice-dominus* accompanied him as a novice. In course of time he was employed by his order on several important affairs; and lastly was sent with a colony of monks to reanimate the ancient Abbey of Farfa; but Innocent II placed them instead at the Tre Fontane.

St. Bernard received the intelligence of the elevation of his disciple with astonishment and pleasure, and gave expression to his feelings in a pastoral letter addressed to the new pope, in which he occurs the famous passage so often quoted by reformers and apostles of reform: "Who will grant me to see, before I die, the Church of God as in the days of old when the Apostles let down their nets for a draught, not of silver and gold, but of soul?" The saint, moreover, proceeded to compose in his few moments of leisure that admirable hand-book for popes called "De Consideratione," Eugene sojourned at Viterbo, Arnold of Briscia
neglect to enforce them were threatened with suspension. Eugene was inexorable in punishing the unworthy. He deposed the metropolitans of York and Mainz, and, for a cause which St. Bernard thought not sufficiently grave, he withdrew the pallium from the Archbishop of Regensburg. But if Philip could at times be severe, this was not his natural disposition.

"Never," wrote Ven. Peter of Cluny to St. Bernard, "have I found a truer friend, a sincerer brother, a purer father. His ear is ever ready to hear, his tongue is always ready to advise. Nor does he comport himself as one's superior, but rather as an equal or an inferior. I have never made him a request which he has not either granted, or so refused that I could not reasonably complain." On the occasion of a visit which he paid to Clairsun, his former companions discovered to their joy that "he who externally shone in the pontifical robes remained in his heart an observant monk".

The prolonged sojourn of the pope in France was of great advantage to the French Church in many ways and enhanced the prestige of the papacy. Eugene now encouraged the intellect and the spirit, consisting of the principal families and their adherents, in the interests of order and the papacy, and the democrates were induced to listen to words of moderation. A treaty was entered into with Eugene by which the Senate was preserved but subject to the pontiff's authority and sweeping allegiance to the supreme pontiff. The senators were to be chosen annually by popular election and in a committee of their body the executive power was lodged. The pope and the senate should have separate courts, and an appeal could be made from the decisions of either to the other. By virtue of this treaty Eugene made a solemn entry into Rome a few days before Christmas, and was greeted by the fickle populace with boundless enthusiasm. But the dual system of government proved unworkable. The Romans demanded the destruction of Tivoli. This town had been faithful to Eugene during the rebellion of the Romans and merited his protection. He therefore refused to permit it to be destroyed. The Romans, growing more and more turbulent, he retired to Castle S. Angelo, thence to Viterbo, and finally crossed the Alps, early in 1146.

In 1147, before the pope of vastly greater importance than the maintenance of order in Rome. The Christian principalities in Palestine and Syria were threatened with extinction. The fall of Edessa (1144) had aroused consternation throughout the West, and already from Viterbo Eugene had addressed a stirring appeal to the chivalry of Europe to hasten to the defence of the Holy Places. St. Bernard was commissioned to preach the Second Crusade, and he acquitted himself of the task with such success that within a couple of years two magnificent armies, commanded by the King of the Romans and the King of France, set out on their way to Palestine. That the Second Crusade was a wretched failure cannot be ascribed to the saint or the pope; but it is one of those phenomena so frequently met with in the history of the papacy, that a pope who was unable to subdue a hand of fickle subordinates could hurl all his energy against the Saracens. Eugene spent three busy and fruitful years in France, intent on the propagation of the Faith, the correction of errors and abuses, and the maintenance of discipline. He sent Cardinal Brevispeak (afterwards Adrian IV) as legate to Scandinavia; he entered into relations with the Oriental patriarchs that led to reunion; he proceeded with vigour against the nascent Manichean heresies. In several synods (Paris, 1147. Trier, 1148), notably in the great Synod of Reims (1148), canon laws were enacted regarding the dress and conduct of the clergy. To ensure the strict execution of these canons, the bishops who should
with Mass and Office rite duplci on the anniversary of his death.

Bullard, (1891), x, 455; and histories of the city of Rome by Von Lomont and Gregorovius.

JAMES F. LOUGHLIN.

EUGENE IV (Gabriello Condulmiro, or Condulmario, b. at Venice, 1383; elected 4 March, 1431; d. at Basle, 23 Feb., 1447). He sprang from a wealthy Venetian family and was a nephew, on the mother's side, of Gregory XII. His personal presence was princely and imposing. He was tall, thin, with a remarkably winning countenance. Coming at an early age into the possession of great wealth, he distributed 20,000 ducats to the poor and, turning his back upon the world, entered the Augustinian monastery of St. George in his native city. At the age of twenty-four he was appointed by his uncle Bishop of Siena; but since the people of that city objected to the rule of a foreigner, he resigned the bishopric and, in 1408, was created Cardinal-Priest of St. Clement. He rendered signal service to Pope Martin V by his labours as legate in Pecum (March of Ancona) and later by building a sedition of the Bolognese. In recognition of his abilities, the concava, assembled at Rome in the church of the Minerva after the death of Martin V, elected Cardinal Condulmiro to the papacy on the first scrutiny. He assumed the name of Eugene IV, possibly anticipating a stormy pontificate similar to that of Eugene III. Stormy, in fact, his reign was destined to be; and it cannot be denied that many of his troubles were owing to his own want of tact, which alienated all parties from him. By the terms of the capitulation which he signed before election and afterwards confirmed by a Bull, Eugene secured to the cardinals one-half of all the revenues of the Church, and promised to consult with them on all questions of importance relating to the spiritual and temporal concerns of the Church and the Papal States. He was crowned at St. Peter's, 11 March, 1431.

Eugene continued throughout his simple routine of monastic life and gave great edification by his regularity and unfeigned piety. But his hatred of nepotism, the solitary defect of his great predecessor, led him into a fierce and sanguinary conflict with the house of Colonna, which would have resulted disastrously for the pope, had not Florence, Venice, and Naples come to his aid. A peace was patched up by virtue of which the Colonnese surrendered their castles and paid an indemnity of 75,000 ducats. Scarcely was this danger averted when Eugene became involved in a far more serious struggle, destined to trouble his entire pontificate. Martin V had convoked the Council of Basle (q. v.) which opened with scant attendance 23 July, 1431. Distrusting the spirit which was reigning at the council, Eugene, by a Bull dated 18 Dec., 1431, dissolved it, to meet eighteen months later in Bologna. There is no doubt that the spirit of the papal prerogative would sooner or later have become imperious; but it seems wise to have resorted to it before the council had taken any overt steps in the wrong direction. It alienated public opinion, and gave colour to the charge that the Curia was opposed to any measures of reform. The pontiff of Basle refused to be cowed, published an encyclical to all the faithful in which they proclaimed their determination to continue their labours. In this course they had the assurance of support from all the secular powers, and on 15 Feb., 1432, they reasserted the Gallican doctrine of the superiority of the council to the pope (see Constance, Council of). All efforts to induce Eugene to recall his Bull of dissolution having failed, the council, on 29 April, formally summoned the pope and his cardinals to appear at Basle within three months, or to be punished for contumacy. The aemolium which now seemed inevitable was for the time averted by the exertions of Sigismond, who had come to Rome to receive the imperial crown, 31 May, 1433. The pope recalled the Bull and acknowledged the council as oecumenical, 15 Dec., 1433. In the following May, 1434, a revolution, fomented by the pope's enemies, broke out in Rome. Eugene, in the garb of a monk, and pelted with stones, escaped down the Tiber to Ostia, whence the friendly Florentines conducted him to their city and received him with an ovation. He took up his residence in the Dominican convent of Santa Maria Novella, and sent Vitelleschi, the militant Bishop of Recanati, to restore order in the States of the Church.

The prolonged sojourn of the Roman Court in Florence, then the centre of the literary activity of the age, gave a strong impetus to the Humanistic movement. During his stay in the Tuscan capital, Eugene consecrated the beautiful cathedral, just then finished by Brunelleschi. Meanwhile, the rupture between the Holy See and the revolutionists at Basle, now completely controlled by the radical party under the leadership of Cardinal d'Allemagne, of Arles, became complete. This time our sympathies are entirely on the side of the pontiff, for the proceedings of the little coterie which assumed the name and authority of a general council were utterly subservient of the Divine constitution of the Church. By abolishing all sources of papal revenue and restricting in every way the papal prerogative, they sought to reduce the head of the Church to a mere shadow. Eugene answered with a dignified appeal to the European powers. The struggle came to a crisis in the matter of the negotiations for union with the Greeks. The majority at Basle were in favour of holding a council in France or Savoy. But geography was against them. Italy was much more convenient for the Greeks; and they declared for the pope. This exercise of the papal prerogative would sooner or later have become imperious; but it seems wise to have resorted to it before the council had taken any overt steps in the wrong direction. It alienated public opinion, and gave colour to the charge that the Curia was opposed to any measures of reform. The pontiff of Basle refused to be cowed, published an encyclical to all the faithful in which they proclaimed their determination to continue their labours. In this course they had the assurance of support from all the secular powers, and on 15 Feb., 1432, they reasserted the Gallican doctrine of the superiority of the council to the pope (see Constance, Council of). All efforts to induce Eugene to recall his Bull of dissolution having failed, the council, on 29 April, formally summoned the pope and his cardinals to appear at Basle within three months, or to be punished for contumacy. The aemolium which now seemed inevitable was for the time averted by the exertions of Sigismond, who had come to Rome to receive the imperial crown, 31 May, 1433. The pope recalled the Bull and acknowledged the council as oecumenical, 15 Dec., 1433. In the following May, 1434, a revolution, fomented by the pope's enemies, broke out in Rome. Eugene, in the garb of a monk, and pelted with stones, escaped down the Tiber to Ostia, whence the friendly Florentines conducted him to their city and received him with an ovation. He took up his residence in the Dominican convent of Santa Maria Novella, and sent Vitelleschi, the militant Bishop of Recanati, to restore order in the States of the Church.

The prolonged sojourn of the Roman Court in Florence, then the centre of the literary activity of the age,
The deliberations with the Greeks lasted for over a year, and were concluded at Florence, 5 July, 1439, by the Decree of Union. Though the union was not permanent, it vastly enhanced the prestige of the papacy. The union with the Greeks was followed by that of the Armenians, 11 Nov., 1445; the Jacobites, 1443, and the Nestorians, 1445. Eugenius exerted himself to the utmost in rousing the nations of Europe to resist the advance of the Turks. A powerful army was formed in Hungary, and a fleet was despatched to the Hellespont. The first successes of the Christians were followed by the crushing defeat at Varna, 10 Nov., 1444. In the meantime, the dwindling conventile at Basle proceeded on the path of schism. On 21 Jan., 1438, Eugenius was pronounced suspended, and this step was followed by his deposition on 25 June, 1439, on the charge of heretical conduct towards a general council. To crown their infamy, the sectaries, now reduced to one cardinal and eleven bishops, elected an anti-pope, Duke Amadeus of Savoy, as Felix V. But Christendom, having repeatedly experienced the horrors of a schism, repudiated the revolutionary step, and, before his death, Eugenius had the happiness of seeing the entire Christian world, at least in theory, obedient to the Holy See. The decrees of Florence have since been the solid basis of the spiritual authority of the papacy.

Eugenia secured his position in Italy by a treaty, 6 July, 1443, with Alfonso of Aragon, whom he confirmed as monarch of Naples, and after an extensive campaign he made a triumphal entry into Rome, on 28 Sept., 1443. He devoted his remaining years to the amelioration of the sad condition of Rome, and to the consolidation of his spiritual authority among the nations of Europe. He was unsuccessful in his attempts to induce the French court to cancel the papal Pragmatic Sanction of Bourges (7 July, 1438), but, by prudent compromises and the skill of Aeneas Silvius, he gained a marked success in Germany. On the eve of his death he signed (5, 7 Feb., 1447) with the German nation the so-called Frankfort, or Prince's Concordat, which, after long hesitancy and against the advice of many cardinals, he recognized, not without diplomatic reserve, the persistent German contentions for a new council in a German city, the mandatory decree of Constance (Frequens) on the frequency of such councils, also the authority (and of that of other general councils), but after the manner of his predecessors, from whom he declared that he did not intend to differ. On the same day he issued another document, the so-called 'Bulla Salvatoria', in which he asserted that notwithstanding these concessions, made in his last illness when unable to examine them with more care, he did not intend to do aught contrary to the teachings of the Fathers, or the rights and authority of the Apostolic See (Hergenrother-Kirsch, II, 941–2).

EUGENIUS II (THE YOUNGER), Archbishop of Toledo from 647 to 13 Nov., 657, the date of his death. He was the son of a Goth named Evanitus, became a cleric in the cathedral of Toledo, and at the death of Eugenius I was elected his successor. The office was so little to his taste that he fled to Saragossa to lead a monastic life, but was forced to return to Toledo by King Chindaswinth and decree that the bishops of Toledo should reside one month every year in that city.

See Pius II; Gregory of Heimburg.

EUGENIUS I, Archbishop of Toledo, successor in 636 of Justus in that see; d. 617. Like his predecessor he had been a disciple of Helladius in the monastery of Agli. He is famous as an astronomer and mathematician. As a bishop he was virtuous and intelligent. At this period, under the Gothic kings, the councils of Toledo were national diets convoked by the monarch, attended by lay lords; they regulated, to some extent, not only spiritual but temporal affairs. Of these councils Eugenius presided at the fifth, convoked in 636 by King Vilaus to confirm his elevation to the throne; he assisted at the sixth, convoked by the same king to take precautions against the disorders of royal elections. This council, contrary to the principles later put in practice by St. Ildefonsus, banished all Jews who did not embrace the Catholic Faith. Eugenius attended the seventh council of Toledo, which was summoned by King Chindaswinth and decreed that the bishops of Toledo should reside one month every year in that city.

EUGENIUS II (THE YOUNGER), Archbishop of Toledo from 647 to 13 Nov., 657, the date of his death. He was the son of a Goth named Evanitus, became a cleric in the cathedral of Toledo, and at the death of Eugenius I was elected his successor. The office was so little to his taste that he fled to Saragossa to lead a monastic life, but was forced to return to Toledo by King Chindaswinth, and take up the government of that see. Though of small stature and feeble health he was a zealous prelate. He undertook the reform of the disciplinary chart of the Divine Office, and the spiritual administration of the See. As a writer of prose and poetry. His style is natural and clear, and his exposition easy and agreeable. His poems, though lacking polish and elegance, are full of fire, spirit, and poetic movement. Poetically, he breathes throughout, and the orthodoxy of his faith is notable. His thought is solid, fertile, and gives evidence of a well-trained mind. His feast is kept on 13 November.

Eugenius left two books in prose and verse, published (Paris, 1619) by Father Simond, S.J., containing his poems on religious and secular subjects, his recension of the poem of Dracocontus on "The Six Days of Creation" (Hexaemeron), to which he added a "Seventh Day", and a letter to King Chindaswinth explaining the plan of the entire work; he also edited the metrical "Satisfactio" of Dracocontus, an account of the writer's misfortunes. Of this work Bardenhewer says (Pauly, tr. St. Louis, 1900) that it is a substan-tial revision at the hands of Eugenius II, Bishop of Toledo, in keeping with the wish of the Visigoth King Chindaswinth (642–49); not only were the poetical form and the theology of the poem affected by this treatment, but probably also its political sentiments. It is this revised edition that was usually printed as Dracocontus Elegia (Migne, P.L., LXXXVIII, 383–88), until the edition of Arevalo (Rome, 1791, 362–402, and 901–32) made known the original text. He also wrote a treatise on the Trinity probably against the Arian Visigoths. Ferrera mentions a letter of Eugenius to the king and one to Protasius, the Metropolitan of Tarra-ragona, promising if possible to write a mass of St. Hippolytus and some festal sermons, but disclaiming the ability to equal his former productions.

EUGIPPIUS

Word he was imitated by the members of his flock, many of whom were exiled with him, after he had admitted Vandals into the Catholic Church, contrary to royal edict, and had worsted in argument Arian theologians, whom the king pitted against the Catholics. Both sides called the name "Catholic", the Arians calling their opponents "Homoomians". The conference was held some time between 418 and February, 441, and ended by the withdrawal of the chief Arian bishop on the plea that he could not speak Latin. The Arians being enraged, Hunicer persecuted the Catholics, exiling forty-six bishops to Corsica, and then burning two to the African deserts. Among the latter was Eugenius, who under the custody of a ruffian named Antonius dwelt in the desert of Tripoli. On setting out he wrote a letter of consolation and exhortation to the faithful of Carthage which is still extant in the works of Gregory of Tours (P. L., LVII, 769-71). Gunthamund, who succeeded Hunicer allowed Eugenius to return to Carthage and permitted them to reopen the church. After eight years of peace Thrasamund succeeded to the throne, revived the persecution, arrested Eugenius, and condemned him to death. He was commuted the sentence into exile at Vienne, near Alps (Languedoc), where the Arian Alaric, then king. Eugenius built here a monastery over the tomb of St. Amaranthus, the martyr, and led a penitential life till his death. He is said to have miraculously cured a man who was blind.

In the Expositio Fidei Catholicae, "demanded of him by Hunicer, possibly the one submitted by the Catholic bishops at the conference. It proves the constitutability of the Word and Divinity of the Holy Ghost. He wrote also an "Apologeticus pro Fide"; "Altercatio cum Arianis", fragments of which are cited also prior to his letters, addressed to Hunicer or his successors. His letter to the faithful of Carthage has been mentioned above.

MARK J. McNEAL

Eugippius. See Severinus, Saint.

Eulalia of Barcelona, Saint, a Spanish martyr in the persecution of Diocletian (12 Feb., 304), patron of the city of Barcelona, also of St. Eulalia. The Acts of her life and martyrdom were copied early in the twelfth century, and with elegant conciseness, by the learned ecclesiastic Renallus Grammaticus (Bol. acad. hist., Madrid, 1902, XIII, 253-55). Their historical source is a Latin hymn of the middle of the seventh century by Quiricus, Bishop of Barcelona, friend and correspondent of St. Ildonzes of Toledo and of St. Tajo, Bishop of Saragossa. This hymn, identical with that of Prudentius (Peristephanon, III) for the feast of St. Eulalia of Merida (10 Dec., 304), was preserved in the Visigothic Church and has reached through the Mozarabic Liturgy.

There is no reason to doubt the existence of two distinct saints of this name, despite the over-hasty and hypercritical doubts of some. The aforesaid Quiricus of Barcelona and Oronius of Merida were present at the fourth council of Toledo (656). The latter had already founded (651) a convent of nuns close by the basilica of the celebrated martyr of his episcopal city, had written a rule for its guidance, and given it for abbess the noble lady Eugenia. Quiricus now did as much for the basilica and sepulchre of the martyr of Barcelona, close to whom he wished to be buried, as we read in the last lines of the hymn. The inscriptions on many Visigothic altars show that they contained relics of St. Eulalia; except in the context, however, they do not distinguish between the martyr of Barcelona and the one of Merida. On an altar in the village of Morera, Province of Badajoz, we find enun-

mered consecutively Sts. Fructuosus and Augurius (Tarragona), St. Eulalia (Barcelona), St. Baudilius (Nimes), and St. Paulus (Narbonne). The Visigothic archaeology of Eastern Spain has been hitherto poor in hagiological remains; nevertheless, a trans-Pyrenean inscription found at St. Eulalia near Dijon mentions a basilica dedicated to the martyrs Sts. Benedictus, Eulalia, and Euundius (of Barcelona). Until 23 Nov., 874, the body of the Barcelona martyr reposed outside the walls of the city in the church of Santa Maria del Mar. On that date both the body and the tomb were transferred to his cathedral by Bishop Frodoinus. In memory of this act he set up an inscription now preserved in the Museo Provincial de Barcelona (no. 864); see also volume XX of Flores, "España Sagrada", for a reproduction of the same. Not long before this the martyr, St. Eulogius, having occasion to defend the martyrs of Cordova for their spontaneous confession of the Christian Faith before the Massilian magistrates, quoted the example of St. Eulalia of Barcelona, and referred to the ancient Acts of her martyrdom. Her distinct personality is also confirmed by the existence of an ancient church and monastery in Cordova that bear the name of the Barcelona martyr; this important evidence is borne out by the papers examined by the learned Dom Freron (below).

Eulalia, Anti-pope. See Boniface I.

Eulogia (Greek εὐλογία, "a blessing")—The term has been applied in ecclesiastical usage to the object blessed. It was occasionally used in early times to signify the Holy Eucharist, and in this sense is especially frequent in the writings of St. Cyril of Alexandria. The origin of this use is doubtless to be found in the words of St. Paul (1 Cor., x, 16): τὸ παρθένον τῆς εὐλογίας ἡ εὐλογίαμεν. But the more general use is for such objects as bread, wine, etc., which it was customary to distribute after the celebration of the Eucharistic Mysteries. Bread so blessed, we learn from St. Augustine (De peccat. merit. ii, 26), was customary distributed in his time to catechumens, and he even gives it the name of sacramentum, as having received the formal blessing of the Church. "Quini accepit catechumenus, quamvis non sit bonum Christi, sanctum tamen est, et sanctius quam cibi quibus alimur, quoniam sacramentum est." (What the catechumens receive, even if it is not the Body of Christ, is holy—holier, indeed, than our ordinary food, since it is a sacrament.) For the extension of this custom in later ages, see Antidoron; Bread, Liturgical Use of.

The word eulogia has a special use in connexion with monastic life. In the Benedictine Rule monks are forbidden to receive "littera, eulogia, vel quaelibet eucharistica" without the abbot's leave; and the word may be used in the sense of blessed bread only, but it seems to have a wider signification, and to designate any kind of present. There was a custom in monasteries of distributing in the refectories, after Mass, the eucharistic bread blessed at the Mass, as the eucharistic sacrament. For the extension of this custom in later ages, see Antidoron; Bread, Liturgical Use of.

Arthur S. Barnes.

Eulogius of Alexandria, Saint, patriarch of that see from 380 to 607. He was a successful combatant of the heretical errors then current in Egypt, notably the various phases of Monophysitism. He was a
warm friend of St. Gregory the Great, corresponded with him, and received from that pope many flattering expressions of esteem and admiration. Among other merits the pope makes special mention of his defence of the primacy of the Roman See (Baronius, Ann. Eccl. 1622, p. 59). Eulogius visited the East, some communities of which ancient sect still existed in his diocese, and vindicated the hypostatic union of the two natures in Christ, against both Nestorius and Eutyches. Baronius (ad ann. 600, no. 5) says that Gregory wished Eulogius to survive him, recognizing in him the voice of truth. It has been rightly said that he restored for a brief period to the church of Alexandria that life and youthful vigour characteristic of those churches only which remain closely united to Rome. Besides the above works and a commentary against the various sects of the Monophysites (Caelestis, Theodosians, Cainites, Aedapuli) he left eleven discourses in defence of Leo I and the council of Chalcedon, also a work against the Agnoetie, submitted by him before publication to Gregory I, who after some observations authorized it unchanged. With exception of one sermon and a few fragments of its works, St. Ephrem has preserved of the writings of Eulogius the following:

Nicaea, The Holy Eastern Church, Faithfulness of Alexandria (London, 1850), II, 46-52; Barrows, History, Theology, v. Sulpicius Severianus (Freiburg and St. Louis, 1908), 534. The extant fragments of the writings of Eulogius are in F. G. LXXIX (140) 58-64.

M. J. McNeal.

Eulogius of Cordova, Saint, Spanish martyr and writer who flourished during the reigns of the Cordovan Caliphs, Abd-ar-Rahman II and Mohammed I (822-856). It is not certain on what date or in what year of the ninth century he was born; it must have been previous to 819, because in 845 he was a priest highly esteemed among the Christians of Catalonia and Navarre, and priesthood was then conferred only on men thirty years of age. The family of the saint was of the nobility and held land in Cordova from Roman times. The Musulman rulers of Spain, at the beginning of the eighth century, tolerated the creed of the Christians and left them, with some restrictions, their civil rule, ecclesiastical hierarchy, monasteries, and property, but made them feel the burden of subjection in the shape of pecuniary exactions and military service. In the large cities like Toledo and Cordova, the civil rule of the Christians did not extend from that of the Visigothic epoch, and the government was exercised by the comarces (counties), president of the council of senators, among whom we meet a similarly named ancestor of Eulogius. The saint, like his five brothers, received an excellent education in accord with his good birth and under the guardianship of his mother Isabel. The youngest of the brothers, Joseph, held a high office in the palace of Abd-ar-Rahman II; two other brothers, Alvarus and Ideorde, were merchants and traded on a large scale as far as Central Europe. Of his sisters, Niola and Anulona, the first remained with her mother; the second was educated from infancy in a monastery where she later became a nun.

After completing his studies in the monastery of St. Zoilus, Eulogius continued to live with his family the better to care for his mother; also, perhaps, to study with famous masters, one of whom was Abbot Spardin, an illustrious writer of that time. In the meantime he found a friend in the celebrated Alvarus Paulus, a student-fellow, and they cultivated together all branches of science, sacred and profane, within their reach. Their correspondence in prose and verse filled volumes; later they agreed to destroy it, the manuscripts perishing and the Alvarus in a short time. The Alvarus married, but Eulogius preferred the ecclesiastical career, and was finally ordained a priest by Bishop Recared of Cordova. Alvarus has left us a portrait of his friend: “Devoted,” he says, “from his infancy to the Scriptures, and growing daily in the practice of virtue, he quickly reached perfection, surpassed in knowledge all his contemporaries, and became the teacher even of his masters. Mature in intelligence, though in body a child, he excelled them all in science even more than they surpassed him in years. Fair in manner (caritas et cultura) and amiable in person, he was gained by his eloquence, and yet more by his works. What books escaped his avidity for reading? What works of Catholic writers, of heretics and Gentiles, chiefly philosophers? Poets, historians, rare writings, all kinds of books, especially sacred hymns, in the composition of which he was a master, were read and digested by him; his humility was none the less remarkable and he readily yielded to the judgment of others less learned than himself.” This humility shone particularly on two occasions. In his youth he had decided to make a foot pilgrimage to Rome; notwithstanding his great fervour and his devotion to the sepulchre of the Prince of the Apostles (a notable proof of the union of the Mozarab Church with the Holy See), he gave up his project, yielding to the advice of prudent friends. Again, during the Saracen persecution in 830, after reading a passage of the Apostles (John 13:18), he decided that he might better defend the cause of the martyrs; however, at the request of his bishop, Saul of Cordova, he put aside his scruples. His extant writings are proof that Alvarus did not exaggerate. They give an account of what is most important from 845 to 856, otherwise almost unknown. From them we learn both without and within the Musulman dominions, especially of the lives of the martyrs who suffered during the Saracen persecution, quorum pars ipsa magna fuit. He was elected Archbishop of Toledo shortly before he was beheaded (11 March, 850). He leaves a perfect account of the orthodox doctrine which he defended, the intellectual culture which he propagated, the imprisonment and sufferings which he endured; in a word, his writings show that he followed to the letter the exhortation of St. Paul: Immitate me et ego Christi. He is buried in the cathedral of Oviedo.

F. Fita.

Eumenia, a titular see of Phrygia Pacatina in Asia Minor, and suffragan to Hierapolis. It was founded by Attalus II Philadelphus (159-138 b.C.) at the sources of the Cludrus and near the Glauceus, on the site of the modern Iškeleli, the centre of a palace in the vilayet of Brusa (1000 inhabitants). The new city was named by her founder after his brother Eumenes. Numerous inscriptions and many coins remain to show that Eumenia was an important and prosperous city under Roman rule. On the site of its Achaeion origin. The source of Christianity is, however, the most interesting fact in its history. As early as the second century its population was in great part Christian, and it seems to have suffered much during the persecution of Diocletian. Its bishopric and martyr, St. Thraseas (Euseb., H. E., XXIV, 28), did not belong to this period. Another bishop, Metrodorus, known by an inscription, lived probably soon after Emperor Constantine. Four other bishops are known by their subscriptions to proceedings of councils—Theodore in 361, Leo in 787, Paul and Ephraim in 879 (Lequien, Oriens christ., I, 897). The information mentioned in the "Notitia ecclesiastica" as late as the twelfth or thirteenth centuries.

S. Pétridi S.
Eunomianism, a phase of extreme Arianism prevalent among a section of Eastern churchmen from about 350 until 381; as a sect it is not heard of after the middle of the fifth century. The teaching of Arians was condemned by the Council of Nicæa, and the doctrine itself, as the touchstone of orthodoxy. The subsequent history of the Arians here is the history of the endeavours of arnining sympathizers to get rid of the obnoxious word. The diplomacy of court intrigeurs forms the dark background against which stand Eusebius and Semi-Arians. Imperial influence had been all-powerful too to allow Arians to be treated as outlaws in church affairs to the imperial change of attitude towards Christianity. That influence was exercised through the court prelates tinged with the fundamental rationalism underlying Arianism. They skillfully avoided the real issue, represented the whole affair as merely a question of the propriety of using particular terms, and for a time deluded those who were unfamiliar with the metaphysics of the question. St. Athanasius was represented as a political fire-brand whose watchword was **homoousian**. The Emperor Constantius (335–381), to his great personal annoyance, was ignorant of the doctrine of the Orthodox, and would not allow Athanasius to be exiled to Alexandria (31 Oct., 346). The lull which seemed to follow the return of Athanasius was due to the political circumstances arising out of the disastrous Persian War and the civil war against Maxentius; and it was not until the victory of Valentinian (13 Aug., 350) that the emperor’s hands were freed.

In the meantime a new and more defiant Arian school was arising, impatient of diplomacy, and less plant to imperial dictation. It frankly returned to the fullest expression of the errors of Arius, and intended to defend it by the rationalizing basis of Aristotelian dialectics. The history of the new school coincides with the life-history of Aetius and Eunomius. Aetius, its founder, successively a goldsmith, physician, and grammarian, turned his attention to theology under Arian influences at Antioch and Alexandria. Aristotle’s categories henceforth formed the limits of his knowledge, and the abuse of the syllogism his principal weapon. Ordained deacon at Antioch in 350, he was deposed by Leonius and sought refuge at Alexandria, where he found a disciple in Eunomius. Radical and uncompromising in their heretical teaching, they asserted that in substance and in all else the Son is unlike the Father: **divinos**, “unlike”, became their watchword as against the **homoousios** (homoousios) of the Orthodox, the **homoios** (homoios) of the Semi-Arians, and the later **huios** (huios) of the Arians. Hence the Arian extremists became known as Aetians, and later as Eunomians and Anomoeans. Their doctrines were received favourably by Eudoxius of Antioch and the Synod of Antioch in 358; but the formulation of their tenets produced a reaction, and in the same year they were condemned by the Semi-Arians and by the Synod of Seleucia (Sept., 359), where Aetius and Cæræus rejected the **homoios** and the triumph of the Homoeans led to their second exile of Aetius to Moesia and later at Ambialada in Pridias. After 360 the Anomoean Arians ceased to be formidable. Julian the Apostate (361–363) allowed Aetius to return; he was rehabilitated in an Arian synod, and died c. 370. Meanwhile Eunomius, supported by his friend Eudoxius, transferred from Antioch to Constantinople (366), became Bishop of the Orthodox See of Cyzicus in Asia Minor. His flock appealed to Constantius, who obliged Eudoxius to take action against him. Deposed in his absence and banished, Eunomius founded a sect of his own, ordained and consecrated some of his followers. Julian recalled both Aetius and Eunomius, who acquired considerable importance in Constantinople. The Synod of Antioch, 362, explicitly set forth the Anomoean doctrine that “the Son is in all things unlike [κατά τὰ πάντα ἀνδρόμαι] the Father, as well in will as in substance”. The death of Eudoxius in 370 marks the beginning of the end of Eunomianism. The sectarians were excluded from the benefit of Gratian’s edict of toleration (end of 378), were directly condemned by the Council of Constantinople (381), and were the objects of special repressive measures in addition to those directed against Arians and heretics in general. Moreover, disruptive forces were at work within the sect. Eunomius died about 395, and for all practical purposes the sect may be said to have died with him.

The dogmatic system of Eunomius is characterized at once by its presumptuous dialectics and its shallowness. His errors concerning Christ are founded upon his erroneous theology, which involves the assertion that a God of simplicity cannot be a God of mystery at all, for even man is as competent as God to comprehend simplicity. Eunomius proclaims the absolute intelligibility of the Divine Essence: “God knows no more of His own substance, than we do; but whatever we know about the Divine Substance, that is more known to me.” It must be said that whatever he knows about the Divine Substance, it is more accurately known to God; on the other hand, whatever He knows, the same also you will find without any difference in us” (Socrates, Hist. Eccl., IV, vii).

**Eunomia**, he maintains, perfectly expresses the Divine Essence: as the Unbegotten, God is a simple being: an act of generation would involve a contradiction of His essence, by introducing duality into the Godhead. The Father is **heterousios**; the Son is **heterousios**; hence, he held, there must be diversity of substance, and thus an Anomoean doctrine. Such constructions against the Orthodox was as follows: we allow **heterousia** to be a Divine attribute. Now the simplicity of God excludes all multiplicity of attributes. Consequently **heterousia** is the only attribute which befits the Divine nature, the only one therefore essential to God. In other words, God is essentially incapable of being begotten. Hence it is folly to speak of a God begotten, of a Son of God. The one God, **heterousios** and **heterousia**, unbegotten and without beginning, could not communicate His own substance, nor beget even a consubstantial Son; consequently there could be no question of identity of substance (homoiousios) or of likeness of substance (homoousios) between the Father and the Son. There could be no essential resemblance (κατὰ ὁμοιασίαν), but at most a moral resemblance. For the Son is a being drawn forth from nothing by the will of the Father, yet superior to all Creation inasmuch as He alone was created by the One God to be the Creator of the world. He does not share in the incomunicable Divine Essence (hōsia), but he does partake in the communicable Divine creative power (hēmera), and it is that partaking which constitutes the Son’s Divinity and distinction, and it is that which the term **Son of God** may be used is clear.

The works of Eunomius are of less importance in themselves than in the light which they throw on the best efforts of St. Basil and St. Gregory of Nyssa. His Commentary on the Romans and his letters have perished. His “Apologieticum” (P. G., XXX, 835), written before 365, seeks to refute the Nicene teaching concerning the coeternal and consubstantial Divinity of the Son. It is extremely obscure, and has been frequently misunderstood. For example, Tilmont, VI, 501–516, needs careful checking. It was against this work of Eunomius that St. Basil wrote his “Adversus Eunomium” (Ἀντίγραφον) in five books. (It is clear, however, that books IV and V are from another pen.) Eunomius retorted with his *Apologetic*.
EUPHROSYNE, P. (Defence of the Defence), written after the death of St. Basil (1 Jan., 379), wherein he does his best to defend more fully and by new arguments his teaching concerning the nature of God. This work was elaborately refuted by St. Gregory of Nyssa by "Advocatus Dei, Euphrosyne," one of which some twelve books have come down to us preserving the fragmentary remains of the "Apologetics, which are gathered in Retberg's "Marelliana" (Gottingen, 1794, pp. 124-147). A very full analysis of it is found in Dicamp, "Gotteslehre des hl. Gregor von Nyssa" (1896), I, 129 sqq. The third extant work is "Euphrosyne," or "Confession of Faith," presented by order to the Emperor Theodosius in 383. (See Arianism.)

Euphemites. See Mesalians.

Euphrosyne of Constantinople (409-496) succeeded as Patriarch Flavitas (or Fravitas, 489-490), who succeeded Acacius (471-489). The great Arian schism (484-519), therefore, lasted during his reign. The Emperor Zeno (474-491) had published a decree called the "Henotikon" (482) that forbade in the current discussions any other criterions but that of Nicaea-Constantinople (ignoring the decrees of Chalcedon), carefully avoiding speaking of Christ's two natures, and used ambiguous formulæ that were meant to conciliate the Monophysites. The "Henotikon" really satisfied no one. Consistent Monophysites disliked it as much as Catholics. But Acacius at the capital, Peter Mongus of Alexandria, and Peter Fullo (Graphus) of Antioch, signed it. Pope Felix III (or H., 485-492) in a Roman synod of sixty-seven bishops (484) condemned the emperor's decree, deposed and excommunicated Acacius, Peter Mongus, and Peter Fullo. Acacius retired by striking the pope's name from his diplomas and persecuted Catholics at Constantinople. When he died, Flavitas, his successor, applied for recognition at Rome, but in vain, since he would not give up communion with Peter Mongus. Euphrosyne recognized the Council of Chalcedon, restored the pope's name to his diplomas, and brought Peter Mongus, who died in the year of Euphrosyne's accession (490). He was therefore a well-meaning person who wanted to restore the union with the Holy See. Unfortunately he still refused to cease the names of his two predecessors (Acacius and Flavitas) from the diplomas, where they occurred among the faithful departed. The pope insisted that heretics and followers of heresy should not be prayed for publicly in the Liturgy; so during the reign of Euphrosyne the union he desired was not brought about. But Euphrosyne was always a Catholic at heart. Before the accession of Emperor Anastasius I (491-518) he had made him sign a Catholic profession of faith (Evagrius, H. E., III, xxii). After the death of Pope Felix, Euphrosyne wrote to his successor, Gelasia I (492-496), again asking for intercommunion on any terms but the condemnation of Acacius. This time, too, the pope refused to modify his condition (Gelasia Epist. et Decret. P. L., LIX, 13). The patriarch had already summoned a synod at Constantinople in which he confirmed the decrees of Chalcedon (Mansi, VII, 1190). Eventually he fell foul of the emperor. A war against the Bulgars and Slavs was then going on, and Euphrosyne was accused of treason by revealing the emperor's plans to his enemies. A soldier tried, unsuccessfully, to murder the patriarch, apparently by order of Anastasius. The emperor further wanted to have back his written profession of faith, which Euphrosyne refused to give up. So he was deposed (496) in spite of the resistance of the people, and Anastasius II (496-511) was appointed successor. Macedonius seems to have been unwilling to take his place and refused to wear patriarchal vestments in his presence. Euphrosyne was exiled to Asia Minor and died in 515 at Anra. He was recognized to the end as lawful patriarch by Catholics in the East (Elias of Jerusalem, Flavian of Antioch, etc.).

Euphrasia, or EUPHRAXIA, SAINT, VIRGIN, b. in 380; d. after 410. She was the daughter of Antigonus, a senator of Constantinople, and a relation of Emperor Theodosius. Her father died shortly after her birth, and her mother, also Euphrosyne, devoted her life thenceforth exclusively to the service of God. To carry out this ideal she abandoned the capital, and, with her seven-year-old daughter, repaired to Egypt, where she dwelt on one of her estates, near a convent, and adopted the nuns' austere mode of life. This example aroused in her daughter the desire to enter the convent, and her mother gave her into the care of the superior, that she might be trained in the ascetic life. After her mother's death she declined an offer of marriage made by the Emperor Theodosius, on behalf of a senator's son, transferred to the emperor her entire fortune, to be used for charitable purposes, and took up, with a holy ardor, the rigorous practices of Christian perfection. She was about thirty when she entered. Her feast is celebrated in the Greek Church on 25 July, and in the Latin Church on 13 May. She is mentioned by St. John Damascene, in his third "Ontio de imaginibus".

Euphrates. See PERATE.

Euphrosyne, SAINT, d. about 470. Her story belongs to that group of legends which relate how Christian virgins, in order the more successfully to lead the life of celibacy and asceticism to which they had dedicated themselves, put on male attire and passed for men. According to the narrative of the "Vita Patrum" Euphrosyne was the only daughter of Paphnous, a rich man of Alexandria, who desired to marry her to a wealthy youth. But having conserved her life to God and apparently seeing no other means of keeping this vow, she clothed herself as a man and under the name of Smaragdus gained admittance into a monastery of men near Alexandria, where she lived for thirty-eight years after. She soon attracted the attention of the abbot by the rapid strides which she made toward a perfect ascetic life, and when Paphnous appealed to him for comfort in his sorrow, the abbot committed the latter to the care of the alleged young man Smaragdus. The father received from his own daughter, whom he failed to recognize, helpful advice and comfort. Not until she was dying did she reveal herself to him as his lost daughter Euphrosyne. After her death Paphnous also entered the monastery where she is celebrated in the Greek Church on 25 September, in the Roman Church on 16 January (by the Carmelites on 11 February).

Eurea, a titular see of Epirus Vetus in Greece, suffragan of Nicopolis. Eurea is mentioned by Hierocles (Syenecedemus, 651, 6). Justinian transferred its inhabitants to an islet in a neighbouring lake and built there a strong town (Procop., De aed., IV, 1).

We know five bishops of Eurea: the first, St. Demetrius, who lived before the time of Theodosius I, the last is mentioned in a letter of Pope St. Gregory the Great about 603 (Lequien, Or. christ., II, 143).

The site of the city is unknown; Lequien identifies it with Paramythia, which is called At Donat (St. Donatus) by the Turks, in the vilayet of Janina. Others have placed it at Limbioni, near Missolonghion. In the east, however, it is most likely to be Phocion, others say, Nicopolis. Panagiotides in Νικοπόλις Ἑλληνική ἔρημος (Constantinople, 1882), II, 308; Philippou in Pauly-Wissowa, Real-Encyk., s. v.

S. Pétridès.

Europe.—Name.—The conception of Europe as a distinct division of the earth, separate from Asia and Africa, had its origin in ancient times. The sailors of the Egean Sea applied the Semitic designation Breb (sunset, west) and Aga (sunrise, east) to the countries lying respectively west and east of the sea; in this way it became customary to call Greece and the territory back of it Europe, while Asia Minor and the parts beyond were named Asia. At a later date the mass of land lying to the south of the Mediterranean was set off as a distinct division of the earth with the name of Asia Minor.

Position, Boundaries, and Area.—Europe is a large peninsula forming the western part of the northern continent of the Eastern Hemisphere. On the north and west it is separated from North America by the Arctic and North Atlantic Oceans; on the south by the Mediterranean Sea from Africa and the Egean Sea. In the east there is no clear natural division from the continental mass of Asia. Such a dividing line may be drawn along the crest of the Ural and Caucasus Mountains, the Emba River, Caspian Sea, and the lowlands of the Manich River, or through the depression that, starting from the Gulf of Obi, extends through the valleys of the Obi, Irtish, Tobol, and Emba Rivers. The political boundary extends beyond the Ural Mountains towards the east, and beyond the Ural River to the south and west, runs along the range called Obischei Syrt and the Usen River, and encircles within the eastern boundary of Europe the whole of the Caucasus. The most northern point of Europe is North Cape (71° 12' N. lat.) on the Island of Magerö belonging to Norway; the most western point is Cape de Roche (9° 31' west of Greenwich) in Portugal; the most southern is Cape Tarifa (36° 50' 33" S. lat.) in Spain; the continent extends as far to the east as 65° longitude east of Greenwich. Its greatest length from north to south is 2398 miles, from west to east 3455 miles. The statement as to the extent of its area varies, according to the position assigned to its eastern boundary, from 3,672,960 sq. miles to 4,092,960 sq. miles. This measurement includes the polar islands Iceland, Nova Zembla, and Spitzbergen, but not the Canary, Madeira, and Azores Islands.

Geological Formation.—Three leading tectonic divisions are to be distinguished in the geological formations of Europe. In the Tertiary period... Western Europe, as far south as the Alps, the Pyrenees, and, reaching beyond the Pyrenees, into the Spanish Peninsula, to the east as far as the Baltic and the Vistula River, is formed of debris and sedimentary deposits. This has been produced by the breaking up and overflowing with water of the mountain chains that now exist as secondary ranges, as the Scotch Highlands, the central plateau of France, and the mountain chain of Central Germany. Towards the east is low-lying land that has remained the same from early times. Sweden and Finland form together a great level called the Plain of the Baltic, south-east from which spreads the great Russian plain, which is limited by the Urals and Carpathian Mountains, the Crimea, and the Caucasus Mountains. The whole of Southern Europe and a part of Middle Europe is a region of late folded mountain ranges. These begin with the Alps, which have remarkable heights, in the ranges of Prealps, in Crete, in the southern and central parts of the Balkan Peninsula. The north-western Apennines pass into the Alpine System. In the eastern Alpines the Alps proper are divided into three chains; of these the middle one passes into the Hungarian plain; the Carpathian and Balkan ranges unite in a great bend with the northern chain, and the southern one is continued by the Dinaric Alpes and the western chains of the Balkan Peninsula as far as Crete and the south-western part of Asia Minor. Numerous islands belong to the Continent of Europe. The separation of the islands from the mainland arose in two ways. In the north and west, the encroachment of the sea produced bays and peninsulas and formed islands. In the south, the war against the sea from the Mediterranean, those of the Adriatic and Egean Seas, the Sea of Marmora, and the southern part of the Black and Caspian Seas, were formed by folding; and in this way also were formed the Iberian, Italian, and Balkan Peninsulas and the archipelagos lying between Greece and Asia Minor. The islands of Europe belong to three different basins, namely, to the Caspian Sea, the Atlantic Ocean, including the Mediterranean and Black Seas, and the Arctic Ocean. The courses of the rivers of Europe are much shorter than the courses of those of Asia, Africa, or America. The largest of the European rivers, the Volga (1778 miles), the Danube (1771 miles), Dnieper (1329 miles), Don (1120 miles), Petehora (1023 miles), and the Dniester (835 miles), flow into seas that are almost entirely cut off from the ocean, consequently from the world's traffic. They offer, however, little obstruction to navigation, and numerous canals are cut through the main watershed that extends from Gibraltar to the northern Urals. The largest number of lakes is found in the region, formerly covered with glaciers, lying north of 50° N. lat.—Finland, Scandinavia, Scotland, and Ireland, and the Alps. Besides this lake region, lakes have also been formed in the Alps by folding, in the Balkans by the breaking in of the surface, and in the Apennine Peninsula by volcanic outbursts.

Climate, Flora, Fauna.—The climatic conditions of Europe are very favourable. Almost the entire continent, excepting the northern point, belongs to the temperate zone. At the same time it is much warmer than other countries in the same latitude, as, for instance, than eastern North America, because along its western coast flows the Gulf Stream, which leaves the coast of Florida with a temperature of 68° Fahr. and raises the normal temperature on the Portuguese and Spanish coast about 7° 2° Fahr., of the British coast about 9°—14° 4° Fahr., and of the Norwegian coast about 14°-18° Fahr. Since there is no chain of mountains traversing Europe from north to south, as is the case in North America, the influence of the Gulf Stream extends far into the interior of the mainland. On the borders of the Arctic Ocean a rigorous climate prevails, summer is short, and during the greater part of the year the temperature is below freezing. This northern region has polar vegetation; the rolling plains called tundras are found on the peninsulas of Kain and Kola and at the mouth of the Pechora. The sub-arctic zone is found south of this in the Scandinavain Peninsula down to 60° N. lat., where the climate of the coast, influenced by the sea, is milder in winter and colder in summer. The part of Europe properly included in the temperate zone is divided
into the following regions: the countries lying on the Atlantic, Great Britain, Brittany, the Channel, and northwestern Spain; this section has moderate temperature and large rainfall; west and middle Europe, with an inland climate, less heavy rainfall (about 1'7 inches), and the rainfall of the mountainous regions is less than 23'6 inches. Finally comes the section of the Euxine comprising the great Hungarian plain, the plain of the Balkan provinces, and Southern Russia; in this division the spring is moist and warm and midsummer hot and dry. The depression of the Caspian belongs to the dry zone of Asia.

The forests of Europe flourish in the temperate zone. In Norway they are composed chiefly of pine; the only deciduous tree found in the highest latitudes is the birch (betula odorata); the mixed forests of pines and deciduous trees are found south of 61° N. lat.; this region is characterized by grass-lands, heaths, and moors. The cultivated land, which in Central and Western Europe is about sixty to seventy per cent, is divided into farm land, cultivated forest land, grass and pasture land. From north to south the succession of grains is as follows: barley, rye and oats, wheat, corn, and finally in France and Hungary, and maize. Potatoes are cultivated on less fruitful soil. In this region native fruits are the apple, pear, and cherry; finer kinds of fruit trees, as the peach, apricot, plum, and of nut trees, the walnut and almond, have been introduced from the south. In this region the grape is cultivated; its northern limit is in the south of the Loire, as far as Paris and the Rhine near Bonn, thence towards the Unstrut and Saale Rivers, and reaches its most northerly point on the Oder below 52° N. lat.; the limit of its cultivation here turns to the south-east until it reaches the Sea of Azov. The region of the Mediterranean, that is the Iberian Peninsula, Provence, Italy, to the foot of the Alps, and the Balkan Peninsula south of 42° N. lat., has a sub-tropical climate. Here flourish trees and bushes which are always green; among those that are cultivated for their products are the citron, orange, fig, and almond; myrtle, and pomegranates. The fauna of Europe is in accord with the climate and vegetation. In Northern Europe are found the polar bear, polar fox, and reindeer; in the region of forests live the bear, wolf, and lynx, which have, however, almost disappeared; the region of the Mediterranean contains numerous reptiles.

**Population, Political Divisions, and Religions.**

-The greater part of the population of Europe belongs to the European or Mediterranean race. The main race-groups are the Teutonic, Romanic, and Slavonic. To the Teutonic division belong: the Germans, Dutch, Flemish, English, and Scandinavian; it contains in all 127,800,000 souls or 32'1 per cent of the whole population; included in the Romanic group are: the French, Walloons, Italians, Friulians, natives of the Rharian Alps, Maltese, Spaniards, Portuguese, and Cubans. In all 108,311,682 souls, or 27'1 per cent are included in the Slavonic are: the Russians, Ruthenians, Poles, Czechs, Slovaks, Wends, Slovenes, Croats, Serbs, Bulgarians, Letts, and Lithuanians, in all 124,600,000, or 31'3 per cent. A smaller number, about 9,500,000 souls or 2'4 per cent is composed of other Asian races: Turks, Greeks, Albanians, Gypsies, Armenians, etc. There are also about 27,000,000, or some 7 per cent, of non-Aryan races: Basques, Magyars, Finns, the tribes of the Ural region, Turks, Kal- mucks, and Jews. The total population of Europe amounts to about 429,000,000.

The organization of the present States of Europe may be traced back to the Middle Ages. Most of the States are limited by natural boundaries within which each has developed its own individual character. The States vary greatly in size and population; most of them are constitutional monarchies, the only republiques being France and Switzerland. Among the latter, Great Britain and Ireland has a total area of 71,622 square miles and 43,722,000 inhabitants; as a natural consequence of the geographical position of the islands, the nation is largely interested in colonial enterprises. The Scandinavian Peninsula is halved by an uninhabited mountain range, thus permitting the existence of two countries, Norway and Sweden. Denmark, on the Atlantic, has an area of 123,938 square miles and 2,300,000 inhabitants; Sweden, on the Baltic, has an area of 172,973 square miles and 5,261,000 inhabitants. The peninsula and islands lying south of Norway and Sweden form the third Scandinavian state, Denmark, that controls the entrance to the Baltic. Denmark has an area of 14,672 square miles and 2,450,000 inhabitants. France, the western part of the continental mass, has an area of 206,950 square miles and a population of 39,060,000; it has the advantage, excepting the Swiss, of having for its boundaries either seas or mountain ranges. Between Western and Central Europe lie the so-called "buffer" States: Belgium with an area of 11,197 square miles and 7,075,000 inhabitants; the Netherlands, area 12,741 square miles, inhabitants 5,510,000; Switzerland, area 15,830 square miles, inhabitants 6,466,000. The German Empire, area 128,880 square miles, inhabitants 60,605,000, covers the greater part of Central Europe. Germany borders upon nearly all the great powers of Europe and has, therefore, developed a large army. The State having the least organic union geographically and ethnically, and consequently in constant danger of external disorganization, is the Austro-Hungarian Monarchy. Its area is 261,004 square miles, population 49,092,000 souls. Russia, area 2,081,079 square miles, inhabitants 119,115,000, occupies the lowland of Europe and, in its largest extent, stretches beyond Europe into the Asiatic plain. Southern Europe embraces numerous states with sharply defined boundaries. The Iberian Peninsula is divided between Portugal and Spain; Portugal, a country lying on the ocean and having a great maritime past, has an area of 43,393 square miles, inhabitants 5,016,000; Spain, area 199,282,341 square miles, inhabitants 28,124,000. Italy belongs completely to the lands of the Mediterranean; its area is 110,811 square miles, population 33,604,000. The physical contour of the Balkan Peninsula is so broken up by mountain ranges that it fails to show any one organically large State. Its divisions at the present time are: Bulgaria, 37,066 square miles, population 3,744,400; Montenegro, 3475 square miles, population 228,000; Rumania, 50,579 square miles, population 6,392,000; Servia, 18,533 square miles, population 2,677,000; European Turkey, 65,251 square miles, population 6,130,000; Greece, 25,662 square miles, population 2,440,000.

By far the greater proportion of the population of Europe belong to the Christian faith. One-fourth of the population are Protestants, somewhat over one-fourth belong to the Oriental Christian Churches, nearly 45 per cent are Catholics, 44 per cent are not professing any religion. In the Romanic States 99 per cent of the population are Catholic; in the Teutonic States 74 per cent are Protestant and less than one per cent non-Christian. In the States of Eastern Europe, Austria-Hungary, Russia, and the Balkan provinces, 57 per cent belong to the Oriental Churches, 9'2 per cent are Protestants, and 6 per cent are Catholic. The only heathen peoples are the Kal- mucks living between the Ural and Caucasus mountains, the Finns of the Volga, and the Samoyedes. About 3,550,000 persons or 2 'per cent of the whole population of Europe are Mohammedans in belief; these are limited to several tribes of the Uralo-Altaic
family in Russia, and to the former territories of the Ottoman Empire; among the Mohammedans are a large portion of the Albanians, some of the Serbs in Bosnia and Herzegovina, and a part of the Bulgarians. The Jews of Europe number 9,000,000 or 2·2 per cent; they are largely found only in Russia, in the Austrian, Hungarian, Rumanian Monarchy, Rumania, and Turkey. (The above figures are based on Hettner, op. cit. infra.)

Christianity.—European civilization is founded on that of the East; from Western Asia and Egypt Europe received its food-plants, domestic animals, method of writing, numerals, the beginnings of art and science; and the modern forms of state organization and religion. The various States of Greece, the European neighbour of Asia, transmitted these by trade and the foundation of colonies to the countries lying on the shores of the eastern Mediterranean and to Southern Italy. Rome from its central position imparted them to Western and Northern Europe and united the civilized parts of the continent into a great empire. At the time of its greatest extent imperial Rome included, on European soil, the present countries of Italy, Spain, France, England, Germany west of the Rhine and south of the Danube, the countries bordering on the Black Sea, and the whole Balkan Peninsula, besides all the islands of the Mediterranean. Christianity, too, came from the East by way of Greece and Rome. The connexion existing between the various Roman provinces and the wide prevalence of the Latin and Greek tongues were most favourable to the spread of the Christian faith. When the Byzantine emperors by the Caesars fell to pieces, the Christian Faith not only entered into its inheritance, but also subdued all those barbarian peoples that had up to then defied the imperial power. The Gospel was brought to Rome by colonies of converts who kept up close relations with Palestine, of the Church of Paris. St. Paul brought Christianity to Greece on his second journey (49-52 A.D.) when he founded, with the aid of Silas, Timothy, and Luke, Christian communities in Philippi, Thessalonica, Berea, Athens, and Corinth. St. Paul's mission to Greece and Italy, perhaps also to Spain, prepared the way for the close connexion between the Roman and Greek Christians and strengthened them for the work of spreading the Gospel. In fact the first persecution under Nero in 64 was not able to crush the new movement, and the same fate befell the many others.

Towards the end of the first century, under Clement, the head of the Church at that time, there was a close bond between Rome and Corinth. It is also to be assumed that in the meantime all the commercial cities on the coasts of the Mediterranean had Christians in their midst, and that before long the regions adjoining these cities accepted the Gospel. According to tradition the Church in Gaul was founded by Trophimus, who was sent there by St. Paul; to Crescentius, a disciple of the Apostles, is ascribed the preaching of the Gospel in Vienne and Mââ©; and to Dionysius the Areopagite, the founding of the Church of Paris. To Eucharius and Maternus, two disciples of St. Paul, are attributed the founding of the Churches of Trier and Cologne. It is certain that flourishing dioceses arose in Lyons and Vienne during the reign of Marcus Aurelius (161-180). At the beginning of the third century, according to the testimony of Tertullian (Adv. Judæos), various tribes of Gaul had accepted Christianity. At about the same date Irenæus (Adv. haerescæ) speaks of Churches in Germany, and the new faith had at that time spread into all the provinces of the Spanish Peninsula. According to the Venerable Bede (Histor. gentis Anglorum) 86; the first missionaries came from the English during the reign of Pope Eleutherius (177-90). By the opening of the third century the British Church had spread beyond the Roman possessions in Britain and may even have embraced Ireland. In the meantime the barbarians living along the northern bound-aries of the Roman Empire had begun their migrations and predatory incursions. Along this border lived the tribes of the Teutonic family, divided by the Oder into the East Germans and West Germans. The East Germans included the Ostrogoths and Visigoths, the Burgundians, Vandals, Heruli, Rugii, and Scyri. The West Germans were either Franks, Alamans, or Germans on the sea-coast, including the later Frisians and Anglo-Saxons; the Istvaneons or the Germans of the Rhine, including the Franks between the Weser and Rhine; the Herulians, among whom were the later Thuringians and the upper German tribes of the Alamans and Bavarians (141-154). As early as the years 161-80 the Marcomanni, a West German tribe, advanced as far as Aquileia; they were defeated, but introduced northern elements into the population. After this failure the current of the migration divided into two streams: one to the south-east, the migration of the East Germans; one to the south-west, the migration of the West Germans. Of the East Germans, the Goths reached the lower Danube and the Black Sea and divided, according to these respective positions, into the Ostrogoths and Visigoths. In 375, on account of the pouring in of Asiatic tribes through the Danube and Black Sea, and the whole Balkan Peninsula, besides all the islands of the Mediterranean. Christianity, too, came from the East by way of Greece and Rome. The connexion existing between the various Roman provinces and the wide prevalence of the Latin and Greek tongues were most favourable to the spread of the Christian faith. When the Byzantine emperors by the Caesars fell to pieces, the Christian Faith not only entered into its inheritance, but also subdued all those barbarian peoples that had up to then defied the imperial power. The Gospel was brought to Rome by colonies of converts who kept up close relations with Palestine, of the Church of Paris. St. Paul brought Christianity to Greece on his second journey (49-52 A.D.) when he founded, with the aid of Silas, Timothy, and Luke, Christian communities in Philippi, Thessalonica, Berea, Athens, and Corinth. St. Paul's mission to Greece and Italy, perhaps also to Spain, prepared the way for the close connexion between the Roman and Greek Christians and strengthened them for the work of spreading the Gospel. In fact the first persecution under Nero in 64 was not able to crush the new movement, and the same fate befell the many others.

Towards the end of the first century, under Clement, the head of the Church at that time, there was a close bond between Rome and Corinth. It is also to be assumed that in the meantime all the commercial cities on the coasts of the Mediterranean had Christians in their midst, and that before long the regions adjoining these cities accepted the Gospel. According to tradition the Church in Gaul was founded by Trophimus, who was sent there by St. Paul; to Crescentius, a disciple of the Apostles, is ascribed the preaching of the Gospel in Vienne and Mââ©; and to Dionysius the Areopagite, the founding of the Church of Paris. To Eucharius and Maternus, two disciples of St. Paul, are attributed the founding of the Churches of Trier and Cologne. It is certain that flourishing dioceses arose in Lyons and Vienne during the reign of Marcus Aurelius (161-180). At the beginning of the third century, according to the testimony of Tertullian (Adv. Judæos), various tribes of Gaul had accepted Christianity. At about the same date Irenæus (Adv. haerescæ) speaks of Churches in Germany, and the new faith had at that time spread into all the provinces of the Spanish Peninsula. According to the Venerable Bede (Histor. gentis Anglorum) 86; the first missionaries came from the English during the reign of Pope Eleutherius (177-90). By the opening of the third century the British Church had spread beyond the Roman possessions in Britain and may even have embraced Ireland. In the meantime the barbarians living along the northern bound-
the state religion of Rome since the time of Constantine the Great, with a more stable power, the united West Germans.

The West Germans, although their migrations were not very extended, had changed their habitations as far as the Rhine, and in the fifth century took entire possession of it, spreading towards the north as far as Coblenz. The Franks were divided into the Ripurian and Gaulish Franks; the former settled on both sides of the middle and lower Rhine, the latter advanced from the Schelde to the Somme. Towards the end of the fifth century, the Saxons advanced from the Elbe to the Rhine; in the fifth century, with the aid of the Angles, they conquered Britain; the former inhabitants of Britain took refuge in Wales and France and gave their name to Brittany. The Frisians settled on the coast and islands of Schleswig-Holstein; the Thuringians spread from the lower Elbe to the southern bank of the Main. The Bajuurari went farthest south. At the time of the birth of Christ they lived in modern Bohemia; about 500 their territory extended from the Lech to the Elbe and from the Danube to the junction of the Tisza and the river Ilz. The tribes just named enlarged the scene of European history; all that was now needed was the political and spiritual union of these peoples to make them the leading people of Europe. The political union was brought about by the Franks, the spiritual union by Germania. In the end these two forces combined in a form of theocracy which, by a rapid series of victories, conquered not only southern Europe, but also Middle and Eastern Europe as well.

Just as the fifth century passed into the sixth (481-511), Clovis, King of the Saxon Franks, forcibly subdued the most important of the tribes and led them to embrace Christianity after his own conversion. Clovis first united what was left of the Roman Empire on the Seine and Loire with his own domain and made Paris his capital. After this he subdued the Alamanni on the Rhine, Mosel, Lower Main, and Neckar; as the champion of the doctrines of Roman Christianity, he conquered the King of the Arian Visigoths near Poitiers (507) and seized the Visigothic territory between the Loire and the Garonne. By overthrowing the petty Saxon chief and the royal family of the Ripurian Franks, he made himself the ruler of the Frankish tribes. The work was completed by his four sons, who seized the territories of the Thuringians and Burgundians, forced the Ostrogoths to give up Provence and Rhetia, and obtained by treaties sovereignty over the Bajuurari.

The first of the foundations of the Franco-Christian Empire which opened to Christianity a new missionary field to be won over to the Faith only by properly trained apostles. The training was given in the monastic institutions which, in imitation of the East, had now spread over all of Western Europe. One of the chief factors in the conversion of the heathen was the Order of St. Benedict of Nursia, encouraged by Gregory the Great. The precursors of the Benedictines were St. Patrick (432) and St. Columba (about 590), who converted Ireland and Scotland, while the Anglo-Saxons received Christianity from the Hibernians in the seventh century. Augustine (590), who had been specially sent by Rome. At the death of St. Patrick there were in Ireland several bishops, numerous priests and many monasteries; his own see was Armagh. Columba founded the celebrated monastery on the Island of Iona, between Ireland and Scotland, which was the centre of the Scotch missions and dioceses. The Abbot Augustine and his companions erected the metropolitan See of Canterbury (Durovernum), York (Eboracum), and the see of London; in the course of the seventh century the successors of Augustine, Mellitus and Theodore of Tarsus, completed his work.

A glorious band of self-sacrificing apostles of the Faith, from Columbanus and Gallus to Boniface, carried Christianity from the British Isles to the Continent. They founded their work on what scanty remains of Christianity still existed in the former Roman provinces. In the fifth century Severinus and Valentinian, both Gaulish Franks, laboured in the south of France. At the end of the fifth century, the first Franks crossed the Vosges mountains, where he had founded the monasteries of Annegray and Luxeuil, and came to Lake Constance; here from Bregenz as a centre he preached Christianity, while his companion St. Gall became the founder of the celebrated monastery of St. Gall. In the early part of the seventh century the monks Agilus and Eustaceus of the monastery of Luxeuil preached the Gospel in Bavaria; they were followed by Rupert of Worms and Emmeram of Aquitaine. St. Corbinian laboured as the first Bishop of Freising, and Kilian in Wormsburg. Ecclesiastical life on the Rhine was largely developed by Bishop Nectarius of Cologne, Dragobodo of Speyer, Amandus, Lambert, and Hugo of Maestricht. The Gospel was brought to the Frisians by Wilfrid of York and Willibrord of Northumbria; the latter erected a see at Utrecht. Willibrord's companion, Suidbert, went into the countship of Mark and Frisia, Lower Lüneburg, and founded a monastery. The brothers Ewald laboured with little success among the Saxons. An organization including all these countries was not established until the appearance of the greatest of the apostles of the Germans, St. Boniface. He entered on his career in the time of the Carlingian Mayors of the Palace, who were destined to realize the union of Church and State in Western Europe.

Repeated divisions of the kingdom, disputes as to succession, civil wars, and the power of the nobles almost brought the great Frankish kingdom to dissolution. It was saved from utter ruin by Pepin of Heristal, Mayor of the Palace (Major domus), who gradually took control of the government. In 687 Pepin won for himself the position of Mayor of the Palace of Neustria and Burgundy, in addition to that for Austrasia which he already held; in this way he ruled the kingdom. He undertook the conquest of the tribes which had broken loose from the Frankish rule and encouraged the missions to the West Frisians. His son Charles Martel, who was not less active, held a position of such power that he was able, in the great battle of Poitiers, 732, to protect Christian German civilization against the attack of Islam to conquer the world. Pepin the Short, the son of Charles, brought about the union of Church and State which had so great an influence on the history of the world. Having obtained the title of king in 752, his first task was to defend Pope Stephen II, who had appealed to him for aid, from the attacks of the Lombards; this was followed by the so-called "Donation of Pepin", a grant of territory to the pope which was the foundation of the later States of the Church. Their mutual engagements fixed not only their own policy but also that of their successors. Like Pepin his famous son Charlemagne lent his support to the Holy See, and all his conquests were undertaken for the good of the Church and Christianity. By successful campaigns against Aquitaine, the Lombards, Avars, Saxons, and Danes, and by treaties with the Slavic peoples, Charlemagne increased his domain, which extended from the Elbe and the Arno to the Elder River in Schleswig-Holstein, and from the Atlantic to the Elbe and the Raab. His kingdom became a world-empire and he himself one of the great rulers of history, worthy of reviving the Western Roman Empire. He was crowned, Christmas Day, 800,
by the pope, and the new empire rested essentially on the basis of an alliance with the Church. Its ideal was the Kingdom of God on earth, in which the emperor by divine appointment is God’s viceroy in order to lead and rule all races as divided into nations, classes, and distinctions of rank according to Divine will. Pepin the Short had been filled with this lofty concept; consequently extraordinary success attended the missionary labours of the Church under both rulers. As early as 716, under the rule of Charles Martel, the Anglo-Saxon monk Winfrid, better known as Boniface, landed on the Continent; he was to be the reformer and organizer of German ecclesiastical life. He always laboured in union with Rome, and was himself a missionary in Frisia with Willibrord, then, in 722, in Hesse and Thuringia, and in 736 in Bavaria. Having been made an archbishop and having received authority from Rome, he founded a number of monasteries, e.g. that of Fulda, and the Bishops of Eichstätt, Würzburg, Burgrave, and Erfurt. By means of synods held every five years he brought about the closer union between the old and new dioceses, and placed the newly founded sees in Thuringia, as well as those of Speyer, Worms, Cologne, Utrecht, Tongern, Augsburg, Chur, Constance, and Strasbourg, under Mainz as metropolitan see, of which he became archbishop in 746. In the reign of Charlemagne the large territories of the Saxons and Avars were added to the lands thus organized, and the regions also received Christian bishops. The result was the founding of the Dioceses of Bremen (787), Paderborn (806), Werden, and Minden in the county of the Engern, Osnabrück and Münster (785) in Westphalia, Halberstadt and Hildesheim (817) in Eastphalia; the metropolitan of all the Saxon sees was Bremen (831). The conversion of the Avars had been attempted by the Bavarian Duke Tassilo II; when the East Mark was founded the Avars came under the influence of the sees and monasteries established in this country; after their subjugation they were placed partly under the jurisdiction of the Bishop of Salzburg and partly under that of the Patriarch of Aquileia.

From these points, Christianity, as formerly in the Roman Empire, extended beyond the boundaries of Charlemagne’s dominions, and new tribes and peoples were evangelized, while, at the same time, German civilization was peacefully established within the Frankish Empire. The monastery of Corvey on the Weser, and the Sees of Bremen and Hamburg (831) were the mission centres for the northern provinces. The monk Anschar of Corvey, first Archbishop of Hamburg, laboured with great zeal as Apostolic legate in Denmark, Sweden, and Norway; his successors were equally active as missionaries and bishops. However it was not until the reign of Canute the Great (1014-35) that the victory of Christianity in Denmark was assured; in 1164 Lund was made the metropolitan See of Scandinavia; in 1163 Upsala became the metropolitan See of Sweden, and about the middle of the twelfth century Trondhjem was made the same for Norway. Iceland was won for Christianity about the year 1000 and was divided into the two sees of Skálholt and Holm. The inhabitants of the Orkneys, Hebrides, Faroe, and Shetland Islands were converted about the same time as Iceland; they were at first placed under the metropolitan See of Hamburg-Bremen, which had been united in 849, and later under the jurisdiction of the metropolitan See of Norway.

During the period of the Teutonic migrations the Slavs had come into contact with Christianity and were converted partly by Christian rulers, as in Thrace, Macedonia, Greece, and Dalmatia, partly through the influence of neighbouring Christian countries, as in Carinthia. In 806 the Bishop of Passau undertook the conversion of Moravia; that of Pannonia was attempted by Archbishop Adalram of Salzburg (821-36). In both these countries a great missionary work was done by Cyril and Methodius; the latter, Methodius, became Archbishop of Moravia and of Thessaly. The work of converting Bohemia began in the year 945; the country was at first subject to Ratisbon; in 973 a diocese was founded in Bohemia itself at Prague, which was suffragan to Mainz. Poland was brought to Christianity by its ruler Duke Mieszylaw (963), and in 968 he erected the Bishopric of Posen. In the year 1000 Gnesen was made a metropolitan see, its suffragan sees were Breslau (1000), and Cracow (1000). Finally, in the reigns of Heinrich I and Otto I the northern Slavs, living in regions subsequently German, namely the Wends, including those living in Pomerania, as well as the Obodrites and Sorbs on the Oder, Vistula, and Elbe, in Lusatia, and Saxonys were forcibly Christianized. The new sees of Havelberg, Brandenburg, Meissen, Zeitz, Merseburg, and Oldenburg (Stargard) served as points from which the work of conversion could be carried on; Magdeburg was the centre of the entire Slavonic mission.

It was during the same period that the Greek Church spread through the eastern part of Europe. In 955 the first Christian princess of Russia, Olga, was baptized at Constantinople; during the reign of her grandson Vladimir, baptized 989, Christianity became the religion of the country. In 864 the Bulgars, at the demand of their patriarch, accepted Christianity as a people, and from 870 were under the ecclesiastical control of Constantinople. A bishop sent from Constantinople introduced Christianity among the Magyars, or Hungarians; the work was carried by German missionaries in particular by the great policy of the Saxon emperors. The first Christian ruler of Hungary was Stephen (997-1038).

Many sacrifices, however, were still necessary in order to keep what had been gained for Christianity and to protect these gains against the threatened dangers of Mohammedanism and heathenism. These sacrifices were freely made by medieval Christian Europe. Under the careful training of their appointed guardians, the Catholic orders, the various nations and their rulers were filled with Christian thoughts and feelings. Although the concession of their lands to the representatives of the secular and spiritual power inevitably led to friction, especially in the age of the Hohenstaufen emperors, nevertheless all were conscious of their common duty to protect faith and civilization against foes both in Europe and outside of it. In the convincing proof of this was the courageous struggle of Europe against the attempted inroads of Islam, and especially the expeditions of conquest to the Holy Land repeatedly undertaken by the various nations of Europe acting together. Spain, which since 711 had been almost entirely under the control of the Moors, was able in 1212 to drive them as far back as Granada; in 1492 Granada also fell. From 875 Sicily had been in the hands of the Saracens, but it was freed by the courageous Normans (1061-91). The so-called Crusades (1096-1291) continued with interruption for nearly two hundred years; among those who were engaged in them were monks, as Peter of Amands and St. Bernard; bishops, as Otto of Freising; rulers of the greatest nations of Western Europe, as the German emperors, Frederick Barbarossa and Frederick II; the French kings, St. Louis, and Philip II, and the English Richard the Lion-Hearted. Orders of knights, as the Order of St. John, were formed to take part in these expeditions. The original aim of the Crusades, the freeing of Palestine from the control of non-Christians, it is true, was not attained. But the power of Mohammeedanism was weakened for a long time to come; the civilization of Western Europe, moreover,

Christianity did not win the victory until 1348. After this only the Turks, in the south-eastern corner of the Continent, were a cause of alarm to Christian Europe for centuries. The decline of the power of the Eastern Empire drew the Turks over the Bosporus; in 1366 they had control of Adrianople; in the course of the fourteenth century the Serbs, Bulgars, Macedonians, and the inhabitants of Thessaly became their subjects. In 1353 the Turks took Constantinople, in 1461 Trebizond, in 1490 even Otranto in Apulia; after 1566 they owned half of Hungary. It was not until the eighteenth and nineteenth centuries that their possessions were reduced to their present boundaries, thus limiting Mohammedanism to a small part of the population of Europe.

At the beginning of modern times a great change took place in the boundaries of the European States. The cause was that ecclesiastical movement known as the Reformation, which placed in opposition to the unity of Catholicism in Western Europe the numerous religious associations that together form Protestantism. The apostasy of the various countries and cities, which began soon after Luther first appeared, was brought about by the most varied causes, described elsewhere, and was facilitated by the violent procedure of the petty princes who had absolute sovereign power over their subjects. The first of the ruling princes to make the change was Albert of Brandenburg, Grand Master of the Teutonic Knights (1525); he was followed by the Elector John of Saxony, Philip, Landgrave of Hesse (1527), and at almost the same date by nearly all the German imperial cities. The movement soon gained the northern countries, Denmark, Sweden, Norway, and the Baltic provinces; these all gave their adherence (1530) to the so-called Augsburg Confession, while the upper German imperial cities, Strasbourg, Constance, Limburg, Memmingen, held to the Tetrapolitan Confession of the so-called Reformed Church founded by Zwingli and especially strong in Switzerland. The Reformed Church also found adherents in the Palatinate, and at the beginning of the seventeenth century in Hesse-Cassel and Brandenburg. The Anglican Church was established in 1549 in Great Britain; in 1559 the French Reformed Church adopted the "Confessio Gallicana"; in 1560 the Scotish Reformed the "Confessio Scotica"; from 1592 the Reformation in Scotland adopted a Presbyterian form of government. Since 1562 the Reformation in the Netherlands has held to the "Confessio Belgica", and the Reformed Church in Hungary since 1567, to the "Confessio Hungarie". Soon the Counter-Reformation, called into life by the Council of Trent (1545-63) to prevent the loss of the whole of middle Europe, appeared; its success was assured by the aid of the Society of Jesus. In this way various princes and bishops who were desirous of doing their duty were enabled to hold their countries to the Catholic Church, as the Duke of Cleves, the Electors of Mainz and Trier, the Bishops of Augsburg, Wurzburg, Bamberg, Münster, Constance, Basle, the Abbey of Fulda, but especially the Dukes of Bavaria and the Hapsburg dynasty within their Austrian provinces. Soon the hostility between the two ecclesiastical parties grew so bitter that a trifling incident sufficed to bring on a terrible religious conflict, the Thirty Years War (1618-48). Two religious confessional leagues confronted each other in Germany:

the Catholic League, which was formed in 1609 among the Catholic States of the German Empire and had for its leader the vigorous Duke Maximilian of Bavaria, and the Union in which, from 1609, most of the Protestant princes and cities combined under the leadership of Frederick IV of the Palatinate. Foreign powers were Sweden, France, and the Roman States, and the war, which lasted till 1648, and which was ended by the Peace of Westphalia, laid the foundation of the present conditions of the religious community. The expenses of the Roman Catholic and Orthodox Greek Churches are met from a fund controlled by the State and obtained from the secularization of Church property in the reign of Joseph II. In Hungary the Roman Catholic Church was originally the state religion and now is the state religion by a decree of 1867, but also exercizes to other Christian confessions and to the Jewish faith. Croatia-Slavonia recognizes only the Roman Catholic and Uniat Greek Churches, the Orthodox Greek Church and Protestant Churches, and the Jewish faith. In Bosnia and Herzegovina the ruling confessions are the Roman Catholic Church and the Uniat Church, and Mohammedanism. The State Church of the Balkan provinces is the Orthodox Greek. The State Church of Russia is the Orthodox Greek Russian Church; the other Christian and non-Christian confessions are tolerated, the Jews have only limited rights.

The situation in the English-speaking countries is, however, more free. In England and Wales the Anglican is the State Church, its head being the king; the fundamental principles are defined by Parliament. There is a similar arrangement for the Presbyterian State Church in Scotland. In these three countries the Church is not subject to the state, but the state grants the Church privileges and protection. In Ireland, however, the Church is still subject to the state, but the Government has a limited influence on it. In France the separation of Church and State was declared in 1905, and the Church is now independent of the state. In Germany the state is more or less subject to the Church, but the state grants the Church privileges and protection. In Italy the Church is independent of the state, but the state grants the Church privileges and protection. In Belgium, Switzerland, and Austria the Church is independent of the state, but the state grants the Church privileges and protection. In Spain and Portugal the state religion is the Roman Catholic. In Belgium the Catholic, Protestant, Jewish, and Anglican forms of worship are recognized by the state and are recognized by the state and are recognized by the state.

The synodal form of organization and similar Presbyterian associations which are based on assemblies of elected representatives and the ordinances passed by these. This form of organization is in existence in Austria-Hungary, Prussia, Bavaria, Hesse, Mecklenburg, and other German States, where the consistory is not in force. The synodal organization also exists among the non-Anglican Churches in Great Britain, in France, among the Italian Waldenses, in the Netherlands, Belgium, Switzerland, and Austria, and in connection with the episcopal form of church government in Sweden and Finland. The Anglican Church, called in England and Wales the Established Church of England, and in Ireland the Church of Ireland, is episcopal in government; in Ireland the episcopal synodal system is in force. The church in England and Wales is divided into three provinces, Canterbury and York. The Archbishop of Canterbury is the Primate of All England; under Canterbury are 42 suffragan dioceses; York consists of an archdiocese and 9 suffragan bishops. Ireland has 3 archdioceses: Armaigh, which has the primacy of all Ireland, and Dublin with 10 suffragans; Scotland has 7 dioceses. The organization of the Oriental Greek Church varies in different countries. In Russia the head of the Church is the Tsar, who appoints the members of the Holy Synod, the highest ecclesiastical body. In Turkey the Ecumenical Patriarch is the head; under him are 10 or 12 metropolitans. In Rumania a national synod is the highest ecclesiastical authority; in Servia a metropolitan with the bishops; in Bulgaria the government is vested in an exarch, aided by archbishops, bishops, and the Council of Bishops. The Holy Synod of Greece consists of five prelates or bishops named by the king. In the Austro-Hungarian Monarchy there are 3 provinces of the Oriental Greek Church: the Austrian, or Province of Czernowitz, with the suffragan Dioceses of Zara and Cattaro, the Archdiocese of Karlowitz (Patriarch-Archbishop), with 6 suffragans, and the Archdiocese of Hermannstadt, with 3 suffragans. Bosnia and Herzegovina have each a metropolitan.

For the ecclesiastical organization of European countries, see the respective articles on the various political divisions, also Eastern Churches. The
Europus, a titular see in Provincia Euphratensis, suffragan of Hierapolis. The former name of this city was Thapsacus (Thapsakh), an Aramean word which means "ford"; it was an important trade-centre at the northern limit of Solomon's kingdom (11 I., iv. 24). The younger Cyril and Alexander the Greatford the Euphrates at this point. The Macedonians called it Amphipolis. It took finally a third name, Europus, under which it is mentioned by the geographers Ptolomy, Pliny, Hierocles, Georgius Cyprius, etc. and figures in the "Notitia episcopatum" of the Antiochenos patriarchate (See Echos d'Orient, 1907, 145). We know but one of his bishops, above 200 (?), 949, and a Jacobite one, between 793 and 817 (Rev. de l'Orient Chrétien, 1899, 451). Justinian built a fortress at Europus (Procop., De edif., II, 9). When the city was destroyed is unknown. Its ruins stand at Djahas, a corrupt form of Europos, on the right bank of the Euphrates, about twenty-five kilometres south of Birejik, in the vilayet of Aleppo.

Eusebius, Saint. Bishop of Vercelli, b. in Sardinia c. 283; d. at Vercelli, Piedmont, 1 August, 371. He was made lector in Rome, where he lived some time, probably as a member of a religious community (Spreitzenhofer, Die Entweltigung des alten Monachitums in Italien, Vienna, 1894, 14 sq.). Later he came to Vercelli, the present Vercelli, and in 340 was unanimously elected bishop of that city by the clergy and the people. He received episcopal consecration at the hands of Pope Julius I on 15 December of the same year. According to the testimony of St. Ambrose (Ep. liii, Ad Vercellenses) he was the first bishop of the West who united monastic with clerical life and with the clergy of his city a community modelled upon that of the Eastern cenobites (St. Ambrose, Ep. xxxxi and Serm. lxxxix). For this reason the Canons Regular of St. Augustine honour him along with St. Augustine as their founder (Propram Canon. Reg., 16 December).

In 354 Pope Liberius sent Eusebius and Bishop Lucifer of Cagliari to the Emperor Constantius, who was then at Arles in Gaul, for the purpose of inducing the emperor to convene a council which should put an end to the dissensions between the Arians and the orthodox. The synod was held at Milan in 355. At first Eusebius refused to attend it because he foresaw that the Arian bishops, who were supported by the emperor, would not accept the decrees of the Nicaean Council and would insist on the condemnation of St. Athanasius. Being pressed by the emperor and the bishops to appear at the synod, he came to Milan, but was refused asylum by the emperor. The document condemning St. Athanasius had been drawn up and was awaiting the signature of the bishops. Eusebius vehemently protested against the unjust condemnation of St. Athanasius and, despite the threats of the emperor, refused to attach his signature to the document. As a result he was sent into exile, first to Seytropolis in Syria, where the Arian Bishop Patro-philus, whom Eusebius calls his jailer (Baronius, Annal., ad ann. 356, n. 97), treated him very cruelly, then to Cappadocia, and lastly to the Thebaid. On the accession of the Emperor Julian, the exiled bishops were allowed to return to their sees, in 362. Eusebius, however, and his brother Lucifer, refused to accept the synod which, in 362, was held there under their joint presidency. Besides declaring the Divinity of the Holy Ghost and the orthodox doctrine concerning the Incarnation, the synod agreed to deal mildly with the repentant apostate bishops, but to impose severe penalties upon the leaders of the several Arianizing factions. At its close Eusebius went to Antioch to reconcile the Eustathians and the Melenians. The Eustathians were adherents of the bishop, St. Eustathius, who was deposed and exiled by the Arians in 331. Since Meletius's election in 391 was brought about chiefly by the Arians, the Eustathians would not recognize him, although he claimed that his orthodox faith from the ambo after his episcopal consecration. The Alexandrian synod had desired that Eusebius should reconcile the Eustathians with Bishop Meletius, by purging his election of whatever might have been irregular in it, but Eusebius, upon appearing at Antioch, refused to go to any synod, in which Lucifer had condemned Paulinus, the leader of the Eustathians, as Bishop of Antioch, and thus unwittingly frustrated the design. Unable to reconcile the factions at Antioch, he visited other Churches of the Orient in the interest of the orthodox faith and finally passed through Illyricum into Italy. Here arrived at Vercelli in 365, he assisted the zealous St. Hilary of Poitiers in the suppression of Arianism in the Western Church, and was one of the chief opponents of the Arian Bishop Auxentius of Milan. The Church honors him as a martyr andcelebrates his feast as a semi-double on 16 December. In the "Journal of Theological Studies" (1000), I, 302-99, E. A. Burn attributes to Eusebius the "Quicumque". (See ATHANASIAN CRED.")

Three short letters of Eusebius are printed in Migne, P. L., XII, 947-54, and of which the first, De vir. ill., c. xvi, and Ep. ii, n. 2 (Migne, loc. cit.) is a translation of a commentary on the Psalms, written originally in Greek by Eusebius of Cesarea; but this work has been lost. There is preserved in the cathedral of Vercelli the "Codex Vercellensis"; the earliest manuscript of the Old Latin Gospels (codex a), which is generally believed to have been written by Eusebius. It was published by Iríco (Milan, 1748) and Bianchini (Rome, 1749), and is reprinted in Migne, P. L., XII, 9-98; a new edition was brought out by Belsheim (Christiania, 1894). Kräger (Lucifer, Bischof von Calias), Leipzig, 1886, 113-30, ascribes to Eusebius a baptismal oration published by Cesari (Quellen zur Gesch. des Taufsymbolis, Christiania, 1869, 112-40). The confession of faith of St. Augustine "De s. trinitate confessio" (P. L., XII, 959-968, sometimes ascribed to Eusebius, is spurious.

Michael Ott.

Eusebius, Saint. Bishop of Samosate (now Samosat), in Syria; date of birth unknown; d. in 379 or 380. History makes no mention of him before the year 361.
when, as Bishop of Samosata, he took part in the
congregation of St. Meletius, the newly elected Patriarch
of Antioch. Just then the Eastern Church was rent
by Arianism and its affiliated heresies. Most of the
episcopal sees were occupied by Arian bishops, and
Meletius himself was elected Patriarch of Antioch only
because the Arians believed him to be a supporter
of their heresy. Tillemont and a few other historians
even maintain that Eusebius was at that time leaning
towards Arianism. Whatever may have been the
faith of Eusebius previously, it is certain that at a
synod held in Antioch in 363 the Nicene formula, with
expression of the term of heresies, was accepted
and the document was signed by Eusebius and
twenty-four other bishops.

When the Arians discovered that Meletius upheld
the doctrine of the Nicene Council, they declared his
election invalid and attempted to obtain from Eusebius,
to whom they had been entrusted, the synodal acts
proving the lawfulness of the election. The
Emperor Constantius, who supported the Arians,
ordered Eusebius to surrender the document, but
without success. Thereupon Constantius threatened
Eusebius with the loss of his right hand, but the bishop
eluded both his棒 and to the bearer of the
imperial message, saying: "Strike them both off.
I will not surrender the document by which the injusti
tice of the Arians can be proved." The emperor
was struck by the constancy of Eusebius and left the
document in his possession.

The danger was averted by the concerted efforts of St.
Eusebius and St. Gregory Nazianzen that, in 370, St.
Basil was elected Archbishop of Cessarea in Cappadocia.
From this time forward the tender friendship
between St. Eusebius and the last-named Father, which
had been attended by some still greater spill blood
between Basil and to the Bishop of Samosata. Eusebius
displayed his greatest activity during the persecution
of the Catholics by the Arian Emperor Valens. Disguised
as a military officer, he visited the persecuted Churches
of Syria, Phoenicia, and Palestine, exhaling the
sufferings of the Christians, solemnizing the
sacred acts and solemnizing the,

Eusebius, a presbyter at Rome; date of
birth unknown; d. 357 (?). He was a Roman patri-

Michael Ott.

Eusebius, Saint, Pope, successor of Marcellus, 309
or 310. His reign was short. The Liberian
Catalogue gives its duration as only four months, from
18 April to 17 August, 309 or 310. We learn some details
of his career from an epitaph for his tomb which Pope
Damnus ordered. This epitaph has come down to us
through ancient transcripts. A few fragments of the
original, together with a sixth-century marble copy
made to replace the original, after its destruction,
were found by De Rossi in the Papal Chapel, in the
Catacomb of Callistus. It appears from this
epitaph that the grave internal dissensions caused in the
Roman Church by the persecution of apostates (Arians)
during the persecution of Diocletian, and which had
'already arisen under Marcellus, continued under Eusebius. The latter maintained the attitude of the Roman Church, adopted after the Decian persecution (250–51), that apostates should not be forever barred from ecclesiastical communion, but on the other hand should be readmitted only after doing proper penance (Eusebius miseros ducit sua criminis flere). This view was opposed by a faction of Christians in Rome under the leadership of one Heraclius. Whether the latter and his partisans advocated a more rigorous (Novationist) or a more lenient (Eusebian) interpretation of the law has not been ascertained. The latter, however, is by far more probable, in the hypothesis that Heraclius was the chief of a party made up of apostates and their followers, who demanded immediate restoration to the body of the Church. Damascus characterizes in very strong terms the conflict which ensued (sedition, caedes, bellum, discordia, lites). It is likely that Heraclius and his supporters sought to compel by force their admission to divine worship, which was resisted by the faithful gathered in Rome about Eusebius. In consequence, both Eusebius and Heraclius were exiled by the Emperor Maximianus. In 261, Eusebius, in particular, was deported to Sicily, where he died soon after. The Western Synod of 235 excommunicated the emperor who had exiled him. 

Eusebius, CHRONICLE OF, consists of two parts: the first was probably called by Eusebius the "Chronograph" or "Chronographies"; the second he terms the "Canons" or "Canons of Eusebius," and also the "Eusebian Canons." It is brought down to the year 225, and as Eusebius alludes to it at an earlier date in the "Ecclesiastical History," and "Preparation of Evangelica," there must have been two editions. The original is lost, but both parts are preserved in an Armenian version of which two rival translations by Zohrab and Aueher, respectively, were published in 1818. Both these editions are superseded by Schoene's. The "Canons," moreover, are preserved in St. Jerome's translation. Two Syriac editions also have been published, one from a MS in the British Museum, which was translated by Rodiger for Schoene's edition, another edited by Siegfried and Gelzer (Eusebius Canonum Epitome ex Dionysii Telmaharesiano Chronicis petita, Leipzig, 1844). Considerable extracts from the original were also preserved by later writers, especially by Synecules. These have been possible to identify since the discovery of the Armenian. They will be found in Schoene. 

The "Chronography" is an epitome of universal history. It is divided into five parts: (1) the history of the Chaldeans, and the Assyrians, followed by lists of kings; (2) Jewish history; (3) Egyptian history; (4) Grecian history; (5) Roman history. It is, like the "Preparation of Evangelica," full of quotations from lost authors. As an illustration of its value in one particular province we may turn to the third chapter of Smith's "Chaldean Account of Genesis," entitled "Chaldean Legends transmitted through Berosus and other Authors." The longest and most important extracts here given, containing, e.g. the Babylonian story of the Creation and the Flood, owe their preservation to Eusebius. The "Canons" are a series of annotations, with short historical notices. The years of Abraham, beginning from the supposed date of his birth, form the backbone. Alongside of these are placed the regnal years of the monarchs of different kingdoms as they rose and fell. A single extract will, however, serve better than any description to give the reader an idea of the character and contents of the "Canons." We have shown above the value of the "Chronicle" to an Assyriologist; our second example will illustrate its importance for classical scholars. On almost the first page of Jebb's edition of the newly discovered poems of Bacchylides, the notices in the "Chronicle" concerning the poet are discussed. There are two such notices. We give the first with its context, as it is found in the facsimile of the Bodleian MS. of St. Jerome's version:—

LXXVI From the above we learn that Bacchylides became renowned in the 16th year of Xerxes, King of Persia, the 36th of an Alexander, King of Macedon, and the 154th year of Abraham. In this MS, the years of Abraham are given at the commencement of every decade. Thus, in the last line, the first year (MDL) marks the opening of a new decade; while the second year (XVIII) shows the continuation of the era of Xerxes.

Which of the two versions of the "Chronicle" is the more trustworthy as regards dates and figures is a question that was conclusively answered in favour of the Latin version by Lightfoot in his excursion, "The Early Roman Succession." The striking differences between the episcopal lists (notably the Roman) as they are found in the Armenian version, on the one hand, and in the Latin version and "The Church History," on the other hand, give rise to a number of ingenious theories concerning changes made by Eusebius in a later edition of his "Chronicle." Lightfoot annullé these theories by demonstrating the corrupt state of the Armenian version in all that relates to figures and the years to which different events are assigned. It is important to remember this in reading books or articles in which reference is made to the "Chronicle," if they were written before 1890. 

Best Editions.—(1) "Eusebii Chronicorum Libri duo," ed. Schoene, 2 vols., Berlin, 1868–75; (2) the Bodleian manuscript of Jerome's version of the "Chronicle of Eusebius," reproduced in collotype with an introduction by John Knight Fotheringham, M.A., Oxford, 1905; (3) the Syrian epistles referred to above.

EUSEBIUS

617

EUSEBIUS

Eusebius of Cesarea (EUSEBIUS PAMPHELII), Bishop of Cesarea in Palestine, the "Father of Church History", b. about 260; d. before 341.

Life.—It will save lengthy digression if we at once speak of a document of a truly slavish kind, which we often have to refer to on account of its biographical importance, viz., the letter written by Eusebius to his diocese in order to explain his subscription to the Creed pronounced by the Council of Nicaea. After some preliminary remarks, the writer proceeds with an account concerning the faith which was put forward by us, and then the second, which they have published after putting in additions to our expressions. Now the writing presented to us, which when read in the presence of our most religious emperor was declared to have a right and approved character was as follows: [The Faith put forward by us]. As we have received from the bishops before us both in our first catechetical instruction and when we were baptized, and as we have learned from the Divine Scriptures, and as we have believed and taught in the presbytery and in the office of bishops, we likewise believing offer to you our faith and it is thus.” Then follows a formal creed [Theodoret, Hist., I, 11; Socrates, Hist., I, 8; St. Athanasius, de Dec. Syn. Nic. (appendix) and elsewhere. Translated by Newman with notes in the Oxford Library of the Fathers (Select Treatises of St. Athanasius, p. 59) and St. Athanasius, vol. I. The translation given here is Dr. Hort's. The words in brackets are probably genuine though not given by Socrates and St. Athanasius].

Dr. Hort in 1876 (“Two Dissertations”, etc., pp. 56 sqq.) pointed out that this creed was presumably that of the Church of Cesarea of which Eusebius was bishop. This view is widely accepted (cf. Lightfoot, art. “Euseb.” in “Dict. of Christ. Biog.”). All references to Lightfoot, unless otherwise stated, are to this article.—Sunday, “Journal of Theolog. Studies”, S. 15; Gwatkin, “Studies of Arianism” (3rd 1899, 2nd edition; McNeill, “Prolog. to C. H. of Euseb.”, in “Select Library of Nic. and post-Nic. Fathers”; Duchesne, “Hist. de l’Eglise”, vol. II, p. 149). According to this view it is natural to regard the introduction, “As we have received” etc., as autobiographical, and to infer that Eusebius had exercised the office of the priesthood in the city of Cesarea before he became his bishop, and had received his earliest religious instruction and the sacrament of Baptism there also. But other interpretations of this document are given, one of which destroys, while the other diminishes, its biographical value: (a) According to some

garius who erroneously maintained that in the Holy Eucharist the bread and the wine are merely a figure or a symbol of the Body and Blood of Christ. That he was a partisan of Berengarius, at least for a time, cannot be denied. In a letter written shortly after the death of Berengarius (1050), in which Berengarius was condemned, he protested against the injustice done to his teacher and the archdeacon of his church. When King Henry I of France (1030-60) summoned the bishops of his realm to a synod held in Paris in 1051, both Eusebius and Berengarius absented themselves, through fear of condemnation. Two contemporary writers—writers, Eusebius, Albert of Liege (P. L., CXLVI, 1438), and Durandus, Abbot of Troarn (P. L., CXLIX, 1422)—class Eusebius Bruno among the followers of Berengarius; the latter always claimed him as a partisan. It is not certain that he really appropriated in its entirety the teaching of his master, though Dodwell and Durandus affirm it. On the other hand, at the Council of Tours (1054), presided over by the papal legate Hildebrand, Eusebius Bruno induced his friend Berengarius to declare, in writing and on oath, that after the consecration the bread and the wine are the Body and Blood of Christ. Martin of Angers (1092) at which Count of Anjou, Geoffrey the Bearded, asked for an account of the teaching of Berengarius, Eusebius’ defence of his master was somewhat weak. When, shortly afterwards, Berengarius complained to him of the opposition of a certain Geoffrey Martini to his teaching, Eusebius declared that in which he lived. Galland (Vet. Patr. Biblioth., VIII, 23) says, “De Eusebio qui vulgo dictur episcopus Alexandriacum inerat omnino” (Concerning Eusebius, commonly called Bishop of Alexandria, there is nothing sure).

His writings have been attributed to Eusebius of Emesa, Eusebius of Cesarea, and others. According to an old biography said to have been written by his notary, the monk John, and discovered by Cardinal Mai, he lived in the fifth century and led a monastic life near Alexandria. The fame of his virtues attracted the attention of Cyril, Bishop of Alexandria, who visited him with his clergy, and in 444, when dying, had him elected his successor and consecrated him bishop, though much against his will. Eusebius displayed great zeal in the exercise of his office and did much good by his preaching. Among those whom he converted was a certain Alexander, a man of senatorial rank. After having ruled his see for seven or, according to another account, for twenty years, he made Alexander his successor and retired to the desert, whence Cyril had summoned him, and there died in the office of sanctity.

Mai seems to have established the existence of a Eusebius of Alexandria who lived in the fifth century, it has been objected that neither the name of Eusebius, nor that of his successor Alexander, appears in the list of the occupant of that ancient see. Dioscurus is mentioned as the immediate successor of Cyril. Nor does the style of the homilies seem on the whole in keeping with the age of Cyril. It may be noted, however, that the biographer of Eusebius expressly states that the Cyril in question is the great opponent of Nestorius. Various solutions of the difficulty have been proposed. Thilo (Ueber die Schriften des Eusebius v. Alexandrien u. des Eusebius von Eusebia, Halle, 1839) thinks that the first of the homilies is to be assigned either to a certain monk—one of four brothers—of the fifth century, or to a presbyter and court chaplain of Justinian 1, who took an active part in the theological strife of the sixth century. Mai suggests that after the death of Cyril there were two bishops at Alexandria. Dioscorus died in the Constantinian party. The homilies cover a variety of subjects, and the author is one of the earliest patristic witnesses to the doctrine regarding the descent of Christ into Hell. A list of homilies with the complete text is given by Mai (Sylllogism Romanum, IX). They may also be found in Migne, P. L., CXXXVI, part I (Paris, 1860); Syriac in Kirchenzetns., s. v.

H. M. Brock.

Francis J. Schaefner.

Eusebius of Alexandria, ecclesiastical writer and author of a number of homilies well known in the sixth and seventh centuries and of much ascetical and dogmatic value. There has been much dispute regarding the date of his life and the age in which he lived. Galland (Vet. Patr. Biblioth., XIII, 78, 80; Deutsch in Realencycl. f. prot. Theol., s. v.; Chevalier, Rép. des sources hist., Bio-bibl., s. v.)
the creed proffered by Eusebius was drawn up as a formula to be subscribed by all the bishops. It was they who were to say that it embodied what they had been taught as catechumens and had taught as priests and bishops. This seems to have been the view generally held by the fathers of the Church, as Kattenbusch has shown in 1894 (Das apostolische Symbol, vol. I, p. 231). One objection to this view may be noted. It makes all the bishops equivalently say that before they received the episcopate they had for some time exercised the duties of the priesthood. (b) Others maintain that this creed was not the official creed of Cæsarea, but one drawn up by Eusebius in his own justification as embodying what he had always believed and taught. According to this interpretation the preliminary statement still remains autobiographical; but it merely informs us that the writer exercised the office of priest before he became a bishop. This interpretation has been adopted by Kattenbusch in his second volume (p. 239) published in 1900. One of the reasons which he gives for his change of view is that when he was preparing his first volume he used Socrates, who does not give the superscription which we have printed in brackets. It is a writer of the school of Kattenbusch not to accept what seems the natural interpretation of Eusebius’s words, viz., that the creed he read before the council was actually the one he had always used. If this is admitted, “then”, to quote Dr. Sanday, “I cannot but think the probability of Kattenbusch’s view that the Eastern creeds were daughters of the early Roman creed, and this latter did not reach the East till about A.D. 272” breaks down altogether. Bishop Lightfoot, puts the birth of Eusebius about 260 A.D., so that he would be something like twelve years old when Aurelian invaded and burned Antioch. In other words he was in all probability already baptized, and had already been catechized in the Cæsarean creed at a time when, in the Kattenbusch-Harnack hypothesis, the parent of that creed had not yet reached Antioch—much less Cæsarea or Jerusalem (Journ. Th. Studies, i, 15).

The passage just quoted shows that the date of Eusebius’s birth is more than a merely curious question. According to Lightfoot, it cannot have been “much later than A.D. 260” (p. 309); according to Harnack, “it can hardly be earlier than 240-250.” (Harnack, i, p. 106). The data from which they argue are the persons and events which Eusebius describes as belonging to “our own times.” Thus, at the end of his account of the epistles of Dionysius of Alexandria, he says he is now going to relate the events of “our own times” (see 6:9). He then recounts how, at Rome, Pope Dionysius (230-236) succeeded Xystus, and about the same time Paul of Samosata became Bishop of Antioch. Elsewhere (H. E., V, 28) he speaks of the same Paul as reviving in “our own time” (see ékóthei) the heresy of Artemon. He also speaks of the Alexandrian Dionysius (d. 246) in the same way (H. E., III, 28). He calls Manes, whom he places (H. E., VII, 31) during the episcopate of Felix (270-274), “the maniac of yesterday and our own times” (Theophania, IV, 30). An historian might of course refer to events recent, but before his own birth, as belonging to “our own times,” e.g. a man of thirty might speak thus of the Franco-German war in 1870. But the reference to Manes as “the maniac of yesterday” certainly suggests a writer who is alluding to what happened within his own personal recollection.

Concerning Eusebius’s parentage we know absolutely nothing. But the fact that he escaped with a short term of imprisonment during the terrible Diocletian persecution, when his master Pamphilus and others of his companions suffered martyrdom, suggests that he belonged to a family of some influence and importance. His relations, later on, with the Emperor Constantine point to the same conclusion. At some time during the last twenty years of the third century he visited Antioch, where he made the acquaintance of the priest Dorotheus, and heard him expound the Scriptures (H. E., VII, 32). By a slip of the pen or the manuscript Kattenbusch (p. 300) makes Dorotheus a priest of the Church of Philippopolis. In 296 he saw for the first time the future Emperor Constantine, as he passed through Palestine in the company of Diocletian (Vit. Const., 1, 19).

At a date which cannot be fixed Eusebius made the acquaintance of Pamphilus, the founder of the magnificent library which remained for several centuries the great glory of the Church of Cæsarea. Pamphilus came from Phœnicia, but at the time we are considering resided at Cæsarea, where he presided over a college or school for students. A man of noble birth, and wealthy, he sold his patrimony and gave the proceeds to the poor. He was a great friend to indigent students, supplying them to the best of his ability with the necessaries of life, and bestowing on them copies of the Holy Scriptures. Too humble to write anything himself, he spent his time in preparing accurate copies of the Scriptures and other books. It was he who first began the collection of the apocryphal books. Elloquent testimonies to the care bestowed by Pamphilus and Eusebius on the sacred text are found in Biblical MSS. which have reproduced their colophons. We give three specimens. (1) The following is prefixed to Ezechiel in the codex Marchalianus of Eusebius. A facsimile of the original will be found in Mai’s “Bibl. nov. Pat.”, IV, p. 218, and in Migne. It is printed in ordinary type in Swete’s O. T. in Greek (vol. III, p. viii). It must be remembered that Origen’s own copy of the Hexapla was in the library of Pamphilus. It had probably been deposited there by Origen himself.

“The following was transcribed from a copy of the Father Apollinaris the Cœnoiarch, to which these words are subjoined: ‘It was transcribed from the editions of the Hexapla and was corrected from the Tetrapla of Origen himself which also had been corrected and furnished with scholia in his own handwriting, whence I, Eusebius, added the scholia, Pamphilus and Eusebius corrected.’”

(2) At the end of the Book of Eneas, in the commentary in the codex Sinaiticus, there is the following note:

“it was compared with a very ancient copy that had been corrected by the hand of the blessed martyr Pamphilus to which is appended in his own hand this subscription: ‘It was transcribed and corrected according to the Hexapla of Origen. Antoninus compared, I, Pamphilus, corrected.’” (Swete, vol. I, p. 212. H. E., VII, 26).

(3) The same codex and also the Vatican and Alexandrine quote a colophon like the above, with the difference that Antoninus has become a confessor, and Pamphilus is in prison—‘Antoninus the confessor compared, Pamphilus corrected’. The volume to which this colophon was subjoined began with I Kings and ended with Esther. Pamphilus was certainly not idle in prison. To most of the books in the Syro-Hexapla is subjoined a note to the effect that they were translated from the Hexapla in the library of Cæsarea and compared with a copy subscribed. “I, Eusebius, corrected these, as far as I could” (Harnack, “Altechrist. Lit.”, pp. 544, 545).

May not the confessor Antoninus be the same person as the priest of that name who, later on, with two companions interrupted the governor when he was on the point of sacrificing, and was beheaded? (Mart. Pol., 52.) One member of Pamphilus’s household, Appius, had done the same a few years before, and another, Ædesius, after being tortured and sent to the mines, on obtaining his release provoked martyrdom at Alexandria by going before the governor and rebuking him. Towards the end of 307 Pamphilus was arrested, horribly tortured, and consigned to prison.
Besides continuing his work of editing the Septuagint, he wrote, in collaboration with Eusebius, a Defence of Origen which was sent to the confessors in the mines—a wonderful gift from a man whose sides had been carried with iron combs, to men with their right eyes buried and the sinews of their left leges broken. Early in 300 Pamphilus and several of his disciples were beheaded. Out of devotion to his memory Eusebius called himself Eusebius Pamphilii, meaning, probably, that he wished to be regarded as the bondsman of him whose name "it is not meet that I should mention, without styling him my lord." (Mart. Paul. et Cureton, p. 37.) Mr. Gifford, in the introduction to his translation of the Prepar. Evang., thus suggested another explanation on the authority of an ancient scholiion emanating from Caesarea which calls Eusebius the "son of Pamphilus." He argues further that Pamphilus, in order to make Eusebius his heir, took the necessary step of adopting him.

During the persecution Eusebius visited Tyre and Egypt and witnessed numbers of martyrdoms (H. E., VIII, vii and ix). He certainly did not shun danger, and was at one time a prisoner. When, where, or how he escaped death or any kind of mutilation, we do not know. An indignant bishop, who had been one of his fellow-prisoners and "lost an eye for the Truth," demanded at the Council of Tyre how he "came off scathless." To this taunt—it was hardly a question—made under circumstances of great provocation, Eusebius deigned no reply (Epiphan., Haer., lviii, 5, c. aliis, "Apol. c. Aris.," viii, 15, 1). But he wrote (p. 135) he was already a bishop, for he was present in that capacity at the dedication of a new basilica at Tyre, on which occasion he delivered a discourse given in full in the last book of the Church history.

Alexander, Bishop of Alexandria, excommunicated Arius about the year 320. The Arians soon found that for all practical purposes Eusebius was on their side. He wrote to Alexander charging him with misrepresenting the teaching of the Arians and so giving them cause to attack and misrepresent whatever they please (see below). A portion of this letter has been preserved in the Acts of the Second Council of Nicaea, where it was cited to prove that Eusebius was a heretic. He also took part in a synod of Syrian bishops who decided that Arius should be restored to his former position, but on his side he was to obey his bishop and continually entertain peace and communion with him (Soz., H. E., I, 15). According to Duchesne (Hist. de l'Eglise, II, 132), Arius, like Origen before him, found an asylum at Caesarea. At the opening of the Council of Nicaea Eusebius occupied the first seat on the right of the emperor, and delivered the inaugural address which was "echoed in a strain of thanksgiving to Almighty God on his, the emperor's, behalf" (Vit. Const., III, 11; Soz., H. E., I, 19). He evidently enjoyed great prestige and may not unreasonably have expected to be able to steer the council through the via media between the Scylla and Charybdis of the party. But it is clear that the councilmen had no common aim to build up a martyrs. But it is clear that the councilmen had no common aim, and that the Arians, who were the stronger, made use of the opportunity to make a full confession. Arianism spread like wildfire. It was in view of the actual state of the controversy, a colourless, or what is called "grey," creed of the day, that Eusebius at once undertook a comprehensive survey. After some delay Eusebius subscribed to the uncompromising creed drawn up by the council, making no secret, in the letter which he wrote to his own Church, of the non-natural sense in which he accepted it. Between 323 and 330 a heated controversy took place between Eusebius and Eustathius, Bishop of Antioch. Eustathius accused Eusebius of tampering with the faith of Nicaea; the latter retorted with the charge of Sabellianism. In 331 Eusebius was among the bishops who, at a synod held in Antioch, deposed Eustathius. He was offered and refused the vacant see. In 334 and 335 he took part in the campaign against St. Athanasius at the synods held in Caesarea and Tyre respectively. From Tyre the assembly of bishops was summoned to Jerusalem by Constantine, to assist at the dedication of the basilica he had erected on the site of Calvary. After the dedication they restored Athanasius and his followers to communion. From Jerusalem they were summoned to Constantinople (336), where Marcellus was condemned. The following year Constantine died. Eusebius survived him long enough to write his Life and two treatises against Marcellus. But by the summer of 341 he was already dead, since it was his successor, Aenarius, who assisted Bishop of Caesarea at a synod held at Antioch in the summer of that year.

WRITING.—We shall take Eusebius's writings in the order given in Harnack's "Altchrist. Lit.," pp. 554 sqq.

A. Historical.—(1) The life of Pampilus, often referred to by Eusebius. He was a rich man who had been a soldier and is called in his letter one of many enemies, yet the charge of cowardice was never seriously made—the best proof that it could not have been sustained. We may assume that, as soon as the persecution began to relax, Eusebius succeeded Pampilus in the charge of the college and literary work. From the information given in the Acts of the second Council of Nicaea, where it was cited to prove that Eusebius was a heretic, he also took part in a synod of Syrian bishops who decided that Arius should be restored to his former position, but on his side he was to obey his bishop and continually entertain peace and communion with him (Soz., H. E., I, 15). According to Duchesne (Hist. de l'Eglise, II, 132), Arius, like Origen before him, found an asylum at Caesarea. At the opening of the Council of Nicaea Eusebius occupied the first seat on the right of the emperor, and delivered the inaugural address which was "echoed in a strain of thanksgiving to Almighty God on his, the emperor's, behalf" (Vit. Const., III, 11; Soz., H. E., I, 19). He evidently enjoyed great prestige and may not unreasonably have expected to be able to steer the council through the via media between the Scylla and Charybdis of the party. But it is clear that the councilmen had no common aim to build up a martyrs. But it is clear that the councilmen had no common aim, and that the Arians, who were the stronger, made use of the opportunity to make a full confession. Arianism spread like wildfire. It was in view of the actual state of the controversy, a colourless, or what is called "grey," creed of the day, that Eusebius at once undertook a comprehensive survey. After some delay Eusebius subscribed to the uncompromising creed drawn up by the council, making no secret, in the letter which he wrote to his own Church, of the non-natural sense in which he accepted it. Between 323 and 330 a heated controversy took place between Eusebius and Eustathius, Bishop of Antioch. Eustathius accused Eusebius of tampering with the faith of Nicaea; the latter retorted with the charge of Sabellianism. In 331 Eusebius was among the bishops who, at a synod held in Antioch, deposed Eustathius. He was offered and refused the vacant see. In 334 and 335 he took part in the campaign against St. Athanasius at the synods held in Caesarea and Tyre respectively. From Tyre the assembly of bishops was summoned to Jerusalem by Constantine, to assist at the dedication of the basilica he had erected on the site of Calvary. After the dedication they restored Athanasius and his followers to communion. From Jerusalem they were summoned to Constantinople (336), where Marcellus was condemned. The following year Constantine died. Eusebius survived him long enough to write his Life and two treatises against Marcellus, but by the summer of 341 he was already dead, since it was his successor, Aenarius, who assisted Bishop of Caesarea at a synod held at Antioch in the summer of that year. Still, however, the abridgment found its way into the Church History. The shorter form lacks some introductory remarks, referred to in c. xii., which defined the scope of the book. It also breaks off when the writer is about to "record the palinode" of the persecutors. It is probable that part of the missing conclusion is extant in the form of an appendix to the eighth book of the Church History found in several MSS. This appendix contrasts the miserable fate of the persecutors with the good fortune of Constantine and his father. From these data Lightfoot concludes that what we now possess formed "part of a larger work in which the sufferings of the Martyrs were set off against the deaths of the persecutors." It must, however, be remembered that the missing parts would not add much to the book. So far as the martyrs are concerned, it is evident that the book would not take long in the telling. Still, the missing conclusion may explain why Eusebius curtailed his account of the Martyrs. The book, in both forms, was intended for popular reading. It was therefore desirable to keep down the price of copies. If the compiler of the shorter form (Texte u. Untersuch., XIV, 4, 1896) followed up this idea and pointed out that, whereas the longer form was constantly used by the compilers of Martyrologies, Menologies, and the like, the shorter form was never used. In a review of Violet (Theol. Litz, 1897, p. 300), Freuensch returns to his original
idea, and further suggests that the shorter form must have been joined to the Church History by some copyist who had access to Eusebius's MSS. Harnack (Chronicle, 11, 115) holds to the priority of the longer form, but he thinks that the shorter form was compiled about the same time for readers of the Church History.—(4) The Chronicle (see separate article, Eusebius, Chronicle of).—(5) The Church History. It would be difficult to overestimate the obligation which posterity is under to Eusebius for this monumental work. Living during the period of transition, when the old order was changing and all change was so forward at the critical moment with his immense stores of learning and preserved priceless treasures of Christian antiquity. This is the great merit of the Church History. It is not a literary work which can be read with any pleasure for the sake of its style. Eusebius’s “dictation,” as Photius said, “is never pleasant nor clear.” Neither is it the work of a great thinker. But it is a storehouse of information collected by an indefatigable student. Still, great as was Eusebius's learning, it had its limitations. He is provokingly ill-informed about the West. That he knew very little about Tertullian or St. Cyril of Alexandria, no instance of a sufficient knowledge of Latin; but in the case of a Greek writer, like Hippolytus, we can only suppose that his works somehow failed to make their way to the libraries of the East. Eusebius’s good faith and sincerity has been amply vindicated by Lightfoot. Gibbon, who indirectly confessed that he has related whatever might redound to the glory, and that he has suppressed all that could tend to the disgrace of religion, can be sufficiently met by referring to the passages (H.E. VIII, 11; Mark. Pal. c. 12) on which it is based, “but indirectly confess,” but openly avows, that he passes over certain scandals, and he enumerates them and denounces them. “Nor again,” to quote Lightfoot, “can the special charges against his honour as a narrator be sustained. There is no ground whatever for the charge that Eusebius forgot to interpolate the passage from Josephus relating to our Lord quoted in H.E. I, 11, though Heinichen is disposed to entertain the charge. Inasmuch as this passage is contained in all our MSS, and there is sufficient evidence that other interpolations (though not this) were introduced into the text of Josephus long before the time (see Orig., Cæli, I. 47, Delarue’s note) no suspicion can justly attach to Eusebius himself. Another interpolation in the Jewish historian, which he quotes elsewhere (11, 23), was certainly known to Origen (l.e.). Doubtless also the omission of the owl in the account of Herod Agrippa’s death (H.E. II, 10) was already in some texts of Josephus (Ant., X, 9, 2). The manner in which Eusebius deals with his numerous quotations elsewhere, where we can test his honesty, is a sufficient vindication against this unjust charge (L., p. 325).

The notices in the Church History bearing on the New Testament Canon are so extended that a word must be said about the rule followed by Eusebius in what he recorded and what he left unrecorded. Speaking generally, his principle seems to have been to quote testimonies for and against those books only whose claims to a place in the Canon had been disputed. In the case of undisputed books he gave any interesting information concerning their composition which he had come across in his reading. The subject was most carefully investigated by Lightfoot in an article in “The Contemporary” (January, 1876, reprinted in Essays on Supernatural Religion), entitled “The Gospels of St. John, Lightfoot concludes: “The silence of Eusebius respecting early witnesses to the Fourth Gospel is an evidence in its favour.” For the episcopal lists in the Church History, see article on the Chronicle. The tenth book of the Church History records the defeat of Licinius in 323, and must have been completed before the death and disgrace of Crispus in 326, for it refers to him as Constantine’s “most pious son.” The ninth book was compiled between the defeat of Maxentius in 312, and Constantine’s first victory over Maxentius in 312. (6) The Life of Constantine, in four books. This work has been most unjustly blamed, from the time of Sozomen down to the present day, because it is a panegyric rather than a history. If ever there was a man under an obligation to respect the maxim, De mortuis nil nisi laudum, this man was Eusebius, writing the Life of Constantine within twenty years after his death (11). This Life is especially valuable because of the account it gives of the Council of Nicaea and the earlier phases of the Arian controversy. It is well to remember that one of our chief sources of information for the history of that council is a book written to magnify Constantine.

B. Apologetic.—(7) Against Hierocles. Hierocles, who, as governor in Bithynia and in Egypt, was a cruel enemy of the Christians during the persecution, before the persecution had attacked them with the pen. There was nothing original about his work except the use he made of Philostatius’s Life of Apollonius of Tyana, to institute a comparison between Lord and Apollonius in favour of the latter. In his reply Eusebius confined himself to this one point.—(8) “Against Porphyry”, a work in twenty-five books of which not a fragment survives.—(9) The “Preparatio Evangelica”, in fifteen books.—(10) The “Demonstratio Evangelica”, in twenty, of which the last ten, with the exception of a fragment of the fifteenth, are lost. The object of these two treatises, which should be regarded as two parts of one comprehensive work, was to justify the Christian in rejecting the religious system of the Greeks in favour of that of the Hebrews, and then to justify him in not observing the Jewish manner of life. The “Preparatio” is devoted to the first of these objects. The following summary of its contents is taken from Mr. Gifford’s introduction to his translation of the “Preparatio”: "The first three books discuss the religious system of Pagan Theology, Mythical, Allegorical, and Political. The next three, IV–VI, give an account of the chief oracles, of the worship of daemons, and of the various opinions of Greek Philosophers on the doctrines of Fate and Free Will. Books VII–IX give reasons for preferring the religion of the Hebrews to that of the Greeks, chiefly on the testimony of various authors to the excellency of their Scriptures and the truth of their history. In Books X–XII Eusebius argues that the Hebrews had borrowed from the older theology and philosophy of the Greeks, dwelling especially on the supposed dependence of Plato upon Moses. In the last three books the comparison of Moses with Plato is continued, and the mutual contradictions of other Greek Philosophers, especially the Peripatetics and Stoics, are exposed and criticized.”

The “Preparatio” is a gigantic feat of erudition, and, according to Harnack (Chronicle, 11, 120), was, like many of Eusebius’s other works, actually composed during the stress of the persecution. It ranks, with the Chronicle, second only to the Church History in importance, because of its copious extracts from ancient authors whose works have perished. The first book of the Demonstratio chiefly deals with the temporary character of the Mosaic Law. In the second the prophecies concerning the vocation of the Gentiles and the rejection of the Jews are discussed. In the remaining eight the testimonies of the prophets concerning Christ are treated of. We now pass to a consideration of one of the things that is known save that they were read by Photius, viz. (11). The “Preparatio Eusebiana,” (12) the “Demonstratio Ecclesiastica,” and (13) Two Books of Objection and Defence, of which, from Photius’s account, there seem to have been two separate editions. (14)
The "Theophania" or "Divine Manifestation". Except for a few fragments of the original, this work is only extant in a Syriac version discovered by Tattam, edited by Lee in 1842, and translated by the same in 1843. It treats of the cosmic function of the Word, the nature of the Incarnation, revelation, etc. In form and style, the first five books are particularly remarkable as a kind of anticipation of modern books on Christian evidences. A curious literary problem arises out of the relations between the "Theophania" and the work "De Laudibus Constantini". There are entire passages which are almost verbatim the same in both works. Lightfoot decides in favour of the priority of the first-named work. Gressel, who has edited the "Theophania" for the Berlin edition of the Greek Fathers, takes the opposite view. He compares the parallel passages and argues that they are improved in the "De Laudibus Constantini". (15) "On the Numerous Progeny of the Ancients". This work is referred to by Eusebius twice, in the "Prep. Ev.", VII, 8, and in the "Dem. Ev.", VII, 8; and also (Lightfoot and Harnack think) by st. Basil ("De Spr. Sacret.", xxxi), where he says, "I draw attention to his [Eusebius'] words in discussing the difficulties simply connected with anachronism. I read from st. Basil's words, Lightfoot thinks that in this treatise Eusebius dealt with the difficulties presented by the Patriarchs possessing more than one wife. But he overlooked the reference in the "Dem. Ev.", from which it would appear that the difficulty discussed was perhaps, a marred tradition contrasted by the desire of the Patriarchs for a numerous offspring and the honour in which circumcision was held by Christians."

C. Exegetical. (16) Eusebius narrates, in his Life of his times, (IV, 36, 37), how he prepared fifty (or sixty) copies of the Bible for use in the Churches of Constantinople. Some scholars have supposed that the Codex Siniaticus was one of these copies. Lightfoot rejects this view chiefly on the ground that "the Text of the codex in many respects differs widely from the readings found in Eusebius". (17) Sections and Canons. Eusebius drew up ten canons, the first containing a list of passages common to all four Evangelists; the second, those common to the first three and so on. He also divided the Gospels into sections numbered continuously with a number, against the one section referred to the particular canon where he could find the parallel sections or passages. (18) The labours of Pampylus and Eusebius in editing the Septuagint have already been spoken of. They "believed (as did St. Jerome nearly a century afterwards) that Origen had succeeded in restoring the old Greek version to its primitive purity." The result was a "miscellaneous mixture of the Alexandrian version with the versions of Aquila and Theodotion." (Swete, "Intro. to O.T. in Greek", pp. 77, 78). For the labours of the two friends on the text of the N. T., the reader may be referred to "Tertullian's Study zum N. T.", c. ii. Whether as in the case of the Old Testament, they worked on any definite critical principles is not known. (19) (a) Interpretation of the ethnological terms in the Hebrew Scriptures; (b) Chronology of Ancient Jerusalem; (c) the Inheritance of the Ten Tribes; (d) A plan of Jerusalem and the Temple; (e) On the Names of Places in the Holy Scriptures. These four works were written at the request of Eusebius's friend Paulinus. Only the fourth is extant. It is known as the "Topics," or the "Onomasticon." (20) On the manuscripts of the Book of the Prophets. This work gives a short biography of each Prophet and an account of his prophecies. (21) Commentary on the Psalms. There are many gaps in the MSS. of this work, and they end in the 115th Psalm. The missing portions are in part supplied by extracts from the Catena. An allusion to the discovery of the Holy Sepulchre fixes the date at about 330. Lightfoot speaks very highly of this commentary. (22) Commentary on Isaiah, written after the persecution. (23 to 28) Commentaries on other books of Holy Scripture, of some of which what may be extracts are preserved. (29) Commentary on St. Luke, which what seem to be extracts are preserved. (30) Commentary on I Cor., the existence of which seems to be implied by St. Jerome (Ep. xlix). (31) Commentary on Hebrews. A passage that seems to belong to such a commentary was discovered and published by Mai. (32) On the Discrepancies of the Gospels, in two parts. It is strongly probable that the first part of this work, of which this part of the Eusebius, of this work was discovered and published by Mai in 1825. Extracts from the original are preserved. Of the two parts, the first, dedicated to a certain Stephen, discusses questions respecting the genealogies of Christ; the second, dedicated to one Marinus, questions concerning the Resurrection. The Discrepancies were largely borrowed from by St. Jerome and St. Ambrose, and have thus indirectly exercised a considerable influence on Biblical studies. (33) General Elementary Introduction, consisting of ten books, of which VI–IX are extant under the title of "Prophetical Excerpts". There are also a few fragments of the remaining books. "This work seems to have been a general introduction to theology, and its contents were very miscellaneous as the extent remains show" (L., pp. 330). D. Dogmatic. (34) The Apology for Origen. This work has already been mentioned in connection with Pampylus. It consisted of six books, the last of which was added by Eusebius. Only the first book is extant, in a translation by Rufinus. (35) Against Marcellus, Bishop of Ancyra, and (36) On the Theology of the Church of Constantine. In two articles in the "Zeitschrift für die neutest. Wissenschaft" (vol. IV, pp. 330 sqq. and vol. VI, pp. 250 sqq.), written in English, Prof. Conybeare has maintained that our Eusebius could not have been the author of the two treatises against Marcellus. His arguments are rejected by Prof. Köstermann, in his introduction to these two works published in 1905 for the Berlin edition of the Greek Fathers. The "Contra Marcellum" was written after 336 to justify the action of the synod held at Constantinople when Marcellus was deposed; the "Theology" a year or two later. "On the Paschal Festival" (a mystical interpretation) was addressed to Constantine (Vit. Const., IV, 35, 36). A long fragment of it was discovered by Mai. (38) A treatise against the Manichæans is perhaps implied by Epiphanius (Haer., lxvi, 2). E. Orationes. (39) At a Sermon on the Church in Tyre (see above). (40) At the Triennalia of Constantine. This seems to have been the opening address delivered at the Council of Nicaea. It is not extant. (41) On the Sepulchre of the Saviour, A.D. 325 (Vit. Const., IV, 35) not extant. (42) At the Triennalia of Constantine. This work is generally known as the "De Laudibus Constantini". The second part (11–18) seems to have been a separate oration joined on to the Triennalia. (43) In Praise of the Martyrs. This oration is preserved in the same MS. as the "Theophania" and "Martyrs of Palestine". The Oration was published and translated in the "Journal of Sacred Literature" by Mr. H. B. Cowper (New Series, V, pp. 403 sqq., and ibid. VI, pp. 129 sqq.). (44) On the Failure of Rain, not extant.

F. Letters. — The history of the preservation of the three letters, (45) to Alexander of Alexandria, (46) to the Bishops of Euphrasia, or Euphrasion, (47) to the Empress Constantia, is sufficiently curious. Constantia asked Eusebius to send her a certain likeness of Christ of which she had heard; his refusal was couched in terms which centuries afterwards were appealed to by the Iconoclasts. A portion of this letter was read at the Second Council of Nicaea, and against it were set
portions from the letters to Alexander and Euphrasian to prove that Eusebius "was delivered up to a repugnable sense, and of one mind and opinion with those who followed the Arian superstition" (Labbe, "Conc. VIII, 1168-1177; Manly, "Conc. XIII, 313-317). Eusebius还挺在 the passage quoted in the introduction, other parts of the letter to Constantine are extant.—(IN) To the Church of Cesararea after the Council of Nicea. This letter has already been described.

F. J. Baccius.

**Eusebius of Doryleum**, Bishop of Doryleum in Asia Minor, was the prime mover on behalf of Catholic orthodoxy against the heresies of Nestorius and Eutyches. During the earlier part of his life he followed the profession of an advocate at Constantinople, and was already known as a layman of considerable learning when he protested publicly (125) against the erroneous doctrine of a discourse delivered by Anastasius, the syneculus, or chaplain, of Nestorius. Shortly afterwards he again bore public witness against the Nestorian heresy as to the nature of Christ, this time during a discourse by Nestorius himself, which he interrupted with the question that "for I have a second generation"—i.e., of a woman, according to the flesh. Much disorder followed, but Nestorius replied with arguments against the "second generation". After the Council of Ephesus (431), at which the teaching of Nestorius had been condemned, a document composed by general consent to Eusebius was made public, in which the doctrine of Nestorius was shown to be identical with that of Paul of Samosata. Eusebius had at some period contracted a friendship with Eutyches, founded, we may fairly conjecture, on their common opposition to Nestorian error. But when Eutyches, acknowledging the Council, and maintaining the opinion which, though directly opposed to those of Nestorius, were equally contrary to the faith of the Church, Eusebius, now Bishop of Doryleum, was no less zealous against his former friend than he had been against their common opponent. After repeated attempts at persuasion, Eusebius brought a formal charge of false teaching against Eutyches, before Flavian, who was then (418) presiding over a synod at Constantinople. Flavian was reluctant to proceed against Eutyches, and urged Eusebius to remonstrate with him privately once more. Eusebius, however, refused, saying that he had already done all he could of his errors, and that further efforts would be useless. Eutyches was then summoned to attend, but did not do so until the summons had been three times issued; he excused his refusal to obey by asserting that he had resolved never to leave his monastery and pleading distrust of Eusebius, whom he now looked upon as his enemy. At last, however, he came, attended by a large escort of soldiers and monks. He was interrogated by Eusebius, who in the meantime had been strongly pressing his case, and who now, as he said, felt some alarm. Eutyches should succeed in evading condemnation and retaliate upon his accuser by obtaining a decree of banishment against him. Eutyches, however, was condemned and deposed; he immediately wrote a letter to the pope, complaining of Eusebius's proceedings, which he attributed to the instigation of the emperor.

In the following year (419) at Constantinople, an examination was held, by imperial authority, of the acts of the synod which had condemned Eutyches, which acts he alleged to have been falsified. Eutyches was represented by three delegates; Eusebius, who was not to withdraw but was permitted to do so, urged that the doctrinal question should not be considered on that occasion, but should be remitted to a general council. On the assembly of the council then summoned at Ephesus (see EPHESUS, ROBBER COUNCIL OF), Eusebius was forcibly excluded by the influence of Dioscorus of Alexandria, who had obtained the support of the emperor. The reading of his part in the synod at Constantinople provoked an outburst of reproaches and threats: "Away with Eusebius! Burn him! As he has divided so let him be divided!" Flavian and Eusebius were deposed and banished, and Eusebius only survived the general disabilities and injuries he had received in the tumultuary council. Eusebius wrote to the Emperors Valentinian and Martin, asking for a fresh hearing; and both Flavian and Flavian sent written appeals to Rome. The text of these appeals was discovered in 1879 by Amelii—who was then curator of the Vatican Library—at Milan and afterwards became Abbot of Monte Cassino—and was published by him in 1882. Eusebius grounds his appeal on the fact of having been condemned unheard, and prays the pope to quash the sentence (pronuntiate evacuari et insanem fieri hanc iniquam condemnationem); he also mentions a written appeal given by him to the papal legates at Ephesus, in which he had begged the Holy See to take cognizance of the matter (in quibus vestrum sedis cognomen poposse). Eusebius fled to Rome, where he was kindly received by Leo I. In two letters written on the same day (28 April, 451) to Patriarch and Zosimus, he bespeaks their good offices for Eusebius; in the former letter he mentions a report that the Diocese of Doryleum was being thrown into disorder by an intruder (quaem curtur vastare qui illi injuste assurritur subrogatus). But Liberatus (Breviariu, c. xii) says that no one was put in the bishop's place, and the report was therefore probably of merely local origin.

Eusebius took part in the Council of Chalcedon, at which he appears as the accuser of Dioscorus. He was one of the commission which drew up the definition of faith finally adopted. The council annulled his condemnation, and made Nestorius the special mention of the fact in the letter to the pope in which it sought his confirmation of its acts. The despatch of the Emperor Marcian (451), issued to clear the memory of Flavian, declares the reputation of Eusebius to be uninjured by the sentence of the Robber Council (injusta sententia nihil obit Eusebio). He was one of the bishops who signed the 28th canon of Chalcedon giving patriarchal rights over Pontus and Asia to Constantinople. When the papal legates despatched the passing of the canon in their absence, and the signatories of the region affected were asked to declare whether they had signed it (the question being whether or not Eusebius had done so), because, when in Rome, he had read the canon to the pope, who had accepted it. Though he was doubtless mistaken as to the fact alleged (how the mistake arose cannot now be determined), his professed motive is significant. His name appears among the signatures to the acts of a council held in Rome in 484, but it seems improbable that he was alive at that date. Baronius considers that the signatures of numerous Eastern bishops appended to these acts are misplaced, and properly belong to some much earlier council; since none of the bishops is otherwise heard of later than these years after the Council of Chalcedon, at which they had all been present.

Flavian said of Eusebius at Constantinople that "fire seemed cold to his zeal for orthodoxy", and Leo wrote of him that he was a man who "had undergone great trials and toils for the Faith". These are all that is known of him, and may be fitted summarily.

A. B. Sharpe.
EUSEBIUS of Laodicea, an Alexandrian deacon who had some fame as a confessor and became Bishop of Laodicea in Syria, date of birth uncertain; d. about 260. His story is told by Eusebius of Cesarea (Hist. Eccl., VII, xi and xxxii). As deacon at Alexandria he had accused the bishop Eusebius (with a number of other deacons, and two Romans who were then in Egypt) before the tribunal of Eunomius, Prefect of Egypt, at the time of the Emperor Valerianus (253–260). Dionysius tells the story of their trial in a letter to a certain Bishop Germanus (Eus., Hist. Eccl., VII, xi). They were all sentenced to leave the city in hiding, "severely served the confessors in prison and buried the bodies of the dead and of the blessed martyrs, not without danger to his own life" (ibid.). In 260 they broke out a rebellion at Alexandria and at the same time a plague ravaged the city. Eusebius again risked his life continually by nursing the sick and the wounded (ibid., VII, xxxii). The Romans besieged a part of the town (Bruchium, Πυροστέα, Πυροστέων). Anatolius, Eusebius' friend, was among the besieged, Eusebius himself outside. Eusebius went to the Roman general and asked him to allow any who would to leave the city. His petition was granted and Anatolius, with whom he managed to communicate, explained the matter to the leaders of the rebellion and implored them to capitulate. They refused, but eventually allowed the women, children, and old men to profit by the Romans' mercy. A great crowd then came to surrender at the Roman camp. "Eusebius there nursed all who were exhausted by the long siege with every care and attention as a father and a physician" (ibid., xxxii). In 264 Dionysius (who seems to have come back from banishment) sent Eusebius as his legate to Syria to represent him at the discussions that were taking place concerning the affair of Paul of Samostia. Anatolius accompanied his friend. The Syrians were so impressed by these two Egyptians that they kept them both and made Eusebius Bishop of Laodicea as successor to Socrates. Not long afterwards he died and was succeeded by Amphilochius. The date of his death is uncertain. Harnack thinks it was before the great Synod of Antioch in 268 (Chron. der altchrist. Litt., I, 34). Another theory is that the siege at Alexandria was in 269, that the friends went to Syria at the end of that year, and that Eusebius' death was not till 270 (so W. Reading in the Variae notes to his edition of Eusebius Pamph., Cambridge, 1720, I, 367). Gams puts his death in 270 (Kirchenlexikon, s. v. Eusebius von Laodicea). Eusebius' name does not occur in the acts of the Synod of 268 (Euseb. Eccl., VII, xi and Barb. Bononiensis, Annales ed., ad an. 263, 8–11; Harnack, Chron. der altchristl. Litt., I, 34, 37, 41, etc.: Duchesne, Hist. ancienne de l'Église (Paris, 1900), I, 488–489.

ADRIAN FORTESCUE.

EUSEBIUS of Nicomedia, Bishop, place and date of birth unknown; d. 341. He was a pupil, at Antioch, of Lucian the Martyr, whose famous school he learned his Arian doctrines. He became Bishop of Berytus; but from ambitious motives he managed to get transferred, contrary to the canons of the early Church, to the see of Nicomedia, the residence of the Emperor Licinius, and with the support of Constantia, sister of Constantine, he was in high favour. Arius, when he was condemned at Alexandria, by Constantine, bishop of that see, took refuge at Cesarea, where he was well received by the famous apologist and historian Eusebius, and wrote to Eusebius of Nicomedia for support. The letter is preserved. In it the heretic explains his views clearly enough, and appeals to his correspondent as to a "fellow Lucianist". Eusebius put himself at the head of the party, and wrote many letters in support of Arius. One is preserved, addressed to Paulinus, Bishop of Tyre. We learn from it what Eusebius' doctrine was at this time: the son, he says, is "not generated from the substance of the Father", but He is "other in nature and power"; He was created, and this is not inconsistent with His Sonship, for the wicked are called sons of God (Is. i, 2; Deut., xxxii, 18) and are even exalted to the dignity of deities (Job, xxxviii, 28); He was begotten by God's free will. This is pure Arianism, borrowed from the letters of Arius himself, and possibly more definite than the doctrine of St. Lucian.

Alexander of Alexandria was obliged to address a circular to all bishops. He had hoped, he says, to carry the matter in silence, but Eusebius, who is now at Nicomedia, considering this a matter of life and death, had induced him to take up the question in his own church; the Emperor being present at a council from his residence in Syriac, had declined to return to the Church which he had governed in Alexandria.

The situation changed when Constantine had conquered Licinius in 323. The Christian emperor began by comprising Arius and Alexander in the list of "men of bad reputation". Why could not they agree to differ about subtleties of this kind, as the philosophers did? A letter in this sense to the patriarch was ineffectual; so Constantine preferred the side of authority, and wrote an angry rebuke to Arius. In the case of the Donatists, Constantine, having obtained the decision from a general council, at Arles, of all the bishops of his then dominions, he now summoned a larger council, from the world of which his victorious arms had made him master. It met at Nicæa in 325. The bishops were nearly all Easterns; but a Western bishop, Hosius of Cordova, who was in the emperor's confidence, was a leading part, and the pope was represented. Constantine ostentatiously declared that his duty at the council went no further than the guardianship of the bishops, but Eusebius of Cesarea makes it clear that he spoke on the theological question. The bishops of the Easterns were told that the emperor himself had voted against the Arian confessions of faith, but that it had only about seventeen supporters from among some three hundred members of the council, and it was hooted by the majority. The formula which was eventually adopted was resisted by the Arians, but eventually all the bishops signed, with the exception of the two Egyptians who had been before excommunicated by Alexander.

Eusebius of Nicomedia had bad luck. Though he had signed the creed, he had not agreed to the condemnation of Arius, who had been, so he said, misrepresented; and after the council he encouraged in their heresy some Arians whom Constantine had invited to Constantinople with a view to their conversion. Three months after the council, the Emperor sent him like Arius into exile, together with Theognis, whom he induced Constantine to appoint to the bishopric of Nicea. He was accused of having been a supporter of Licinius, and of having even approved of his persecutions, as well as of having sent spies to watch himself. But the banishment of the intriguer lasted only two years. It is said that it was Constantia, the widow of Licinius, who induced Constantine to exile him, and it is probable that she was also the cause of the return of her old friend Eusebius. By 329 he was in high favour with the emperor, with whom he may have had some kind of relationship, since Ammianus Marcellinus makes him a relative of Julian.

From this time onwards we find Eusebius of Nicomedia at the head of a small and compact party called,
by St. Athanasius, the Eusebians, at ἅγιον τον Ἑσυαίον, whose object it was to undo the work of Nicaea, and to procure the complete victory of Ariusianism. They did not publicly recall the signatures that had been forced from them. They explained that Arius had repented of his former words, or been misquoted. They dropped the Nicene formula, as ambiguous. They were the leaders of a much larger party of conservative prelates, who wished to stand well with the emperor, who reverence[d] the martyr Lucian and the great Origen, and were seriously alarmed at any danger of Sabellianism. The emperor, therefore, opened with a successful attack on Eusebius of Antioch, the principal prelate of the East properly so called. He had been having an animated controversy with Eusebius of Caesarea, in which he had accused that learned personage of polytheism, while Eusebius retorted with a charge of Sabellianism. Eustathius was deposed and exiled, for alleged disrespectful expressions about the emperor's mother, St. Helena, who was greatly devoted to the memory of St. Lucian. It is said that he was also charged with immorality and heresy, but it is certain that the whole case was got up by the Eusebians, to check the grace of a religious court of Alexandria, which had taken a leading part at Nicaea. Small in stature, and young in years, he was at the head of a singularly united body of nearly a hundred bishops, and his energy and vivacity, his courage and determination marked him out as the only man from the Eusebians. Alexandria Ariana had now signed an ambiguous formula of submission, and Eusebius of Nicomedia wrote to Athanasius, asking him to reinstate them, adding a verbal message of threats. The Meletian schism in Egypt, had only been partially healed by the mild measures decreed at Nicaea, and the schismatic names were giving trouble. Constantine was induced by Eusebius to write to Athanasius curtly telling him he should be deposed, if he refused to receive into the Church any who demanded to be received. Athanasius explained why he could not do this, and the emperor seems to have been satisfied. Eusebius then joined hands with the Meletians, and induced them to trump up charges against Athanasius. They first pretended that he had invented a tribute of linen garments which he exacted. This was disproved, but Athanasius himself was sent for to the court. The Meletians, who intended to save the emperor from his own policy, kept on accusing him for many years, that he had ordered a priest named Macarius to overturn an altar and break up a chalice belonging to a priest named Ischyros, in the Mareotis, though in fact Ischyros had never been a priest, and at the time he alleged could not have been pending to say Mass, for he was ill in bed. It was also said that Athanasius had assisted a certain Philumenus to conspire against the emperor, and had given him a bag of gold. Again the accusers were refuted and put to flight. The saint returned to his Church with a letter from Constantine, in which the emperor apologized to the Antiochians after his wont, urging them to peace and unity. But the question of the broken chalice was not dropped, and the Meletians further got hold of a bishop named Arsenius, whom they kept in hiding while they declared that Athanasius had put him to death; the charge was brought up against him, and he was exiled. Some said, was Arsenius's, cut off by the patriarch for the purpose of magic. Athanasius induced Ischyros to sign a document denying the former charge, and managed to discover the whereabouts of Arsenius. Constantine in consequence wrote a letter to the patriarch disavowing the innocent.

Eusebius had stood apart from all these false accusations, and he was not disheartened by so many failures. He got the Meletians to demand a synod, and represented to Constantine that it would be right for peace to be obtained before the assembling of many bishops. At Jerusalem, to celebrate the dedication of the new Church of the Holy Sepulchre. This was in 335. A synod met at Tyre, whose history need not be detailed here. Athanasius brought some fifty bishops with him, but they had not been summoned, and were not allowed to sit with the rest. A deputation was sent from the Mareotis, to be informed of what had happened at Ischyros and the chalice, and the chief enemies of Athanasius were chosen for the purpose. The synod was tumultuous, and even the Count Dionysius, who had came with soldiers to support the Eusebians, thought the proceedings unfair. It remains a mystery how so many prelates were deceived into condemning Athanasius. He refused to await their judgment. Extricating himself with difficulty from the assembly, he led away his Egyptians and betook himself directly to Constantinople, where he accused the emperor abruptly, and demanded justice. At his suggestion, the Council of Tyre was ordered to come before the emperor. Meanwhile Eusebius had brought the bishops on to Jerusalem, where the deliberations were made joyous by the reception back into the Church of the followers of Arius. The Egyptian bishops had drawn up a protest, attributing all that had happened at Tyre to the emperor. The synod of Caesarea, the Meletians and Arians, the enemies of the Church. Athanasius asserts that the final act at Jerusalem had been Eusebius's aim all along; all the accusations against himself had tended only to get him out of the road, in order that the rehabilitation of the Arians might be effected.

Eusebius prevented any of the bishops at Jerusalem from going to Constantinople, save those he could trust, Eusebius of Caesarea, Theognis of Nicaea, Patrophius of Scythopolis, and the two young Pannonian bishops Ursacius and Valens, who were to continue Eusebius's policy laid down at Nicaea, and the schismatic names were giving trouble. The young Emperor, however, declared later that his father had made a mistake by trusting Eusebius, and the Meletians, the Arians, and the Eusebians were not trusted. And Athanasius tells us that five Egyptian bishops reported to him that they rested their case on a new charge, that he had threatened to delay the crown ships from Alexandria, and the bishop Hilarus, who supplied Constantinople. The emperor was enraged. No opportunity of defence was given, and Athanasius was banished to Gaul. But, in public, Constantine said that he had put in force the decree of the Council of Tyre. Constantine the Younger, however, declared later that his father had made a mistake by trusting Eusebius, and the Meletians, the Arians, and the Eusebians were not trusted. And Athanasius tells us that five Egyptian bishops reported to him that they rested their case on a new charge, that he had threatened to delay the crown ships from Alexandria, and the bishop Hilarus, who supplied Constantinople. The emperor was enraged. No opportunity of defence was given, and Athanasius was banished to Gaul. But, in public, Constantine said that he had put in force the decree of the Council of Tyre. After the Gwatkin, He complain Alexandria. Diet. Stantius, the somewhere between Ariani and the Nicene faith. The Arians of who had fallen away to the arts. Eusebius, so that the rest of his foolish and obstinate life was spent in persecuting Athanasius, and in carrying out Eusebius’s policy. Never himself an Arian, Constantius held orthodoxy to lie somewhere between Arianism and the Nicene faith. Thus he was able to obtain from him a favour, which he denied to the few uncompromising Catholics who rejected his generalities.

The see of Alexandria had remained vacant during the absence of Athanasius. Eusebius now claimed to put the Synod of Tyre in force, and a rival bishop was set up in the person of Plistus, one of the Ariani priests whom Alexander had long ago excommunicated. Until now the East alone had been concerned. The Eusebians were the first to try to get Rome and the West on their side. They sent to the pope an embassy of two priests and a deacon, who carried with them the minutes of the Council of Tyre and the supposed proofs of the guilt of Athanasius, of which the accused himself had been unable to get a sight. Instead of at once granting his communion to Plistus, Pope Julius sent the documents to Athanasius, in order that he might present them as a defence. The latter summoned council at his suffragans. More than eighty attended, and sent to Julius a complete defence of their patriarch. The arrival of Athanasius’s envoys bearing this letter struck terror into the minds of the ambassadors of the Eusebians. The priests fled, and the deacon could think of nothing better than to beg Julius to call a council, and be judge himself. The pope consented, on the ground that in the case of one of the chief Churches such as Alexandria, it was right and customary that the matter should be referred to him. He therefore wrote summoning both accusers and accused to a council, at which he was willing that they should determine the place and time.

Thus it was not Athanasius who appealed to the pope, but the Eusebians, and that simply as a means of withdrawing from an awkward predicament. Plistus was not a success, and Constantius introduced by way of contrast another Gregory, a Capadocian, in his place. After addressing a protest to the whole Church against the methods of Eusebius, managed to escape with his life, and at once made his way to Rome to obey the pope’s summons. His accusers took good care not to appear. Julius wrote again, fixing the end of the year (339) as the term for their arrival. They detained the legates until the fixed time had elapsed, and sent them back in January, 340, with a letter full of studied and ironical politeness, of which Sozomen has preserved us the tenor. He says: “Having as- sembled at Antioch, they wrote an answer to Julius, elaborately worded and rhetorically composed, full of irony, and containing terrible threats. They admitted in this letter that Rome was always honoured as the school of the Apostles, and the metropolis of the Faith from the beginning, although its teachers had settled in the East. They had been made null, and they ought not to take a secondary place because they had less great and populous Churches, since they were superior in virtue and intention. They reproached Julius with having communicated with Athanasius, and complained that this was an insult to their synod, and that the condemnation of him was made null; and they urged that this was unjust and contrary to ecclesiastical law. After thus reproaching Julius and complaining of ill usage, they promised, if he would accept the deposition of those whom they had deposed, and the appointment of those whom they had ordained, to grant him peace and communion, but if he withstood their decrees, they would refuse to do so. For they declared that the earlier Eastern bishops had made no objection when Novatian was driven out of the Roman Church. But they wrote nothing to Julius concerning their acts, which were contrary to the decisions of the Council of Nicea, saying that they had been by necessary reason, because it was superfluous to make any defence against a vague and general suspicion that they had done wrong.” The traditional belief that Rome had been schooled by the Apostles, and that had always been the metropolis of the Faith, is interesting in the mouths of those who were denying her right to interfere in the East, in a matter of jurisdiction; for it is to be remembered that neither then, nor at any time, was Athanasius accused of heresy. This claim of independence is the first sign of the breach which began with the foundation of Constantinople as New Rome, and which ended in the complete separation of that city and all its dependencies from Catholic communion. For Eusebius had not contended himself with Nicomedia, now that it was no longer the capital, but had managed to get St. Paul of Constantinople exiled once more, and had seized upon that see, which was evidently, in his view, to be set above Alexandria and Antioch, and to be in very deed a second Rome.

The Roman council met in the autumn of 340. The Eusebians were not represented, but many Easterners, their victims, who had taken refuge at Rome, were from Thrace, Coele-Syria, Phœnicia and Palestine, besides Athanasius and Marcellus. They came to complain of the violence at Alexandria. Others explained that many Egyptian bishops had wished to come, but had been prevented and even beaten or imprisoned. At the wish of the council the pope sent to Eusebius and the Eusebians. It is one of the finest letters written by any pope, and so it all the deeds of Eusebius, with a clearness which is as unsparing as it is dignified. It is probable that the letter did not trouble Eusebius much, safe as he was in the emperor’s favour. It is true that by the death of Constantine II., Constantius, the protector of orthodoxy, had inherited his dominions, and was now far more powerful than Constantius. But Eusebius had never posed as an Arian, and in 341 he had a fresh triumph in the great Dedication Synod of Antioch, where a large number of orthodox and conservative bishops ignored the Council of Nicea, and showed themselves quite at one with the Eusebian party, though denying that they were followers of Arius, who was not even a bishop.

Eusebius died, full of years and honours, probably soon after the council; at all events he was dead before that of Sardica. He had arrived at the summit of his hopes. He may really have believed Arian doctrine, but clearly his chief aim had ever been his own aggrandisement, and the humiliation of those who had humbled him at Nicea. He had succeeded. His enemies were in exile. His creatures sat in the sees of Alexandria and Antioch. He was bishop of the imperial city, and the young emperor obeyed his counsels. If Epiphanius is right in calling him an old man even before Nicea, he must now have reached a great age. His work lived after him. He had trained a host of prelates who continued his intrigues, and who followed the Court from place to place throughout the reign of Constantius. More than this, it may be said that the world suffers to this day from the evil wrought by this worldly bishop.

John Chapman.
EUSTACE

Eustace, Saint, date of birth unknown, d. 29 March, 625. He was second abbot of the Irish monastery of Luxeuil in France, and his feast is commemorated in the Celtic martyrologies on the 29th of March. He was one of the first companions of St. Columbanus, a monastic missionary of certain passages in his writing, who devoted much to spread the Gospel over Central and Southern Europe. When Columbanus, the founder of Luxeuil, was banished from the Kingdom of Burgundy, he was one of the first companions to choose Eustace as his successor. Subsequently Columbanus settled at Bobbio in Italy. Three years after his appointment (613), when Clothaire II became ruler of the triple Kingdom of France, the abbot of Luxeuil was commissioned, by royal authority, to proceed to Bobbio for the purpose of recalling Columbanus. The latter, however, setting forth his reasons in a letter to the king, declined to return, but asked that Clothaire would take under his protection the monastery and brethren of Luxeuil. During the twelve years that followed, under the administration of the abbot Eustace, the monastery continued to acquire renown as a centre of learning and sanctity. Through the patronage of its benefices and lands were increased, the king devoting a yearly sum, from his own revenues, towards its support. Eustace and his monks devoted themselves to preaching in remote districts, not yet evangelized, chiefly in the north-eastern extremities of Gaul, and their missionary work extended even to Bavaria. Between the monasteries of Luxeuil in France and that of Bobbio in Italy (both founded by St. Columbanus) connexion and intercourse seem to have long been kept up.

John B. Cullen.

Eustace, John Chetwode, antiquary, b. in Ireland, c. 1702; d. at Naples, Italy, 1 Aug., 1815. His family was English; his mother being one of the Chetwodes of Cheshire. He was educated at Sedgley Park School, and after 1741 at the Benedictine house, St. Gregory's, Douay. He did not become a Benedictine though he always retained an attachment to the order, but went to Ireland where he taught rhetoric at Maynooth college, where he was ordained priest. He never had much sympathy for Ireland and, having gone back to France, he returned to England and entered the service of Dr. Collins in his school at Southall Park. From there he went to be chaplain to Sir William Jerningham at Costessey. In 1802 he travelled through Italy with three pupils, John Cust (afterwards Lord Brownlow), Robert Rushbrooke, and Philip Roche. During the travels he wrote a journal which subsequently became celebrated in his "Classical Tour." In 1805 he resided in Jesus College, Cambridge, as tutor to George Petre. This was a most unusual position for a Catholic priest, and Eustace's intercourse with leading members of the university led to his being charged with indifferentism. Dr. Milner, then vicar Apostolic, charged him with laying aside "the distinctive worship of his priesthood, in compliment, as he professed, to the liberality of the Protestant clergy, with whom he associated" and with permitting Catholics under the care of his house to attend "public worship"; and wrote the bishop, "was so notorious and offensive to real Catholics, that I was called upon by my brethren to use every means in my power to put a stop to it." On the other hand, an intimate friend says, "he never for a moment lost sight of his sacred character or its duties" (Gentleman's Magazine, see below). Petre left Eustace and accompanied him on another tour to Greece, Sicily, and Malta. In 1813 the publication of his "Classical Tour" obtained him sudden celebrity, and he became a prominent figure in literary society, Burke being one of his chief friends. A short tour in France, in 1814, led to his "Letter from Paris," and in 1815 he travelled again to Italy to collect fresh materials, but he was seized with malaria at Naples and died there. Before death he bitterly lamented the erroneous tendency of his works and the mistakes in his previous works, as "A Political Catechism adapted to the present Moment" (1810); "An Answer to the Charge delivered by the Bishop of Lincoln to the Clergy of that Diocese at the Triennial Visitations in 1812"; "A Tour through Italy" (London, 1813, 2d ed., 1814); "A Classical Tour" (London, 1809), a collection of his previous works, revised and enlarged (1815). A seventh edition of it appeared in London in 1841. It was also reprinted at Paris in 1837 in a series "Collections of Ancient and Modern English Authors," and "The Proofs of Christianity." The manuscript of his course of rhetoric, never published, is at Downside. Catholicon (1817), V, 205; Gentleman's Magazine, LXXXV, ii; Kirk, Biog. Mem. of Eighteenth Century Cath. London, 1805; Butler, Mem. of English Cath. (London, 1819); Heber, Life of Bishop Milner (Dublin, 1862); Gillow, Bibli. Dict. Eng. Cath., ii; Cooper in Dict. Nat. Biog. XVII.

Edwin Burton.

Eustace, Maurice, eldest son of Sir John Eustace, Castlemartin, County Kildare, Ireland, martyred for the Faith, Nov. 1581. Owing to the fact that he was to be educated at the Jesuit College at Bruges in Flanders, where, after the completion of his secular studies, he desired to enter the Society of Jesus. His father, however, wrote the superiors of the college to send him home. Maurice returned to Ireland, much against his own inclination, but in the hope of being able, later on, to carry out his desire. After a brief stay, during which he tried to dissuade his father from opposing his vocation, he went back to Flanders. His old masters at the college of Bruges on learning his father's determination advised him to return to Ireland, and devote himself in the world to the service of religion. Shortly after his arrival in Ireland, he got an appointment as captain of horse, in which position he did much to edify, and even win back to the Faith, those who served under him. He never abandoned the idea of becoming a priest, and secretly took Holy Orders. His servant, who was aware of the fact, told his father, who had his son immediately arrested and imprisoned in Dublin. A younger brother, desiring to inherit the family estates, also reported Maurice to be a priest, a Jesuit, and a friend of the queen's enemies. As a consequence, he was put on trial for high treason. During his imprisonment, against Adam Loftus, Archbishop of Dublin, offered him his daughter in marriage, and a large dowry, if he would accept the reformed religion. Yielding neither to bribery nor persecution, Eustace was sentenced to public execution, and hanged.

John B. Cullen.

Eustachius, Bartolomeo, a distinguished anatomist of the Renaissance period—"one of the greatest anatomists that ever lived," according to Isherwood's authoritative "Biographical Dictionary of the Most Prominent Physicians of All Time"—b. at San Severino, in the March of Ancona, Italy, in the early part of the sixteenth century; d. at Rome, August, 1574. Of the details of his life very little is known. He received his medical education at the University of Perugia, and travelled in France and Italy, very well. After receiving his degree in medicine he devoted himself to the study of anatomy so successfully that with Vesalius and Columbus he constitutes the trio who remade the science of anatomy for modern times. He early attracted attention for his skill and knowledge, and became physician to Cardinal Borromeo, son and successor of Charles Borromeo. He was also physician to Cardinal Giulio della Rovere whom he accompanied to Rome. After the death of Columbus he was chosen professor of anatomy at the Sapienza which had been reorganized as
EUSTACHIUS

the Roman University by Pope Alexander VI and magnificently developed by Popes Leo X and Paul III. The reason for his selection as professor was that he was considered the greatest anatomist in Italy after Columbus's death, and the policy of the popes of his time was to secure for the papal medical school the best available teachers. This position gave him time and opportunity for original work of a high order and Eustachius took advantage of it. He published a number of works on anatomy in which he added very markedly to the knowledge of the details of the structure of most of the organs of the body accepted up to that time. His first work was an anatomical commentary on Galen's "Lexicon." Subsequently he wrote a treatise on the kidneys, another on the teeth, a third on blood vessels, a paper on the Azygos vein, and other special anatomical structures. Morgagni and Haller declared that there was not a part of the body on whose structure he had not shed light. In the midst of his work he became, in 1570, physician to Cardinal Peretti, afterwards Pope Sixtus V. At the beginning of his career as an anatomist, Eustachius criticized Vesalius rather severely for having departed too far from Galen. After having continued his own original investigations for some time, however, he began to appreciate Vesalius's merits and did ample justice to his work.

Eustachius's greatest contributions to anatomical science passed through many vicissitudes which kept his real merit from being recognized until long after his death. His anatomical investigations were recorded in a series of plates with text attached. Eustachius himself was not afforded the opportunity to arrange for the publication of his work, as he died rather suddenly. Some of his papers and plates went to his heirs, and others were deposited in the Vatican Library. They were unearsted by Lancisi, a distinguished papal physician at the beginning of the eighteenth century, and were published at the expense of Pope Clement XI. This work, "Bartholomei Eustachi Tabulæ Anatomicæ," (Rome, 1714), demonstrates how much Eustachius had accomplished in anatomy. His special contributions to the science were the descriptions of the sturrup bone in the ear and the canal connecting the ear and the mouth, since called by his name. His monograph on the teeth of the child is very complete and has been surpassed only in recent years. In mythology he worked out the insertions and attachment of the sterno-hioide-muscle of the coccigeus, the splenius of the neck, the levator of the eyelid, and some others. In neurology his descriptions of the cranial nerves is especially full. In abdominal anatomy he added much. His description of the facial circulation was the most complete up to his time and it was he who recognized the valve on the left side of the opening of the inferior vena cava which serves to direct the blood from this vessel through the foramen ovale into the left auricle. This constitutes the most important distinctive structural difference between the circulatory apparatus of the adult and the child and is called the Eustachian valve.

EUSTACHIUS AND COMPANIONS, SAINTS, martyrs under the Emperor Hadrian, in the year 118. Feast, in the West, 20 September; in the East, 2 November. Emblems, a crucifix, a stag, an oven.

The legend relates that Eustachius (before baptism, Flaccus), a Roman general under Trajan, while still a heathen, saw a stag coming towards him, with a crucifix between the horns. He turned the head of the stag in that direction and heard a voice telling him that he was to suffer much for Christ's sake. He received baptism, together with his wife Tatiana (or Trajana, after baptism, Theopista) and his sons, Agapius and Theopistus. The place of the vision is said to have been Guadagnolo, between Tibur and Prænesta (Tivoli and Palestrina), in the vicinity of Rome. Through adverse fortune the family was scattered, but later reunited. For refusing to sacrifice to the idols after a victory, they suffered death in a heated brazen bull. Baronius (Ann. Ecc., ad an. 103, 4) would identify him with Placidus Flavius as a general under Titus.

The Acts are certainly fabulous, and recall the similar story in the Clementine Recognitions. They are a production of the seventh century, and were used by St. John Damascene, but the veneration of the saint is found in both the Latin Church and in the Slav Church; he is honoured as one of the Holy Helpers, is invoked in difficult situations, and is patron of the city of Madrid and of hunters. The church of Sant' Eustachio in Rome, title of a cardinal-deacon, existed in 827, according to the "Liber Pontificalis," but perhaps as early as the time of Gregory the Great (d. 604). It claims to possess the relics of the saint, some of which are said to be at St.-Denis and at St.-Eustache in Paris. An island in the Lesser Antilles and a city in Canada bear his name.

EUSTACHIUS, SAINT, Bishop of Antioch, b. at Side in Pamphylia, c. 270; d. in exile at Trajanopolis in Thrace, most probably in 360, according to some already in 336 or 337. He was at first Bishop of Berea in Syria, whence he was transferred, c. 323. At the Council of Nicea (325), he was one of the most prominent opponents of Arianism and from 325-330 he was engaged in an almost continuous literary warfare against the Arians. By his fearless denunciation of Arianism and his refusal to engage in synods he incurred the hatred of the Arians, who, headed by Eusebius of Cesarea and his namesake of Nicomedia, held a synod at Antioch (331) at which Eustathius was accused, by subdued witnesses, of Sabellianism, incontinence, cruelty, and other crimes. He was deposed by the synod and banished to Trajanopolis in Thrace by order of the Emperor Constantine, who gave credence to the scandalous tales spread about Eustathius. The people of Antioch, who loved and revered their holy and learned patriarch, became indignant at the injustice done to him and were ready to take the law into their own hands. But Eustathius kept them in check, exhorted them to remain true to the orthodox faith and humbly left for his place of exile, accompanied by a large body of his clergy. The adherents of Eustathius at Antioch formed a separate community by the name of Eustathians and refused to acknowledge the bishops set over them by the Arians. When, after the death of Eustathius, St. Melitius became Bishop of Antioch in 360 by the united vote of the Arians and the orthodox, the Eustathians would not recognize him, even after his election was approved by the Synod of Alexandria in 362. Their intransigent attitude gave rise to two factions among the orthodox, the so-called Melitian Schism (q. v.), which lasted till the second decade of the fifth century (Cavallera, Le schisime d' Antioche, Paris, 1905).

Most of the numerous dogmatic and exegetical treatises of Eustathius have been lost. His principal extant work is "De Engrastrymythio," in which he maintains against Origen that the apparition of Samuel (1 Kings, xxviii) was not a reality but a mere phantasm called up in the brain of Saul by the witch of Endor. In the same work he severely criticizes Origen for his allegorical interpretation of the Bible. A new edition of it, together with the respective homilies of Origen, was made by A. Jahn in Gebhardt and Harnack's "Texte und Untersuchungen zur Geschichte der altchristlichen Literatur" (Leipzig, 1886), II, fasc. iv. Cavallera recently discovered a Christological homily:

...
EUSTATHIUS

Eustathius, Greek savant and defender of monasticism, Archbishop of Thessalonica, b. at Constantinople in the early part of the twelfth century; d. at Thessalonica c. 1194. He received his ecclesiastical training in the monastic school of St. Ephrem at Constantinople, became a monk there in the monastery of St. Florus, and afterwards deacon of the "Great Church" (St. Sophia), and teacher of rhetoric and secretary to the petitions addressed to the emperor. He enjoyed the confidence of the Commnen emperors, particularly of Manuel of Palaeologus. The emperor reposed his utmost confidence in him, who intrusted to him the education of one of his sons. About 1174 he was made Archbishop of Myra in Asia Minor; but before his installation, was transferred to the archiepiscopal See of Thessalonica by special direction of the emperor. In this position he proved himself a real shepherd and father of his people. He tried to reform the worldly and hypocritical lives of the monks and anchorites of his time; he shielded his people against the excessive exactions of the imperial tax-collectors; he remained with his flock at the time of the invasion of Thessalonica by the Normans of Sicily in 1185, and tried to encourage his subjects and alleviate their sufferings. Owing to his opposition to the monastic order and its frankness of speech towards those in high places, he incurred the displeasure of the emperor and was removed from Thessalonica for a brief period; at what time, however, is not known.

Eustathius was a prolific and elegant writer, and the best Greek author of his age. His works may be classified in two categories: commentaries on ancient authors written during his activity in Constantinople; and his writings, tracts, orations, or letters, which were occasioned by special circumstances during his episcopate in Thessalonica. Of the former class may be mentioned: "The Commentaries on the Iliad and Odyssey of Homer" (Rome, 1542–50; Basle, 1559–69; Leipzig, 1852–55); "A Paraphrase of the Geographical Epic of Dionysius Periegetes", ed. Bernhardy (Leipzig, 1825); "A Commentary on the works of Pindar", of which, however, only the preface is known, ed. Tafel (Frankfurt, 1832). These works of Eustathius on the ancient classics are much prized by modern philologists. Among the works of the second class the following are to be reckoned: "A History of the conquest of Thessalonica by the Normans" (ed. Tafel in "Kommenen und Normannen", 2d ed., 1870); several addresses to the Emperor Manuel Comnenus I, and the funeral oration at the death of the same; letters written to the emperor or other distinguished personages of his time; several tracts having reference to his own monastery; as, "On the Monastic Life" (German tr. by Tafel, 1847); a letter written to a styliote of Thessalonica; a tract on hypocrisy; and others. Several purely religious works such as: four LENTEN sermons; a sermon for the beginning of the year; and panegyrics for the festivals of various saints. Most of his theological works, first edited by Tafel (1832), are in Migne, P. C., CXXXV. CXXXVI.

In these Eustathius shows himself an earnest and zealous ecclesiastical, fully penetrated with the genuine spirit of Christianity.

FRANCIS J. SCHAEFER.

Eustathius of Sebaste, born about 300; died about 377. He was one of the chief founders of monasticism in Asia Minor, and for a long time was an intimate friend of St. Basil. He was censured because of the exaggerated asceticism of his followers, hesitated all his life between various forms of Arianism, and finally became a leader of the Pneumatomachians condemned by the First Council of Constantinople (381). Eustathius was apparently the son of Eulalius, Bishop of Sebaste, the metropolis of Armenia (the Roman province). He studied under Arius (Basil, Ep. cxxxii, 3; cxciv, 3; ccxii, 3), and was known from the beginning as a sympathizer with the heretic. He was ordained priest and then founded a community of monks. Partly because of the idea common at that time (Fortescue, The Greek Fathers, London, 1895, pp. 57, 94) that no one could be both a priest and a monk, and partly also because of the jealousy of the emperor, Constantius (337–361), who feared lest he be suspended from his priesthood by a synod at Neocaesarea. Later, in 340, a synod at Gangra condemned his followers (τοὺς ἐν Εὐσταθίῳ) for exaggerated and extravagant asceticism. These monks forbade marriage for any one, refused to communicate with married priests, and taught that no married person can be saved; they fasted on Sundays and would not do so on the appointed fast-days; they claimed special grace for their own conventicles and dissuaded people from attending the regular services of the Church. It was evidently a movement like that of the Encratites and Montanists. Against these abuses the council drew up twenty canons, but without directly censuring Eustathius (Hefele, "Conciliengesch.", 1st ed., II, 777 sq.; Braun, "Die Abhaltung der Synode von Gangra" in "Hist. Jahrb.", 1895, pp. 590 sq.). Sozomen (Hist. Eccl., III, xiv, 36) says that Eustathius submitted to the council's decision. However, a synod at Antioch (341?) condemned him again for "perjury" (Sozomen, IV, xxiv, 9), perhaps because he had broken his promise made on oath. About the year 356 he became Bishop of Sebaste. St. Basil was at that time (355–369) studying the history of monks before founding his own community at Annesus, and he was much attracted by Eustathius's reputation as a zealous leader of monasticism. For years, till about 372 or so, Basil believed in and defended his friend. But Eustathius was anything but a Catholic. Once, apparently in 366, he persuaded the pope (Liberius, 352–366) of his orthodoxy by presenting a confession of the Nicene faith (Socrates, IV, xii); otherwise he wavered between every kind of Arianism and semi-Arianism and signed all manner of heretical and contradictory formulae. In 368 a synod at Miletene deposed him, it seems rather for the old question of his rigorism than for Arianism. Meletius (later the famous Bishop of Antioch) succeeded him at Sebaste. But the Semi-Arians still acknowledged Eustathius. He wandered about, was present at many synods (at Seleucia in 359, later at Smyrna, in Pisidia, Pamphylia, etc.); Socrates, IV, xxii, 8), and at last (372 or so?) was deposed and excommunicated. If one can speak of any principle in so inconsistent a person, it would seem that Eustathius was generally on the side of one of the forms of Semi-Arianism, opposed to Catholics on the one hand and to extreme Arians on the other. St. Basil found him out and broke with him definitively at last (about 372 or 373).
By this time Eustochius had taken up the cause of the people who denied the consubstantial nature of the Holy Ghost (Socrates, Hist. Eccl., II, xlv; 6; Basil, Ep. cxxi, 3). We hear of him last about 377; he was then a very old man (Basil, Ep. cxxv, 4; cxxi, 3). Besides his activity as a founder of monasteries in Armenia, Pontus, and Paphlagonia (Sozomen, III, xiv, 36), Eustochius had merit as an organizer of works of charity, builder of almshouses, hospitals, refuges, etc. (Epiphanius, Haer., lxxx, 1; Sozomen, III, xiv, 36).

We find in Dict. Eccl., II, IV; Sozomen, Hist. Eccl., III, besides references in the letters of St. Basil in F. G., XXXII, 219–1110, a few fragments in those of St. Gregory. Loofs, Eusta-
chio und die Chronik Menologion (Halle, 1898); Braun, Die Abfaßung der Synode von Ganzia in Hat. Jahrbuch der Gerresienschaff, XVI (1895), p. 368 sq.; Grenn, Eustochium in Arianism (Cambridge, 1900); Viros in Dict. of Christ. Biog., s. v.

ADRIAN FORTESCUE.
Euthanasia. He also wrote a short "Life of St. Paul" and a series of "Argumenta" or short summaries which are placed by way of introduction to the different books of the New Testament. Of Euthaliius' activities as a bishop little or nothing is known. Even the place of his episcopal see, Aelia, is a matter of doubt. It can hardly be identified with the bishopric of that name in Sardinia. More likely it was situated somewhere in Egypt, and it has been conjectured that it is the same as Paika, a city of the Thebaid in the neighbourhood of Syene.

For a long time in oblivion, the works of Euthaliius were published in Rome, in 1698, by Lorenzo Alessandro Zaccagni, Prefect of the Vatican Library. They are embodied in the first volume of his "Collectanea Monumentorum Veterum Ecclesiae Graecae et Latinae." They can also be found in Gallandi (Biblioth. Pat., X, 197) and in Migne (P. G., LXXXV, 623).

Vigouroux in Dict. de la Bible, s. v.; Milligan in Dict. of Christian Biography, s. v.; Schraven, A Plain Introduction to the Criticism of the New Testament (London, 1894), 53, 624, etc.

James F. D'Arcy.

Euthanasia (from Greek ἐθάνατος, death), easy or painless death. This is as far as it may be artificially brought about by the employment of anaesthetics. When these last are of a character to deprive the sufferer of the use of reason, their effect at this supreme hour of human life is not viewed with approbation by the received teaching of the Catholic Church. The reason for this attitude is that this practice deprives a man of the capacity to act meritoriously at a time when the competency is most necessary and its product invested with finality. It is equally obvious that this space is immeasurably precious to the sinner who has still to reconcile himself with his offended God.

An additional motive assigned for this doctrine is that the administration of drugs of the nature specified is in the premises if not formally at all events equivalent a shortening of the life of the patient. Hence as long as the stricken person has as yet made no adequate preparation for death, it is always gravely unlawful to induce a condition of insensibility. The most that may be granted to those charged with responsibility in the case is to take up a passively permissive demeanour whenever it is certain that the departing soul has abundantly made ready for the great change. This is equally true of those who have continued possession of his faculties, a relapse into sin.

In no contingency, however, can any positive indorsement be given to means whose scope is to have one die in a state of unconsciousness. What has been said applies with equal force and for the same reasons to the case of those who have to suffer capital punishment by process of law.

Joseph F. Delany.

Euthymius, Saint (styled The Great), abbot in Palestine; b. at Melitene in Lesser Armenia, A.D. 377; d. A.D. 473. He was educated by Bishop Otreius of Melitene, who afterwards ordained him priest and placed him in charge of all the monasteries in the Diocese of Melitene. At the age of twenty-nine he secretly set out on a pilgrimage to Jerusalem and remained for some time with a settlement of monks at a laura called Pharan, about six miles east of Jerusalem. In 411 he withdrew, with St. Theoctistus, a fellow-saint, into the wilderness, and lived for a while in a rock cell on the land of the Samaritans. At this time the disciples gathered around them, they turned the cavern into a church and built a monastery which was placed in charge of St. Theoctistus.

A miraculous cure which Euthymius worked has been related. It is said that he was sent by God to a place called Eutropeus, the son of the Saracen chief Aspetebus, spread the fame of the holy hermit far beyond the confines of Palestine. Aspetebus, was afterwards ordained priest and became bishop over his tribe, in which capacity he attended the Council of Ephesus in 431.

When the report of this miracle had made the name of Euthymius famous throughout Palestine, and large crowds came to visit him in his solitude, he retreated with his disciple Domitian to the wilderness of Ruba, near the Dead Sea. Here he lived for some time on a remote mountain called Marda whence he afterwards withdrew to the desert of Ziphon (the ancient Engaddi). When large crowds followed him to this desolate retreat, he returned to the neighbourhood of the monastery of Theoctistus, where he took up his abode in a cavern. Every Sunday he came to the monastery to take part in the Divine services. At length, because numerous disciples desired him as their spiritual guide, he founded, in 420, on the right side of the road from Jerusalem to Jericho, a laura similar to that of Pharan. The church connected with this laura was dedicated in 425 by Juvenal, the first Patriarch of Jerusalem. When the Council of Chalcedon (451) condemned Euthymius and Eutyches, it was greatly due to the authority of Euthymius that the sounder recluses accepted its decrees. The Empress Eudoxia was converted to Catholic unity through his efforts. The Church celebrates his feast on 20 January, the day of his death.

Michael Ott.

Eutropius of Valencia, a Spanish bishop; d. about 610. He was originally a monk in the Monasterium Serritantum, generally believed to have been situated in the province of Valencia, Spain. It was founded some time in the sixth century by the monk Donatus who had been driven from Roman Africa during one of the Vandal persecutions. The rule he introduced must have been based on that in use among the African monks, which has caused the members of this community to be connected with the Augustinians, without, however, sufficient warrant. The Monasterium Serritantum is known on through the reports of Isidore and Ildenphonius to its founder and one of his disciples, Eutropius, who succeeded as abbot.

Eutropius is known as the author of three letters, one to Licinius, Bishop of Carthage, and two to Peter, Bishop of Iubirica. In the first, which has been lost, he inquires the reason for having banished children with holy chriam. This letter is known through St. Isidore. The same saint mentions a letter to Bishop Peter, the text of which has been preserved, which he says every monk should read. The title is "De destructione monachorum et ruinâ monasteriorum." In response to a suggestion of some candidates for his monastery, he points out that the number of monks is a small matter compared with their earnestness. He may be criticized for his severity in enforcing the rule and in reprimanding the guilty, but he can easily justify himself, as his whole care consists in applying the rules the founders of the monastery laid down. And thus the reproaches made against him fall back on their authors. In any case he will not swerve from his course; he is indifferent to the criticisms of men. He cannot allow the faults of his monks to go uncheked. The Scriptures and the canons of councils agree that every part of the monastery is the abode of God, and the duties of him who is charged with the guidance of others, and negligence on this head would only lead to serious irregularities. The second letter to Bishop Peter touches on the seven deadly sins. Like Cassian, Eutropius enumerates eight: gluttony, lust, covetousness,
anger, sadness, faint-heartedness, vanity, and pride.

He analyzes them, traces the links that unite them, and emphasizes their results. A Christian should resist these enemies with all his strength, persuaded that of himself he cannot be victorious, but that he needs the help of God. As Eutropius develops his theme in the treatise "De blasphemia et anathema" of Cyprian, the bishop of Carthage (c. 210–258), and as the bishops of Antioch, "Laetentur eas!", written after the agreement between the two patriarchs, in 434. These documents were acclaimed by all. Flavian summed up to the effect that Christian was of "two natures", 

Eutyches}, an heresiarch of the fifth century, who has given his name to an opinion to which his teaching and influence contributed little or nothing. The essence of the view is the assertion that there was one nature after the Incarnation, and it is spoken of indifferently as the Eutychian or the Monophysite heresy, though Eutyches was not its originator, and though he was repudiated and condemned by many of the Monophysites, who all looked upon St. Cyril of Alexandria as their great Doctor. Eutyches in 434 was seventy years of age, and had been for thirty years archimandrite of a monastery outside the walls of Constantinople, where he ruled over three hundred monks. He was not a learned man, but was much respected and had influence through the infamous minister of Theodosius II, the eunuch Chrysaphius, to whom he had stood godfather. He was a vehement opponent of Nestorianism, and of the Antiochian party led by Theodoret of Cyprus (Cyrrhus) and of John of Antioch. These bishops had, for a time, championed the orthodoxy of Eutyches, and had been excommunicated the Council of Ephesus in 431; he was again in the same council in 449. Mutual explanations had been exchanged between the great theologians Theodoret and Cyril, but their partisans had not been convinced. On the death of Cyril, in 444, his successor Dioscorus was not slow to renew hostilities, and the Cyrillicans and anti-Nestorians everywhere took the offensive. It was but as a part of this great movement that Eutyches, at Constantinople, began to denounce a supposed revival of Nestorianism. He wrote to Pope Leo on the subject, and received a sympathetic reply. The Patriarch of Antioch, Domnus, was on his guard, and he addressed a synodal letter to the Emperor Theodosius II, accusing Eutyches of renewing the heresy of Apollinarius (this had been the charge of the Antiochian party against St. Cyril) and of wishing to anathematize the great Antiochian teachers of a past generation, Diodorus and Theodore — which Eutyches was not altogether in the wrong (Facundus, viii, 6, and xiii, 5). This was probably in 448, as St. Flavian, Bishop of Constantinople, had heard of no such accusation when he held a synod on Nov. 8th, with regard to a point of discipline connected with the province of Sardis. Eutyches had been accusing various personages of covert Nestorianism, and at the end of the session of this synod one of those inculpated, Eusebius, Bishop of Dorylaeum, brought the question forward, and preferred a counter charge of heresy against the archimandrite.

Eutyches had been, many years before, while yet a layman, one of the first to detect, and denounce, the errors in the sermons of Nestorius, and he was naturally indignant at being called a Nestorian. Flavian expressed great surprise at this sudden and unexpected charge, and suggested a private conference with Eutyches. Eusebius refused, for he had frequent interviews without result. At the second session the orthodox view was defined, at Eusebius's request, by the reading of the second letter of St. Cyril to Nestorius, and its approbation by the council, and the excommunication of Cyril to John of Antioch, "Laetentur eas!", written after the agreement between the two patriarchs, in 434. These documents were acclaimed by all. Flavian summed up to the effect that Christ was of "two natures", 

"in two natures", and all the bishops echoed, in their own words, the sentiments of the president. In the third session the messengers, who had been sent to summon Eutyches to attend, returned, bringing his absolute refusal. He had determined, he declared, that he would never set his foot outside his monastery, which he regarded as his tomb. He was ready to subscribe to the councils of Nicea and Ephesus; though in doing so he ought not to be understood to subscribe to, or to condemn, any errors into which they might have fallen; he searched the Scriptures alone, as being the expression of the Holy Spirit, and he acknowledged one nature of God, incarnate and made man after the Incarnation. He complained that he had been accused of saying that God the Word had brought His flesh down from heaven. This was untrue. He acknowledged our Lord Jesus Christ as of "two natures" (τὰ δύο φύσεως) hypostatized, united, as perfect God, and perfect Man born of the Virgin Mary, not having flesh consubstantial with ours. These statements of Eutyches were substantiated by three witnesses. The council therefore addressed a letter to him, summoning him to appear, for his excuse was insufficient in fact of the participation of Eusebius of Dorylaeum, whose ardour was by no means quenched, than pointed out that Eutyches had been sending round a writing to the different monasteries to stir them up, and that danger to the council might result. Two priests were therefore sent round to the different monasteries in the city; two to those across the Golden Horn, and two across the Bosphorus to Chalecedon, to make enquiries.

Meanwhile the envoys sent to Eutyches had returned. After some difficulties and the plea of illness, Eutyches had consented to receive them. He still refused to come to the council; but he sent a letter to the Bishops and the Pope, addressed to the Emperor, in which he explained that he was not at all 'in error', that he was not a Nestorian, and that he had not been "in two natures", and that he performed his services as before. The council then returned, and the Pope, with the monks, and the envoys, went back to the Emperor, who had ordered the synod to be held. Eutyches remained in Antioch, and the council pronounced him "in error", and recommended him to be excommunicated.

The day after the council, an express arrived from the Emperor with a second letter, repeating his reasons. Eutyches returned the letter, saying that he would not be bound by the synod, and that he refused to have anything to do with Nestorianism. The Emperor wrote to his cousin and protégé, St. Flavian, Bishop of Constantinople, saying that Eutyches was a nestsorian; that he had been reproached with the errors of the Rotary, and had been charged with the heresy of Apollinarius; that he had been warned for many years not to hold these opinions; that he was not worthy of the title of Nestorian; that he was not to be regarded as a Christian; that he was an heretic; and that he would be excommunicated if he did not repent. The Emperor then added that Eutyches had been long a friend of his, and that he had always acquitted himself well in his office of Bishop of Antioch; that he had been a good Christian; that he had been a good man; that he had been a good servant of God; that he had been a good friend of his; and that he had been a good friend of his.

The Emperor then added that Eutyches had been long a friend of his, and that he had always acquitted himself well in his office of Bishop of Antioch; that he had been a good Christian; that he had been a good man; that he had been a good servant of God; that he had been a good friend of his; and that he had been a good friend of his.
EUTYCHES

On the Saturday, Eusebius elicited testimony to further heretical remarks of Eutyches, which the envoys had heard him make. In particular he had denied two natures in Christ after the Incarnation, and had said he was ready to be condemned; the monastery should be burnt. On Monday Eutyches was sought vainly in the Church and the Archbishop's palace, but was eventually announced as arriving with a great multitude of soldiers, and monks, and attendants of the Prefect of the Pretorian guard, and this escort only permitted him to enter under the synod's promise that his person should be restored to them. When Eutyches arrived a Silentiary, Magnus, bringing a letter from the Emperor, who desired that the Patrician Florentius should be admitted to the Council; the Silentiary was therefore sent to invite his presence. Eusebius showed more than ever his anxiety that Eutyches should be convicted on the grounds of his former sayings, lest he should now unsay them, and be simply acquitted; for in that case his accuser might be made liable to the penalties due to calumnious accusation: "I am a poor man," he said, "without means. He threatens me with exile; he is rich; he has already depicted the Oasias as my destination." Flavian, and the Patriarch Magnus replied, that any submission made by Eutyches now should not release him from answering the charges as to his past words. Flavian then said: "You have heard, priest Eutyches, what your accuser says. Say now whether you admit the union of two natures, τὸ δύο φύσεων Παραμετρίαν, Eutyches answered: "Yes, and moreover." Eusebius interrupted: "Do you acknowledge two natures, Lord Archimandrite, after the Incarnation, and do you say that Christ is consubstantial with us according to the flesh; yes or no?" This expressed clearly the whole question between Catholic truth and the heresy of Monophysitism. Eutyches, after a few words, replied: "I have never up till now said that Christ was consubstantial with us; but I have acknowledged the holy Virgin to be consubstantial with us." Basil of Seleucia urged that her Son must therefore also be consubstantial with us, since Christ was incarnate from her. Eutyches answered: "Since you say so, I agree with all;" and he further explained that the body of Christ is the body of God, not of a man; though it is a human body. Provided he was not understood to deny that Christ is the Son of God, he would say "consubstantial with us," as the Archbishops would wish it and permit it. Flavian denied that the expression was novel.

Florentius showed that the Emperor had judged rightly that he was a good theologian, for he now pushed the Archimandrite on the essential point, the two natures. Eutyches answered explicitly: "I confess that Lord was one of two natures, before the union; but after the union, I acknowledge one nature." It is very odd that no comment was made on this utterance. The synod ordered Eutyches to anathematize all that was contrary to the letters of Cyril, which had been read. He refused. He was ready enough to accept the homilies of Dioscurus and Athanasius; but he would not anathematize all who did not use these expressions; otherwise he would be anathematizing the holy Fathers. Nor would he admit that Cyril or Athanasius had taught two natures after the Incarnation (and this was indeed correct, so far as mere words go). But Basil of Seleucia rightly urged: "If you do not say two natures after the union, you say there is mixture or confusion" (though, at the Robber Council, the unfortunate bishop was fain to deny his words). Florentius then declared, that he is not orthodox who does not confess for Eutyches also τὸ δύο φύσεων. The synod agreed, and considered the forced submission which Eutyches offered to be insincere. Flavian then pronounced the sentence of degradation, excommunication, and deposition. This was signed by about 30 bishops, including Julian of Cos, the pope's chargé d'affaires at the Court of Theodosius. The acts of the synod were published for this reason, because they were read in full at the Robber Council of Ephesus, in the following year 449, and again, in 451, at the Council of Chalcedon as a part of the Acts of the Robber Council. Flavian took care that the acts should also be signed by many archimandrites of the city, Eutyches, on his side, wrote for support to the chief bishops of the world, and placarded Constantinople with complaints. He sent an appeal to the pope (St. Leo, Ep. xxii) explaining that he had refused to affirm two natures and to anathematize all who did not do so; else he would have condemned the holy Fathers, popes Julius and Felix; Saints Athanasius and Gregory (he is referring to the extracts from the Fathers which were read in the first session of the Council of Ephesus; later in 555 it was declared that these papal documents were Apollinarian forgeries, and such is still the opinion of critics. See Harnack, Bardenhewer. Eutyches complained that this might be made known to your holiness, and that you might judge as you should think fit, declaring that in every way I should follow that which you approve." It was untrue that Eutyches at the council had appealed to the pope. He could only prove that in a low place he had said he did not give the heresy to rise.

When St. Leo had received the Acts of the Council, he concluded that Eutyches was a foolish old man who had erred through ignorance, and might be restored if he repented. Dioscorus of Alexandria, imitating some of his predecessors in assuming a primacy over Constanti- nople with complaints. The archimandrite had not been touched by the consideration Flavian had shown. His obstinacy continued. He obtained, through Chrysaphius, a new synod met in April 449 (without the presence of Flavian, but including the Patrician Florentius and several of the bishops who had taken part in the condemnation), in order to examine his complaint that the Acts had been falsified. After a careful revision of them, some slight alterations were made to please Eutyches; but the result was of no practical importance. Dioscorus and Eutyches had obtained the convocation by the Emperor of an oecumenical council to meet at Ephesus on 1st August, 449. The proceedings of the party of Dioscorus before and at that council will be found under Dioscorus, and Robber Council of Ephesus; it is only necessary to say here that in the first session Eutyches was exculpated, and absolved, while violence was done to Flavian and Eusebius, who were imprisoned. The former soon died of his sufferings. Both had appealed to Rome. The Pope annulled the council, but not the synod, which met in April 449. On the Emperor's sudden death the outlook changed. A new council met at Chalcedon in October, 451, at the wish of the Emperor Marcian and his consort St. Pulcheria, the course of which was directed by imperial commissioners, in accordance with the directions of St. Leo, whose letters presided. Dioscorus and Eutyches were put to death. Eutyches was also exiled. A letter of St. Leo (Ep. 134), written 15th April, 454, complains that Eutyches is still spreading his poison in banishment, and begs Marcian to transfer him to some more distant and lonely spot. The old man does not seem
to have long survived. His monastery, at Constantinople, was put under the supervision of Julian of Cos as visitor, that prelate being still the papal representative at Constantinople.

The leading authorities for the life of Eutyches are The Acts of the Council of Chalcedon and The Letters of St. Leo. See also under Eutychianism.

John Chapman.

Eutychianism and Monophysitism are usually identified as a single heresy. But as some Monophysites condemned Eutyches, the name Eutychian is given by some writers to the more extreme of the Monophysites, or even to those in Armenia, though it seems best to use the words indifferently, as no party of the sect looked to Eutyches as a founder or a leader, and Eutychian is but a nickname for all those who, like Eutyches, rejected the orthodox expression “two natures” of Christ. The tenet “one nature” was common to all Monophysites and Eutychians, and they affected to call Catholics Diphytaries or Dyophysetes. The error took its rise in a reaction against Nestorianism, which taught that in Christ there is a human hypostasis or person as well as a Divine. This was interpreted to imply a want of reality in the union of the two natures, and it even to result in two Christs, two Sons, though this was far from the intention of Nestorius himself in giving his incorrect explanation of the union. He was ready to admit one "Д|ο|τ|ο|ρ|ο|ν", but not one hypostasis, a "prosopie" union, though not a "hypostatic" union, which is the Catholic expression. He so far exaggerated the heresy of the Eutychians that he denied that the Blessed Virgin could be called Mother of God, Theotokia. His views were for a time interpreted in a benign sense by Theodoret, and also by John, Bishop of Antioch, but they all eventually condemned him in his condemnation of John, and his heretical spirit by refusing all submission and explanation.

His great antagonist, St. Cyril of Alexandria, was at first vehemently attacked by Theodoret, John, and their party, as denying the completeness of the Sacred Humanity after the manner of the heretic Apollinaris. St. Cyril, however, produced just the same difficulties that the word υπόστασις had aroused in the preceding century. For υπόστασις, as St. Jerome rightly declared, was the equivalent of όλη in the mouths of all philosophers, yet it was eventually used etymologically, from a letter to lea, as applied to the Person of the Trinity, different from the Latin persona, that is, a subsistent essence. Similarly ϕάσις was an especially Alexandrian word for όλη and υπόστασις, and was naturally used of a subsistent όλη, not of abstract όλη, both by Cyril often (as in the formula in question), and by the more moderate Monophysites. The Cyrilian formula, in its genesis and in its rationale, has been explained by Newman in an essay on astounding learning and perfect clearness (Tracts Theol. and Eccl., iv, 1874).

He points out that the word υπόστασις could be used (by St. Athanasius, for example), without change of meaning, both of the one Godhead, and of the three Persons. In the former case it did not mean the Divine Essence in the abstract, but considered as subsistent, without defining whether that subsistence is threedfold or single, just as we say "one God" in the concrete, without denying a triple Personality. Just the same is true of υπόστασις. We are not, at the point of view it is clear that Christ is not so fully "consubstantial with us" as He is "consubstantial with the Father". Yet again,
in these two phrases the word *consubstantial* appears in different senses; for the Father and the Son have one substance numero, whereas the Incarnate Son is of one substance with us *specie (not numero, of course). It is therefore not to be wondered at, if the expression *consubstantial* with *us* was avoided as late as the fourth century. In like manner the word *physis* has its full meaning when applied to the Divine Nature of Christ, but a restricted meaning (as has been just explained) when applied to His Human Nature.

In St. Cyril's use of the formula its signification is plain. It means (1) the body of St. Cyril's opinion, the Divine Word became man, remained one and the same in essence, attributes and personality; in all respects the same as before, and therefore *μὰ φύσιν*. It means (b), that the manhood, on the contrary, which He assumed, was not in all respects the same nature as that *massa, usus, physis, etc.* out of which it was taken; (1) from the very circumstance that it was only an addition or supplement to what He already was, not a being complete in itself; (2) because in the act of assuming it, He changed it in its qualities. This added nature, then, was best expressed, not by a second substantive, as if collateral in its position, but by an adjective, as *σαυρακωμένη*. The three words answered to St. John's ὁ λόγος ἀπὸ τοῦ τέρτου, ἐκ τοῦ συνεσχημούντος. Thus St. Cyril intended to safeguard the teaching of the Council of Antioch (against Paul of Samosata, 264-72) that the Word was unchanged by the Incarnation, *καθαρὸς καὶ τὸ ἐν αὐτῷ ἡμεῖς καὶ ἐν οὐρανῷ καὶ ἐν οἰκόμην* (p. 317). He intended by his one nature of God, "with the council of Antioch, a protest against that alterableness and imperfection, which the anti-Catholic schools affixed to their notion of the Word. The council says one and the same in *φύσιν*; I have in like manner written a treatise entitled 'quod unus sit Christus'; and, in one of his Paschal Epistles, he quotes with the text 'Jesus Christ, yesterday, to-day, the same, and for ever.' His great theme in these words is not the coalescing of the two natures into one, but the error of making two sons, one before and one upon the Incarnation, one divine, one human, or again of degrading the divine essence by making it subject to the humanity" (p. 321). It has been necessary thus to explain at length St. Cyril's meaning in order to be able to enumerate the more briefly and clearly, the various phases of the Eutychian doctrine. 1. The Eutychian party before Chalcedon did not put forward any doctrine of their own; they only denounced as Nestorians any who taught *τὸν φύσαν* two natures, which they made equal to two hypostases, and two Sons. They usually admitted that Christ was *ἐκ δύο φύσεων* "of two natures", but this meant that the Humanity before (that is, logically before) it was assumed was a complete *φύσις*; it was no longer a *φύσις* (subsistent) after its union to the Divine nature. It was natural that those of them who were consistent should reject the teaching of St. Leo, that there were two natures: "Tenet enim sine defectu proprietatem suam utratque naturae", "Assumpti formam servi sine sorte pecati, humanum agens, divina non agens", and if they chose to understand "nature" to mean a subsistent nature, they were even bound to reject such language as Nestorian. Their fault in itself was not necessarily that they were Monophysites at heart, but that they would not stop to listen to the six hundred bishops of Chalcedon, to the father of the Church, and to the entire Western church, who were ready to hear explanations and to realize that words may have more than one meaning (following the admirable example set by St. Cyril himself), were able to remain in the unity of the Church. The rest were rebels, and whether orthodox in belief or not, well deserved to find themselves in the same ranks as the real heretics.

2. Eutyches himself was not a Cyrilian. He was not a Eutychian in the ordinary sense of that word. His mind was not clear enough to be definitely Monophysite, but his spirit was ever in thinking him ignorant. He was with the Cyrilians in denouncing as Nestorians all who spoke of two natures. But he had never adopted the "consubstantial with us" of the "creed of the union", nor St. Cyril's admissions, in accepting that creed, as to the two natures. He was willing to accept St. Cyril's letters and the decisions of Ephesus and Nicea in a general way; but they contained no error. His disciple, the monk Constantine, at the revision, in April, 449, of the condemnation of Eutyches, explained that he did not accept the Fathers as a canon of faith. In fact Eutyches simply upheld the ultra-Protestant view that nothing can be imposed as of faith which is not verbally to be found in Scripture. This, together with an exaggerated notion of Nestorianism, appears to describe his whole theological position.

3. Dioscorus and the party which followed him seem to have been pure Cyrilians, who by an excessive dislike of Nestorianism, fell into excess in maintaining the completeness of the Humanity, and exaggerating the effects upon it of the union. We have not documents enough to tell us how far their error went. A fragment of Dioscorus is preserved in the "Antirrhetica" of Nicephorus (Spiecl. Solesm., IV, 380) which states: If the Blood of Christ is not by nature the Blood of God's and not a man's, how does it differ from the blood of goats and bulls and the ashes of a heifer? For this is earthly and corruptible, and the blood of man according to nature is earthly and corruptible. But God forbid that we should say the Blood of Christ is consubstantial with one of these things, or that it according to nature (ἐν τῶν κατὰ φύσιν ἁμαρτίας)." If this is really, as it purports to be, from a letter written by Dioscorus from his exile at Gangra, we shall have to class him with the extreme Monophysites "in contempt", if the formula "the consubstantial with us" and makes the Blood of Christ incorruptible of its own nature. But the passage may conceivably be a Julianist forgery.

4. Timothy Ælurus, the first Monophysite Patriarch of Alexandria, was on the contrary nearly orthodox in his views, as has been clearly shown by the extracts published by Lebon from his works, extant in Syria in a MS. in the British Museum (Addit. 12156). He denies that *φύσις*, nature, can be taken in an abstract sense. Hence he makes extracts from St. Leo, and mocks the pope as a pure Nestorian. He does not even accept *ἐκ δύο φύσεων*, and declares there can be no question of two natures, either before or after the Incarnation. "There is no nature which is not a hypostasis, nor hypostasis which is not a person." So far we have, not heresy, but only a term defined contrary to the Chalcedonian and Western usage. A second point is the word *εἰκονισμός* means that which is "by nature". Christ, he says, is by nature God, not man; He became man only by *εἰκονισμός* (economy or Incarnation); consequently His Humanity is not His *φύσις*. Taken thus, the formula *μὰ φύσιν* was intended by Ælurus in an orthodox sense. Thirdly, the actions of Christ are attributed to His Divine Person, to the one Christ. Here Ælurus seems to be unorthodox. For the essence of Monothelism is the refusal to ascribe the actions (ὑπερευθέν) between the two natures, but to insist that they are all the actions of the one Person—whether in the Son or in the Holy Spirit. How far Ælurus was in reality in reality, we cannot be judged until his works are before us in full. He is, at all events in the main, a schismatic, full of hatred and contempt for the Catholic Church outside Egypt, for the 600 bishops of Chalcedon, for the 1600 of the É veneral, for Rome and the whole West. But
he consistently anathematized Eutyches for his denial that Christ is consubstantial with us. 

5. In the next generation Severus, Bishop of Antioch (511–39), was the great Monophysite leader. In his earlier days he rejected the Henoticon of Zeno, but when a patriarch he accepted it. His contemporaries assign the duty of the Humanity of Christ to himself in the nature of the union of the two, and it seems to be comprehensive. He did not, however, concede the Incorruptible, but maintained the corruptibility of the Body of Christ. He seems to have admitted the expression ἐν δύο φύσεισ. Chalcedon and Pope Leo he treated as Nestorian, as Αἰλουρος did, or two wills, he sought to found his truth on two natures. He did not allow the Humanity to be a distinct monad; but this is no more than a view of many modern Catholic theologians that it has no esse of its own. (So St. Thomas, III, Q. xvii, a. 2; see Janssens, De Deo homoine, pars prior, p. 607, Freiburg, 1901.) It need not be understood that by thus making a composite hypothesis Severus renounced the Cyrilian doctrine of the unchanged nature of the Word after the confusion union. Where he is most certainly heretical is in his conception of one nature not Divine (so Cyril and Αἰλουρος) but theandric, and thus a composition, though not a mixture—φύσις. He naturally attributed all the activities of Christ, and they are called “theandric” (θεαναρικα). Instead of being separated into Divine activities and human activities as by the Catholic doctrine. The undivided Word, he said, must have an undivided activity. Thus even if Severus could be defended from the charge of strict Monophysitism, in that he affirmed the full reality of the Human nature of Christ, though he refused to it the name of nature, yet at least he appears as a dogmatic Monotheliste. This is the more clear, in that on the crucial question of one of the most important he pronounced for his theandric position. The other utterances of Severus which make Christ’s sufferings voluntarily permitted, rather than naturally necessitated by the treatment inflicted on his Body, might perhaps be defended by the consideration that from the union and consequent Beatitude, the Soul of Christ, would congruously enjoy a beatiﬁcation of the Soul and a spiritualizing of the Body, as was actually the case after the Resurrection; from this point of view it is true that the possibility of the Humanity is voluntary (that is, decreed by the Divine will) and not due to it in the state which is consequent upon it. Thus in the natural union the Humanity is of its own nature possible apart from the union (St. Thomas, III, Q. xiv, a. 1, ad. 2). It is important to recollect that the same distinction has to be made in considering whether the Body of Christ is to be called corruptible or incorruptible, and consequently whether Catholic doctrine on this point is in favour of Severus or of his adversary Julian. The words of St. Thomas may be borne in mind: “Corruptio et mors non competit Christo ratione suppositi, secundum quod admitterit unitas, sed ratione naturae, secundum quam inventur differentia mortis et vitae.” (St. Thomas, III, Q. xiv, a. 2.) As the Catholic theologians discussed the question ratione suppositi (since they took nature to mean hypostasis, and to imply a suppositum) they were bound to consider the Body of Christ incorruptible. We must therefore consider the Julianists more consistent than the Severians.

6. Julian, Bishop of Halicarnassus, was the leader of those who held the incorruptibility, as Severus was of those who held the corruptibility. The question arose in Alexandria, and created great excitement, when the two bishops had taken refuge in that city, soon after the accession of the orthodox Emperor Justin, in 519. The latter called the Severians Corrupticole, and the latter retorted by entitling the Julianists Αὐθαναστέων and Phantasists, as renewing the Docetic heresies of the second century. In 537, the two parties elected rival patriarchs of Alexandria, Theodosius and Gaianas, after whom the Corrupticole were known as Theodosians, and the Incorrupticole as Gaianites. Julian considered, with some show of reason, that the doctrine of Severus necessitated the admission of two natures, and he was unjustly accused of Docetism and Manicheanism, for he taught the Incorruptible was not formalis quæ human, but as united to the Word. His followers, however, split upon this question. One party admitted a potential corruptibility. Another party taught an absolute incorruptibility εὐτυχίαν ὡς πάντα τὸνόσον, as flowing from the union of the two natures. This third sect declared that by the union the Humanity obtained the prerogative of being incorruptible; they were called Actistetes, and replied by denominating their opponents “Cistolaters”, or worshippers of a creature. Heresies, after the analogy of low forms of physical life, tend to propagate by division. So Monophysitism showed its nature, once it was separated from the Catholic doctrine, in 556, adopted the incorruptibilist view, and made it a law for all bishops. The troubles that arose in consequence, both in East and West, were calmed by his death in November of that year.

The famous Philoxenus or Xenocrates (d. soon after 518), Bishop of Mahbour, Mambuce, or Hierapolis in Syria Euphratensis, is best known to-day by his Syriac version of the N. T., which was revised by Thomas of Harkel, and is known as the Harklean or Philoxenian text. It is unfair of Hefele (Councils, tr. III, 459–60) to treat him as almost a Docetist. From what can be learned of his doctrines they were very like those of Severus and of Αἰλουρος. He was a Monophysite in words and a Monothelite in reality, for he taught that Christ had one will, an error which was almost impossible for any Monophysite to avoid. To those who use the word pius θεαναρικόν, on the other hand, who refused it, there is no possibility of explaining away this assertion of the suffering of the Divine Nature by the communicatio idiomatum, for it is not merely the Divine Nature (in the sense of hypostasis) of the Son which is said to have been crucified, but the words are attached to a three-fold invocation of the Trinity. Peter may therefore be considered as a full-blooded Monophysite, who carried the heresy to its extreme, so that it involved error as to the Trinity (Sabellianism) as well as with regard to the Incarnation. He did not admit the addition of the words “Christus Rex” which his orthodox rival Cyril added to his formula. Some Syrian monks of Constantinople, led by John Maxentius, before the reconciliation with the West in 519, upheld the formula “one of the Trinity was crucified” as a test to exclude the heresy of Peter Fulo on the one hand and Nestorianism on the other. The orthodox adherents of the Council of Chalcedon, Pope Hormisdas thought very badly of the monks, and would do nothing in approval of their formula. But it was approved by John II, in 534, and imposed under anathema by the Second Council of Constantinople in 553, which closed the so-called “Theopaschite” controversies. 

9. We have further to catalogue a number of subdivisions of Monophysitism which pululated in the sixth century. The Agnoetics were Corrupticole, who denied completeness of knowledge to the Human.
EUTYCHIANISM

Nature of Christ; they were sometimes called Theonistians, from Themistius Calonymus, an Alexandrian deacon, their chief writer. They were excommunicated by the Patriarchs of Alexandria and Thessalonica (d. 527) and Theodosius. Their views resemble the "Theonistians" of our day. The Triarchites, or Tritheites, or Condobaudites, were founded by a Constantinopolitan philosopher, John Asenagus, or Asenagh, at the beginning of the sixth century, but their principal teacher was John Philoponus, an Alexandrian philosopher, who died probably in the year 538. These heretics taught that there were three natures in the Holy Trinity, the three persons being individuals of a species. A zealot of the sect was a monk Athanasius, grandson of the Empress Theodora, wife of Justinian. He followed the view of Theodosius, that the bodies to be given in the resurrection are new creations.

Stephen Gobaraus was another writer of this sect. Their followers were called Athanasians or Philoponiaci. Athanasius was opposed by Conon, Bishop of Tarsus (c. 600), who, eventually anathematized his teacher Philoponus. The Cononites are said to have urged that, though the matter of the body is corruptible and was excommunicated by the Jacobite Patriarch of Alexandria, Damian (577), who found the unity of God in a brahman distinct from the three persons, which he called abheses. His disciples were taunted with believing in four Gods, and were nicknamed Tetrachites or Triarchites. Eutyches, the first of the Monophysites, taunted them with the doctrine of the three natures. They found the three natures of the Holy Trinity to resemble the three axes of a species. Eutyches was accused of heresy by the Emperor Theodosius II (577), excommunicated, and died not long after.

Leo the Great was supposed to be of the sect of the Monophysites, while he was bishop of Antioch (578-91), opposed them, and, with both he and Damian attacked the Alexandrian philosopher Stephen the Usurper, founder of the Nyobites, who taught that there was no distinction whatever between the Divine Nature and the Human after the Incarnation, and characterized the distinctions made by those who admitted only one nature as half-hearted.

Many of his followers joined the Catholics, when they found themselves excommunicated by the Monophysites.

History.—Of the origin of Eutychianism among the Christians, a few words were said above. The controversy between Cyril and the Patriarch of Alexandria, Dioscorus, and the Emperor Theodosius, was revived with violence in the attacks made in 444-8, after Cyril's death, by his party on Ireneus of Tyre, Ibas of Edessa, and others (see Dioscorus). The trial of Eutyches, by St. Flavian at Constantinople, brought matters to a head (see Eutyches II), and convened an ecumenical council at Ephesus, in 449, over which Dioscorus, the real founder of Monophysitism as a sect, presided (see Ephesus, Robber Council). St. Leo had already condemned the teaching of one nature in his letter to Flavian called the tomæ, a masterpiece of exact terminology, unsurpassed for clearness of thought, which condemns Nestorius on the one hand, and Eutyches on the other (see Leo I, Pope). After the council had acquitted Eutyches, St. Leo insisted on the signing of this letter by the Eastern bishops, especially those who had taken part in the disgraceful scenes at Ephesus. A hundred bishops assembled at Chalcedon, under the presidency of the papal legates (see Chalcedon, Council). The pope's view was assured of success beforehand by the support of the new Emperor Marcian. Dioscorus of Alexandria was deposed. The tomæ was condemned by all, save by thirteen of the seventeen Egyptian bishops present, for these declared their lives would not be safe, if they returned to Egypt after signing, unless a new patriarch had been appointed. The reality difficulty lay in drawing up a definition of faith. There was no new Patriarch of Alexandria; the bishops were to be banished and, it was decided that Dioscorus, though they had now accepted the tomæ, the bishop of Jerusalem, had been one of the leaders of the Robber Council. The rest had submitted to St. Leo. It is consequently not surprising that the committee, appointed to draw up a definition of faith, produced a colourless document (no longer extant), using the words ἐκ δύο φύσεως, which Dioscorus and Eutyches might have signed without difficulty. It was excitedly applauded in the fifth session of the council, but the papal legates, supported by the bishops of the East, would not agree to it, and declared they would break up the council and return to Italy, if it were pressed.

The few bishops who stood by the legates were of the Antiochian party and suspected of Nestorianism by many. The emperor's personal intervention was invoked. It was decided to refuse to assert "two natures" (not merely "of" two) was to agree with Dioscorus and not with the pope, and they yielded with a very bad grace. They had accepted the pope's letter with enthusiasm, and they had deposed Dioscorus, not indeed for heresy (as Anatolius of Constantinople had the courage, or the impudence, to point out), but for violation of the canons. To side with him meant punishment. The result was the drawing up by a new committee of the famous Chalcedonian definition of faith. It condemns Monophysitism in the following words: "Following the holy Father we acknowledge one and the same Lord Jesus Christ; and in accordance with this we all teach that He is perfect in Godhead, perfect also in Manhood, truly God and truly Man, of a rational soul and body, consubstantial with His Father as regards His Godhead, and consubstantial with us as regards His Manhood, and in like manner in all things. For, having been begotten of His Father before the worlds as to His Godhead, and in the last days for us and for our salvation [born] of Mary the Virgin Theotokos as to His Manhood; one and the same Christ, Son, Lord, Only-begotten, made known as in two natures [the Greek text now has "of two natures"], but the history of the definition shows that the Latin "in" is correct] without confusion or change, indissolubly inseparably [ἐκ δύο φύσεως ἰδιωτικής, ἀρρενωποί ἀνεμορφωμένος, ἐν δύο φύσεως ἱερομυθώματι, ἐν δύο φύσεως ἱερομυθώματι]; the distinction of the two natures being in no wise removed by the union, but the properties of each nature being rather preserved and concurring in one Person and one Hypostasis, not as divided or separated into two Persons, but one and the same Son and Only-begotten, God the Word, the Lord Jesus Christ; even as the Prophets taught aforesaid about Him, and as the Lord Jesus Christ Himself taught us, and as the symbol of the Fathers is recorded among us." So Monophysitism was exorcised; but the unwillingness of the larger number of the six hundred Fathers to make such a declaration is important. The historical account of the Council is this, that a doctrine which the Creed did not declare, which the Fathers did not unanimously witness, and which some eminent Saints had almost in set terms opposed, which the whole East refused as a symbol, not once, but twice, patriarch by patriarch, metropolitan by metropolitan, first by the mouth of above one hundred, then by the mouth of above six hundred of its bishops, and repeatedly, and upon the ground of its being contrary to the Creed, was forced upon the Council, not indeed as a Creed, yet, on the other hand, not for subscription merely, but for its acceptance as a definition of faith under the sanction of an anathema, forced on the Council by the resolution of the Pope of the day, acting through his Legates and supported by the civil powers (Newman, "Development", v. § 3, 1st ed., p. 307). Theodosius issued edicts against the Eutychians, in March and July, 433, forbidding them to have priests, or assemblies, to make wills or inherit property, or to do military service. Priests who were obstinate in these were to be banished by the civil powers beyond the empire. Troubles began immediately the council was over. A monk named Theodosius, who had been punished at Alexandria for blaspheming Dioscurus, now on the contrary opposed the decision of the council, and going to Palestine persuaded the
many thousands of monks there that the council had taught plain Nestorianism. They made a raid upon Jerusalem and drove out Juvenal, the bishop, who would not renounce the Chalcedonian definition, although he had been before one of the heads of the Robber Council. Houses were set on fire, and some of the churches were destroyed. Theodosius made one known bishop, and throughout Palestine the bishops were expelled and new ones set up. The Bishop of Scythopolis lost his life; violence and riots were the order of the day.

Eudocia, widow of the Emperor Theodosius II, had retired to Palestine, and gave some support to the monks. Marcian and Pulcheria, with their usual mild measures to restore peace, and sent repeated letters in which the real character of the decrees of Chalcedon was carefully explained. St. Euthymius and his community were almost the only monks who upheld the council, but this influence, together with a long letter from St. Leo to the excited monks, had no doubt great weight in obtaining peace. In 453, large numbers acknowledged their error, when Theodosius was driven out and took refuge on Mount Sinai, after a tyranny of twenty months. Others held out on the ground that it was uncertain whether the pope had ratified the council. It was true that he had annulled its disciplinary canons. The emperor therefore wrote to St. Leo asking for an explicit confirmation, which the pope sent at once, at the same time thanking Marcian for his acquiescence in the condemnation of the twenty-eighth canon, as to the precedence of the See of Constantinople, and for repressing the religious riots in Palestine.

In Egypt the results of the council were far more serious, for nearly the whole patriarchate eventually sided with Dioscurus, and has remained in heresy to the present day. Out of seventeen bishops who represented, at Chalcedon, the hundred Egyptian bishops, only four had the courage to sign the decree. These four returned to Alexandria, and peaceably ordained the archdeacon, Proterius, a man of good character and venerable by his age, in the place of Dioscurus. But the deposed patriarch was popular, and the thirteen bishops, who had been allowed to defer signing the tome of St. Leo, misrepresented the teaching of the council as contrary to that of Cyril. A riot was the result. The soldiers who attempted to quell it were driven into the ancient temple of Serapis, which was now a church, and it was burnt over their heads. The pagans retaliated by the usual largess of corn, of public shows, and of privileges. Two thousand soldiers reinforced the garrison, and committed scandalous violence. The people were obliged to submit, but the patriarch was safe only under military protection. Schism began through the retirement from his communion of the priest Timo-thy, called Elurus, "the cat", and Peter, called Mongus, "the horse", a deacon, and these were joined by four or five bishops. When the death of Dioscurus (September, 454) in exile at Gangra was known, two bishops consecrated Timothy Elurus as his successor. In 456, the emperor almost the whole of Egypt acted against the Monophysites. On the arrival of the news of the death of Marcian (February, 457), Pro-terius was murdered in a riot, and Catholic bishops were everywhere replaced by Monophysites. The new emperor, Leo, put down force by force, but Elurus was protected by his minister Aspar. Leo wished for a council, but gave way before the objections made by the pope his namesake, and the difficulties of assembling so many bishops. He therefore sent queries throughout the Eastern Empire to be answered by the bishops, as to the version due to the pope and to the ordinaries of the See of Elurus. As only Catholic bishops were consulted, the replies were unanimous. One or two of the provincial councils, in expressing their indignation against Timothy, add the proviso "if the reports are accurate", and the bishops of Pamphylia point out that the decree of Chalcedon is not a creed for the people, but a test for bishops. The letters, still preserved (in Latin only) under the name of Eucylus, or Codex Eucylus, bear the signatures of about 260 bishops, but Nicephorus Callistus says, that there were altogether more than a thousand, while Eulogius, Patriarch of Alexandria, in the days of St. Theodosius the Great, puts the number at 1000. He says that only one bishop, the aged Amphilocheus of Sidon, dissented from the rest, but he soon changed his mind (quoted by Photius, Bibl., CXXX, p. 283). This tremendous volume of testimonies to the Council of Chalcedon is little remembered to-day, but in controversy with the Monophysites it was in those times of equal importance with the council itself, as its solemn ratification.

In the following year Elurus was exiled, but was recalled in 475 during the short reign of the Monophysite usurper Basiliscus. The Emperor Zeno exiled Elurus from communion on account of his great age. That emperor tried to reconcile the Monophysites by means of his Henotic decree, a decree which dropped the Council of Chalcedon. It could, however, please neither side, and the middle party which adhered to it and formed the official Church of the East was excommunicated by the Pope. Emulated by Marcian of Alexandria, the Monophysites were united to the schismatic Church of Zeno by Peter Mongus who became patriarch. But the stricter Monophysites succeeded from him and formed a sect known as Acæphal (q. v.). At Antioch Peter Fullo also supported the Henotic doctrine. A schism between East and West lasted through the reigns of Zeno and his more definitely Monophysite successor Anastasius, in spite of the efforts of the pope, especially the great St. Gelasius (q. v.). In 518, the orthodox Justin came to Rome, and in that year he signed a famous decree which had been preserved at Rome, and condemned not only the leaders of the Eutychian heresy, but also Zeno’s time-serving bishops of Constantinople. Similarly, Acæus (q. v.) and his successors. Few of the Eastern bishops seem to have been otherwise than orthodox and anxious for the reunion, and they were not obliged to omit from their diptychs of their churches the names of their predecessors, who had unwillingly been cut off from actual communion with Rome, in the reigns of Zeno and Anastasius. The famous Monophysite writer Severus was only deposed from the See of Antioch, Justinian, during his long reign, took the Catholic side, but his empress, Theodora, was a Monophysite, and in his old age the emperor leaned in the same direction. We still possess the acts of a conference, between six Severian and seven orthodox bishops, held by his order in 533. They are controversial, but of his reign was the following treatise about the “three chapters”, extracts from the writings of Theodre of Mopsuestia, Theodoret, and Ibas, which Justinian wished to get condemned in order to conciliate the Severians and other moderate Monophysites. He succeeded in driving Pope Viglius (q. v.) into the acceptance of the Successors of Constantine (q. v.), which he had summoned for the purpose of giving effect to his view. The West disapproved of this condemnation as derogatory to the Council of Chalcedon, and Africa and Illyricum refused to receive the council.
beggar’s garb, ordaining bishops and priests everywhere in Mesopotamia, Syria, Asia Minor, in order to repair the spiritual ruin caused by the Monophysites by Justinian’s renewal of the original laws against their bishops and priests. John of Ephesus puts the number of clergy he ordained in a period at 200,000, otherwise 30,000. His journeys were incredibly swift. He was believed to have miracles of healing, and at least he performed the miracle of infusing a new life into the dry bones of his sect, though he was unable to unite them against the “Syndotes” (as they called the orthodox), and he died worn out by the quarrels among the Monophysite patriarchs and theologians. He has been variously named to give his name to the Monophysites of Syria, Mesopotamia, and Babylonia, with Asia Minor, Palestine, and Cyprus, who have remained since his time generally united under a Patriarch of Antioch (see JOSEPH). A number of these united in 1646 with the Catholic Church, and they are governed by the Syrian Archbishop of Aleppo. The rest of the Monophysites are also frequently called Jacobites.

For the Coptic Monophysites see EUTHYCHUS, and for the Armenians see ARMENIA. The Armenian Monophysite Patriarch resides at Constantinople. The Abyssinian Monophysites, in Persia, were drawn to the same heresy toitle the close connexion with Alexandria. At least since the Mohammedan conquest of Egypt, in 641, the Abuna of the Abyssinians has always been consecrated by the Coptic Patriarch of Alexandria, so that the Coptic Church has always been, and is still, maintaining Monophysitism.

The chief materials for the general history of the Eutychians will be found in the Collections of the Councils by MANUHAROOS, lectiones, letters of persons, and other documents. To these must be added the historians EUTHYCHIANUS, THEOPHANES, etc., and the Monophysite historians JOHN OF EPHESUS, and ZACHARIAH (writing both in Leyden’s Optica Syriaca, 11–111, Leyden, 1879), a German translation of the latter by GEORG KONIG (Leipzig, 1889), and an English one by HAMMERSLEY and BROOKS (London, 1889). The works of FAKUR, the Brauer von Liberatus, and information imparted by FAKUR were valuable. Of modern authorities, the larger and smaller histories are innumerable, e.g. BARONIS, FLEET, GIBSON, HEEFELDE, and for the early period TILLEMONT, VI; also biographical articles in such works as: LATE in Biogr. Litt. FABERE:KUR, die Kirchengesetzien, HENRO, KRONEN, KREUZER, and DET. CH. BOOS., KONSFSE, etc.; DET. ORIENT., DET. CH. ORIENT, WALCH, KOTZKESGEGNISSE, Leipz., 1780–12; VI–VIII; for detailed biographies see the articles referred to above.

For the Coptic see PETAVIO, DE INERM. VI; DOREN, Enzyklopädie der Kirchengeschichte von der Person Christi (Berlin, 1853), 2nd ed.; TRU: DOCTRINE OF THE PERSON OF CHRIST (Edinburgh, 1813); and we should note that Dorens himself has not treated the Coptic view. Of the latter, the most famous is the Eutychianus-Coptic. Its history is: DIET. TH. CATH., the history of dogmas such as Eutychianus-Coptic, and up to 411, B. BAKER: KREUZER, Monophysite Streitigkeiten in Zusammenhang mit der Kirchenpolitischer (1819); LORING, LSAMINA von der Kirchengeschichte, 1st series. 1–3, 1937; see also the three works of John of Ephesus. The latter, however, are from the Syrian, Arabic, and Coptic of late years. In addition to the histories mentioned above, EUTYCHUS, History of the Monophysites of the Coptic Church of Alexandria, Arabic and English in Patrology, 1, 2 (Paris, 1905); S. BEN EL MOFFAFA, History of Patriarch Eutychius, in Opera Script. Chrest. Orient., Ser. arabicae, 3rd series. IX; CHORANO, Chronique de Michel le Syrien (Paris, 1901), II.

JOHN CHAPMAN.

Eutychianus, Saint, Pope.—He succeeded Pope Felix I as Pope, almost a year after the latter’s death, and entered the Church from the imperial household, 275, until 7 December, 283. We know no details of his pontificate. The rite for blessing the produce of the fields, ascribed to him by the “Liber Pontificalis”, undoubtedly belongs to a later period. The statement also that he promulgated rules for the burial of martyrs and buried many of them with his own hands, has but slight claim to acceptance, since after the death of Aurelian (275) the Church enjoyed a long respite from persecution. It is highly probable that Eutychianus did not die a martyr. The fourth-century Roman Calendar mentions him (8 December), in the “Deposito Episcoporum”, but not in its list of martyrs. His remains were placed in the papal chapel in the Catacomb of Callistus. When this famous crypt was discovered some fragments of the epitaph of Eutychianus were found, i.e. his name (in Greek letters): EUTHYCHIANUS EPIS (KOPHOS). His feast is celebrated on 8 December.

J. P. KIRSH.

Eutychius I, Patriarch of Constantinople, b. about 512, in Phrygia; d. Easter Day, 5 April, 582. He became a monk and then archimandrite at Amasea, and was chosen to succeed the Patriarch Eutychianus in Constantinople, where he seems to have made a great impression on Justinian I (527–565), so much so that when Mennas the Patriarch (536–552) died, the emperor procured Eutychius’s election as successor, on the very same day (in August). The great quarrel of “the Three Chapters” was then going on. Justinian thought he could conciliate the Monophysites, in Egypt, and Syria, by publishing anathemas against three theologians,—long dead—who were suspect of the opposite heresy, Nestorianism. The three points (called ἐπαθετά, ἐπιτυχία, νεανική): were: (1) the condemnation of the person and works of Theodore of Mopsuestia (428); (2) the condemnation of the writings of Theodoret of Cyrus (c. 457) against the Council of Ephesus; (3) a letter of one Ibas, to a Persian named Masri, which attacked that Council. It should be noted that these documents certainly were Nestorian, and that their condemnation involved no real concession to Monophysitism. The question at issue was rather, whether it were worth while, on the chance of conciliating these Monophysites, to condemn people who had died so long ago. It is also true that, in the West, people suspected in these Three Chapters were anathematized; however, he did not attack on Chalcedon. Justinian’s “Δικαίωσις τῶν Κεκλημένων” appeared in 544. It was accepted in the East and rejected in the West. Pope Vigilus (540–555) was the unhappy victim of the quarrel. In 548 he accepted the Edict by a council, which also carefully guarded Chalcedon. He had himself just come to Constantinople in order to advise a Council that should confirm the three anathemas. But he found that, by its inclusion, he had grievously offended his own Western bishops. Dositius of Milan, and Facundus of Hermance led the opposition against him, and in 550 a Synod of Carthage excommunicated the Pope. Vigilus did not die for the condemnation that has left him the reputation of being the weakest Pope that reigned. He was still at Constantinople when Eutychianus became Patriarch. Eutychius sent him the usual announcement of his own appointment and the usual (and quite orthodox) profession of
of faith. At the same time, he urged him to summon the Council at once. Meanwhile Justinian had published a second, and still stronger, condemnation of the Three Chapters (23 Dec., 551). Vigilius gave, and then withdrew, his consent to the Council. Justinian insisted on the exclusion of the African bishops who were all opposed to his condemnation. In spite of the Pope's refusal, the council met on 5 May, 553, at Constantinople. A hundred and sixty-five bishops attended. This is what was afterwards recognized as the Fifth General Council (Constantinople II). On 11 May the Pope sent them a modified Decree, to which they adhered. It is called "The Breviarium of the Council of Constantinople," and it forbade the condemnation of the other Chapters. As he would not attend the council Eutychius presided. The council wrote respectfully to the Pope, but, in spite of the Constitutium, completely confirmed Justinian's edicts in its eighth session. It also acknowledged the formula Unus de Trinitate passus est as orthodox, and incidentally condemned Origen. (Can. 11, 12, 13, 14. For this Council see Liberati Breviarium, infra; Mansi, IX, 163; Hefele, Concilienesch., 2nd ed., II, 598 seq.) Vigilius gave in on 8 December, after months of ill-treatment, and was allowed to go back to Rome, and died on the way, in Sicily, in 554. [There is an account of all this story in Fortescue's Orth. Eastern Church, 82-83.]

Eutychius had, so far, stood by the Emperor throughout. He composed the decree of the Council against the Patricians (Mansi, IX, 367-575); he consecrated the new church of Sancta Sophia. His next adventure was a quarrel with Justinian about the Aphthartodocetes. These were a sect of Monophysites, in Egypt, who said that Christ's body on earth was incorruptible (δεινος), and subject to no pain. To prevent this flow in the defence of these people, Justinian means of conciliating the Monophysites, and, in 554, he published a decree defining their theory (Evagrius, Hist. Eccl., IV, 391). Eutychius resisted this decree, so on 22 January, 555, he was arrested in his church, and banished to a monastery at Chalcedon. Eight days later a synod was summoned to judge him. A ridiculous list of charges was brought against him; he used ointment, he ate deliciously, etc. (Eustathius, Vita S. Eutych., 4, 5). He was condemned, deposed, and sent to Prince's Island in Propontis. There he went to his old home at Amasea, where he stayed for twelve years. Joannes Scholasticius succeeded as Patriarch (John III, 566-577); and after his death, in 577, the Emperor Justin II (565-578) recalled Eutychius, who came back in October. At the end of his life Eutychius evolved a heretical opinion denying the resurrection of the body. St. Gregory the Great was then Apotheosis (legate) of the Roman See, at Constantinople. He argued about this question with the patriarch, quoting Luke, xxv, 39, with great effect, so that Eutychius, on his death-bed, made a full and orthodox profession of faith as to this point. St. Gregory tells the whole story in his "Exp. in Nov. Job" (Moralism lib. XIV, 56): Eutychius dying said: "I confess that we shall all rise again in this flesh" (See also Paul. Diacon.: Vita Greg. Mag. I, 9.) His extant works are his letter to Pope Vigilius (Migne, P. L., LXX, 53, P. G. LXXXVII, 2601), a fragment of a "St. Gregory's Letter to Constantine," (Mansi, X, 1054; Script. Vet. Nov. Coll. X, 623); and other fragments in P. G., LXXVII. His life was written by his disciple Eustathius, a priest of Constantinople. His feast is kept by the Byzantine Church on 6 April, and he is mentioned in our "Corpus Iuris" (Grat., I pars., D, 548).---EUTYCHIUS. Vita S. Eutychii in Acta SS., April, I, 550-573; EVAGRIUS, Hist. Eccl., IV, 37, 38; V, 16, 18; HEPFEL, Concin- cillation., II, 2, 582, etc. ADRIAN FORTESCUE.

Eutychius, Melchite Patriarch of Alexandria, author of a history of the world, b. 876, at Fustat (Cairo); d. 11 May, 940. He was an Egyptian Arab, named Sa'id ibn Batriq; his father's name was BatrIQ (Patricius). He first studied medicine and history, and practised for a time as a physician. He then entered a monastery and eventually became Patriarch of Alexandria, taking the name Eutychius, being the Melchite Orthodox. He spent most of his reign in strife with the great majority of Egyptian Christians who were (Monophysite) Copts, and with his Coptic rival. His works (all written in Arabic and preserved only in part) are treatises on medicine, theology, and history. He wrote a compendium called "The Breviarium of the Council of Constantinople," treatises on fasting, Easter, and the Jewish Passover, various feasts, etc. also a "Discussion between a Christian and an Infidel," by which he means a Melchite and a Monophysite. But his most important work is "Nasn al-Gawahir" (Chaplet of Pearls), a chronicle of the history of the world from Adam to 938. The work is dedicated to his brother, Isa ibn Batriq, and is meant to supply a short account of universal history. In Latin it is quoted as "Eutychii Historia universalis", or as the "Annales" of Eutychius. The author states that he has compiled his history only from the Bible and from the civil authorities. He has, however, a great number of strange and improbable additions to Biblical and profane history not found in any other source. There are also in the "Chaplet of Pearls" many valuable details about the Monophysite controversy and the history of the Patriarchate of Alexandria. The book acquired a certain fame when, in the seventeenth century, John Selden published an excerpt of it (London, 1642, see below) in order to prove that originally at Alexandria there was no distinction between bishops and priests (a theory at one time adopted by St. Jerome; "In ep. ad Titum"), i.e., the ancient "Evagrius" al-Oawahir" (John Selden's excerpt contains an excerpt from the work of St. Ephrem, translated from Syriac; it was published in 1589 by a Maronite, Abraham Ecchellensis (Rome, 1661), who disputed the accuracy of his translation of the passages in question and proposed another. In the thirteenth century another Arabic historian, Al-Mākie (d. 1275), used Eutychius work for compiling his own history of the world to 1290 (Krumbacher, Byzantinische Litteratur, Munich, 1897, p. 365).

Evagrius, surnamed Ponticus, b. about 315, in Ibarra, a small town on the shores of the Black Sea; d. 399. He is numbered among the more important ascetical writers of the fourth century. Instructed by St. Gregory Nazianzen, he was ordained reader by St. Basel, the great and peace-loving St. Gregory Thaumaturges (380), whom he accompanied to the Second Council of Constantinople (381). According to Palladius, who differs in his account from Sozomen and Evagrius, Evagrius remained for a time as archdeacon in Constantinople, while Nectarios was patriarch (381-393). Leaving the city on account of its spiritual dangers, he went first to Jerusalem and then into the Nitrian Desert, where he began an eremitical life under the guidance of the younger Macarius (383). He steadfastly refused a bishopric offered by Theophilus of Alexandria, and became very celebrated as an ascetical life and writings, though St. Jerome (e.g. Ep. 133 ad Ctesiphonem, n. 3) charges him with Origenistic errors and calls him the precursor of Pelagius. The Sixth, Seventh, and Eighth Ecumenical Councils condemn Evagrius together with Origen. Rufinus and Eusebius translated the works of Evagrius into Latin; several of them have been lost or have not thus far been recovered (P. L., XL). The best collections of his works are edited by Bigot (Paris, 1680); Galland, "Biblioth. vet. patr.," VII, 551-581; Migne, "P. G.," XI; cf. also Elter, "Gnomica" (Leipzig, 1862); Zeokler, "Evagrius Pontikus" (Munich, 1893). We may here name: "Monachus seu de vita activa"; "De oraculis sancti Hieronymi"; "Rerum itineraria rationes earumque juxta quinimum retrorsum"; "De orto vitiosarum cognitionibus."--Bardeenwer, Patrology, etc. (Stil. Louis, 1908), 271; A. J. Maas. 

Evangeliaria, liturgical books containing those portions of the Gospels which are read during Mass or in the public offices of the Church. The name does not date back earlier than the seventeenth century. The Greeks called such collections Εὐαγγελία, "Gospel", or Ἑυαγγελία τοῦ εὐαγγελίου, "Selections from the Gospel". The collection of readings from the Acts of the Apostles is known as Ἀποστόλος, "Apostle", or πράξεις Ἀποστόλων. In churches of the Latin Rite, the lessons from the Old Testament, the Epistles from the New Testament, and portions of the Gospels are usually grouped in the same book, under the name Comes, Liber comitii, Liber comicus (from comes, companion), or Lectionario. Separate Evangeliaria are seldom to be met with in Latin. Tables indicating passages to be read, as well as the Sundays and Holy Days on which they are to be read, are called the Capitulare, or the Collectio of Evangeliaria. The word is sometimes given to the Evangeliarum proper; they are also called "Synaxarium", and by the Latins are known as "Ceritalus". Although the word Evangeliarium is of recent origin, it has been universally adopted. The word Lectionario is employed, however, to denote either the collection from the Old and New Testaments, including the Gospels, or else the passages alone without the corresponding Gospels.

Origin and Use of Evangeliaria.—Following the custom of the Synagogue, the Scriptures of the Old Testament were read at the primitive Christian assemblies. According as the Canon of the New Testament was decided on, certain extracts from it were included in these readings. Justin tells us that in his day, when the Christians met together, they read the Memoirs of the Apostles and the writings of the Prophets (Apol., I, lxvii). Tertullian, Cyprian, and other writers bear witness to the practice of this custom, and in fact the order of lector existed as early as the third century. The want of precise testimony we do not know how the particular passages were decided on. Most likely the presiding bishop chose them at the assembly itself; and it is obvious that on the occurrence of certain festivals the scripture relating to them would be read. Little by little a more or less definite list would naturally result from this method. St. John Chrysostom in a homily delivered at Antioch exhorts his hearers to read beforehand the Scripture passages to be read and commented on in the Office of the day (Homiliae de Lectori, 3, c. 1). In like manner others would form a table of readings. In the margin of the MS. text it was customary to note the Sunday or festival on which that particular passage would be read, and at the end of the manuscript, the list of such passages, the Synaxarium or Ceritalus, would be added. Transition from this process to the making of an Evangeliarium, or collection of all such passages, was easy. Gregory is of opinion that we possess fragments of Evangeliaria in Greek dating from the fourth, fifth, and sixth centuries, and that we have many from the ninth century onwards (according to Gregory Thaumaturges, c. 1072). But together with these, we find Lectionaries in the Latin Churches as early as the fifth century. The Comes of the Roman Church dates from before St. Gregory the Great (P. L., XXX, 487-532). From the tenth century onwards we find the Gospel lessons, together with the Epistles and prayers, united in a new liturgical book, called the Missal.

Evangeliarium and the Text of the New Testament.—Evangeliaria have very little importance for the critic of the Gospel text. At the time when the various Gospel passages began to be collected in book-form for use in liturgical reunions, the various families of the Gospel text and its transmission were already in existence; and those Evangeliaria simply reproduce the particular text favoured by the Church which compiled it. They have even exercised an unfortunate influence on the more recent MS. of the Gospels; certain additions of a liturgical nature (e. g. in illo tempore: discri Dominus) which were set at the beginning or end of a reading, have found their way into the text itself. But in the official text of the Vulgate, and in editions of the Greek text of to-day, owing to the labours of Tischendorf and of Westcott and Hort, these liturgical glosses are very rare. We notice one example in the Vulgate text: Matt. vii, 31 and 32. The Evangeliorum et Liturgiarum.—It is especially from a liturgical point of view that the study of Evangeliaria is interesting. The general method of Greek Evangeliaria is uniform. The first part contains the Gospels of the Sundays beginning with Easter; the
second part gives the Gospels for the festivals of the saints beginning with 1 September. In the Churches of the West the distribution of the Gospel pericopes was more divergent because of the various rites. And the ceremonial followed in the reading of the Gospel presents many differences of usage between one church and another, in which it would be too long to treat here.

The Evangeliaires may be mentioned the following: the portion of an Evangelarium from Siono (sixth century: in the Bibliothèque Nationale, Paris); the Evangelarium of Rossano (about 600) in Greek uncials; the Syrian codices of Rabula (580, at Florence) and Eschmidzin (miniatures of the sixth century); the Evangelical Family of Gregory I (at Cambridge) in Latin uncials; the Book of Kells (seventh to ninth century, at Dublin); the Book of Lindisfarne (eighth century, in the British Museum, London) of Irish workmanship; the Irish-Continental Evangelaria of St. Gall (about 800); the Carolingian Evangelarium of Codexcale (about 789, in the Bibliothèque Nationale, Paris); the Ada Codex (eighth century, at Trier); the Evangelarium of Euchernach (tenth century, at Gota), and of the Abbess Uta (about 1002, at Munich). Valuable Evangeliaires were carefully treasured, and when used in the offices were placed on a strip of parchment or a strictly selected leaf of the binding was usually left plain, but the front cover was enriched with all the skill of the goldsmith. One of the most ancient bindings or covers we possess is that offered by Queen Theodelinda (600) to the cathedral of Monza. At times plaques of ivory, relined with gold and copper, were set into the binding, or, as in the earliest of them we are of Oriental or Italian origin, and bear painted figures of Christ or the Blessed Virgin, etc. A number of them, to be found in the countries along the Rhine and the Meuse and in Northern France (tenth and eleventh centuries), have the scene of the Crucifixion.

See general works on palaeography, archeology, iconography, the lesser arts, and monographs on the Evangeliaires especially: R. Remy, Geschichte der Evangeliaires im Mittelalter (Freiburg im Br., 1900).

Evangelical Alliance, The, an association of Protestants belonging to various denominations, founded in 1846, whose object, as declared in a resolution passed at the first meeting, is "to enable Christians to realize in themselves and to exhibit to others that a living and everlasting union binds all true believers into the fellowship of the Church." (Report of the Proceedings of the First General Conference). The points of belief, which the members accept as being the substance of the Gospel, are contained in a document adopted at the first conference and known as the Basis. They are nine in number:

1. The Divine inspiration, authority, and sufficiency of the Holy Scriptures; 2. The right and duty of private judgment in the interpretation of the Holy Scriptures; 3. The unity of the Godhead and the Trinity of Persons therein; 4. The utter depravity of human nature in consequence of the fall; 5. The Incarnation of our Lord Jesus Christ, with the eternal blessedness of the righteous and the eternal punishment of the wicked; 6. The Divine institution of the Christian ministry, and the obligation and perpetuity of the ordinances of Baptism and the Lord's Supper. ... It being, however, distinctly declared that this brief summary is not to be received, in any formal or ecclesiastical sense, as a creed or confession, nor the adoption of it as involving an assumption of the right authoritative to define the limits of Christian brotherhood, but simply as an indication of the class of persons whom it is desirable to embrace within the Alliancé.
is also distinctly stated that no compromise of the views of any member, or sanction of those of others, on the points wherein they differ, is either required or expected; but that all are held free as to maintain and advocate their religious convictions, with due freedom and brotherly love at all times. It is not conceded that the Alliance should assume or aim at the character of a new ecclesiastical organization, claiming and exercising the functions of a Christian Church. Its simple and comprehensive object, it is strongly felt, may be successfully promoted without interfering with, or disturbing the order of, any branch of the Christian Church to which its members may respectively belong.

The Alliance thus lays claim to no doctrinal or legislative authority. In a pamphlet issued by the society itself this feature is thus explained: "Then it is an Alliance—not a union of Church organizations, much less an attempt to secure an outward uniformity—but the members of the Alliance are allies: they belong to different ecclesiastical bodies—yet all of the One Church. They are of different nations as well as of many denominations—yet all holding the Head, Christ Jesus. Unum corpus sumus in Christo. We are one body in Jesus Christ good for the common purpose of manifesting the real unity which underlies our great variety. We are free to hold our own views in regard to subsidiary matters, but all adhere to the cardinal principles of the Alliance as set forth in its Basis."

The Alliance arose at a time when the idea of unity was a popular one. During the years that had witnessed the beginning of the Oxford Movement in the Church of England, there progressed a movement in favour of union among men whose sympathies were diametrically opposed to those of the Tractarians, but who in their own way longed for a healing of the divisions and differences among Christians. In 1842 the Presbyterian Church of Scotland tried, though without success, to establish relations with other Protestant bodies. In England the progress of the Tractarian Movement led many distinguished Evangelical Non-conformists to desire a "great confederation of men of all Churches who were loyal in their attachment to Evangelical Protestantism in order to defend the faith of the Reformation" (Dale, History of Eng. Congregationalism, 637). At the annual assembly of the Congregational Union held in London, May 1842, John Angell James (1785–1859), minister of Craven Chapel, Birkbeck Street, London, proposed a plan which immediately developed into the Evangelical Alliance. He asked: "Is it not in the power of this Union to bring about by God's blessing, a Protestant Evangelical Union of the whole body of Christ's faithful followers who have at any rate adopted the voluntary principle?... Let us only carry out the principle of a great Protestant Union and we may yet have representatives from all bodies of Protestant Christians to be found within the circle of our own United Empire" (Congregational Magazine, 1842, 435-6). The first definite step towards this was taken by Mr. Patton, an American minister who proposed the sending of delegates from various bodies, with the result that a preliminary meeting was held at Liverpool in October, 1845, at which the basis of such a conference was arranged. On 19 Aug., 1846, at a meeting of eight hundred delegates, representing fifty denominations, held in the Freemasons' Hall, London, the Evangelical Alliance was founded. All who would accept the Basis were eligible as members, and the representatives of the various nations were recommended to form national organizations or branches, of which the British Organization, formed in 1846, was the first. The British Organization was independent and were at liberty to carry on their work in such a manner as should be most in accordance with the peculiar circumstances of each district. They have been formed in the United States, Germany, France, Switzerland, Holland, Sweden, Italy, Turkey, Australia, India, and several missionary countries. The French national branch abandoned the Basis in 1854 and substituted for it a wider form of a Unitarian character. The Alliance meets and acts as a whole only in the international and general conferences, which are held from time to time. The first of these was held in London, 1851, and has been succeeded by others as follows: Paris, 1855; Berlin, 1857; Geneva, 1861; Amsterdam, 1867; New York, 1873; Basle, 1879; Copenhagen, 1884; Florence, 1891; London, 1896 (Celebration of the Jubilee); London, 1907, on which occasion the Jubilee was observed.

These international conventions are regarded as of special value in the promotion of the aims of the Alliance. Another matter to which much importance is attached is the annual "Universal Week of Prayer", observed the first complete week in January of each year since 1846. At this time the Alliance invites all Christians to join in prayer, the programme being prepared by representatives of all denominations and printed in many different languages. The relief of persecuted Christians is another department of work in which the Alliance claims to have accomplished much. Finally, in 1865, the Alliance School was founded with headquarters at Berlin, under the direction of Pastor Kohler and Herr Warns, "to place before the students the history and doctrine of the Bible in accordance with its own teaching." The reports of the conferences claim considerable success, a claim which is best investigated. From its principles the Evangelical Alliance is necessarily opposed to the doctrine and authority of the Catholic Church; and Catholics, while sympathizing with the desire for union among Christians, realize that the unity by which we are made one in Christ is not to be won by such methods. The motto of the Alliance is Unum corpus sumus in Christo.

The Evangelical Alliance (London, 1847) and other reports of the International Conference of Congregationalists and Non-conformist religious bodies, as well as some pamphlets and tracts, are recommended.

Edwin Burton

Evangelical Church (in Prussia).—The sixteenth-century Reformers accused the Catholic Church of having adulterated the primitive purity of the Gospel by the addition of human ordinances and practices; consequently they designated themselves as "Evangelicals", or followers of the pure Gospel, in contradistinction to the un-evangelical followers of Roman traditions and institutions. Almost from the beginning the new Evangelical Church was split, first into two communions, the Lutheran and the Reformed, then into a multitude of sects which baffles the skill of statisticians. The cleavage arose through differences in the doctrine of Christ's presence in the Holy Eucharist. Luther taught the actual bodily presence of Christ in and with the elements, while denying Transubstantiation. Zwingli and the Swiss Reformers admitted only His spiritual presence. The Lutheran and the Reformed Churches form the two great branches of Evangelical Protestantism to which all the other divisions of Protestants are subordinate. The evangelical section of the Anglican Church stands midway between the High Church and the Lutheran Low Church. As a proper name with strictly limited meaning the designation "Evangelical Church" applies to a branch of the Protestant Church in Germany, formed in 1817 at the instance of King Frederick William III of Prussia, by a union of the Lutherans and the Reformed Churches of one and the same state.

History.—At the beginning of the nineteenth century religious life in Germany was at a low ebb. The Rationalism and Illuminism of the eighteenth century, openly encouraged by King Frederick II (the Great), had told severely on the supernatural life of the coun-
try, especially among the Protestants. The “rights of man”, proclaimed and ruthlessly carried out by the French Revolutionists, had found a welcome beyond the Rhine and well nigh superseded the rights of God. Luther and Calvin, whilst casting off the authority of the Holy Bible, but that of the Bible, and their followers adhered to several “Confessions of Faith” as binding on their conscience. These formulae were now overthrown as inimical to the rights of free inquiry, as the work of men little versed in exegesis and history, as unscientific and un-Protestant. Religious life, thus deprived of its staff, was rapidly withering away. Indifference and indolent indifference obliterated the differences among Protestant communities and threatened for a time to sweep away Christianity itself.

The Prussian State, owing its origin, growth, and importance to Protestantism, was not sympathetic to its Catholic subjects. The Rhine Province, Westphalia, and the Polish provinces were ever ready to manifest their affection for the Catholic rulers of Austria and even of France. The House of Hohenzollern was Calvinist, the majority of the nation was Lutheran. Frederick William III, King of Prussia (1797-1840), undertook to strengthen his rule and his country by forming a united religion, armed with a powerful army, efficient schools, and a flourishing trade. As early as 1798 he had expressed the hope of uniting the Reformed and the Lutheran Churches by means of a common “Agenda”, or ritual. He matured the idea on his visit to England in 1811, and made the first attempt towards that object with a union and a visit to James’s Palace in London. It was proposed to celebrate in Germany the third centennial jubilee of the Reformation, and in anticipation of this festival he issued on 27 Sept., 1817, the memorable declaration that the royal wish was that the separate Lutheran and Reformed Confessions in his dominions should a union into one Evangelical Christian Church, and that he would set an example in his own congregation at Potsdam by joining in a united celebration of the Lord’s Supper at the approaching festival of the Reformation. It was the intention to fuse the Reformed Church into the Lutheran, or vice-versa, but to establish one Evangelical Church, quickened with the spirit of the Reformation. The epithet “Protestant” was avoided as too partisan; prominence was given to the vague term evangélist,” Lutherans and Calvinists, whilst maintaining their own specific dogma, and form a single church under a single government and to present a united front to the Catholic Church.

The execution of the royal plan was entrusted to the provincial consistory, synods, and clergy generally. The Synod of Berlin and nearly all the clergy and laity of Prussia responded cordially to the decree. External union, facilitated by the prevailing religious indifference, was adopted in Nassau and in the Rhineland Palatinate (1818), in Baden (1821), in Rhenish Hesse (1825), in Württemberg (1827). But Saxony, Hanover, and Bavaria proper were too exclusively Lutheran, while Switzerland was too exclusively Reformed to join the Evangelical Church, and the Austrian Protestants also divided their allegiance between the Helvetic and the Augsburg Confessions. Instead of the former two Protestant bodies in Germany, there were now three - the Reformed Church, the Lutheran, and the united Evangelical. The Reformed was the weakest in numbers; and in doctrine its sole distinctive tenet was the rejection of Luther’s teaching concerning the Eucharist. Neither was the Lutheran flourishing; true Lutheranism existed only in the piou aspirations of a few theologians, pastors, and laymen. A uniform confession and liturgy is but a loose mass, unworthy to be called a church. Frederick William, therefore, attempted to consolidate his Evangelical Church by giving it a common liturgy composed by himself with the assistance of the court chaplains and a pious layman. This “Agenda” was made obligatory by royal order for the royal chapel, the cathedral of Berlin, and for the army; its general adoption was only recommended. It met with determined opposition as a measure oppressive of evangelical freedom, antiquated, leaning to “Romanish” practices, unsettling men’s consciences. None the less, by 1826 it had been adopted by 5343 churches out of 7782. The Protestant bishops Eylert and Neunander in Berlin were in favour of it and of the measures taken to enforce it. In 1828-29 the “Agenda” was issued in a revised form and made binding on all Protestant churches, some concessions being granted to Silesia, Saxony, Pomerania, and other parts of the kingdom, in deference to provincial uses. The Lutherans, fearing the loss of their confessional status, offered increased resistance. But the king was inexorable. Dr. Scheibl, professor in Breslau, and others of the Lutheran clergy who had refused to accept the new liturgy, were suspended from their offices. For several years a fierce persecution raged against the “Old Lutherans”, especially in Silesia and the Grand Duchy of Pozen. Preacher Hahn headed the troops which were sent to subdue the recusant vilagers by seizure of their goods, imprisonment, and all manner of violence. Minister Curschmann justified these measures on the principle that it was the Government’s duty to protect these blind sectarians against the consequences of their own folly. Thousands of the recusants were driven to emigrate to America and Australia. Not a voice was raised in their defence; the whole Liberal party lauded the energy of the Government. By a royal decree of 28 Feb., 1834, all Lutheran worship was declared illegal.

Frederick William III ruled his Church as summus episcopus, as a pope without a fixed deposit of faith to guard, or a hierarchy Divinely ordained to co-operate with him. The result was arbitrary in the rule, disorganization in the ruled. The king’s first royal decrees aimed at the conciliation of religion with the prevailing rationalistic philosophy, but the misfortunes of the year 1836 and the death of his beloved consort turned his mind more and more to the religion of revelation and mysteries. Considering himself the protector and leader of the Church in Germany he endeavoured to raise it from degradation by forcing unity upon it with a strong hand; unity not in dogma, for he disliked theologians “who pretend to be more Christian than Christ,” but in liturgy, wherein his sincere piety found sufficient satisfaction. In 1831 he surprised Superintendent Eylert with an essay on the power of the keys and the binding and loosing power in the Church; it contained an attempt to reintroduce auricular confession and the old old discipline. All his efforts, however, only ended in greater division. At his death, in 1840, the Church of his creation was still a chaos of warring sects, irresponsible to the brooding of the royal mind and restive to the royal arm.

Frederick William IV immediately set free the imprisoned Lutheran clergy and allowed the formation of separate congregations. The Old Lutherans now founded a “separate Lutheran Church” at Breslau under the direction of the lawyer Huschke. By the general concession of 1845 they were recognized as Dissenters with legal status but without pecuniary support from the State. The new sect was, however, wanting in union and cohesion; Diederich opposed Huschke and the Oberkirchecommissariat (supreme ecclesiastical council); frictions among members were of frequent occurrence. But few of the latter had left the established Evangelical Church to join the Old Lutherans; the majority remained at their posts for various reasons: within the Union they had a better opportunity for working its destruction than without; they were unwilling to sacrifice their incomes from the State and consequent independence from the financial support of their pa-
Theical part abandoned the revivalers of the doctrine by forming a Lutheran union. Theologically teaching in schools and preaching, although starting from the same roots, diverged in 1846. On the one side there were the partisans of a maior medius, endeavouring to find the golden mean between the Lutheran Confession of Faith and the Rationalism of the period. On the other side stood the Neo-Lutherans, who resisted the Lutheran doctrine of justification but rejected his invisible Church and universal priesthood; they defended a Divinely ordained hierarchy, and their teaching on sacrifice, orders, and sacraments nearly approached the Roman. This current runs parallel with Positivism in England; Hengstenberg (1814-1886) was its main support.

The General Synod of Berlin (2 June-29 Aug., 1846) had given rise to great hopes for the consolidation of the Union. It was resolved that the National Evangelical Church should have no other basis than the "consensus"; that the parish councils (Generalversammlung) and consistorial boards be the supreme centres of doctrine. The King of Prussia, in his "Kirchenzeitung," branded the synod as a Robber Synod, a denial of Christ; its decrees were not to be executed, because they failed to give expression to the "general Protestant consciousness." The consistory was reserved to increase existing dissensions. The most vital questions divided the leading minds: What was the territorial ruler by right the minnuss episcopus within his territory? Was it advisable to impose an evangelical church discipline, and if so, which? What part was to be conceded to laymen in the ministry of the Word of the sacraments? The very start of the controversy turned some practical men from words to works: the "Inner Mission" was originated (1848) by Wicheren, the founder of the Hamburg Boxhagen Institute, who had been a Roman Catholic priest, and who now established an institution which covers almost the whole field of Christian charity.

The preacher Friedner (d. 1861) instituted the order of Protestant deaconsesses, an imitation of the Catholic Sisters of Charity in the main objects of their life. Court preacher Zimmermann of Darmstadt founded the Gustav-Adolfs-Verein (1841-2), a union whose purpose was to support the evangelical missions in outlying districts (the Diakonie). The secondary object being to bind together all Protestants regardless of denominational differences, and to oppose a solid bulwark to the encroachments of Catholicism. The secondary object caused a split in the Union.

The short-lived movement of the "Protestant Friends," or "Free Light," was started in opposition to pietistic orthodoxies, and was also unfettered in teaching. Article 3 of the programme which they issued from the Moravian settlement at Gnadenau, in 1841, runs: "We hold it to be our right and our duty to submit to the test of our reason whatever is said or written." Ulrich, the man who had the gift of popular preaching, and Pastor Wisslicenus, a downright Rationalist, were the soul of this movement. The Berlin magistrates presented to King Frederick William IV an address conceived in the spirit of the Protestant Friends. They recommended him to grant the Church a free constitution in keeping with the needs of the time, and freedom of teaching limited only by public morality and the safety of the State. The king in person received his theological municipality, who paraded in fourteen state coaches before the royal castle. His piety was offended by the pretensions of the town councillors; in language not over gracious he told them to mind their own business. This happened 22 August, 1845; it marks the end of the Protestant Friends but also the beginning of the "Free Communities" (Freie Gemeinden). As formerly the right wing of the Church of Prussia continued to form Neo-Lutheran communities, so now the left wing withdrew to form dissenting rationalistic congregations. Their meetings were prohibited, but Rupp, Ulrich, and Wisslicenus resisted until by royal decree of 30 March, 1847, the new dissenters were allowed to separate from the Established Church without the loss of their civil rights; yet not without many vexatious formalities and expenses. The Free Communities, wanting internal cohesion to resist the royal disfavour and the ceaseless assaults of the dominant pietist clique, came to a speedy end.

The wave of liberal aspirations which rolled over Europe in 1848 left its mark on the Churches in Prussia. Paragraph 15 of the new Constitution read: "The Evangelical, and the Roman Catholic Church, and every other religious Society, orders and manages its own affairs independently (selbsstbeständig)." The Catholics had the benefit of this law until the beginning of the Kulturkampf, but among the Protestants, the ruling orthodox pietists, led by Hengstenberg, were determined that no freedom should be given to any other party. They evaded the law by a new theory, viz. the king, being the princeps principium ecclesiae, i.e. the chief member of the Church, rules it in his inherent right without any law. He made in fact Par. 15 makes the territorial lord quite independent of all State interference with his management of his own Church. The king himself did not favour this extraordinary doctrine. "Do I look like a bishop?" he said, pointing to his uniform and spurs. His ideal
was “the small independent Christian community managing its own affairs in the spirit of the universal Church” as in the days of the Apostles. The ideal of his minister von Raumer and of Hengstenberg was to train Prussian Unterkapenverein, i.e. a mentality fit for people under strict authority: believe in Luther, obey the ministers and ask no questions. The alliance of politics, Lutheran orthodoxy and pietism, royal cabinet-orders and counter-orders, general unsettledness and discontent, and five authorized churches instead of one—such was the result of the Union of 1817 in the fourth decade of its existence. Many attempts at a reform were done and the general revolution was made on the basis of practical charity, federation, opposition to Catholicism; church conferences were held in Berlin, Wittenberg, Eisenach, and elsewhere; the Gustav-Adolf-Verein and the Inner Mission were founded; the English Evangelical Alliance was invited to Berlin (1857). The result was greater discord and disruption.

William I, who as Regent, King of Prussia, and German Emperor reigned from 1858 to 1888, was an honest, single-minded, and industrious ruler. He had little sympathy with the Constitution and none at all with Hengstenberg’s agitation for enforcing Lutheran orthodoxy. He maintained the Constitution as the law of the land. But of the orthodox party he said in an address to his newly constituted ministry: “...in both Churches [Catholic and Protestant] all endeavours to make religion a cloak for politics must be strenuously opposed. In the Evangelical Church—we cannot deny—it an orthodoxy has found a footing which is in contradiction with the fundamental idea of the Union, and which has hypocrites in its train. That orthodoxy has impeded the work of the Union, has almost wrecked it. Now it is my will that the Union be maintained intact.”

Until 1866, however little was done to carry out William’s programme. It was impossible and unavoidable to dismiss all the clerical office-bearers and professors appointed for their opinions during the last eighteen years. The new minister of worship, von Muehler, was dominated by Queen Augusta, a highly educated woman devoted to orthodoxy, who suggested candidates for higher positions and insisted on their appointment (Hase, Neue Kirchengesch., 305). By her stood Hengstenberg and Hoffman, a fanatic Swabian. Together they worked for the preservation of the old regime. The Liberal party meanwhile found a common centre and a driving force in the Evangelical Church. The Protestant Union was founded in 1863 at Frankfurt-on-the-Main with the object of defeating both Protestant and Catholic orthodoxy. It spread at first but slowly, as it found little support among the still faithful masses and met with open hostility among the ruling classes. In 1896 it numbered 27,000 members.

After the war with Austria (1866) the acquisition of new territories laid upon William I the task of again regulating the religious situation of his kingdom. The Hengstenberg party proposed a measure which would have dealt a death-blow to the Union, viz. to divide the Supreme Church Council into three senates: a Lutheran, a Reformed, and a United, each with circumscribed territorial jurisdiction. But the Supreme Council refused to take this step and persuaded the King to leave to the new provinces their existing church constitutions as long as they chose to maintain them. This was done. To a deputation from the Hanover Consistory William I expressed his conviction that “the Evangelical Union was best furthered by free and unprejudiced hearts working towards unity in charity. The slight difficulties which arose locally, e.g. in Hesse, were probably due as much to faulty political as religious sentiment. The political unity of Germany achieved through the Franco-German War (1870–71) naturally aroused a strong desire for religious unity in the new empire. Bismarck started the Kulturkampf to bring the Catholics into line with the Protestant majority, but had to acknowledge himself vanquished in 1886. For the unification of the Protestants in the empire only one way was open: to abolish legal pressure and to allow the various religious bodies to work out their own salvation in their own way. The emperor, however, was loath to disturb them. Prussian and Catholic bishops and the head of the whole organization stands the Supreme Ecclesiastical Council (Oberkirchenrat) in Berlin, consisting of twelve regular members, one ecclesiastical vice-president, and a lay president. Under this council are eight provincial consistories, Königberg, Berlin, Stuttgart, Breslau, Posen, Magdeburg, Münster, and Colbenz; and under them the superintendents numbering 415. In the Evangelical State Church the two types of Protestantism are united; no distinction is made between Lutheran and Reformed either in the theological faculties or in the seminaries. Luther’s Bible is the only Bible in common use; the churches and the schools have no denominational character. The emperor, or as King of Prussia, is summus episcopus, which, however, is a title rather than an office. In matters of faith the royal pronouncements neither claim, nor are they credited with, infallibility; and matters of administration are left to the councils and the diocesan estates.

The doctrinal status of the United Evangelical Church in Germany may be fitly described as Modernism in the sense of the Encyclical “Pascendi”. The simple country folk, who practise more than they think, still follow the religion of older generations, but the towns are either openly or secretly hostile to all supernatural religion. Owing to the principle sanctioned in 1648 “that all the subjects must follow the religion of their ruler” the population, from a religious point of view, is less mixed in Germany than in England or America. Numerically, the two confessions are in the same proportion as they were 300 years ago: two Catholics to one Catholic. Conversions from one religion to the other almost balance with a slight excess in favour of Protestantism. This is entirely due to mixed marriages and temporal allurements. The efforts of proselytism as the Gustav-Adolf-Verein, the Protestant and the Evangelical Unions, show but poor results. Statistics from the census of 1900 are as follows: Evangelical Church in Prussia: 8,558 parishes with 17,246 churches, etc., 10,071 clergy, and 21,517,577 adherents against 12,110,229 Catholics, which gives the proportion of 5 Catholics to 9 Protestants. For the whole German Empire the proportion is 7 Catholics to 12 Protestants, i.e. 20,321,411 to 35,231,104.

J. WILHELM.

**Evangelical Counsels.** See **Counsellors, Evangelical**.

**Evangelist.**—In the New Testament this word, in its substantive form, occurs only three times: Acts, xxxii, 8; Eph., iv, 11; II Tim., iv, 5. It seems to indicate not so much an order in the early ecclesiastical hierarchy as a function. The Apostles, indeed, were evangelists, inasmuch as they preached the Gospel (Acts, viii, 5; xii, 17; Philip likewise was both a deacon (Acts, vi, 5) and an evangelist (Acts, viii, 5–40; xxi, 8). In like manner was St. Timothy exorted by St. Paul to do the work of an evangelist (II Tim., iv, 5).
EVE

The first account of the creation (Gen. i, "P") sets forth the creation of mankind in general, and states simply that they were created male and female. The second narrative (Gen. ii, "J") is more explicit and detailed. God is represented as forming an individual man from the slime of the earth, and breathing into his nostrils the breath of life. In like manner the creation of the first woman and her relation to man is described with picturesque and significant imagery. In this account, in which the plants and animals appear on the scene only after the creation of man, the loneliness of the latter (Gen. ii, 18), and his failure to find a suitable companion among the animals (Gen. ii, 20), are set forth as the reason why God determines to create for man a companion like unto himself. He causes a deep sleep to fall upon him, and taking one of his ribs, forms it into a woman, who, when she is brought to him, is recognized at once as bone of his bone and flesh of his flesh. A discussion of the arguments in favor of the historical, or the more or less allegorical character of this narrative would be beyond the scope of the present notice. Suffice it to say that the biblical account has always been looked upon by pious commentators as embodying, besides the fact of man's origin, a deep, practical and many-sided significance, bearing on the mutual relationship established between the sexes by the Creator. Thus, the primitive institution of monogamy is implied in the fact that one woman is created for one man. Eve, as well as Adam, is made the object of a special creative act, a circumstance which indicates her natural equality with him, while on the other hand her being taken from his side implies not only her second-order role in the conjugal state (I Cor. xi, 9), but also emphasizes the intimate union between husband and wife, and the dependence of the latter on the former.

"Wherefore a man shall leave father and mother, and shall cleave to his wife: and they shall be two in one flesh."

The innocence of the newly created couple is clearly implied in the following verses. After the fall, God immediately proceeds to relate how they soon acquired, through actual transgression, the knowledge of good and evil, and with it the sense of shame which had been previously unknown to them. In the story of the Fall, the original cause of evil is the serpent,
EVE 647

which in later Jewish tradition is identified with Satan (Wisdom, ii, 24). He tempts Eve presumably as the weaker of the two, and she in turn tempts Adam, who yields to her seduction. Immediately their eyes are opened, but in an unexpected manner. Shame and remorse take possession of them, and they seek to hide from the face of the Lord.

For her share in the transgression, Eve (and woman-kind after her) is sentenced to a life of sorrow and travail, and to be under the power of her husband. Doubtless this last did not imply that the woman’s essential condition of equality with man was altered, but the sentence expresses what, in the nature of things, was bound to follow in a world dominated by sin and its consequences. The natural dependence and subjection of the weaker party was destined inevitably to become something little short of slavery. But if woman was the occasion of man’s transgression and fall, it was also decreed in the Divine counsels, that she was to be instrumental in the scheme of restoration which God already promises while in the act of pronouncing sentence upon the serpent. The woman has suffered defeat, and infinitely painful are its consequences, but henceforth there will be enmity between her and the serpent, between her seed and his seed, until through the latter in the person of the future Redeemer, who will crush the serpent’s head, she will again be victorious.

Of the subsequent history of Eve the Bible gives little information. In Gen., iv, 1, we read that she bore a son whom she named Cain, because she got him (נָתַן—to acquire, possess) through God—this at least is the most plausible interpretation of this obscure passage. Later she gave birth to Abel, and the narrative does not record the birth of another child until after the slaying of Abel by his elder brother, when she bore him a son and called his name Seth; saying: “God hath given me [הָיָה]—put or appoint another seed, for Abel whom Cain slew.” Of daughters no specific mention is made in this account, but in Gen., v, 4 (“P”) we find the general statement that “the days of Adam, after he begot Seth, were eight hundred years: and he begot sons and daughters.”

Eve is mentioned in the Book of Tobias (viii, 8; Sept., viii, 6) where it is simply affirmed that she was given to Adam for a helper; in II Cor., xi, 3, where reference is made to her seduction by the serpent, and in I Tim., ii, 13, where the Apostle enjoins submission and obedience of women. In the apocryphal story of “Adam and Eve” first formed; then Eve. And Adam was not seduced, but the woman being seduced, was in the transgression.”

As in the case of the other Old Testament personages, many rabbinical legends have been connected with the name of Eve. They may be found in the “Jewish Encyclopedia,” s. v. (see also, Adam), and in Vouzouros, “Dictionnaire de la Bible,” I, art. “Adam.” They are, for the most part, puerile and fantastic, and devoid of historical value, unless in so far as they serve to illustrate the mentality of the later ages, their writers, and the unreliability of the “traditions” derived from such sources, though they are sometimes appealed to in critical discussions.

JAMES F. DRISCOLL

Eve of a Feast (or Vigil; Lat. Vigilia; Gr. παρακλήσις).—In the first ages, during the night before a holy feast, a ceremony of the faithful assembled in the place or church where the feast was to be celebrated and prepared themselves by prayers, readings from Holy Writ (now the Offices of Vespers and Matins), and sometimes also by hearing a sermon. On such occasions, as on fast days in general, Mass also was celebrated in the evening, before the Vespers of the following day. Towards morning the people dispersed to the streets and houses near the church, to wait for the solemn services of the forenoon. This vigil was a regular institution of Christian life and was defended and highly recommended by Augustine and St. Jerome (see Pfélieux, Aelterge Heilige des Breviergetes, pp. 223 sq.). The morning intermission gave rise to grave abuses; the people caroused and danced in the streets and halls around the church (Durandus, “Rat. Div. off.,” VI, 7). St. Jerome speaks of these improprieties (Epist. ad Riparium).

As the feasts multiplied, the number of vigils was greatly reduced. But the abuses could be stopped only by abolishing the vigils. And where they could not be abrogated at once and entirely they were to begin in the afternoon. A synod held at Rouen in 1231 prohibited all vigils except those before the patronal feast of a church (Hefele, “Concilien des ecclésiastiques,” V, 1007). In place of nocturnal observances, the bishops introduced for the laity a fast on the day before the feast, which fast Durandus (loc. cit.) calls “jejunium dispensations.” Honorus of Auxerre, in 1152 (Gemma Animae, III, 6), and others explain in this way the Libri, which existed, however, after the abolition of the nocturnal meetings. The fast on Christmas Eve is mentioned by Theophilus of Alexandria (d. 412), that before the Epiphany by St. John Chrysostom (d. 407), that before Pentecost by the Sacrament of St. Leo I. Pope Nicholas, in the Liber Pontificalis, answers to the Bulgarians, of the fast on the eves of Christmas and of the Assumption. The Synod of Erfurt (932) connects a fast with every vigil. The very fact that the people were not permitted to eat or drink before the services of the vigil (Vespers and Matins) were ended, after the vigil was celebrated, explains the exceptions of which the councils and writers speak.

The Synod of Seligenstadt (1022) mentions vigils on the eves of Christmas, Epiphany, the feasts of the Apostles, the Assumption of Mary, St. Laurence, and All Saints, besides the fast of two weeks before the Nativity of St. John. After the eleventh century the fast, Office, and Mass of the nocturnal vigil were transferred to the day before the feast; and even now the liturgy of Holy Saturday (vigil of Easter) shows, in all its parts, that originally it was not kept on the morning of Saturday, but during Easter Night. The day before the feast was henceforward called a similar celebration before the high feasts exists also in the Orthodox (Greek) Church, and is called πανοικία or Νυκτονια. In the Occident only the older feasts have vigils; even the feasts of the first class introduced after the thirteenth century (Corpus Christi, the Sacred Heart) have no vigils, except the Immaculate Conception, which Pope Leo XIII (30 Nov. 1879) singled out for this distinction. The number of vigils in the Roman Calendar besides Holy Saturday is seventeen, viz., the eves of Christmas, the Epiphany, the Ascension, Pentecost, the Immaculate Conception, the Assumption, the eight feasts of the Apostles, St. John the Baptist, St. Laurence, and All Saints. Some dioceses and religious orders have particular vigils, e. g. the Servites, on the Saturday next before the feast of the Seven Dolors of Our Lady; the Carmelites, on the eve of the feast of Mount Carmel. In the United States only four of these vigils are fast days: the vigils of Christmas, Pentecost, the Assumption, and All Saints. The vigils of Christmas, the Epiphany, and Pentecost are called vigiliae majores; they have a proper Office (semi-double), and the vigil of Christmas is kept as a double feast. The rest are vigiliae minores, or communes, and have the ferial office. On the occasion of the reform of the Brevalary, in 1568, a homily on the Gospel of the vigil was added, an innovation not accepted by the Cistercians. If a vigil falls on a Sunday, according to the present rubrics, it is kept on the preceding Saturday; during the Middle
Evesham Abbey, founded by St. Egwin, third Bishop of Worcester, about 701, in Worcestershire, England, and dedicated to the Blessed Virgin. The founder’s charter of endowment, dated 714, records that a herdsman of the bishop, named Evoes, was one day favoured with a vision of Our Lady. St. Egwin, being informed, visited the spot and there the Mother of God appeared to him also, commanding him to erect in that place a monastery in her honour for Benedictine monks. The bishop at once set about the task, being liberally assisted in the work by Ethelred and Kenred, successive kings of Mercia, and others. The derivation of the name Evesham is accounted for by the above legend. It is stated, though contemporary charters make the fact doubtful, that St. Egwin resigned his see in order to become first abbot of the new foundation, which he ruled until his death in 717. He was buried in the abbey church and his shrine, beautified by subsequent abbots, became in after years one of the richest and most popular in the West of England. Many miracles are recorded as having taken place there. In 941, after the havoc wrought by the Danes, the few remaining monks who had survived were ejected and secular canons installed in their place. Their possession of the abbey, however, did not last long, for in 969 St. Dunstan and St. Ethelwold, then engaged upon their great reform of the English monasteries, restored the Benedictines to their own. A second expulsion occurred in 977 and it was not until 1014 that the monks effected their final return. With the Norman conquest and the consolidation of the kingdom of England, Evesham grew and prospered, and enjoying royal favour became one of the most important abbeys of Black Monks in the country, so much so, indeed, that the jealousy of the bishops of Worcester was aroused.

As in the case of many other monasteries they claimed rights of visitation and diocesan authority over the monks. The dispute continued for a long time, but eventually the exemption from episcopal jurisdiction, originally obtained by St. Egwin, was confirmed by Rome in 1296. In this as in other matters, the internal history of the abbey is recorded in the “Evesham Chronicle”, differs only in detail from that of any other great Benedictine house of the same period. A succession of worthy abbots, seldom broken, guided its fortunes wisely and religiously through the eight centuries of its existence. The use of abbatial pontificalia was obtained in 1160 by Abbess Adam from the reigning pope. At the height of its prosperity the abbey was one of the largest and most stately in England. It had two dependent “cells”—Penwortham, in Lancashire, and Aleseter, in Warwickshire—besides another in Denmark; the abbots were also the patrons of seventeen neighbouring parishes; they held a seat in the House of Lords; and they exercised civil jurisdiction within the bounds of the monastic territory. The great abbey church, which, besides the magnificent shrine of St. Egwin, contained fifteen altars, was commenced in the eleventh century by Abbot Walter and gradually completed by several subsequent abbots. It was cruciform, with a central tower, and was nearly 300 feet in length. The previous campaign having fallen, after being struck by lightning, a magnificent bell tower, still standing, was built by Abbot Clement Lichfield about 1533.

Within the abbey precincts and under the very shadow of its minster, were two parish churches, erected by the monks for the use of the people of the town which had grown up around its walls. That of St. Lawrence dates from the thirteenth century and that of All Saints is of a century later. The last of the great abbots of Evesham, Clement Lichfield, who reigned from 1514 to 1539, added chantries to both of these churches. Unwilling to yield to the rapacity of Henry VIII, when the suppression of the monasteries was threatening, he resigned his abbacy, acting, it is said, at Cromwell’s suggestion. His unworthy successor was Philip Hawford, who surrendered the abbey for £3,240, and afterwards became first Protestant Dean of Worcester, in which cathedral his tomb may still be seen. The revenues of the abbey at the time of its suppression are given by Dugdale as £1,215. The demolition of the buildings commenced almost immediately, and the ruins became, as in the case of so many others, a stone quarry for the neighbourhood. Besides the two parish churches and the bell tower, only a gateway, a cloister arch, the almonry, and a few other isolated fragments remain intact to show what man-
EVIL

ner of building the once glorious abbey of Evesham was.

EVIL

Evil, in a large sense, may be described as the sum of the opposition, which experience shows to exist in the universe, to the desires and needs of individuals; when one considers among human beings at least, the suffering in which life abounds. Thus evil, from the point of view of human welfare, is what ought not to exist. Nevertheless, there is no department of human life in which its presence is not felt; and the discrepancy between what is and what ought to be has always called for explanation in the account which mankind has sought to give of itself and its surroundings.

For this purpose it is necessary (1) to define the precise nature of the principle that imparts the character of evil to so great a variety of circumstances, and (2) to ascertain, as far as may be possible, the source for its power.

With regard to the nature of evil, it should be observed that evil is of three kinds—physical, moral, and metaphysical. Physical evil includes all that causes harm to man, whether by bodily injury, by thwarting his natural desires, or by preventing the full development of his powers, either in the order of nature directly, or through the various social conditions under which mankind naturally exists. Physical evils directly due to nature are sickness, accident, death, etc. Poverty, oppression, and some forms of disease are instances of evil arising from imperfect social organization. Evil suffering, suppression, disappointment, and remorse, and the limitation of intelligence which prevents human beings from attaining to the full comprehension of their environment, are congenital forms of evil which vary in character and degree according to natural disposition and social circumstances.

By moral evil are understood the deviation of human volition from the prescriptions of the moral order and the action which results from that deviation. Such action, when it proceeds solely from ignorance, is not to be classed as moral evil, which is properly restricted to the motions of thought from which the conscience disapproves. The extent of moral evil is not limited to the circumstances of life in the natural order, but includes also the sphere of religion, by which man’s welfare is affected in the supernatural order, and the precepts of which, as depending ultimately upon the will of God, are of the strictest possible obligation (see Sin).

The obligation to moral action in the natural order is, moreover, generally believed to depend on the motives supplied by religion; and it is at least doubtful whether it is possible for moral obligation to exist at all apart from a supernatural sanction.

Metaphysical evil is the limitation by one another of the various component parts of the natural world. Through this mutual limitation natural objects are for the most part prevented from attaining to their full or ideal perfection, whether by the constant pressure of physical conditions, or by sudden catastrophes. Thus, animal and vegetable organisms are variously influenced by climate and other natural causes; predatory animals depend for their existence on the destruction of life; nature is subject to storms and convulsions, and its order depends on a system of reproduction and renewal due to the interaction of its constituent parts. It is evident that metaphysical evil does not, like the other two kinds, necessarily connote suffering. If animal suffering is excluded, no pain of any kind is caused by the inevitable limita-

EVIL

tions of nature; and they can only be called evil by analogy, and in a sense quite different from that in which the term is applied to human experience. Clarke, moreover, has aptly remarked (Correspondence with Leibnitz, letter ii) that the apparent disorder of nature is really no disorder, since it is part of a definite scheme, and precisely fulfills the intention of the creator; it may therefore be counted as a relative perfection rather than an imperfection. It is, in fact, only by a transference to irrational objects of the subjective ideals and aspirations of human intelligence, that the “evil of nature” can be called evil in any sense and in any degree. The nature and degree of pain in the lower animals is very obscure, and in the necessary absence of data it is difficult to say whether it should rightly be classed with the merely formal evil which belongs to inanimate objects, or with the suffering of human beings. The latter is generally held in ancient times, and may perhaps be referred to the anthropomorphic tendency of primitive minds which appears in the doctrine of metempsychosis. Thus it has often been supposed that animal suffering, together with many of the imperfections of animate nature, was due to the fall of man, with whose welfare, as the prime chief part of the universe, it is bound up the fortunes of the rest (see Theop. Antioc., Ad Autolyc., II; cf. Gen. iii, and I Cor. ix). The opposite view is taken by St. Thomas (I, Q. xxvi, a. I, 2). Descartes supposed that animals were merely machines, without sensation or consciousness; he was therefore followed by Malebranche and Clarke generally. Leibniz grants sensation to animals, but considers that mere sense-perception, unaccompanied by reflexion, cannot cause either pain or pleasure; in any case he holds the pain and pleasure of animals to be far less acute than those of human beings, and capable in degree to those resulting from reflex action in man (see also Maher, Psychology, Supp. 3. A., London, 1903).

It is evident again that all evil is essentially negative and not positive; i.e. it consists not in the acquisition of anything, but in the loss or deprivation of something necessary for perfection. Pain, which is the test or criterion of physical evil, has indeed a positive, though purely subjective existence as a sensation or emotion; but its evil quality lies in its disturbing effect on the sufferer. In like manner, the perverse action of the will, upon which moral evil depends, is more than a mere negation of right action, implying as it does the positive element of choice; but the morally evil character of wrong action is constituted not by the element of choice, but by its rejection of what right reason requires. Thus Origen (In Joh., ii, 7) defines evil as ἀρέτας; the Pseudo-Dionysius (De. Div. Nom. iv) as the non-existent; Maimonides (Dux, plex, 3. iii, 10) as “privato boni aleiquest”; Albertus Magnus (adopting St. Augustine’s phrase) attributes evil to “alia causa deficiens” (Summa Theol., I, xi, 4); Schopenhauer, who held pain to be the positive and normal condition of life (pleasure being its partial and temporary absence), nevertheless made it depend upon the failure of human desire to obtain fulfillment — the wish is in itself pain —. Thus it will be seen that evil is not a real entity; it is relative. What is evil in some relations may be good in others; and there is no form of existence which is exclusively evil in all relations. Hence it has been thought that evil cannot truly be said to exist at all, and is really nothing but a “lesser good.” But this opinion seems to leave out of account the reality of human experience. Though the mere cause may give pain to the suffering, and pleasure to another, pain and pleasure, as sensations or ideas, cannot be mutually exclusive. No one, however, has attempted to deny this very obvious fact; and the opinion in question may perhaps be understood as merely a paradoxical way of stating the relativity of evil.
There is practically a general agreement of authorities as to the nature of evil, some allowance being made for varying modes of expression depending on a corresponding variety of philosophical presuppositions. But on the question of the origin of evil there has been a considerable diversity of opinion. The problem is strictly a metaphysical one; i.e., it cannot be solved by a mere experimental analysis of the actual conditions from which evil results. The question, which Schopenhauer has called "the pune-tum pruriens of metaphysics," is concerned not so much with the various detailed manifestations of evil in nature, as with the hidden and underlying cause which has made these manifestations possible or necessary; and it is at once evident that enquiry in a region so obscure must be attended with great difficulty, and that the conclusions reached must, for the most part, be of a provisional and tentative character. No systematic philosophy has ever succeeded in escaping from the obscurity in which the subject is involved; but it is not too much to say that the Christian solution offers, on the whole, fewer difficulties, and approaches more nearly to completeness than any other. The question may be stated to the following effect: Admitting that evil consists in a certain relation of man to his environment, or that it arises in the relation of the component parts of the totality of existence to one another, how comes it that though all are alike the results of a universal cosmic process, this universal agency is perpetually at work; or, by what means? Is evil due only to a deficiency, or is it a principle, which is itself, interacting into itself, developing its own efforts in the mutual hostility of its progeny? Further, admitting that metaphysical evil in itself may be merely nature's method, involving nothing more than a continual redistribution of the material elements of the universe, human suffering and wrongdoing will stand out as essentially opposed to the general scheme of natural development, and are scarcely to be reconciled in thought with any conception of unity or harmony in nature. To what, then, is the evil of human life, physical and moral, to be attributed as its cause? But when the universe is considered as the work of an all-benevolent and all-powerful Creator, a fresh element is added to the problem. If God is all-benevolent, why did He cause or permit suffering? If He is all-powerful, He can be under no necessity of creating or permitting it; and on the other hand, if He is under any such necessity, He cannot be all-powerful. Again, if God is both all-powerful and also omnipotent, how can He permit the existence of moral evil? We have to enquire, that is to say, how evil has come to exist, and what is its special relation to the Creator of the universe.

The solution of the problem has been attempted by three different methods.

I. It has been contended that existence is fundamentally evil; that evil is the active principle of the universe, and good no more than an illusion, the pursuit of which serves to induce the human race to perpetuate its own existence (see Pessimism). This is the fundamental tenet of Buddhism (q.v.), which regards happiness as unattainable, and holds that there is no way of escaping from misery by ceasing to exist otherwise than in the impersonal state of Nirvana. The origin of suffering, according to Buddha, is inherent in the nature of this world; its cause was partly the necessary imperfection of material and created existence, and partly the action of the human will (Timæus, xlii; cf. Phadoc, ix). With Aristotle, evil is a necessary aspect of the constant change of matter, and has in itself no real existence (Metaph., ix, 9). The Stoics conceived evil in a somewhat similar manner, as due to necessity; the immanent Divine power harmonizes the evil and good in a changing world. Moral evil proceeds from the folly of mankind, not from the Divine will, and is overruled by it to a good end. In the hymn of Cleanthes to Zeus (Stat. Exp., I, p. 30) may be perceived an approach to the doctrine of Leibniz, as to the nature of evil and goodness of the world. "Nothing is done without thee in earth or sea or sky, save what evil men commit by their own folly; so thou hast fitted together all evil and good in one, that there might be one
EVIL

reasonable and everlasting scheme of all things." In the mystical system of Eckhart (d. 1329), evil, sin included, has its place in the evolutionary scheme by which all proceeds from and returns to God, and contributes, both in the moral order and in the physical, to the accomplishment of the Divine purpose. Eckhart's mystic or pantheistic tendencies seem to have obscured for him many of the difficulties of the subject, as has been the case with those by whom the same tendencies have since been carried to an extreme conclusion.

Christian philosophy has, like the Hebrew, uniformly attributed moral and physical evil to the action of created free will. Man has himself brought about the evil from which he suffers by transgressing the law of God, on obedience to which his happiness depended. Evil is in created things under the aspect of mutability, and possibility of defect, not as existing per se: and the errors of mankind, mistaking the true conditions of its own well-being, have been the cause of moral and physical evil (Dion. Areop., De Div. Nom., iv, 31; St. Aug., De Civ. Dei, xii). The evil from which man suffers is, however, the condition of good, for the sake of which it is permitted. Thus, "God judged it better to bring good out of evil than to suffer no evil to exist." (St. Aug., Enchirid., xxvii). Evil contributes to the perfection of the universe, as shadows to the perfection of a picture, or harmony to that of music (De Civ. Dei, xii). Again, the excellence of God's works in nature is insisted on as evidence of the Divine wisdom and goodness, and no evil is directly caused. (Greg. Nyss., De opif. hom.) Thus Boethius asks (De Consol. Phil., I, iv) Who can be the author of good, if God is the author of evil? As darkness is nothing but the absence of light, and is not produced by creation, so evil is merely the defect of goodness. St. Augustine (Hexæm., Hom. ii) points out the educative purposes served by evil; and St. Augustine, holding evil to be permitted for the punishment of the wicked and the trial of the good, shows that it has, under this aspect, the nature of good, and is pleasing to God, not because of what it is, but because of where it is; i. e. as the penal and just consequence of sin (De Civ. Dei, xi, xii, De Vera Relig. xlv). Lactantius uses similar arguments to oppose the dilemma, as to the omnipotence and goodness of God, which he puts into the mouth of Epiciurus (De Ira, Dei, xii). St. Augustin (Monologium) connects evil with the partial manifestation of good by creation; its fullness being in God alone.

The features which stand out in the earlier Christian explanation of evil, as compared with non-Christian dualistic theories are thus (1) the definite attribution to God of absolute omnipotence and goodness, notwithstanding His permission of the existence of evil; (2) the assignment of a moral and retributive cause for suffering in the sin of mankind; and (3) the unhesitating assertion of the beneficence of God's purpose in permitting evil, together with the full admission that He could, had He so chosen, have prevented it (De Civ. Dei, xiv). How God's permission of the evil which He foreknew and could have prevented is to be reconciled with His goodness, is not fully considered; St. Augustine states the question in forcible terms, but is content by way of answer to follow St. Paul, in his doctrine of the unsearchableness of the Divine judgments (Contra Julianum, I, 48).

The same general lines have been followed by most of the modern attempts to account in terms of Theism for the existence of evil. Descartes and Malebranche held that the world is the best possible for the purpose for which it was created, i. e. for the manifestation of the attributes of God. If it had been more perfect in detail, it would have been less fitted as a whole for the attainment of this object. The relation of evil to the will of a perfectly benevolent Creator was elaborately treated by Leibniz, in answer to Bayle, who had insisted on the arguments derived from the existence of evil against that of a good and omnipotent God. Leibniz founded his views mainly on those of St. Augustine and St. Thomas, and deduced from them his theory of Optimism (q. v.). According to it, the universe is the best possible; but metaphysical evil, or imperfection, is necessarily involved in the whole of creation, and it may be supposed that the evil it contains is necessary for the existence of other regions unknown to us. Voltaire, in "Candide," undertook to throw ridicule upon the idea of the "best possible world"; and it must be admitted that the theory is open to grave objections. On the one hand, it is scarcely consistent with belief in the Divine omnipotence; and on the other, it fails to account for the permission (or indirect authorship) of evil by a good God, to which Bayle had specially taken exception. We cannot know that this world is the best possible; and if we could, why, since it may contain so much that is evil, should a perfectly good God have created it? It may be urged, moreover, that there can be no degree of finite goodness which is not susceptible of increase by omnipotence, without ceasing to fall short of infinite perfection.

Leibniz has been more or less closely followed by many who have since treated the subject from the Christian point of view. These have, for the most part, emphasized the evidence in creation of the wisdom and goodness of its Author, after the manner of the Book of Job, and have been content to leave undiscussed the reason for the fall of man, by Hamartia, in which evil is unavoidable. Such was the view of King (Essay on the Origin of Evil, London, 1732), who insisted strongly on the doctrine of the best possible world; of Cudworth, who held that evil, though inseparable from the nature of imperfect beings, is largely a matter of men's own fancy and opinions, rather than of the reality of things, and therefore not to be made the ground of accusation against Divine Providence. Derham (Physico-Theology, London, 1712) took occasion from an examination of the excellence of the Creator to commend an attitude of humility and trust towards the Creator of "this elegant, this well-contrived, well-formed world, in which we find everything necessary for the sustentation, use and pleasure both of man and every other creature here below; as well as some whips, some rods, to scourge us for our sins." Priestley held a doctrine of absolute Determinism, and consequently attributed evil solely to the Divine will; which, however, he justified by the good ends which evil is providentially made to subserve (Doctrine of Philosophical Necessity, Birmingham, 1782). Clarke, again, called special attention to the evidence of method and design, which bear witness to the benevolence of the Creator, in the midst of apparent moral and physical disorder. Rosmini, closely following Malebranche, pointed out that the question of the possibility of a better world than this has really no meaning; any world created by God must be the best possible in relation to its special purpose, apart from which neither goodness nor badness can be predicated of it. Mamiani also supposed evil to be inseparable from the finite, but that it tended to disappear as the finite approached its final union with the infinite.

III. The third way of conceiving the place of evil in the general scheme of existence is that of those systems of Monism, by which evil is viewed as merely a mode in which certain aspects or moments of the development of nature are apprehended by human consciousness. In this view there is no distinctive principle to
which evil can be assigned, and its origin is one with that of nature as a whole. These systems reject the specific idea of creation; and the idea of God is either rigorously excluded, or identified with an impersonal principle, immanent in the universe, or conceived as a material being, or the origin of nature is due to the fact viewed from the standpoint of Materialism or from that of Idealism, is the one ultimate reality. The problem of the origin of evil is thus merged in that of the origin of being. Moral evil, in particular, arises from error, and is to be gradually eliminated, or at least minimized, by improved knowledge and the conditions of human welfare (Meliorism). Of this kind, on the whole, were the doctrines of the Ionic Hylozoists, whose fundamental notion was the essential unity of matter and life; and on the other hand, also, of the Eleatics, who found the origin of all things in abstract being. The Atomists, Leucippus and Democritus, held what may be called a doctrine of materialistic Monism. This doctrine, however, found its first complete expression in the philosophy of Epicurus, which explicitly rejected the notion of any external influence upon nature, whether of “fate”, or of Divine predetermination, according to the Epicurean Literature of Rerum Natura, II, line 180) the existence of evil was fatal to the supposition of the creation of the world by God:

Nequaquam nobis divinitus esse creatum

Naturam mundi, quo tanta est prælita culpa

Gioveno, who made God the immanent cause of all things, acting by an internal necessity, and producing the relations considered evil by mankind. Hobbes regarded God as merely a corporeal first cause: and applying his theory of civil government to the universe, defended the existence of evil by simple assertion of the absolute power to which it is due—a theory which is little else than a statement of materialistic Determinism in terms of social relations. Spinoza united matter and spirit in the notion of a single substance, to which he attributed both thought and extension; error and imperfection were the necessary consequence of the order of the universe. The Hegelian Monism, which reproduces many of the ideas of Eckhart, and is adopted in its main features by many different systems of recent origin, gives to evil a place in the unfolding of the Idea, in which both the origin and the inner reality of the universe are to be found. Evil is a necessary discord born to the general good. Huxley was content to believe that the ultimate causes of things are at present unknown, and may be unknowable. Evil is to be known and combatted in the concrete and in detail; but the Agnostics, who are discordant in evil, seems to be a transcendental cause, and confines itself to experimental facts. Haeckel advances a dogmatic materialism, in which substance (i.e. matter and force) appears as the eternal and infinite basis of all things. Professor Metchnikoff, on similar principles, places the cause of evil in the “dis-harmony of the forms” to which prevail in nature, which may perhaps be ultimately removed, for the human race at least, together with the pesimistic temper arising from them, by the progress of science. Bourdeau has asserted in express terms the futility of seeking a transcendental, or supernatural origin for evil, and the necessity of confining the view to natural, accessible, and determinable causes (Revue Philosophique, I, 1900).

The recently constructed system, or method, called Pragmatism, has this much in common with Pessimism, but it regards evil as an actually unavoidable part of that human experience which is in principle identical with truth and reality. The world is what we make it; evil tends to diminish with the growth of experience, and may finally vanish; though, on the other hand, there may always remain an irreducible minimum of evil. The origin of evil is, like the origin of all things, inexplicable; it cannot be fitted into any theory of the design of the universe, simply because no such theory is possible. “We cannot by any possibility comprehend the character of a cosmic mind whose purposes are fully revealed by the strange and terrible details that we find in the universe; and the world’s particulars—the mere word design, by itself, has no consequences and explains nothing.” (James, Pragmatism, London, 1907. Cf. Schiller, Humanism, London, 1907.) Nietzsche holds evil to be purely relative, and in its moral aspect at least, a transitory and non-essential phenomenon. With him, mankind in its present state, is “the animal not yet properly adapted to his environment”. In this mode of thought the individual necessarily counts for comparatively little, as being merely a transient manifestation of the cosmic force; and the social aspects of humanity are those under which its pains and shortcomings are mostly considered, with a view to their amelioration. Hence, the various forms of Socialism; the idea conceived by Nietzsche of a totally new, though as yet undefined, form of social morality, and of the constitution and mutual relations of classes; and the so-called religions in the moral and scientific literature tending to the general good. The first example of such religions was that of Auguste Comte, who, upon the materialistic basis of Positivism, founded the “religion of humanity”, and professed to substitute an enthusiasm for humanity as the motive of right action, for the natural religion.

In the light of Catholic doctrine, any theory that may be held concerning evil must include certain points bearing on the question that have been authoritatively defined. These points are (1) the omnipotence, omniscience, and absolute goodness of the Creator; (2) the freedom of the will; and (3) that suffering is the penal consequence of wilful disobedience to the law of God. A complete account may be gathered from the teaching of St. Thomas Aquinas, by whom the principles of St. Augustine are systematised, and to some extent supplemented. Evil, according to St. Thomas, is a privation, or the absence of something which belongs properly to the nature of the creature. (I, Q. xiv, a. 10; Q. xlix, a. 3; contra Gentiles, III, x, 8). There is therefore no “sumnum malum”, or positive source of evil, corresponding to the “sumnum bonum”, which is God (I, Q. xxvii, a. 3; C.G., xliii, q. 13; De Malo, I, 14). Evil being not “from without” only “ens rationis” i.e. it exists not as an objective fact, but as a subjective conception; things are evil not in themselves, but by reason of their relation to other things, or persons. All realities (entitas) are in themselves good; they produce bad results only incidentally; and consequently the ultimate cause of evil is fundamentally good, as well as the objects in which evil is found (I, Q. xliii; cf. I, Q. v, 3; De Malo, I, 3). Thus the Manichaean dualism has no foundation in reason.

Evil is threefold, viz., malum naturae (metaphysical evil), culpa (moral), and ira (suppositive consequence of malum culpa) (I, Q. xvii, a. 5; Q. lxvi, a. 9; De Malo, I, 4). Its existence subserves the perfection of the whole; the universe would be less perfect if it contained no evil. Thus fire could not exist without the corruption of what it consumes; the lion must slay the ass in order to live; and if there were no wrongdoing, there would be no sphere for patience and justice (I, Q. xviii, a. 2). God is said (as in Is., xlvi) to be the author of evil in the sense that the corruption of material objects in nature is ordained by him, as a means for carrying out the design of the universe; and in this world, as an instrument, to bring about the perfection of the universe, the source of which is in Divine appointment; the universe would be less perfect if its laws could be broken with impunity. Thus evil, in one aspect, i.e. as counter-balancing the secession of sin, has the
The mystery of creation, before which all schools of thought are equally helpless. It is as impossible to know, in the fullest sense, why this world was made as to know how it was made; but St. Thomas has at least shown that the acts of the Creator admit of complete logical justification, notwithstanding the mystery in which, for human intelligence, they can never wholly cease to be involved. On Catholic premises, the amelioration of moral evil and its consequent suffering can only take place by means of individual reformation and not so much through increase of knowledge as through stimulation or re-direction of the will. But since all methods of social improvement that have any truth in them must necessarily represent a measure of conformity with Divine laws, they are welcomed and furthered by the Church, as tending, at least indirectly, to accomplish the purpose for which she exists.

For ancient views of evil, see: Histories of philosophy by Zeller und Ueberweg; Darmstätter and Miélot, The Zend-Avesta (London, 1887); Moinier-Williams, Buddhism, Brahmanism and Hinduism (London, 1889); Allegro, Univ. Church Hist. (Dublin, 1900); Godfreiton, Buddhism (London, 1905).

A. B. Sharpe.

Eudoxus, first Bishop of Antioch after St. Peter. Eusebius mentions him thus in his "History": "And Eudoxus having been established the first [bishop] of Antiochians, Ignatius flourished at this time (III, 22). The time referred to is that of Rome and Trajan, of whom Eusebius has just spoken. Harnack has shown (after discarding an earlier theory of his own) that Eusebius possessed a list of the bishops of Antioch which did not give their dates, and that he was obliged to synchronize them roughly with the popes. It seems certain that he took the three episcopal lists of Rome, Alexandria, and Antioch from the "Chronography" which Julius Africanus published in 221. The "Chronicle of Eusebius" is lost; but in Jerome's translation of it we find in three successive years (1) the three entries that Peter having founded the Church of Antioch, is sent to Rome, where he perseveres as bishop for 25 years; (2) that Mark, the interpreter of Peter, preaches Christ in Egypt and Alexandria; and (3) that Eudoxus is ordained first Bishop of Antioch. This last year is given as Claudius III by the Codex Fethianus, but by the fifth-century Bodleian Codex (not used in Schnöe's edition) and the rest as Claudius IV (A. d. 44). The Armenian translation has Claudius II. We have no mention of Eudoxus earlier than that by Africanus; but the latter is confirmed by his contemporary, Origen, who calls Ignatius the second bishop after Peter (cf. Origen, Contra Cels. 1. 13). It is curious that the ordination of Eudoxus should not have been given in the "Chronography" in the same year as the founding of the Antiochian Church by Peter, and Hort supposed that the three entries must have belonged to a single year in
Eusebius. But the evidence is not in favour of this simplification. The year of the accession of Ignatius, that is the death of Evodus, was unknown to Eusebius, for he merely places it in the "Chronicle" together with the death of Peter and the accession of Linus at Rome (Nero 14-18), while in the "History" he mentions it at the beginning of Trajan's reign.

The fame of Ignatius has caused later writers, such as Athanasius and Chrysostom, to speak of him as though he were the immediate successor of the Apostles. Jerome (De viris ill., 16) and Socrates (H. E., VI, 71) call him the "third" Peter; but this is only because they illogically include Peter among his own successors. Theodoret and Pseudo-Ignatius represent Ignatius as consecrated by Peter. The difficulty which arose about Evodus was solved in the Apostolical Constitutions by stating that Evodus was ordained by Peter and Ignatius by Paul. The Byzantine chronographer, John Malalas (X, 252), relates that as Peter went to Rome, and passed through the great city of Antioch, it happened that Evodus, the bishop and patriarch, died, and Ignatius succeeded him; he attributes to Evodus the introduction of the name Christian, which seems to be justified in supposing that Malalas ascribes any of this information to Theophilus, the second-century Bishop of Antioch. We may be sure that Evodus was an historical personage, and really the predecessor of St. Ignatius. But the dates of his ordination are quite uncertain. No early witness makes him a martyr.

The Greeks commemorate together "Evodus" and Onesiphorus (II Tim., 1, 16) as of the seventy disciples and as martyrs on 29 April, and also on 7 Sept. Evodus was unknown to the earlier Western martyrologists that St. Bertram and those of Peter Ado introduced him into the so-called "Martyrologium Romanum parvum" (which he forsook not long before 860) and into his own work, on 6 May. His source was Pseudo-Ignatius, whom he quotes in the "Libellus de fest. Apost.", prefixed to the martyrology proper. From him the notice came to Usuard and the rest, and to the present Roman Martyrology.

Acta SS., 6 May: Salmon in Diss. Christ. Böing., s. v.; Har- nack, Gesch. der Alten Lit., I, 781, s. v. Chronol. part 1, cap. II 152; Quentin, Les Martyrologies historiques (1906), 77, attributes writings to Evodus, of which one was called Ser. The Eight: in it was stated that three years elapsed from the Baptism of Christ until His Passion, and seven years more until the stoning of Stephen. A Sermon is attributed to him in a Coptic papyrus published in Rome in Memoria della R. Acad. delle Scienze di Torino, Series II, XXI, 1892. See Harnack, I loc. cit.

JOHN CHAPMAN.

Evolution.—This subject will here receive a twofold treatment, as follows: A. The Theory Broadly Considered, and the Catholic Attitude in its Regard; B. Its History and Scientific Foundations.

A. ATTITUDE OF CATHOLICS TOWARDS THE THEORY.

One of the most important questions for every educated Catholic is: What is to be thought of the theory of evolution? Is it to be rejected as ungrounded in science and Christianity; or is it to be accepted as an established theory altogether compatible with the principles of a Christian conception of the universe? We must distinguish between the different meanings of the words theory of evolution in order to give a clear and correct answer to this question.

We must distinguish (1) between the theory of evolution as a scientific hypothesis and as a philosophical speculation; (2) between the theory of evolution as based on theistic, then as purely scientific, then as anistic and lastly as atheistic foundation; (3) between the theory of evolution and Darwinism; (4) between the theory of evolution as applied to the vegetable and animal kingdoms and as applied to man.

(1) As a scientific hypothesis, the theory of evolution seeks to determine the historical succession of the various species of plants and of animals on our earth; and, with the aid of paleontology and other sciences, such as comparative morphology, embryology, and zoology, to show how in the course of the different geological epochs they gradually evolve from their primitive forms by purely natural causes. The theory of evolution, then, as a scientific hypothesis, does not consider the present species of plants and of animals as forms directly created by God, but as the final result of an evolution from other species existing in former geological periods. Hence it is called "the theory of evolution," or "the theory of descent," since it implies the descent of the present from extinct species. This theory is opposed to the theory of constancy, which assumes the immutability of organic species. The scientific theory of evolution, therefore, does not concern itself with the origin of life. It merely inquires into the genetic relations of systematic species, genera, and families, and endeavours to arrange them according to the natural order of descent (genetic trees).

How far is the theory of evolution based on observed facts? It is understood to be still only an hypothesis of the newest and most accurate type. The forces which brought it into existence, and which seem to be justified in supposing that Malalas ascribes any of this information to Theophilus, the second-century Bishop of Antioch. We may be sure that Evodus was an historical personage, and really the predecessor of St. Ignatius. But the dates of his ordination are quite uncertain. No early witness makes him a martyr.

The Greeks commemorate together "Evodus" and Onesiphorus (II Tim., 1, 16) as of the seventy disciples and as martyrs on 29 April, and also on 7 Sept. Evodus was unknown to the earlier Western martyrologists that St. Bertram and those of Peter Ado introduced him into the so-called "Martyrologium Romanum parvum" (which he forsook not long before 860) and into his own work, on 6 May. His source was Pseudo-Ignatius, whom he quotes in the "Libellus de fest. Apost.", prefixed to the martyrology proper. From him the notice came to Usuard and the rest, and to the present Roman Martyrology.

Acta SS., 6 May: Salmon in Diss. Christ. Böing., s. v.; Har- nack, Gesch. der Alten Lit., I, 781, s. v. Chronol. part 1, cap. II 152; Quentin, Les Martyrologies historiques (1906), 77, attributes writings to Evodus, of which one was called Ser. The Eight: in it was stated that three years elapsed from the Baptism of Christ until His Passion, and seven years more until the stoning of Stephen. A Sermon is attributed to him in a Coptic papyrus published in Rome in Memoria della R. Acad. delle Scienze di Torino, Series II, XXI, 1892. See Harnack, I loc. cit.

JOHN CHAPMAN.
fere directly with the natural order, where secondary causes suffice to produce the intended effect" (De operis sex dierum, II, c. x, n. 13). In the light of this principle of the Christian interpretation of nature, the history of the animal and vegetable kingdoms on our planet is the subject of a separate volume of a million pages, which the natural development of the cosmos is described, and upon whose title-page is written: "In the beginning God created heaven and earth."

(2) The theory of evolution just stated rests on a theistic foundation. In contradistinction to this is another theory resting on a materialistic and atheistic basis, the first principle of which is the denial of a personal Creator. This atheistic theory of evolution is ineffectual to account for the first beginning of the cosmos or for the law of its evolution, since it acknowledges neither creator nor lawgiver. Natural science, moreover, has proved that spontaneous generation—i.e., the independent genesis of a living being from non-living matter—contradicts the facts of observation. For this reason the atheistic theory of evolution postulates an intervention on the part of the Creator in the production of the first organisms. When and how the first seeds of life were implanted in matter, we do not know. The Christian theory of evolution also demands a creative act for the origin of the human soul, since the soul cannot have its origin in matter. The atheistic theory of evolution, on the contrary, rejects the assumption of a soul separate from matter, and thereby sinks into blank materialism.

(3) Darwinism and the theory of evolution are by no means equivalent conceptions. The theory of evolution was propounded before Charles Darwin's time, by Lamarck (1809) and Geoffroy de Saint-Hilaire. Darwin, in 1859, gave it a new form by endeavouring to explain the origin of species by means of natural selection. According to this theory the breeding of new species depends on the survival of the fittest in the struggle for existence. The Darwinian theory of selection is Darwinism—adhering to the narrower, and accurate, sense of the word. As a theory, it is scientifically inadequate, since it does not account for the origin of attributes fitted to the purpose, which must be referred back to the interior, original causes of evolution. Haeckel, with other materialists, has enlarged this selection theory of Darwin's into a philosophical world-idea, by attempting to account for the whole evolution of the cosmos by means of the chance survival of the fittest. This theory is Darwinism in the secondary, and wider, sense of the word. It is that a theistical form of the theory of evolution which was shown above—under (2)—to be untenable. The third significance of the term Darwinism arose from the application of the theory of selection to man, which is likewise impossible of acceptance. In the fourth place, Darwinism frequently stands, in popular usage, for the theory of evolution in general. This use of the word rests on an evident confusion of ideas, and must therefore be set aside.

(4) To what extent is the theory of evolution applicable to man?—That God should have made use of natural, evolutionary, original causes in the production of man's body, is ver se not improvable, and was propounded by St. Augustine (see Augustine of Hippo, Saint, under V. Augustinism in History). The actual proofs of the descent of man's body from animals is, however, inadequate, especially in respect to paleontology. And the human soul could not have been derived through natural evolution from that of the brute, since it is of a spiritual nature; for which reason we must refer its origin to a creative act on the part of God.

For a thorough exposition, Wasmann, Modern Biology and the Theory of Evolution (Freiburg im Br., 1894). Of the later literature, Stricklet, On the Geneas of Species (London and New York, 1871).

E. Wasmann.

B. History and Scientific Foundations. The world of organisms comprises a great system of individual forms, generally classified according to structural resemblances into kingdoms, classes, orders, families, genera, species. The species is considered as the unit of the system. It is designated by a double name, the first of which indicates the order, e.g., Canis familiaris, the dog, and Canis lupus, the wolf. Comparing the species of the present day with their fossil representatives in the geological layers, we find that they differ from one another the more the farther we retrace the geological record. To explain this remarkable fact two theories have been proposed, the one maintaining the stability and special creation of species, the other the instability and evolution, or genetic relation, of species. As is plain from the preceding section of this article, the principal difference between the two theories consists in: that the theory of evolution derives the species of today by a progressive development from one or more primitive types, whilst the theory of constancy insists upon the special creation of each true species. It is generally admitted that the determination of specific forms depends largely on the subjective views and experience of one naturalist.

We shall here confine our attention to the history and scientific foundations of the biological theory of evolution, leaving all purely philosophical and theological discussions to others. The entire subject will here be divided into the following parts: I. History of the Scientific Theories of Evolution; II. Definition of Species; III. Variability and Experimental Facts Relating to the Evolution of Species; IV. The Paleontological Argument; V. The Morphological Argument; VI. The Ontogenetic Argument; VII. The Biogeographical Argument.

Before we begin, we wish to remind the reader of the important distinction brought out in the preceding essay, that the general theory referring to the mere fact of evolution must be well distinguished from all special theories which attempt to explain the assumed fact by ascribing it to certain causes, such as natural selection, the influence of environment, and the like. In other words, an evolutionaryist—that is, a defender of the general scientific theory of evolution—isc not eo ipso a Darwinian, or a Lamarckian, or an adherent of any special evolutionary system. No less important are the other definitions and distinctions emphasized above under A.

I. History of the Scientific Theories of Evolution. The historical development of the scientific theories of evolution may be divided into three periods. The main figure of the first period is Lamarck. The period ends with an almost complete victory of the theory of constancy (1830). The second period commences with Darwin's "Origin of Species" (1859). The idea of evolution, and in particular Darwin's theory of natural selection, enters into every department of the biological sciences and to a great extent transforms them. The third period is a time of critical reaction. Natural selection is generally considered as insufficient to explain the origin of new characters, while the ideas of Lamarck and G. Saint-Hilaire become prevalent. Besides, the theory of evolution is tested experimentally. Typical representatives of the period are Bateson, Hugo de Vries, Morgan. First Period. Linnaeus based his important "Systema naturae" on the principle of the constancy and special creation of every species—"Species tot numeros quotidiversa forma in principio sua creatas" ("Philosophia botanica", Stockholm, 1751, p. 99). For, "contemplating the works of God, it is plain to every one that organisms produce offspring perfectly similar to the parents" ("Systema", Leipzig, 1748, p. 21). Linnaeus had a vast influence upon the naturalists of his time. Thus his principle of the con-
EVOLUTION 656

stancy of species was universally acknowledged, and this all the more because it seemed to be connected with the first chapter of the Bible. Georges Louis Leclerc Buffon (1707–88), the "suggestive" author of the "Histoire naturelle générale et particulière" first to dispense with scientific grounds. Till 1761 he had defended the theory of constancy, but he then became an extreme evolutionist, and finally held that through the direct influence of environment species could undergo manifold modifications of structure. Similar views were expressed by the German Goethe in Reinhold Trum

anis in his work "Biologie oder Philosophie der lebenden Natur" (1802), and by "the poet of evolution", J. W. Goethe (1749–1832). However, none of these men worked out the details of a definite theory. The same must be said of the grandfather of Charles Darwin, Erasmus Darwin (1731–1802), physician, poet, and naturalist, the first who seems to have anticipated Lamarck's main views. "All animals undergo transformations which are in part produced by their own exertions in response to pleasures and pains, and many of these acquired forms and propensities adhere to their posterity," (Zoonomia, Jean-Baptiste de Lamarck (b. 1744) was the scientific founder of the modern theory of evolution and its special form, known as Lamarckism. At the age of forty-nine Lamarck was elected professor of invertebrate zoology at the Jardin des Plantes (Paris). In 1809 his complete work, the "Philosophie zoolo
gique" (1809) and his "Histoire des animaux sans vertébrés" (1816–22). Lamarck disputes the immutability of species, and characters, and his principle of variability is an objective criterion for determining, with any degree of accuracy, which forms ought to be considered as true species. Consequently, according to him, the name species has only a relative value. It refers to a collection of similar individuals "que la génération perpétuelle dans le même état tant que les circonstances de leur situation ne changent pas assez pour faire varier leurs habitudes, leur caractère et leur forme" (Phil. zool., I, p. 75). But how are species transformed into new species? As to plants, Lamarck believes that all changes of structure and function are due to the direct influence of environment. Lamarck shows how the conditions of the environment first call forth new wants and new activities. New habits and instincts will be produced, and through use and disuse organs may be strengthened or weakened, newly adapted to the requirements of new functions, or made to disappear. The acquired changes are handed down to the offspring by the strong principle of inheritance. Thus the web in the feet of water birds was acquired through use, while the so-called rudimentary organs, e. g. the teeth of the baleen whale, the small eyes of the mole, were reduced to their imperfect condition through disuse. Lamarck did not include the closure of man in his system. He expressed his belief in abiogen
cesis, but he maintained at the same time that "rien n'existe que par la volonté du sublime Auteur de toutes choses" (Phil. zool., I, p. 56).

Lamarck's theory was not sufficiently supported by facts. Besides, it offered no satisfactory explanation of the origin and development of new organs, though he did not ascribe the effect to a mere wish of the ani
mal. Finally, he offered no proof whatever for his position that acquired characters are inherited. Lamarck had very little influence upon his own time. Lamarck's doctrine of the powerful influence of the environment was again lost with the death of Lamarck. Lamarck introduced the term "Lamarckianism" in the sense of evolutionism. As professor of zoology Saint-Hilaire (1772–1841) had long been the colleague of Lamarck. Saint-Hilaire held the mutability of species, but ascribed the main influence in its evolution to the "monde ambiant". Besides, in order to account for the discontinuity of species, he imagined that the environment could produce sudden changes in the specific charac
ters of the embryo (Philosophie anatômique, 1818). In 1850 G. Saint-Hilaire presented to the French Academy of Sciences an outline of unity of plan and composition in the animal kingdom. Cuvier opposed his celebrated theory of the four "embranchements", and showed that his adversary had mistaken resemblance for unity. Cuvier brought convincing facts in support of his attitude; Saint-Hilaire did not settle the issue. The theory of evolution was officially abandoned. Natu

ralists left speculation and returned for a few decades to an almost exclusive study of positive facts. A single writer of some celebrity, Bory de Saint-Vincent (1780–1846), took up Lamarck's doctrines, but not without modifying them by insisting upon the following.

Second Period.—Charles Robert Darwin's book, on the "Origin of Species by means of natural selection or the preservation of favourable races in the struggle for life", published 24 November, 1859, marks a new epoch in the history of the evolution idea. Though the main principles of Lamarck's theory, "struggle, variation, selection", had been enunciated by others, it was mainly Darwin who first combined them into a system which he tried to support by an extensive empirical foundation. Assisted by a num

ber of influential friends, he succeeded in obtaining an almost universal acknowledgment for the general the

ey of evolution, though his special theory of natural selection gradually lost much of the significance at

tached to it, especially by Darwin's extreme followers. Charles Robert Darwin was born at Shrewsbury, 12 February, 1809. From 1831–36 he accompanied as naturalist an English scientific expedition to South America. In 1842 he retired to his villa at Down in Kent, where he wrote his numerous works. He died on 19 April, 1882, and was buried in Westminster Abbey a few feet from the grave of Newton. Biogeographical observations on his voyage to South America led Darwin to abandon the theory of creation. "I had been deeply impressed", he says in his Autobiography, "by discovering in the Pampean formation great fossil animals covered with armour like that on the existing armadillos; secondly by the manner in which closely allied animals replace one another in proceeding southward over the continent; and thirdly by the South American character of most of the productions of the Galapagos archipelago and more especially by the manner in which they differ slightly on each island of the group. . . . It was evi
dent that such facts could only be explained on the idea of the gradual modification of species. . . ." In order to account for the transformation, Darwin began with a systematic study of numerous facts referring to domesticated animals and cultivated plants. This was in July, 1837. He soon perceived that selection was the keystone of man's success in making useful races, namely, by breeding only from useful vari

ations. But it remained a mystery to him how selec
tions could be applied to organisms living in nature. In October, 1838, Darwin read Malthus's "Essay on Population" and understood at once that in the struggle for existence described by Malthus "favourable variations would tend to be preserved while unsuitable ones would be destroyed, and that the result of this selection or survival would be the formation of new species". The struggle itself appeared to him as a necessary consequence of the high rate at which organ

ic beings tend to increase. The result of the selec

tion—that is the survival of the fittest variations—was supposed to be transmitted and accumulated through the principle of inheritance. In this manner Darwin defined and tried to establish the theory of natural selection. Long after he had come to Down house, he was the most important and influential writer on this subject. The formation of new species implies that organic beings tend to diverge in character as they become modified. But how could this be explained? Darwin answered: Because the modified offspring of all dominant and increasing forms tend to become adapted to many and highly diversified places in the economy of nature. In species, according to Darwin, species are continuously transformed "by the preservation of such variations as arise and are beneficial to the being under its conditions of life", that is, by the survival of the fittest, which is to be considered "not the exclusive", but the "most important means of modification".

As his studies and observations progressed, Darwin lost his almost exclusive belief in his own theory, as he held it in 1859, and gradually adopted, at least as secondary causes in the origin of species, the Lamarck factor of the inheritance of the effects of use and disuse and the Buffon factor of the direct action of the environment, especially in case of the geographical isolation of species. To the human species, Darwin was, as early as 1837 or 1838, of the opinion that it was likewise no special creation, but a product of evolutionary processes. The numerous facts which, according to Darwin, might be adapted to substantiate his views are contained in his work, "The Descent of Man" (1871). As a supplementary work to "The Origin of Species", Darwin published, in 1868, "The Variation of Animals and Plants under Domestication", which contains many valuable facts and theoretical discussions concerning variation and heredity. The principle of natural selection is certainly a very useful factor in removing variations not well adapted to their surroundings, but the action is merely negative. The main point (that is the origin and teleological development of useful variations) is left untouched by the theory, as Darwin himself has indicated. Moreover, no proof is brought forward that variations must accumulate in the same direction and that the result must be a higher form of organization. On the contrary, as we shall point out below, the experimental evidence of the post-Darwinian period has failed to substantiate Darwin's claim. It is, however, well to note that Darwin did not wish to ascribe the origin and survival of useful variations to chance. That word, he deduces, is a wholly incorrect expression which merely serves to acknowledge plainly our ignorance of the causes of certain variation. Later on, it is true, he seems to have abandoned the idea of design, "the old argument", he says in "his Autobiography" (1876) ... "fails now that the law of natural selection has been discovered." Similarly, his belief in the existence of God, which was strong in him when he wrote the "Origin", seems to have vanished from his mind in the course of years. In 1874 he confessed: "I for one must be content to remain Agnostic".

Of the numerous friends of Darwin who contributed so much to the development and spread of his theories, we mention in the first place Alfred Russel Wallace, whose essay on natural selection was read before the Linnaean Society, in London, 1 July, 1858, together with Darwin's first essay on the subject. The main work of Wallace, "Darwinism, an Exposition of the Theory of Natural Selection with Some of its Applications" (1889), "treats the problem of the origin of species on the same general lines as were adopted by Darwin; but from the standpoint reached only 30 years of discussion." In fact the book is a defence of pure Darwinism. Wallace, too, assumed the animal origin of man's bodily structure, but, contrary to Darwin, he ascribed the origin of man's "intellectual and moral faculties to the unseen Universe of spirit" (Darwinism). Thomas H. Huxley (1825-1895) was one of the most strenuous defenders of Darwin's views; his book on "Man's Place in Nature" (1863) is a defence of man's "Oneness with the brutes in structure and in substance". Besides Wallace and Huxley, there were the geologist Sir Charles Lyell, the zoologist Sir John Lubbock, and the botanists Asa Gray and J. D. Hooker, who supported Darwin's theory almost from the beginning. Quatrefages and Dana called it in part, but declared that there were no arguments in favour of the animal origin of man. Spencer's views are not very much different from those of Darwin's later years. Natural selection is more aptly called by him "the survival of the fittest" ("Principles of Biology", 1898, I, p. 530). Trying to harmonize the Lamarckian and Darwinian factors of evolution, he was among the first to defend the so-called neo-Lamarckian theory, which insists upon the direct influence of the environment and the inheritance of newly acquired characters. Before we enter upon the last phase in the development of the evolution idea, it is necessary to devote some space to the extreme defenders of Darwinism in Germany. Ernst Haeckel, of Jena, is in some sense the founder of the science of phylogeny, which seeks at least by way of hypothesis, to determine the genetic relation of past and present species. In 1868 Darwin wrote to Haeckel: "Your boldness sometimes trembles". This refers especially to the phylogeny, which is in fact an aprioristic structure often contradicted, and at almost no point supported by experiment and observation. The tetrahedral carbon atom is, according to Haeckel, the external fountain of each particular kind of life. Through abiogenesis of certain most primitive organisms are said to have been formed, such as "moners", which Haeckel described as unicellular beings without structure and without any nuclear differentiation. During ages of unknown duration these simple masses of protoplasm have been
evolved into higher plants and animals, man included. As one of his main arguments, Haeckel refers to the so-called “biogenetic law of development”. The supposed law maintains that ontogeny is a short and rapid repetition of phylogeny, that is, the stages in the individual development of an organism correspond more or less to the stages which the species passed through in their evolution. The causes of development are, according to Haeckel, the same as were proposed by Darwin and by Lamarck; but Haeckel denies the existence of God and rejects the idea of teleology.

Our leading scientists do not care to support the unfounded generalities of Haeckel's doctrines. They have even, most severely, but justly, censured Haeckel's scientific methods, mainly his frauds, his want of distinction between fact and hypothesis, his neglect to correct wrong statements, his disregard of facts not agreeing with his apriori conceptions and his unacquaintance with history, physics, and even modern biology. They have also pointed out that the biogenetic law of development is by no means a trustworthy guide in retracing the phylogenetic succession of species, that many other species, Haickel are without foundation. But above all we must reject Haeckel's popular writings because they contain numerous errors of every kind, and ridicule in a shameful manner the most sacred convictions and moral principles of Christianity. It is a sad fact, that even through the influence of "Die Welt im Geschichtsprozeß", Haeckel did great harm was done to religion and morality, especially in Germany and in the English-speaking countries.

The present leader of extreme Darwinism is August Weismann of Freiburg (Vorträge über Derzendener Alterthümer, 24 ed., 1904), the energetic opponent of Lamarck's idea that acquired characters—i.e., changes that according to Weismann, every individual and specific character which may be transmitted by heredity is preformed and prearranged in the architecture of certain ultra-microscopic particles composing the chromatin of the germ-cells. On account of qualitative differences the various groups of these ultimate particles or "biophores" have a different power of assimilation. Besides, they are present in different numbers. In consequence thereof, an intracellular struggle for existence will arise, and the germ-cells are undergoing fertilization. The outcome of the struggle will be that the weaker forms will succumb. Thus the principle of the survival of the fittest is transferred to the germ-cells. Weismann, moreover, admits an indirect influence of the environment upon the germ-cells. In order to account for the facts of regeneration and rejuvenation established by Driesch, Morgan, and others, Weismann appeals at times to unknown forces of vital affinities, without, however, dismissing his thoroughly materialistic and antiteleological suppositions. It will be superfluous to add that Weismann's theory is a mere hypothesis whose foundation can probably never be controlled by observation and experiment. But it must be acknowledged that Weismann was among the first to point out the intrinsic connexion between the evolution of species and the science of the cell. As extreme scientific opponents of Darwinism and evolution we may mention Albert Wiegand the zoologist and paleontologist Louis Agassiz, the well-known adversary of Asa Gray. These men produced many an excellent argument against the extreme defenders of pure Darwinism, but, probably by attending too much to the exceedingly weak foundation of the current theory of mutation by small changes, they rejected evolution almost entirely. The most recent representative of such extreme views is the zoologist Albert Fleischmann, who has become a complete scientific agnostic.

Third Period.—The third period in the history of the biological evolution theory has only in recent years assumed the form which marks it as a new epoch. Its path was prepared by the fact that two classes of naturalists had in course of time been drawing nearer to one another. On the one hand were those whose work was merely critical, by discriminating clearly between Darwinism and evolution, and on the other hand those who gave their undivided attention to the work of experimental investigation. Only in recent years have the two classes joined hands and, in men like de Vries, Bateson, Morgan, have gained very efficient assistance. At the present time the greatest importance is laid on the study of the origin of species, on the adaptation of organisms to environment, and on the inheritance of characters thus acquired, and above all on the idea of the segregation and the independence of biological characters, as was pointed out almost fifty years ago by Gregor Johann Mendel.

As far back as 1865, K. von Nägeli decided in favour of the general theory of evolution and against Darwinism. According to him progressive evolution required intrinsic laws of development, which, however, as he added, were to be sought for in molecular forces. But this was only an effort to say, could only explain the survival of the more useful, but not its origin. Like Spencer, Nägeli was a determined precursor of neo-Lamarckism. This theory, which is now defended by many evolutionists, attempts to reconcile Lamarck's principle of the use and non-use of organs of animals, with the influence of external circumstances. There are many evolutionists, such as Th. Eimer, Packard, Cunningham, Cope, who defend this view. However, the experimental evidence for the foundation of neo-Lamarckism—namely, the inheritance of acquired characters—is still wanting, or at least very debatable. Nägeli's most important work, "Mechanisch-physiologische Theorie der Abstammungslehre", appeared in 1884. The embryologist K. E. von Baer, who did not share the antiteleological views of Nägeli, opposed no less energetically Darwin's theory of natural selection, because, as he argued, that theory does not explain teleology and correlation, and is at the same time in contradiction to the persistence of species and varieties. He also vigorously controverted Haeckel's system, especially his biogenetic law of development. But he maintained the transformation of species was much more gradual and sudden changes. This leads us to the theory of saltatory evolution which is to-day most strongly defended by Bateson, de Vries and others. Some of the first scientific expositors of this view were R. von Kölliker and St. George Mivart. In his work "On the Genesis of Species" (1871) Mivart proposed a number of convincing arguments against the opinion of the power of natural selection as a prevailing factor. According to this hypothesis species are suddenly born and originate by some innate force, which works orderly and with design. Mivart concedes that external conditions play an important part in some way determining evolutionary processes. But the transformation of species will mainly, if not exclusively, be produced by some constitutional affection of the generative system of the parental forms, an hypothesis which Mivart would extend also to the first genesis of the body of man. Hugo de Vries (Die Mutationstheorie, 1901-03) is, with Bateson, Reimke, and Morgan, a typical representative of the exponent of the modern theory of saltatory evolution. He first endeavoured to show experimentally that new species cannot arise by selection. Then he attempted to demonstrate the origin of new lines of variation. The principal illustration to establish his theory of "mutation" was the large flower, evening primrose (\textit{Engelackeriana}). Th. H. Morgan ("Evolution and Adaptation", 1903) summarizes this view as follows: "If we suppose that new mutations and
The moderate catastrophes, species the 186.5, experiments. Theory that EVOLUTION his may are or a of scientific advance. The earliest forerunners of Mendel were the first scientific hybridists J. G. Köhreuter (1739–1806) and T. A. Knight (1758–1838). Köhreuter’s results are of special interest because, through the repeated crossing of a hybrid with the pollen or ovules of one of the parents, forms appeared which more and more reverted to the characteristics of the respective parent. K. F. von Gartner (1772–1850) was the most prolific writer on hybridism of his time, though he did not surpass Köhreuter as to the positive results of his experimental research. C. Naudin’s essay on the hybridity in plants (1802) represented a considerable advance. The author pointed out that the facts of the reversion of the hybrids to the specific forms of their parents, when repeatedly crossed with the latter, are naturally explained by the hypothesis of the segregation of the two specific essences in the pollen grains and ovules of the hybrids (Leck). This formed in after years no small part of Mendel’s discovery, which is indeed one of the most brilliant results of experimental investigation.

Gregor Mendel was born 22 July, 1822, at Heinen- dorf near Odrau (Austrian Silesia). After finishing his studies he entered, in 1843, the Augustinian monastery at Brunn. Having been for fourteen years professor of the natural sciences, he was elected abbot of the monastery in 1868, and died in January, 1884. Mendel’s celebrated memoir, “Versuche über Pflanzenhybriden”, appeared in 1865, but attracted little attention, and remained unknown and forgotten till 1900.

It was based on experiments that had been carried out during the course of eight years on more than 10,000 plants. The principal result of these experiments was the recognition that the peculiarities of organisms produced entities independent of one another, so that they can be joined and separated in a regular way. As we have said above, H. de Vries was the first to recognize the value of Mendel’s paper. Other investigators who have taken up the same line of work are Correns, Tschermak, Morgan, and, most of all, Bateson, the principal founder of “Mendelism”, or the science of genetics.
criterion of the elementary species is the experimentally proved constancy of the features (it is quite immaterial how small they may be) during a series of generations.

How are we to regard these opinions? Before answering this question we must strongly emphasize the fact that the biological idea of species has nothing whatever in common with the Scriptural conception or with that of Scholastic philosophy. The Mosaic story of Creation signifies nothing more than this, that ultimately all organisms owe their existence to the Creator of the world. The connecting link has nothing to do with the proposition of faith regarding creation. The enumeration of certain popular groups of organisms, such as fruit-trees, draft-animals, and the like, could have no other design than to manifest to the simplest as well as to the most cultivated mind the action of the Creator of all things; at least, there can be no question of a scientific conception of genera and species. The biological concept of species is likewise removed from the philosophical concept which designates either the metaphysical or the physical species. The former is identical with the *integrā essentia* (Urrbrah, in general essence)—the latter, founded on the essence (*fundatur in essentia*—T. Pesch), and is to be recognized by some attribute (*gradus alicujus perfectionis*) which remains constant and unchangeable in every individual of every generation and so appears to be necessarily connected with the ultimate essence of the organism (*cum rei naturalis constitutum*—Hsau). The concept, therefore, of species according to Holy Scripture, Philosophy, and Science, is by no means a synonymous one for the natural units of the organic world. And particularly, the first chapter of Genesis should not be brought into connection with Linnaeus’s “Systema naturae.”

As far as the biological concept of species is concerned there is not up to the present time any decisive criterion by which we may determine in practice whether a given group of organisms constitute a particular species or not. Genuine species are differentiated from one another by the fact of their possessing some important morphological difference which remains constant during a series of generations without the production of any intermediate form. If the difference is of less importance, but constant, we have to do with sub-species (elementary species). Jordan species, while intermediate forms and all deviations which are not strictly constant are set down as varieties. Are such distinctions and criteria acceptable? Expressions such as “considerable,” “essential,” “more or less considerable,” signify relative propositions. Hence it follows that the morphological determination of species depends to a great extent on the subjective estimate of the naturalist and on his intimate knowledge of the geographical distribution and habits of the organism concerned. In fact, the force of the term *species* differs greatly in the different classes of organisms. On this account the fact that species do not cross-breed, or at least that after a cross they do not produce fertile descendants, was added as an auxiliary criterion. This criterion, however, is an impracticable one in the case of paleontological species, and in the plant world in particular on many exceptions. In botany, therefore, the auxiliary criterion has been limited in the sense that within the species itself the fertility always maintains the same general level, while by the crossing of different species it diminishes very materially—propositions which do not admit of converse suggestions. The general law of hybridization is generally recognized from the fact that they oscillate around a certain mean, from which they deviate in inverse proportion to their frequency, a rule which primarily pertains only to quantitative differences. According to Darwinians, useful individual differences can be increased indefinitely by selection and may finally become independent of it. In this manner new species would result: Darwin himself sometimes considered single variations as of greater importance. The same view is strongly defended by modern evolutionists, who, if correct, at the same time, a direct influence of environment to which an organism adapts itself.
In order first of all to obtain a just estimate of the influence of selection, it must be pointed out that not everything that is attributed to selection has originated through selection. The origin of many pure breeds (e.g., of pigeons) is unknown, and cannot therefore be further investigated be ascribed to selection. Furthermore, many cultivated forms have arisen through crosses and segregation of characters, but not through merely strengthening individual characters. If we restrict our examination only to well attested facts, we find, first, that nothing new is brought about by selection; secondly that the maximum amount in quantitative modification is obtained in a few generations (mostly in three to five) and that this amount can only be maintained through constant selection. In case selection is stopped, a regression will follow proportional to the length of time required for the progress. In short, as far as facts teach us, new species do not arise by selection. But if qualitative changes were produced by some other cause, selection would probably be a potent principle in order to explain why some peculiarities survive and others disappear. The question is: Whether changes in the environment may furnish such a cause. There can be no doubt that the environment does influence organisms and mould them in many ways. As proof of this we need only draw attention to the different forms of Alpine and valley plants, to the formation of the leaves of plants according to the humidity, shadiness, or sunniness of the habitat, to the influence of light and temperature on the formation of pigment and colouring of the surface, to the strange and considerable differences produced, for instance, in knot-weeds by merely changing the environment, and so forth. But as far as actual experiments show, the changes of characteristics and niceties of adaptation go to and fro, as it were, without transgressing definite ranges of variation. Moreover, it is not at all clear how discontinuity of species could have arisen "by a continuous environment, whether acting directly, as Lamarck would have it, or as a selective agent, as Darwin would have it" (Bateson), unless one takes into account the accidental destruction and isolation of intermediate forms.

In spite of these conclusions it has been assumed that individual differences might lead to the formation of new species under the continuous influence of natural selection. Wasmann's well-known Dinarda-forms may serve as an example. The four forms of the rove-beetle, Dinarda, namely D. Markeli, D. dentata, D. Hagensi and D. pygmaea, bear a certain relation with regard to size to the four forms of ants, Formica rufa, sanguinea, exsecta, fusco-rufibarbisis, and to their nests, in which they live as tolerated guests. D. Markeli, which is 5 mm. long, dwells with F. rufa, which is comparatively large and builds spacious hill-nests. D. dentata, which is 4 mm. long, lives with F. sanguinea, which is comparatively large, but builds small earth-nests. D. Hagensi, which is 3-4 mm. long, lives with F. exsecta, which is smaller than F. sanguinea, but builds a fairly roomy hill-nest. D. pygmaea, which is 3 mm. long, lives with F. fusco-rufibarbisis, which is relatively small and builds small earth-nests. Moreover, the three first-named ants are two-coloured (red and black), and so are the corresponding Dinarda. The last-named ant, however, is of a more uniform dark colour, as is also the corresponding Dinarda. Now comparative zoogeography contains some indications according to which the similarity of colour and proportion of size must be attributed to actual adaptation. For (1) there are regions in Central Europe in which only F. sanguinea with D. dentata, and F. rufa with D. Markeli are found, whereas F. exsecta and F. fusco-rufibarbisis do not harbour any Dinarda-forms at all. Secondly, there are districts in which the four forms of Dinarda are living with their four hosts and yet hardly ever showing transitional forms. Thirdly, in other parts there are more or less continuous intermediate forms, D. dentata-Hagensi living with F. exsecta, and D. Hagensi-pygmaea living with F. fusco-rufibarbisis. The nearer a Dinarda approaches the form of D. pygmaea, the more frequently it is found with F. fusco-rufibarbisis. To all this must be added, that the adaptation in general appears to have kept pace with the historical freeing of Central Europe from ice, though numerous exceptions must be explained by local circumstances, especially by isolation. Considering these facts, we are inclined to believe that D. pygmaea especially presents an example of real adaptation in fieri, though this adaptation cannot be called a progressive one, since the more recent forms, Hagensi and pygmaea, are only smaller in size and of a more uniform colour. But at the same time it seems to us that the adaptation of the Dinarda cannot be considered as an example to illustrate specific evolution, because, as we have shown elsewhere, there are many instances in nature—we mention only the races and othersub-divisions of the human species—that likewise present different degrees of adaptation far more pronounced than that found in the Dinarda, but which are not, and cannot on that account be, quoted as examples of the formation of new specific characters.

(2) Single Variations are presumably of far greater importance for the solution of the evolution problem
than individual differences; for they are discontinuous and constant, and are therefore capable of explaining the gaps between existing species and those of palaeontology. We use the term single variation when, from among a large number of offspring, some one particular individual stands out that differs from the rest in one or more characteristics which it transmits unchanged to posterity. It is said to be peculiar to the single variations that they cannot be reduced to crosses. If this is possible, we speak of "analytical variations." Favourable conditions for the appearance of single variations are altered environment, a liberal supply of seed, and excellent nourishment. It is a remarkable fact that the fertility of single variations decreases considerably, and this the more so the greater the deviation from the parents. Besides, the newly produced forms are comparatively weak. This weakness and inclination to sterility are facts which must be carefully weighed when determining the probable importance of single variations for specific evolution. Besides, it is—to our knowledge—in no case excluded that the suddenly arising form may be traced back to former crossings. Probably the only case which is quite generally interpreted to demonstrate specific evolution experimentally is that of the primrose observed by de Vries. After many failures with more than 100 species, de Vries, in 1880, determined to cultivate the evening primrose (Oenothera Lamarkiana), whose extraordinary fertility had attracted his attention. He chose nine well-developed specimens and transplanted them into the Botanical Garden of Amsterdam. The cultivation was at first continued through eight generations. In all he examined 50,000 plants, among which he discovered 800 deviating specimens, which could be arranged in seven different groups, as shown in the following table:

The specimen of O. gigas (1895) was self-fertilized and yielded 450 O. gigas forms, among which there was only one dwarf form, O. gigas-nanella. The three following generations remained constant. O. albida was a very sickly form, though it succeeded, thanks to regular attention, in breeding constant offspring. Among the O. oblonga descendants there was one specimen, albida, and in a later generation one specimen of O. rubrinervis. O. rubrinervis proved to be as fertile as Lamarkiana, and yielded besides a new variation, leptocarpa. The offspring of O. nanella was constant, though among the 1800 descendants of nanella in 1896 three specimens showed oblonga characteristics. O. lata was purely female: but, fertilized with pollen of other variants, it yielded 15 to 20 per cent O. lata descendants. O. scintillans was not constant. According to de Vries' observations (Repr. 1888), these new forms also originated in nature, but they succumbed in the struggle for existence. The differences between the single forms relate to various parts and degrees of development, though in several they are very slight. The plants become either stronger or weaker, with broader or narrower leaves: the flowers become larger and darker yellow, or smaller and lighter, the fruit longer or shorter, the outer skin rougher or smoother, etc.

It may be conceded that the Oenothera has developed constant forms corresponding to the so-called "small or elementary species." The question, however, is, whether the forms are really new ones or whether they owe their origin to some unexpected original crosses. In fact, if we are to suppose a previous cross, perhaps O. Lamarkiana and O. rubrinervis, then the O. Lamarkiana of Hilversum had contained the different variations in a latent form; and through cultivation gradually reverted by throwing off the different variations. At any rate, there cannot be any question of a progressive development, for the reason that none of the new forms shows the slightest progress in organization or even development of any kind advancing in that direction.

(3) Crosses and Mendelian Segregations. Cross-breeding can in nature hardly be considered as a factor in the progressive development of species; in particular, forms of different degrees of organization do not cross, and if they did, all deviations would soon be equalized according to the laws of chance (Heredity). All the greater seems to be the importance of the Mendelian segregations. It may be known to the reader that the famous experiments of the Abbot Mendel were carried on with seven different pairs of characters which he crossed with one another, and then, by letting the cross-breds self-fertilize, he continued the cultivation of the plants through a series of generations. In the first generation it was found that the offspring exhibited without exception the character of one of the parents, that of the other parent not appearing at all. Mendel therefore called the former—the prevailing—character the "dominant" and the other the "recessive." In the following generation,
The hybrids of any two different characters produce seeds, one half of which again develop the hybrid forms, while the other half yield offspring which remains constant, and possess the dominant and recessive characters in equal proportion. A simple analysis of this rule shows that it consists of three parts: (a) By fertilization the characters of the parents are united, without, however, thereby losing their purity and independence; (b) In the offspring the characters of both parents may again be separated from each other; (c) The character of one of the parents may completely conceal that of the other. This last part of the rule is not, according to later investigators, necessarily connected with the other two parts. We may add that Mendel's rule also holds good for the offspring of hybrids, in which several constant characters are combined, and that in it there is found a splendid confirmation of the modern theory of the cell. Cross-breeding, therefore, does not by any means lead to the mixing of characteristics. These, on the contrary, remain pure, or, at most, form new combinations or split up into simpler components. Hence, the idea that gaps in nature originate through such segregation is well founded. But the question, whether the idea is to be applied to the formation of species, and how this is to be carried out, can scarcely be answered at present. This much, however, is evident: that there is no progress in organization any more than there is any progressive specific development, brought about by segregation.

Hence this important conclusion follows: That the central idea of modern evolution theories—namely, progressive specific development—has not up to the present received any confirmation from observation of the world of organisms as it now exists. It is quite true, however, that the plasticity of organisms has been proved by a number of experiments to be very considerable; so that, in a constant environment, and by single variations, changes may be brought about which a systematist would classify as specific or even generic, if it were not clear from other sources that they are not such. In the same way forms could be developed by segregation, the characteristics of which would suffice "to constitute specific differences in the eyes of most systematists, were the plants or animals brought home by collectors" (Bateson) Yet such criteria are meaningless for the demonstration of the formation of species. The question as to the transmission of acquired characters is not by any means decided. It follows from the doctrine of propagation that only such characters can be transmitted as are contained in the germ-cells or which have been either directly or indirectly transmitted to them. Hence it is clear that all peculiarities acquired by the cells of the body through the influence of environment, or by use or disuse, can only be inherited if they are handed over, as it were, to the germ-cells. But it is useless to discuss the question before we have sufficient experimental evidence that acquired characters are at all inherited.

IV. The Paleontological Argument.—(1) Historical Method. Before entering upon the discussion of the evidence furnished by palaeontology we must briefly refer to the method which ought to be employed in the interpretation of the palaeontological records. The great archives of the geological strata are very incomplete. Almost three-quarters of the earth's surface is covered with water, and another large portion, with perpetual ice, while of the rest which has remained free from the ravages of water and the elements; of this small portion, again, only certain regions are accessible to the investigator, and these have been but partially examined. Besides, in most cases only the hard portions of organisms are preserved, and even these are often so badly mutilated that their correct classification is sometimes difficult. Many of them, especially in the oldest rocks, must have perished under the crushing force of metamorphic processes. Further, the geographic distribution of plants and animals must have varied according to climatological and topographical changes. It may suffice to cite the glacial periods of which there are clear indications in various geological epochs. Finally, the geological strata themselves underwent many violent strains and displacements, being upheaved, tilted, folded again, and even entirely inverted. It is evident that every one of these phenomena tends to produce chaos in its own way and makes the work of classifying and restoring all the harder. It gives at the same time to the scientist the right to formulate hypotheses probable in themselves and adapted to bridge over the numerous gaps in the work of reconstruction in the organic world. But these working hypotheses ought never to assume the form of scientific dogmas. For after all, the documents which have really been deciphered are the only deciding factors. At all events, the chronological succession and the genetic relation of organisms cannot be determined by a priori reasoning, or by means of our present system of classification, or by applying the results of ontogenetic studies. One illustration may suffice. Some maintain that trilobites are descended from blind ancestors because certain blind forms exhibit a number of simple characteristics which are common to all specimens. And yet we know that, e.g., *Tritonichus* possesses eyes in the earlier stages of its development, and only becomes blind in the later stages. The non-existence of eyes is, therefore, due to degeneration, and does not point to a former eyeless state. As a matter of fact, specimens of trilobites possessing eyes are found side by side with eyeless specimens in the lower Carabrian strata. Other examples of false a priori conclusions are to be found in the extraordinary genealogies constructed by extreme evolutionists, and which dissolve like so many mists in the light of advancing investigations. In fact, up to the present the genealogy of phylology has not been proved in any single instance. In short, if we disregard observation and experiment on living organisms, it is the historical method alone which can decide the limits of evolution and the succession and genetic relations of the different forms: "In the substitution of the present by the ancestral by real ones lies the future of true phylegetic science" (Handlisch).

(2) The Oldest Fossils. Now let us turn to the documents themselves and see what they have to show us. The foundation of the Archives is formed of gneiss and crystallized slate, a rigid mass containing the remains of organic life, and one which offers to the palaeontologist the hopeless outlook that his science must remain in a very incomplete state, perhaps forever. Immediately above this foundation, nature has imbedded the multitudinous, highly-developed Cambrian fauna, with-
out leaving the slightest trace of their antecedents, origin, birth, or age. Some 800 species of this remo-
test period are known to us. They belong almost
without exception to marine faunas, and are distributed
over all the chief groups of the invertebrates. Nearly
one-third are arthropods. They are the
known trilobites which occupy a position about the
middle of the scale of animal development. Other
groups belong to coelenterates, brachiopods, gastropods,
and cephalopods. Sponges, too, and traces of
worms are found, as also very imperfect fragments of
sporopods and other insects. Moreover, there can be
no doubt that various types of fishes must have ex-
isted, since in the Silurian age numerous representa-
tives, such as selachians, ganoids, marsipobranchi,
and dipnoans, are found from the very beginning side by side.
Where are the ancestors of these highly specialized
beings? The one thing we may affirm is that we know
absolutely nothing whatever of a primitive fauna and
of the numberless series of organisms which must have
followed them up to the Cambrian era, for the simple
reason that we possess absolutely no evidence. More-
over, there is not the least trace of paleontological evi-
dence of the spontaneous appearance of one imper-
fect organism or of the ascending development out of
primitive protoplasmic masses up to the time of the Cambrian
era. The Cambrian types were all of them specialized
forms perfectly adapted to time and environments,
and not generalized types of zoological systems. The
onset of the plant world is absolutely shrouded in im-
possible darkness for the paleontologist. The enor-
mous layers of anthracite and graphite are, according
to the most recent investigations, of inorganic origin.
Clearly established evidence of plant life only dates
from post-Silurian times, and consists of contents of the
oldest turf moors—giant ferns and horsetails, plants akin to the club-mosses, like the Lepidodendron,
and Gymnosperms, like the slender Cordaites. One
is astounded at the rich forms of this long-lost flora, and
we search in vain for their ancestors.
It is certainly remarkable, and a fact which clearly
proves the transformation of species, that plants be-
longing to these remote times vary considerably from
their later representatives. But, as Kerner von Mari-
lau insists, the “fundamental structure of the type”
is never obliterated, and the degree of organization has
at least remained the same. In particular, the pres-
cence of layers of the horsetails, ferns, and horsetails,
but miserable remains of their mighty ancestors, and the
Cordaites, though different from the present con-
ifers, were as highly organized as they. To this must
be added the recently discovered fact that seed-
bearing plants, which constitute a considerable part of
the fern flora of the Carboniferous, are found among
the ferns of the Devonian era.
(3) Angiosperms and Vertebrates. But how did the
undoubtedly higher forms of a later period originate?
To begin with the angiosperms, we are confronted
with the fact that these organisms appear quite sud-
denly in the Cretaceous era and form a group remark-
able, in forms as highly organized as their present
representatives. It is a fact that principally the dic-
yotyledons (at least those in the more recent strata)
correspond more and more to the present-day forms,
clearly indicating the relationship they bear to one an-
other. But whence the earliest forms of the creta-
ceous came, is shrouded in mystery. Similarly, the
gradual transformation of one species into another
cannot be proved in any concrete case. Only this
much is certain, that if evolution took place, it in-
volved a change which did not imply attainment to a
high degree of organization. In other words, what was
in mind, moreover, that we know of no intermediate forms capable of justifying even as much as a hypoth-
thesis that angiosperms were evolved from lower plants.
If the origin of the angiosperms is for the present
an insoluble problem, the genesis of the verte-
brates is no less so. However, in order not to pass en-
tirely over the post-Cambrian history of the inverte-
brates, we must at least make mention of the sig-
nificant fact that this fauna seems to be constantly
changing, but without ascending to higher forms of
organization. They are the “ancestors of the shell-
bearing groups, owing to the changed size, form,
and ornamentation of their shells, and in this
offers a very acceptable basis for the establishment of a
series of kindred forms—e. g., with the gastropod
genus Paludina of the Siluvian tertiary strata. But
these and other instances would almost entirely fall
on the calcareous nature of the medium, and on the varying
kind and amount of movement, we can scarcely be
inclined to regard an increased ornamentation of the
shell as a mark of real progress in organization, but
at most as a temporary development of actual disposi-
tions due to varying conditions of life.
EVIDENCE OF ANIMAL ORIGIN
The first authenticated ancestors of the vertebrates are
the fish—remains of the lower Silurian era. Widely
removed from them we find in the carboniferous
strata the oldest remains of the amphibian quadrup-
eds and, associated with them, forms of reptiles
which suddenly appear. These groups both, however,
belong to the unsolved problems of paleontology.
Among the Mesozoic fishes we encounter old forms
together with teleosts which suddenly appear in
the Jurassic strata without producing any transitional
forms. It is generally supposed that the teleosteans
are derived from some reptile which was adapted to
the water and, thus, the teleosts, as a matter of fact,
it would seem, have no structural advantage over the cartilagi-
nous fishes in the lesser hardness of the scale and the
greater hardness of the skeleton. This is, however,
but a shifting, as it were, of development, as the dis-
appearances of the rigid body-covering is compensated
for by the ossification of the skeleton. At any rate,
the origin of the teleosteans is an unsolved problem, as is
that of the Silurian ganoids. The appearance of birds
and mammals is likewise very mysterious. The first
known bird is the famous "bird-reptile" Archaeo-
teryx of the Jurassic strata at Soluhofen. In spite
of some characteristics that remind one of reptiles—as
for instance the twenty homologous caudal vertebrae,
the talons, the separated metacarpal bones and the
toothed jaw—yet the true bird nature is evidenced by
the plumage, the pinions, and the bill. In fact Archae-
teryx is far removed from the reptiles, nor does it
constitute any connecting link with the later birds,
not even with the toothed Ichthyornis and Hesperornis
of the upper Cretaceous era. Certainly the two iso-
lated specimens from Soluhofen indicate that birds
must have existed a long time before; but where their
place of origin is, none can tell.
Paleontology is silent likewise about the early his-
tory of mammals. The mesozoic representation of this
class may have some connexion with marsupials,
monotremes, and insectivorous animals, but as to the
early history of the great majority of placental mam-
mal mammals we have no evidence. A vast number
of intermediate forms would certainly be required to
connect the mammals with the reptiles. No such
series of forms is known. Even the genealogy of the
horse, which is considered the most striking example
of an evolutionary series within a mammalian family,
is scarcely more than a very moderately supported
hypothesis. Let the reader consider the accompany-
ing table of differences in the paleontological represen-
tatives of the Equidae. Upon the facts embodied
in this table, which—chiefly refer to fossils found in
North American strata, the following comments are
made: The generic classification must be a mere as-
sumption, though it must be conceded that some sedi-
mentary deposits their series seems to be continuous.
Secondly, the sub-families show great differences be-
tween one another. Of the Merychippus, which con-
nects the Equina with the Palaeotheria, we know only
the teeth. Thirdly, if we take the European material into consideration as well, we are confronted with widely divergent opinions, so much so that the brilliant pedigree becomes greatly dimmed. In particular, the Eocene forms and the still more remote genus *Phohippus* are avowedly very dubious ancestors of the horse. Lastly, it is well within the range of possi-

### TABLE OF DIFFERENCES IN PALEONTOLOGICAL EQUIDAE

In all, eighty figures are represented, of which number forty-nine are those of bisons.

From what has been said we may conclude that man, in the first stage of civilization known to us, appears as a true *Homo sapiens*; but how he arrived at that stage is a problem we are quite unable to answer, because all records are wanting. The bones, too,
human, and have given rise to renewed interest through the valuable discoveries made in Krapina. The Neandertal skull itself serves as a type which, owing to the low, receding forehead and the strongly developed supra-orbital ridges, appears to be very primitive, though no one knows the actual geological conditions of the place where it was originally deposited. We pass over the fact that twenty scientists have expressed twelve different opinions on this mysterious cranium, and confine ourselves to the latest opinion of Schwab, who says that the Neandertal cranium exhibits forms which are never found in either a normal or a pathologically altered Homo sapiens, whether Negro, European, or Australian, and yet at the same time the skull does exhibit human characteristics. In a word, the Neandertal skull does not belong to any variety of Homo sapiens. Kohlbrugge very aptly compares Schwab's hypothesis to an upturned pyramid balancing on a fine point, since a single Australian or Negro skull which may be found to agree with the Neandertal skull suffices to overthrow the hypothesis. Such a skull has not as yet been found, but there are other factors which suffice to disprove Schwab's hypothesis. The nearest relative to the other diluvial bone remains of Homo primigenius, amongst others to the petrified Gibraltar skull, to two molar teeth from the Taubach cave, to the two fragments of a skull from the mammoth caves of Spy, and the jawsbones from La Nauette, Schipka, Oches, and, finally, to considerable remains of bones, such as fragments of skulls, lower jawbones, pelvic bones, thigh and shin bones, from a cave near Krapina in Croatia. To these must be added the "Mouster skull" which was dug up in August, 1908, in Vezenetal (Dordogne). All these fragments possess fairly uniform characteristics. Especially those worthy of note are, above all, the cranium with its prominent supra-orbital ridges and receding forehead. These qualities, however, are not infrequently found in men of the present day. Australians exhibit here and there even the genuine supra-orbital ridges (Gorjanowie-Kramberger). It cannot be clearly decided whether we are dealing with purely individual characteristics or with peculiarities which would justify us in classifying the Krapina fragments as belonging to a special race. But this much is clear, that the formation of the skull and the degree of civilization of that race are quite sufficient to permit of our designating Homo primigenius not as a species of itself, but merely as a local sub-division of the Homo sapiens. The Galley Hill skull, from England, which is still older than the Krapina bones, points to the same conclusion and corresponds to the most ancient skulls of post-diluvial man. Hence, to sum up, we may affirm that we are acquainted with no records of Tertiary man, that the most ancient remains of the Quaternary belong to the Galley Hill man, whose skull worthily represents Homo sapiens. The same is to be said of the oldest traces of civilization as yet known to us.

Palaeontology, therefore, can assert nothing of whatever a development of the body of man from the animal. It may be added that Haeckel's curious "Progonotaxis", or genealogy of man, is a pure fiction. It consists of thirty stages, beginning with the "mon-
analogies of structure and function in vastly different groups. Finally, the chief problem, which refers to teleology of adaptive modifications, is not even touched by the doctrine of descent from common ancestors.

(2) Man and the Anthropoids.—Palæontology knows of no records that point to the relationship between the body of man and that of the anthropoid. Hence it follows that the argument of analogy and classification is of little worth. But, as ever and again attempts are made to discover analogies between every bone of man and his corresponding part of the ape (e.g. Wiedersheim), it will be useful to gather a few of the more important morphological discrepancies which exist between man's body and that of the anthropoids (orang-utang, chimpanzee, gorilla). It is, however, far from our intention to attribute to these differences any great argumentative force, especially against those who suppose that there was a common primate ancestry from which both man and ape finally descend; nor do we wish to deny that zoologically the human body belongs to the class of the mammals, nor that within this class there is any representative more similar to it than the anthropoids.

Of these differences the most important lies in the development of the brain of man and of the anthropoid, which is seen from the comparison of the weights. According to Wiedersheim we are forced to admit that the relative mass of the human brain is twice that of the chimpanzee, while, absolutely, it is from three to four times as great. The same is probably true of the orang-utang, while the brain of the gorilla, which, according to Wiedersheim, is the most humanlike of any of the anthropoid brains, is relatively only one-fifth that of man's. The human skull is from three to four times as large as that of the anthropoids. The difference becomes much more striking still when we compare the cerebral hemispheres and their convolutions. The weight of the brain of a male Teuton of from thirty to forty years of age is on the average 1424 grammes, that of a female 1273 grammes, and that of a full-grown orang only 79-7 grammes (Wundt). The proportion is therefore from 18:1 to 16:1. If we measure the superficial area of man's brain with all its convolutions and that of the orang we have, according to Wagner, from 1777 sq. cm. to 2196 sq. cm. for the human brain and 533-5 sq. cm. for that of the orang—that is a proportion of 4:4:1. It is further to be taken into consideration that, as Wiedersheim points out, the human brain is not to be looked upon as an enlarged anthropoid one, but as a "new acquisition with structures which the anthropoid does not as yet [!] possess." These new acquisitions are presumably qualitative and refer mainly to the centre within the great cerebral hemispheres. Intimately connected with the development of the brain is the moderate development of the dentition of man in comparison with the chisel-like molars of the monkey, which is armed with powerful teeth. Again, "the human face slides as it were down from the forehead and appears as an appendix to the front half of the skull. The gorilla's face, on the contrary, protrudes from the skull, which on return slides almost entirely backwards from the face. . . . It is only on account of its protruding, strongly developed lower parts that the small skull-cap of the animal can mask as a kind of human face" (Ranke).

A second group of differences is obtained by comparing the limbs of man and the anthropoid. Owing to his upright stature, man's appendicular skeleton is quite different in form and structure from that of the anthropoid. This is shown not merely by the length of the single parts, which, strangely enough, exhibit inverse proportions, but also in the interior structure of the bones, as was proved by Wallhoff (1905) in the case of the femur. If we suppose the length of the body to be 100 we have, according to Ranke, the following proportions:

<table>

The sponge-like structure in the femur of man and anthropoid exhibits considerable difference, so that it could be established by means of radiogrammes whether the femur was that of an upright walking individual or not; e.g., it was possible to prove the Neanderthal and Spy femur to be human. The foot of man is, moreover, very characteristic. It is not furnished with a thumb that can be bent across the whole member and hence it does not represent a typical prehensile organ, as is the case with the hind feet of the monkey. In general, each bone and organ of man could in some sense be styled ape-like, but in no case does this similarity go so far that the form peculiar to man would pass over into the form which is peculiar to the ape. This conclusion is confirmed by the fact that, according to Ranké and Weisbach, all the efforts to discover a series of bodily formations which would lead from the most apelike savages to the best apelike races have till now resulted in utter failure, since the apelike forms of organs actually found in some individuals are not confined to a single race or nation, but are distributed throughout all of them. Tailed ape-men, in the proper sense of the word, have no existence. If sometimes tail-like appendages occur, they are genuine deformities, pathological remnants of the individual's embryonic life. Cretins and microcephali are likewise pathological cases. The theory that such were the ancestors of the human species is certainly excluded by the fact that they are unable to procure independently the necessary means of existence.

(3) **“Blood Relationship” between Man and the Anthropoid.** In 1900 Friedental thought that he was able to prove the kinship of man and the anthropoid biochemically by showing, first, that the transfusion of human blood-serum into the chimpanzee was not followed by any signs of blood-poisoning, as usually happens on the introduction of foreign blood, and, secondly, that human serum did not produce a reaction when introduced into a solution of the blood of the orang and gibbon, while on the other hand it dissolved the blood corpuscles of the lower apes. A little later Nutall and others proved that anti-sera exercised an opposite effect. An "anti-man-serum" was prepared by injecting subcutaneously sterile human serum into a rabbit till the animal became immune to poisoning from the foreign blood-serum. The "anti-man-serum" of rabbit-blood thus prepared gave a precipitate with the blood-serum of man or of an animal with chemically similar blood, for instance anthropoids, but not with the serum of chemically different blood. The force of the argument lies, therefore, in this, that the chemical reaction obtained seems to be on the whole proportional to the degree of their chemical affinity.

What follows from these facts? Only this, that the blood of man is chemically similar to that of the anthropoids; but it does not follow that this chemical similarity must be attributed to any kinship of race. The mistake arises from the confusion of the ideas "similarity of blood" and "blood-relationship" in the genealogical sense of the term; otherwise it would be at once perceived that the fact of chemical similarity of blood is of no more importance for the theory of vertical evolution than any other fact of comparative morphology or physiology.

(4) **Rudimentary Organs.** One of the special arguments commonly cited in favour of the evolution theory is based on the frequent occurrence of rudimentary structures in organisms. As examples we may mention the following: Pythons and boa possess vestiges of hind limbs and of a pelvis separated from the vertebral column. The slow-worm is without external limbs, and yet possesses the shoulder-girdle and the pelvis, as well as a slightly developed breast-bone. The ostrich has merely stunted wing-bones, while the nearly extinct kiwi (aperyx) of New Zealand has only extremely small stumps of wings, which are clothed with hair-like feathers. The gigantic birds of New Zealand which became extinct in past ages were entirely wingless. Well worthy of note, also, are the rudimentary organs of the whale (Cetacea), since of the hind limbs only a few minute bones remain, and these are considered to be the pelvic bones, while the Greenland whale (Balena mysticetus) also possesses thigh and leg bones. The bones of the fore-limbs are not movable independently of one another, being bound together by means of tendons. Other remarkable pathological structures are the teeth of the Arctic right whale, which never penetrate the gums and are reabsorbed before birth, the upper teeth of the ox, the milk teeth and the eyes of the mole. The deep sea fish, like the Barathronae, have instead of eyes "two golden metallic concave mirrors" (Chun).

Nor is man devoid of rudimentary organs. Wiedereiche mentions no fewer than one hundred but of these only a few are genuine. The vermiform appendix may serve as an example, though according to recent research it is not entirely functionless. Its length oscillates between 2 cm. and 23 cm., while its breadth and external form vary exceedingly. Probable reasons for its partially rudimentary character are, besides its extreme variability, especially two facts in particular: the length of the organ compared with that of the large intestine is 1:10 in the embryo, and as 1:20 in the adult; secondly, in 32 per cent of all cases among adults of over twenty years of age the appendix is found to be closed.

Do such rudimentary organs furnish us with an acceptable proof for the theory of evolution? It is to be admitted that in many instances the organs were
formerly in a more perfect condition, so as to perform their typical functions—e.g., the eyes of the mole as organs of sight; and the limbs of the kiwi as means of locomotion for running or even for flying. Hence those individuals which now possess rudimentary organs are descended from ancestors which were in possession of some organs in a less degenerate condition. But it cannot be ascertained from the structures whether those ancestors were of another kind than their offspring. The veriform appendix in man is fully explained by supposing it to have had in antediluvian man a more perfect function of secretion, or simply the organs that remained. Until the palaeontological records furnish us with more evidence we can only conclude from the occurrence of rudimentary structures that in former ages the whale possessed better developed limbs, that the moles had better eyes, the kiwi wings, etc. In short, rudimentary organs per se do not prove more than that structures may dwindle away by disuse.

Haeckel’s endeavour to invalidate the teleological argument has no foundation in fact. In many cases the function of rudimentary organs has been discovered—e.g., the rudimentary teeth of the whale are probably of use in the growth of the jaw; the vertebral bone of the slow-worm as a protection of the chest. But even in instances in which we have not succeeded in discovering the function of such structures, it must not be forgotten that degeneration may be eminently teleological in furnishing material for other organs whose functions become more important. Moreover, as long as rudimentary organs remain, they may become, under altered circumstances, the starting-point for an appropriately modified reorganization. It is indeed difficult to see how “dysteleology”, as Haeckel calls it, follows from the fact that an organ adapted to some function disappears, probably in order to strengthen other organs when those means of livelihood are changed; and, until the contrary is proved, we may assume that we have to deal with instances of teleological adaptation and correlation, as has already been demonstrated in many cases—e.g., in the development of amphibians.

VI. THE ONTOGENETIC ARGUMENT.—Comparisons between the embryos of higher forms and the adult stages of lower groups were made long before the evolution theory was generally accepted by biologists. But it was only after 1859 that the facts of embryology were interpreted by means of that theory. Fritz Müller (1864) was one of the first to advance the view that the ontogenetic development of an individual is a short and simplified repetition of the stages through which the species had passed. Haeckel modified the proposition by introducing the term “kenogenesis”, which should account for all points of disagreement between the two series of development. In its new form the theory of recapitulation received the name “the biogenetic law of development”. Later on Hertwig reformed the law a second time by changing the expression “repetition of forms of essential ancestors” into “repetition of forms necessary for organic development and leading from the simple to the complex”. Besides, considerable changes, generally in an advancing direction, are said to have been brought about by the action of external and internal factors, so that in reality “a later condition can never correspond to a preceding one”. Both Haeckel’s and Hertwig’s views were rejected by Morgan, who does not believe in the recapitulation of ancestral adult stages by the embryo, but tries to show that the resemblance between the embryos of higher forms might be due to “the presence in the embryos of the lower groups of certain structures that remain in the adult forms of this group”. According to Morgan, we are justified in comparing “the embryonic stages of the two groups” only—a theory which he calls “the repetition theory.” Perhaps the most striking fact to illustrate the ontogenetic argument is the resemblance between the gill-system of fishes and certain analogous structures in the embryos of the other vertebrates, man included. However, contrary to the statements of most scientists, we do not think that the resemblance is such as to justify us in concluding “with complete certainty that all vertebrates must in the course of their history have passed through stages in which they were gill-breathing animals” (Wiedersheim). The embryos of fishes are at a certain very early stage of development furnished with vertical pouches which grow out from the wall of the pharynx till they fuse with the skin. Then a number of vertical slits (gill-slits) are formed by the fact that the walls of the pouches separate. In the adult fishes the corresponding openings serve to let water pass from the mouth through the gill-slits, which are covered by the capillaries of the gill-filaments. In this way the animal is enabled to provide the blood with the necessary oxygen and to remove the carbon dioxide. Now it is quite true that in all vertebrates there is some resemblance as to the first formation of the pouches, the slits, and the distribution of blood-vessels. But it is only in fishes that real gill-structures are formed. In the other vertebrates the development does not proceed beyond the formation of the apparently indiffernt pouches which never perform any respiratory function nor show the least tendency to develop into such organs. On the contrary, the gill-slits and arches seem to have, from the very beginning, a totally different function, actually subserving, at least in part, the formation of other organs. Even the amphibians that are furnished with temporary gills form them in quite a peculiar manner, which cannot be compared with that of fishes. Besides, the distribution of blood-vessels and the gradual disappearance of seemingly useless structures, as the “gill-systems” of vertebrates seem to be, may likewise be observed in cases where no one would seriously suspect a relation to former specific characteristics of living forms. In short, there is (1) no evidence that the embryos of mammals and birds have true inipient gill-structures; (2) it is probable that the structures interpreted as such really subserve from the very beginning quite different functions, perhaps only of a temporary nature.

In general it may be said that the biogenetic law of development is as yet scarcely more than a pristino principii. Because (1) the agreement between ontogeny and phylogeny has not been proved in a single instance; on the contrary—e.g., the famous pedigree of the horse’s foot begins ontogenetically with a single digit; (2) the ontogenetic similarity which may be observed, for instance, in the larval stages of insects may be explained by the similarity of the environment; (3) the ontogenetic stages of organisms are throughout specifically dissimilar, as is proved by a careful concrete comparison. The same conclusion is indicated.
by Hertwig's and Morgan's modifications of the biogenetic law, which, in turn, are of a merely hypothetical nature. In addition to this a short reference to Weismann's "confirmation" of Haeckel's law may be useful. Weismann knew that in the larval development of butterflies the species cannot be traced by merely longitudinal ones. Hence he concluded that in certain similar butterflies, whose early larval stages were then unknown, a similar succession of markings ought to be found. Ten years later the "predicted" marking was discovered. It is plain that such facts are not confirmation of the biogenetic law, but find their simple explanation in the fact that similar organisms will show similar ontogenetic stages. This fact, too, seems to account sufficiently for the observations advanced by Morgan in support of his theory of repetition.

VII. THE BIOGEOGRAPHICAL ARGUMENT.—The biogeoographical argument is a very complex one, composed of a vast number of single facts whose correlation among one another, and whose bearing upon the problem of evolution, can hardly be determined before many years of detailed research have gone by. The theory is well established, for instance, by Wallace are certainly not supported by facts. On the contrary, they have serious defects. One of them is the well-known "Wallace line"; another, much more important, the unfounded assertion that the higher vertebrates must have originated from marsupial and monotremes because these animals are almost entirely extinct everywhere except Australia, where they survive, as the highest representatives of the Australian vertebrates, in greatly varying forms till today. Besides, in most cases that we have no sufficient knowledge of the geographical distribution of organisms and of its various causes. But in order to give the reader an idea of the argument we shall briefly refer him to a group of facts which is well adapted to support the view of evolution explained in the preceding pages. Volcanic islands and such as are separated from the continent by a sea or strait of great depth exhibit a fauna and flora which have certainly come from the neighbouring countries, but which at the same time possess features altogether peculiar to them. The flora of Socotra, in the Indian Ocean, for instance, comprises 550 systematic species; among these there are 300 endemic plant species or 450; on the Hawaiian Islands, 70 endemic species of birds among 116; on the Galapagos, 81 among 108. Many such facts are known. They certainly form an excellent demonstration in favour of the proposition defended throughout this article: that such forms as the endemic species, which may well be compared with the races of the human species, were not directly created, but arose by some process of modification which was greatly facilitated by their complete isolation.

The most important general conclusions to be noted are as follows:—
1. The origin of life is unknown to science.
2. The origin of the main organic types and their principal subdivisions are likewise unknown to science.
3. There is no evidence in favour of an ascending evolution of organic forms.
4. There is no trace of even a merely probable argument in favour of the animal origin of man. The earliest human fossils and the most ancient traces of culture refer to a true Homo sapiens as we know him today.
5. Most of the so-called systematic species and genera were certainly not created as such, but originated by a process of either gradual or saltatory evolution. Changes which extend beyond the range of variation observed in the human species have thus far not been distinctly demonstrated, either experimentally or historically.

6. There is very little known about the causes of evolution. The greatest difficulty is to explain the origin and constancy of "new" characters and the teleology of the process. Darwin's "natural selection" is a negative factor only. The moulding influence of the environment cannot be broken down, but it proves unable to ascertain how far that influence may extend. Lamarck's "inheritance of acquired characters" is not yet exactly proved, nor is it evident that really new forms can arise by "mutation". In our opinion the principal of Mendelian segregation", together with the Weismann's natural selection and the movement of environment, will probably be some of the chief constituents of future evolutionary theories.

Many works referring to the subject have been mentioned in the body of the article. We shall here enumerate mainly such works on which the student of biogeography, or palaeontology, will be most interested.
bishop, Quintianus, was present at the Council of Elvira early in the fourth century. There exists no complete list of his successors for the next two centuries, though some are known from ancient diplomas. In 584 the Visigothic king, Leovigild, incorporated Evreux into the Kingdom of the Suevi, to the sorrow of Evora, which hitherto belonged. From the sixth and seventh centuries there remain few Christian inscriptions pertaining to Evora. In one of them has been interpolated the name of a Bishop Julian (1 Dec., 566); he is, however, inadmissible. Thenceforth the episcopal list is known from the reign of Recared (586) to the Arab invasion (714), after which the succession is quite unknown for four centuries and a half, with the exception of the epiphany of a Bishop Daniel (January, 1100). Until the reconquest (1106) by Alfonso I of Portugal, Evora was suffragan to Merida. Under this king it became suffragan to Braga, despite the protests of the Archbishops of Compostella, administrators of Merida. In 1274, however, the latter succeeded in bringing Evora within their jurisdiction. Finally, it became suffragan to Lisbon from 1394 to 1514, when it was made an archbishopric. Its large and splendid cathedral has undergone many architectural changes. Among its illustrious prelates may be mentioned Enrique (1540-64), 1578-80; the founder of its university and King of Portugal (1578-80); Teutonic de Braganza (1570-1602); and the scholarly writers Alfonso de Portugal (1456-1522) and Father Manuel de Cenaculo Villasboas (1802-14). Portuguese writers have maintained that the first bishop of Evora was St. Mautius, a Roman, and a disciple of Jesus Christ, sent by the Apostles into Spain as a missionary of the Gospel; from his genuine acts it appears that he was a devout Christian, put to death by the Jews after the fourth century. Spanish Jews, it is known, are mentioned in the fourth-century Council of Elvira (can. 49).

FONSECA, Evora glosaria (Rome, 1729), 261-315; Espana Sagrada (Madrid, 1761), XIV, 102-141; Gama, Series episcoporum (1753), 93-100; Suppl. (1789), 91; HINBERN, Inscriptiones Hispaniae christiane (Berlin, 1871), n. 1, 9, 10, 11, 213, 324; EDELE, Hierarchia catholica medii aevi (Munich, 1901), I, 163, II, 246.

F. FITA.

EVEUX, Diocese of (Evreciensis), in the Department of Eure, France; suffragan of the Archdiocese of Rouen. A legend purporting to date from a certain Deodatus, who is said to have been converted and then later ordained by St. Taurinus, makes the latter first bishop of Evreux. According to this legend St. Taurinus was baptized at Rome by St. Clement and sent to Gaul as a companion to St. Denis. According to Mgr. Duchesne this legend arose about the ninth century, when Abbot Hilduin of Saint-Denis was intent on proving the identity of Dionysius the Areopagite with Dionysius (Denis), first Bishop of Paris. It is certain that in the time of Charles the Bald (ninth century) St. Taurinus was held in high esteem at Evreux; still earlier, Bishop Landulphus, who seems to have occupied the See of Evreux at the beginning of the seventh century, had built the basilica in his honour. It is also impossible to fix the date of the reign of St. Gaul, who died a hermit at St. Pair, in the Cotentin. The first historically known Bishop of Evreux is Maurusio, who was present at the Council of Orléans in 511. Other bishops of Evreux are: St. Landulphus, St. Eterius, and St. Aquilinus (seventh century); Gilbert (1017-1112), sent by William the Conqueror to Alexander II, who preached the funeral oration over the Conqueror; still earlier, Bishop Landulphus, who seems to have occupied the See of Evreux at the beginning of the seventh century, had built the basilica in his honour. It is also impossible to fix the date of the reign of St. Gaul, who died a hermit at St. Pair, in the Cotentin.

Cathedral of Notre-Dame, Evreux. There are pilgrimages to the shrine of Notre-Dame de la Couture at Bernay (since the tenth century); to that of Notre-Dame des Ares at Pont de l'Arche; and to a relic of St. Clotilda venerated at Andelys. Previous to the anti-Congregations law of 1901, there were Jesuits and Lazarists at Evreux. Communities of nuns devoted to teaching and the relief of the poor were: the Dominicans of St. Catherine of Siena, an institute founded in 1587 at Etrepagny, which has three houses in the English West Indies; and especially the Sisters of Providence of Evreux, an order founded in 1700 by Justine Duvivier and her brother Father Duvivier in a small hamlet called Caer. It was organized by Father James, an Eudist missionary, and re-established in 1804 by Mgr. Théodore Le Mesle; it now has several houses in the diocese. The charitable institutions in charge of religious orders were in 1900: 2 cècrèches, 10 day-nursery, 1 orphan asylum for boys, 12 for girls, 3 workrooms, 19 homes for the aged, 11 dispensaries, 2 houses of retreat, and 1 insane asylum. The Diocese of Evreux comprised in 1905 (close of the Concordat period) 334,751 inhabitants, 37 parishes, 554 curvularian churches (mission churches), and 25 vicariates paid by the State.

Ewald (or Ewald), Saints, Martyrs in Old Saxony about 693. They were two priests and natives of Northumbria, England. Both bore the same name, but were distinguished as the Black Ewald and the Fair Ewald, from the difference in the colour of their hair and complexion. According to the example of many at that time, they spent several years as students in the schools of Ireland. Ewald the Black was the more learned of the two, but both were equally renowned for holiness of life. They were apparently acquainted with St. Willibrord, the Apostle of Friesland, and were animated with his zeal for the conversion of the Germans. Indeed, by some they have been actually numbered among the eleven companions of that saint, but it is more probable they did not set out from England till after St. Willibrord's departure. They entered upon their mission about 690. The scene of their labours was the country of the Ewalds, the part of Westphalia, and covered by the dioceses of Münster, Osnabrück, and Paderborn. At first the Ewalds took up their abode in the house of the steward of a certain Saxian earl or ealdorman (satrapa). Bede remarks that "the old Saxons have no king, but the royal power is shared among their ealdormen, who are elected by the people; and the wisest is the one in whose wisdom the country is best served, who is held to be the king of the tribe, the protector of the church." The Ewalds therefore lived in the midst of the people, and were respected by the heathen for their knowledge of the Scriptures and for their holiness of life. They laboured with much success, and were followed by many disciples, among whom were several ealdormen who were converted to Christianity. These, after the death of the Ewalds, continued their labours in the same spirit and with the same success as their masters.

Meanwhile, the Ewalds omitted nothing of their religious exercises. They prayed often, recited the canonical hours, and celebrated Mass, for they carried with them all that was necessary for the Holy Sacrifice. The pagan Saxons, understanding from these things that they had Christian priests and missionaries in their midst, began to suspect that their aim was to convert their overlord, and thus destroy their temples and their religion. Inflamed with jealousy and anger, they resolved that the Ewalds should die. Ewald the Fair quickly despatched with the steward of the Black Ewald, but, since the Black Ewald was a man of peace and was respected by the heathen, he was preserved. He was then called to the chief town, and there was held a meeting to decide the fate of the Ewalds. After much deliberation, the heathen agreed to put them to death, and the two bodies were cast into the Rhine. This is understood to have happened on 3 October at a place called Andernach, where a chapel still stands.

When the ealdorman heard of what had been done he was exceedingly angry, and took vengeance by ordering the murderers to be put to death and their village to be destroyed by fire. Meanwhile the martyred bodies were miraculously carried against the stream up the Rhine, for the space of forty miles, to the place in which the companions of the Ewalds were residing. As they floated along, a heavenly light, like a column of fire, was seen to shine above them. Even the murderers are said to have witnessed the miraculous brightness. Moreover, one of the martyrs appeared in vision to the monk Tilm (a companion of the Ewalds), and told him where the bodies would be found: "that the spot where they are buried will be a place of pilgrimage for the faithful through all ages."

Pepin, Duke of Austrasia, having heard of the wonders that had occurred, caused the bodies to be translated to Cologne, where they were solemnly enshrined in the collegiate church of St. Gumibert. The heads of the martyrs were bestowed on Frederick, Bishop of Munster, by Archbishop Anno of Cologne, at the opening of the shrine in 1074. These relics were probably destroyed by the Anabaptists in 1534. When St. Norbert visited Cologne, in 1121, he obtained two vessels containing the relics of the Ewalds, and among them were bones of the saints. These were deposited either at Prémontré, or at Florennes, a Premonstratensian monastery in the province of Namur. The two Ewalds are honoured as patrons in Westphalia, and are mentioned in the Roman Martyrology on 3 October. Their feast is celebrated in the dioceses of Cologne and Munster.

Ewing, Thomas, jurist and statesman, b. in West Liberty, Virginia (now West Virginia), U.S. A., 28 December, 1789; d. at Lancaster, Ohio, 26 October, 1871. His father, George Ewing of New Jersey, who had served as an officer in the Continental Army after the Revolu- tionary War, was a founder of the ancient county of Monogum Valley, and then, in 1789, in what is now Ames Township, Athens County, Ohio. Here, amid the privations of pioneer life, Ewing was taught to read by his elder sister, Sarah, and by extraordinary efforts acquired a fair elementary education. At the age of eleven, he left home and worked in a salt establishment, pursuing his studies at night by the light of the furnace fires. He remained there until he had earned sufficient to enable him to enter the Ohio University at Athens, where, in 1815, he received the degree of A.B., the first degree conferred by any college in the western part of the United States.

In March, 1821, Ewing entered public life as a member from Ohio of the United States Senate, and became prominent therein, with Webster and Clay, in resistance of the acts of President Jackson and in support of the Black Republicans. He upheld the protective tariff system of Clay, and presented one of the first of the memorials for the abolition of slavery.

In March, 1837, on the expiration of his term, he resumed the practice of the law. Upon the election of President Harrison, he was appointed Secretary of the Treasury in March, 1841. He prepared the second bill for the re-charter of the Bank of the United States, and, on its veto by Tyler, resigned from the cabinet, in September, 1841. In March, 1849, he was appointed by President Taylor secretary of the recently created Department of the Interior. He originated and conducted the construction of a railroad to the Pacific. On the death of Taylor in 1850, Ewing resigned from the cabinet and was appointed senator from Ohio to fill an unexpired term. On the expiration of his term in March, 1851, he returned to the practice of the law. In 1860 Ewing was appointed by the Governor of Ohio a member of the famous Peace Conference, and he was prominent in the efforts to avert the secession of the Southern States. During the war he unreservedly supported the government, and his judgment on matters of state was frequently sought by Mr. Lincoln. Upon the capture of Mason and Slidell brought England and the United States to the verge of hostilities, Ewing sent Mr. Lincoln the famous telegram that was decisive of the whole trouble: "There can be no contraband of war between neutral points."

COLUMBA EDMONDS.
the envos and the averting of hostilities. Conservative in his opinions, Ewing opposed the radical measures of Reconstruction at the close of the war and supported the administration of President Johnson. In February, 1868, after the removal of Stanton, the President appointed him to the Senate nomination of Ewing as Secretary of War, but it was not confirmed.

Descended of Scottish Presbyterian stock, Ewing, after a lifelong attraction to the Catholic Church, entered it in his latter years. Reared outside the fold of any religious body, he married, 7 January, 1820, Maria Wills Boyle, daughter of Hugh Boyle, an Irish Catholic, who was deeply influenced by the faith and pious example of his wife during their long married life, and all his children were reared in the faith. In October, 1869, Ewing was stricken while arguing a case before the Supreme Court of the United States and he was baptized in the court room. In September, 1871, his lifelong friend, Archbishop Purcell of Cincinnati, received him into the Church.

Philemon Beecher, eldest son of Thomas, b. at Lancaster, 3 November, 1820; d. there 15 April, 1896. He graduated in 1858 from Miami University, Oxford, Ohio, and then entered upon the study of the law. Admitted to the Bar in 1851, he formed with his father the firm of T. Ewing & Son. In both State and Federal courts, through his grasp of the philosophy of the law and his judicial temperament, he won a place beside his illustrious father. He was also the main support of his father in his political life and labours, and was an active figure first in the Whig and then in the Republican party. In 1862 he was appointed Judge of the Court of Common Pleas. Being opposed to the Reconstruction measures of his party he took part in the Liberal Republican movement. He was nominated to the supreme bench of Ohio in 1873. During the fifties and sixties which he engrossed in banking business, and was prominent in the development of the Hocking Valley coal-fields. The later years of his life were spent in retirement.

He married at Lancaster 31 August, 1848, Mary Rebecca Gillespie, a sister of Eliza Maria Gillespie (Mother Mary of St. Angela of the Sisters of the Holy Cross of Notre Dame, Indiana). He was a man of wide culture and a writer of vigorous and limpid English. He was ever foremost where the interests of the Church were concerned, and was a delegate from the Diocese of Columbus to the Catholic Congresses of 1847 and 1853.

Hugh Boyle, third son of Thomas, b. at Lancaster, 31 October, 1826; d. there 30 June, 1905. He was educated at the United States Military Academy at West Point, and in 1849 went to California, returning to Lancaster, in 1852, to enter on the study of the law. On his admission to the Bar, he practiced in St. Louis, Missouri, from 1854 to 1856, and then, in partnership with his brother Thomas, at Leavenworth, Kansas, from 1856 to 1858. In April, 1861, he was appointed a captain in the 7th Ohio Volunteer Infantry, and while in his regiment at St. Louis, Missouri, from 1854 to 1856, and then, in partnership with his brother Thomas, at Leavenworth, Kansas, from 1856 to 1858.

In April, 1861, he was appointed a captain in the 7th Ohio Volunteer Infantry, and while in his regiment at St. Louis, Missouri, from 1854 to 1856, and then, in partnership with his brother Thomas, at Leavenworth, Kansas, from 1856 to 1858, he was commissioned colonel, commanding the 17th Ohio Volunteer Infantry, and rendered conspicuous service. In November, 1862, he was commissioned brigade-general. He took part in the operations against Vicksburg, and his command led in the assault of 22 May, 1863. In July following he was made a major-general, and his command was in the assault upon Missionary Ridge in the operations about Chattanooga. He led his division in the assault upon Missionary Ridge and its capture. In the latter part of the war he was placed in command of the district of Kentucky, and at its close was brevetted major-general. In 1869 President Johnson appointed him Governor of Missouri, but he resigned.

On 3 January, 1873, he was appointed by President Johnson to the Senate, to the Senate nomination of Ewing as Secretary of War, but it was not confirmed.

In February, 1873, after the removal of Stanton, the President appointed him to the Senate nomination of Ewing as Secretary of War, but it was not confirmed.

Descended of Scottish Presbyterian stock, Ewing, after a lifelong attraction to the Catholic Church, entered it in his latter years. Reared outside the fold of any religious body, he married, 7 January, 1820, Maria Wills Boyle, daughter of Hugh Boyle, an Irish Catholic, who was deeply influenced by the faith and pious example of his wife during their long married life, and all his children were reared in the faith. In October, 1869, Ewing was stricken while arguing a case before the Supreme Court of the United States and he was baptized in the court room. In September, 1871, his lifelong friend, Archbishop Purcell of Cincinnati, received him into the Church.

Philemon Beecher, eldest son of Thomas, b. at Lancaster, 3 November, 1820; d. there 15 April, 1896. He graduated in 1858 from Miami University, Oxford, Ohio, and then entered upon the study of the law. Admitted to the Bar in 1851, he formed with his father the firm of T. Ewing & Son. In both State and Federal courts, through his grasp of the philosophy of the law and his judicial temperament, he won a place beside his illustrious father. He was also the main support of his father in his political life and labours, and was an active figure first in the Whig and then in the Republican party. In 1862 he was appointed Judge of the Court of Common Pleas. Being opposed to the Reconstruction measures of his party he took part in the Liberal Republican movement. He was nominated to the supreme bench of Ohio in 1873. During the fifties and sixties which he engrossed in banking business, and was prominent in the development of the Hocking Valley coal-fields. The later years of his life were spent in retirement.

He married at Lancaster 31 August, 1848, Mary Rebecca Gillespie, a sister of Eliza Maria Gillespie (Mother Mary of St. Angela of the Sisters of the Holy Cross of Notre Dame, Indiana). He was a man of wide culture and a writer of vigorous and limpid English. He was ever foremost where the interests of the Church were concerned, and was a delegate from the Diocese of Columbus to the Catholic Congresses of 1847 and 1853.

Hugh Boyle, third son of Thomas, b. at Lancaster, 31 October, 1826; d. there 30 June, 1905. He was educated at the United States Military Academy at West Point, and in 1849 went to California, returning to Lancaster, in 1852, to enter on the study of the law. On his admission to the Bar, he practiced in St. Louis, Missouri, from 1854 to 1856, and then, in partnership with his brother Thomas, at Leavenworth, Kansas, from 1856 to 1858. In April, 1861, he was appointed a captain in the 7th Ohio Volunteer Infantry, and while in his regiment at St. Louis, Missouri, from 1854 to 1856, and then, in partnership with his brother Thomas, at Leavenworth, Kansas, from 1856 to 1858.

In April, 1861, he was appointed a captain in the 7th Ohio Volunteer Infantry, and while in his regiment at St. Louis, Missouri, from 1854 to 1856, and then, in partnership with his brother Thomas, at Leavenworth, Kansas, from 1856 to 1858, he was commissioned colonel, commanding the 17th Ohio Volunteer Infantry, and rendered conspicuous service. In November, 1862, he was commissioned brigade-general. He took part in the operations against Vicksburg, and his command led in the assault of 22 May, 1863. In July following he was made a major-general, and his command was in the assault upon Missionary Ridge in the operations about Chattanooga. He led his division in the assault upon Missionary Ridge and its capture. In the latter part of the war he was placed in command of the district of Kentucky, and at its close was brevetted major-general. In 1869 President Johnson appointed him Governor of Missouri, but he resigned.
must enter into all effectual instruction, for it is not sufficient that a book be placed in the hands of a pupil or that he be compelled to attend lectures, but it is necessary to see that he grasps the ideas conveyed. Such tests are widely in vogue in Catholic institutions, as measures not subject to the Church. Examinations, however, have other purposes, especially as tests of qualifications for offices or positions, and as investigations to arrive at the truth. It is particularly under these aspects that the question of examinations now presents itself.

Examination for Appointment to Parochial Benefits.—The Council of Trent, realizing that parishes should be ruled over by men of virtue and learning, decreed (Sess. XXIV, c. xvii, De ref.) that the cure of souls should be entrusted only to those who, in a competitive examination or concursus, have demonstrated their fitness. The purpose of this examination is not only to exclude unworthy candidates, but to secure the selection of the best. Clement XI and Benedict XIV determined the form of this examination (see CONCORSUS. EXAMINERS. SYNODAL.

Examination for Promotion to Orders.—The Council of Trent (XXIII, c. vii, De ref.), repeating the legislation of previous councils, prescribes that a bishop promote no one to orders in the Church till priests and others prudent and learned, appointed by the bishop, pass upon the candidate's qualifications. This investigation is concerned with legitimate birth, habit, formation, freedom, or other details of the examination are left to the bishop. A prelate commissioned by another to ordain the latter's subject is free to submit the candidate to an examination or not, as he may deem proper, unless, for grave reasons, he suspects the unfitness of the candidate, notwithstanding a previous examination, or unless he be commissioned by the candidate's bishop to hold the examination. Members of religious orders are examined by their own superiors and likewise by the ordinary prelate, except the Jesuits and some others who by special privilege are exempt from examination by the ordinary prelate. (See EXAMINATION. EXAMINERS. SYNODAL.)

Examination of Bishops-Elect.—In addition to the examination in the Roman Pontifical, Gregory XIV prescribed another for bishops-elect, while Clement VIII instituted a congregation of cardinals for this purpose. This examination, however, developed into little else than a ceremony, since bishops are not selected till assurance is given of their prudence, piety, and learning. The late reorganization of the Roman Curia puts this matter under the Congregational Congregation. Cardinals who are to receive episcopal consecration are exempt from this examination.

Examination of Confessors.—The Council of Trent (Sess. XXIII, c. xv, De ref.) established the necessary requirements of episcopal approbation for all priests, both secular and regular, to hear confessions, advising an examination as a test of fitness, though bishops are free to appoint, without such test, those whose judgment are qualified for the work. Members of the regular clergy, without exception, may be obliged by the ordinary of the diocese to undergo this test, if they would hear the sacramental confessions of secular persons. Once approved, however, they are not subjected to another examination, unless some grave cause relating to confessions arise (see EXAMINERS. APOTOLIC.)

Examination of Preachers.—The ordinary of a diocese may submit to an examination members of religious bodies who desire to preach in the diocese in churches other than those of their own order. Once, however, he has given his approbation, he may not insist on a second examination, though for just cause he may withdraw the permission given to preach. The bishop's successor in office may demand a re-examination.

Examination of Those Wishing to Contract Marriage.—Before publishing the bans of marriage the pastor questions separately the contracting parties regarding their place of residence, to ascertain whether he has a right to unite them in matrimony. He inquires, likewise, whether they are acting with perfect freedom, from any undue pressure, fear, or other motive which might invalidate the contract. He learns of any opposition on the part of parents to the proposed union, as well as of the possible existence of any matrimonial impediment. He must ascertain, moreover, whether the parties are sufficiently grounded in the rudiments of the Catholic religion and capable, consequently, of instructing their offspring. If the parties belong to different parishes, by whom is this investigation to be conducted? Local regulations and customs are to be observed, since there is neither positive universal legislation nor uniform practice in this matter.

In ecclesiastical courts, civil, courts, witnesses are examined under oath, administered by the auditor or judge, who should first call the witness's attention to the nature and binding effect of an oath and to his duty of telling the truth. The oath must be to the effect that the witness will tell the truth, the whole truth, and nothing but the truth. If thought advisable by the judge, the oath may also contain the promise of secrecy. A statement not sworn to does not constitute evidence. Witnesses are examined separately. In civil trials the interested parties have a right to be present when witnesses are deposed, and may not be excluded except in rare cases approved by the judge. In criminal or other cases, where public rather than private interest is at stake, the practice is to exclude the plaintiff and defendant, as well as other witnesses. Here, also, in extreme cases an exception may be made. If, however, the defendant is not allowed to confront the witnesses cited by the plaintiff and vice versa, he is permitted to see the witnesses take the oath and may suggest interrogatories to be proposed.

Witnesses are to be asked or cited, but not necessarily in a formal manner, to appear in court and testify. He who offers his witness is responsible.
which must be attested by the clerk. If the witness refuses to subscribe, the fact and the reason thereof must be noted. Finally, both the judge and the clerk sign the document.

ANDREW B. MEEHAN.

Examination of Conscience.—By this term is understood a review of one's past thoughts, words, and actions for the purpose of ascertaining their conformity with, or disparity from, the moral law. Disclose and admission of faults or the acquisition of conscience is necessary, not so much for the dignity and happiness it confers on them as through regard for the holiness of the Supreme Author of the moral law. This precept of rational nature has been enforced by the voice of revelation. Thus God said to Abraham: “Walk before me and be perfect.” (Gen. xvi, 1). To this precept the Prophet Jeremiah referred when he sang in his Lamentations: “Let us search our ways, and seek, and return to the Lord” (Ill, 40).

In the fullness of time Christ came to perfect the knowledge of the moral law and draw the human heart into closer union with God. Frequent examination of conscience then became more imperative than before. In particular it was commanded by the Apostle St. Paul to be performed by the faithful each time they received Holy Communion: “Let a man examine himself; and so let him eat of that bread, and drink of the chalice; for he that eateth and drinketh unworthily eateth and drinketh judgment to himself…” if we would judge ourselves, we should not be judged” (I Cor. xi, 28-31). And the early Christians who received Holy Communion very frequently, examination of conscience become a familiar exercise of their spiritual life. Thus we read of the great hermit St. Anthony, that he examined his conscience every night, while St. Basil, St. Augustine, and St. Bernard, and founders of religious orders generally, made the examination of conscience a regular daily exercise of their followers. What was thus enjoined on religious by rule was inculcated upon the faithful at large by the masters of the spiritual life as a most effectual means to advance in virtue.

The devotional examination of conscience is quite distinct from that required as a proximate preparation for sacramental confession. If a Christian judges himself unworthy of receiving the Body of the Lord, he is to make himself worthy by obtaining pardon of his sins; and the means is provided for the purpose by Christ in the power He has given His ministers to remit sins. As confession is to be used in remitting or retaining sins, the confession of the sinner is necessary; and to confess his faults he must examine his conscience with proper diligence. By self-examination he intensifies his contrition and purpose of amendment. In preparing for confession, the penitent is strictly obliged to examine his imagination with such diligence as the most man ordinarily devotes to important business, but the impossibility is not demanded. The more protracted his wanderings have been, the weaker the prodigal may have become to travel back to his Father, and the more help he may need to accomplish the task. When he has made some earnest efforts in this matter, the priest is to lend his assistance to perfect the work; as Vasquez and de Lugo remark, a prudent confessor can accomplish more with most penitents by a few questions than they themselves can by a long examination. Suarez takes notice that the Fathers of the Church have had a wide range for such examinations. The ordinary method followed in the examination for confession is to consider in succession the Ten Commandments of God, the Commandments of the Church, the Seven Capital Sins, the duties of one's state of life, the nine ways of mortification, and those things which have led a uniform life it will often suffice to recall. Where they have been, the persons with whom they have dealt, the duties or pursuits in which they have been engaged; how they have behaved on ordinary occasions—as, for instance, when buried in their usual employment on working-days—and on unusual occasions, such as Sundays and holidays.

As to the daily examination of conscience, two species must be distinguished, the general and the particular. The former aims at the correction of all kinds of faults, the latter at the avoidance of some particular sin. Some particular sins are so grave that the general examination a good method is laid down by St. Ignatius of Loyola in his “Spiritual Exercises”.

It contains five points. In the first point we thank God for the benefits received; in the second we ask grace to know and correct our faults; in the third we pray that we may be so disposed that we will, in the fourth we ask God's pardon; in the fifth we purpose amendment.

Of the particular examination of conscience St. Ignatius is generally considered as the author, or at least as the first who reduced it to system and promulged its practice among the faithful. It concentrates one's attention on some one fault or virtue. On arising in the morning we resolve to avoid a certain fault during the day, or to perform some act of a particular virtue. Afternoon we consider how often we have committed that fault, or practiced that virtue; we mark the number in a booklet prepared for the purpose, and we renew our resolution for the rest of the day. At night we examine and mark again, and make resolutions for the following day. We thus get a more careful business of our affairs, and a special portion of our mercantile transactions to see where losses come in or where greater gain may be secured. St. Ignatius further suggests that we impose upon ourselves some penance for every one of the faults committed, and that we compare the numbers marked each time with those of the preceding day, the total sum at the end of the week with that of the preceding week, etc. (See Conscience; Duty; Sin.)

CHARLES COPPENS.

Examiners, APOSTOLIC, so called because appointed by the Apostolic See for service in Rome. In 1570 Pius V instituted the Apostolic examiners to conduct examinations of candidates for orders and of confessors. These examiners, who are chosen by the pope, are instructed to examine the candidates to ascertain whether they have been to examination examiners. In preparing for confession, the penitent is strictly called to examine his imagination with such diligence as the most man ordinarily devotes to important business, but the impossibility is not demanded. The more protracted his wanderings have been, the weaker the prodigal may have become to travel back to his Father, and the more help he may need to accomplish the task. When he has made some earnest efforts in this matter, the priest is to lend his assistance to perfect the work; as Vasquez and de Lugo remark, a prudent confessor can accomplish more with most penitents by a few questions than they themselves can by a long examination. Suarez takes notice that the Fathers of the Church have had a wide range for such examinations. The ordinary method followed in the examination for confession is to consider in succession the Ten Commandments of God, the Commandments of the Church, the Seven Capital Sins, the duties of one's state of life, the nine ways of mortification, and those things which have led a uniform life it will often suffice to recall. Where they have been, the persons with whom they have dealt, the duties or pursuits in which they have been engaged; how they have behaved on ordinary occasions—as, for instance, when buried in their usual employment on working-days—and on unusual occasions, such as Sundays and holidays.

As to the daily examination of conscience, two species must be distinguished, the general and the particular. The former aims at the correction of all kinds of faults, the latter at the avoidance of some particular sin. Some particular sins are so grave that the general examination a good method is laid down by St. Ignatius of Loyola in his “Spiritual Exercises”.

It contains five points. In the first point we thank God for the benefits received; in the second we ask grace to know and correct our faults; in the third we pray that we may be so disposed that we will, in the fourth we ask God's pardon; in the fifth we purpose amendment.

Of the particular examination of conscience St. Ignatius is generally considered as the author, or at least as the first who reduced it to system and promulged its practice among the faithful. It concentrates one's attention on some one fault or virtue. On arising in the morning we resolve to avoid a certain fault during the day, or to perform some act of a particular virtue. Afternoon we consider how often we have committed that fault, or practiced that virtue; we mark the number in a booklet prepared for the purpose, and we renew our resolution for the rest of the day. St. Ignatius further suggests that we impose upon ourselves some penance for every one of the faults committed, and that we compare the numbers marked each time with those of the preceding day, the total sum at the end of the week with that of the preceding week, etc. (See Conscience; Duty; Sin.)

CHARLES COPPENS.
from this examination, except in case of tonsure, when he may allow candidates to be examined privately by one examiner. All, whether affiliated to the Diocese of Rome or not, must undergo this examination. Those who have been in Rome four months or more, and to return to the Eternal City under pain of suspension, be examined in the vicariate before receiving orders (not tonsure) elsewhere. An exception is made in regard to the canons of the basilica of St. Peter, who are examined and promoted to orders by their cardinal archpriest. They must, however, have testimonial letters from the cardinal vicar. Examiners are required to take the oath as above, to allow suspects to swear, and to accept gifts or any form of examination. Whether these examiners, thus appointed out of synod, hold office till death or only till the convening of the next synod is not determined. In many dioceses these same examiners conduct the examinations for the junior clergy, confessors, candidates for orders, and the like. (Cf. Council of Trent, Sess. 21; Conc. V, c. xxv, Third Plenary Council of Baltimore, nos. 21 sq.)

Andrew B. Meehan.

**Exarch** (Gr. ἕξαρχος), a title used in various senses both civilly and ecclesiastically. In the civil administration of the Roman Empire the exarch was the governor or viceroy of any large and important province. The best-known case is that of the Exarch of Italy, who, after the defeat of the Goths, ruled from Ravenna (552-751) in the name of the emperor at Constantinople. In ecclesiastical language an exarch is a bishop whose see has been extended beyond his own (metropolitical) province, over other metropolitans. Thus, as late as the time of the Council of Chalcedon (451), the patriarchs are still called exarchs (can. ix). When the name “patriarch” became the official one for the Bishops of Rome, Alexandria, Antioch (ancestor of Constantinople and Jerusalem), the other title was left as the proper style of the metropolitans who ruled over the three remaining (political) dioceses of Diocletian’s division of the Eastern Prefecture, namely the Exarchs of Asia (at Ephesus), of Cappadocia and Pontus (at Caesarea), and of Thrace (at Nicomedia). The adoption of Constantinople put an end to these exarchates, which fell back to the state of ordinary metropolitan sees (Ferrusæus, Orth. Eastern Church, 21-25). But the title of exarch was still occasionally used for any metropolitans (so at Thessalonica in 1439, can. vi). Since the use of all these titles became gradually fixed with definite technical meanings, that of exarch has disappeared in the West, being replaced by the names “Apostolic vicar” and then “primate.” A few cases, such as that of the Archbishop of Lyons, whom the Emperor Frederick I named Exarch of Burgundy in 1157, are known, but the title of primate is a bishop who holds a place between that of patriarch and that of ordinary metropolitan. The principle is that, since no addition may be made to the sacred number of five patriarchs, any bishop who is independent of any one of these five should be called an exarch. Thus, since the Church of Cyprus was declared autocephalous (at Ephesus in 431), its primate receives the title of Exarch of Cyprus. The short-lived medieval Churches of Ipek (for Servia), Achrida (for Bulgaria), Tirnovo (for Rumania), were governed by exarchs, though these prelates occasionally usurped the title of patriarch (Ferrusæus, Orth. Eastern Church, 305 sq., 317 sq., 328 sq.). On the same principle the Archbishop of Mount Sinai is an exarch, though in this case, as in that of Cyprus, modern Orthodox usage generally prefers the (to them) unusual title, “archbishop” (Ἀρχιεπίσκοπος). When the Bulgarians were granted their national Church (1570), not quite daring to call its head a patriarch, they made him an exarch. The Bulgarian exarch, who resides at Constantinople, is the most famous of all persons who bear the title now. Because of his adherents throughout Macedonia are called exarchs (as opposed to the Greek patriarchs’ the title use of). It was an invented title styled “exarch” of Peter the Great, after abolishing the Patriarchate of Moscow (1702), for twenty years before he founded the Russian Holy Directing Synod, appointed a vicegerent with the title of exarch as president of a tem-
porary governing commission. Since Russia destroyed the old independent Georgian Church (1802) the Primate of Georgia (always a Russian) sits in the Holy Synod at St. Petersburg with the title of Exarch of Georgia (Fortescue, Orth. Eastern Church, 304-305).

Lastly, the third officer of the court of the Patriarch of Constantinople, who examines marriage cases (suo
defensor matrimonii), is called the exarch (ibid., 349).

Excadrination. See Incardination.

Ex Cathedra, literally “from the chair,” a theological term which signifies authoritative teaching and is more particularly applied to the definitions given by the Roman pontiff. Originally the name of the seat occupied by a professor or a bishop, cathedra was used later on to denote the magisterium, or teaching authority. The phrase ex cathedra occurs in the writings of the medieval theologians, and more frequently in the time at which arose the Reformers, regarded to the papal prerogatives. But its present meaning was formally determined by the Vatican Council, Session IV, Const. de Ecclesiâ Christi, iv. “We teach and define that it is a dogma Divinely revealed that the Roman pontiff when he speaks ex cathedra, that is when in discharge of the office of pastor and doctor of all Christians, by virtue of his supreme Apostolic authority, he defines a doctrine regarding faith or morals to be held by the universal Church, by the Divine assistance promised to him in Blessed Peter, is possessed of that infallibility with which the Divine Redeemer willed that His Church should be endowed in defining doctrine regarding faith or morals, and that therefore such definitions of the Roman pontiff are of themselves and not from the consent of the Church irrefromable.” (See Infallibility; Pope.)

E. A. PACE.

Exclusion, Right of (Lat. Jus Exclusionis), the alleged competence of the more important Catholic countries, Austria, France, and Spain, to include in their respective cardinal protector, or cardinal procurator, those members of the Sacred College who were persona minus grata, so that, if there was a possibility of one of these becoming pope, the authorized cardinal might, before the decisive ballot, give his veto, in the name of his government, against such election. At one time this veto was given orally; later it was given in writing. The cardinal protector, or cardinal procurator, who cast the veto, was, as a rule, that member of the Sacred College who had been created a cardinal at the desire of his government. This declaration could only be the last moment, for the bishops, by traditional usage, a government might invoke this alleged right only once at the same concile, and consequently would not wish to employ it unnecessarily. A veto made after the election was not recognized. Opinions differ widely as to the antiquity of this right. It cannot be proved that it is in any way related to the rights in the papal election, exercised by German kings and emperors in the early Middle Ages. Indeed, it was not until the sixteenth century, that the more important European countries obtained larger influence over papal elections, owing to the contentions of France, Spain, and the German emperors for the control of Italy. These governments were originally satisfied with the so-called “ballot of exclusion,” i.e., they sought to unite more than one-third of the voters against an undesirable candidate and thus make his election impossible, through lack of the necessary two-thirds majority. About the beginning of the seventeenth century, however, in the conclaves that elected Leo XI and Paul V (1605), Spain raised the claim, that it could exclude a candidate by a general declaration addressed to the College of Cardinals. Soon after, in the conclaves of 1614 and 1655, which elected, respectively, Innocent X and Alexander VII, and in both of which Cardinal Sfregotti was excluded as a candidate, the term used for this action was Jus Exclusi-

EXCLUSION. I

In the following period repeated use was made of this so-called right. In 1721 the German emperor formally excluded Cardinal Rampolla; in 1730 the King of Spain excluded Cardinal Imperiali; in 1758 France exercised this right to exclude Cardinal Cavalchini. In the nineteenth century Austria maintained the right of exclusion, in 1830, against Cardinal Severoli, and Spain, in 1890, against Cardinal Giustiniani; in 1903 Austria again exercised this right, this time against Cardinal Rampolla. As a matter of fact, no government has a right to exercise any veto in a papal election. On the contrary the popes have expressly repudiated the exercise of such right. Pius IV in the Bull “In eligentia” (9 October, 1565) (Magnum Bullarium, II, 277 sqq.), ordered the cardinals to elect a pope “Prin-
cipium secularium intercessionibus, et certe, quae mundanis respectibus, minime attentis” (without any regard to the interference of secular rulers, or to other human considerations). That he meant thereby what is now known as the right of exclusion cannot, however, be proved; according to the foregoing account of its origin such claim did not then exist. Gregory XV, in the Bull “Æterni Patris Filius” (15 November, 1621, in “Magnum Bullarium”, III, 444 sqq.) declared authoritatively: “Cardinales omnino ab intercessionibus et omnibus pactis convencionibus, promotionibus, intendimentis, condicis, fraudibus, aliquibus obligationibus, minis, signis, contrasignis sufragiorum seu schedularum, aut aliis tam verbis quam scripto aut quodocumque dantibus aut petendis, tam respectu inclusionis quam exclusionis, tam universum quum plurimum aut omnium rebus, ebedem of which is, that the cardinals must abstain from all agreements, and from acts of any kind, which might be construed as binding them to include or exclude any one candidate, or several, or candidates of a certain class. It may be that the pope does not ever refer to exclusion by a state, but only to the so-called “ballot of exclusion”; it has already been stated, however, that the governments at this time laid claim to a formal right of exclusion. In the Bull “Apostolatus officium” (11 October, 1792, in “Magnum Bullarium”, XIV, 39 sqq.) Clement XIII ordered the cardinals in the words of Pius IV, already quoted, to elect, “principium secularium intercessionibus et certe, quae mundanis respectibus minime attentis et postpositis” (i.e. without regard to the interference of secular rulers or to other human considerations). By this decision governmental interference of an extent long been the accepted form of the interference of secular rulers (interesto principiis) in papal elections. It is, therefore, precisely this exclusion which the pope forbids. This command has all the more weight since we know that this pope was urged to recognize, within certain limits, the right of exclusion put forth by the Catholic states; in the minutes of the deliberations of the commission of cardinals appointed to draw up this Bull the right of exclusion is explicitly characterized as an abuse. By the Constitution “In hac subditi”, of 23 August, 1871 (Archiv für kath. Kirchenrecht,
1891, LXV, 303 sq.), Pius IX forbade any interference of the secular power in papal elections. It is plain, therefore, that the popes have rejected all right of exclusion by a Catholic state in a papal election. Nor can it be admitted that this right has arisen otherwise than from the consequences essential to the growth of a customary right are present; reasonableness and prescription are especially lacking. To debar precisely the most capable candidates is an onerous limitation of the liberty of the electors, and injurious to the Church. Moreover, the cases of exclusion by a Catholic state are few in comparison with the exclusion of a right acquired by customary possession. Recent legislation by Pope Pius X has absolutely repudiated and abolished forever this jus exclusivum. In the Constitution "Commissum Nobis" (20 Jan., 1904) he declared that the Apostolic See had never approved the civil veto, though previous legislation had not succeeded in preventing it: "Wherefore in virtue of holy obedience, under threat of the Divine judgment, and pain of excommunication latet sententia . . . . we prohibit the cardinals of the Holy Roman Church, all and single, and likewise the Sacred Congregation of the Holy Office, who take part in the Conclave, to receive even under the form of a simple desire the office of proposing the veto in whatever manner, either by writing or by word of mouth. . . . And it is our will that this prohibited will be extended . . . . to all intercessions, etc., and whatever the lay persons endeavor to intrude themselves in the election of a pontiff. . . . "Let no man infringe this our inhibition . . . under pain of incurring the indignation of God Almighty and of his Apostles, Sts. Peter and Paul." The new form of oath to be taken by all cardinals contains these words: "we shall never in any way accept, under any pretext, from any civil power whatever, the office of proposing a veto of exclusion under the form of a mere desire . . . and we shall not lend favour to any intercession, or intercession, or any other method whatever, by which the lay powers of any grade or order may wish to interfere in the election of a pontiff."

JOHANNES BAPTISTE SAGMÜLLER.

Excommunication.—This subject will be treated under the following heads: I. General Notions and Historical Summary; II. Kinds of Excommunication; III. Who Can Excommunicate? IV. Who Can Be Excommunicated? V. Effects of Excommunication; VI. Excommunication from Excommunication; VII. Excommunications Late Sententia Now in Force.

I. GENERAL NOTIONS AND HISTORICAL SUMMARY.

Excommunication (Lat. ex, out of, and communio or communicatio, communion—exclusion from the communion), the principal and severest censure, is a medical spiritual penalty that deprives the guilty Christian of all participation in the Eucharistic society. Being a penalty, it supposes guilt; and being the most serious penalty that the Church can inflict, it naturally supposes a grave offence. It is also a medicinal rather than a vindictive penalty, being intended, not so much to punish the culprit, as to correct him and bring him back to the path of righteousness. It necessarily, therefore, contemplates the future, either to prevent the recurrence of certain culpable acts that have grievous external consequences, or, more especially, to induce the malefactors to satisfy certain moral obligations with the growth of a customary right are present; reasonableness and prescription are especially lacking. To debar precisely the most capable candidates is an onerous limitation of the liberty of the electors, and injurious to the Church. Moreover, the cases of exclusion by Catholic states are few in comparison with the exclusion of a right acquired by customary possession. Recent legislation by Pope Pius X has absolutely repudiated and abolished forever this jus exclusivum. In the Constitution "Commissum Nobis" (20 Jan., 1904) he declared that the Apostollic See had never approved the civil veto, though previous legislation had not succeeded in preventing it: "Wherefore in virtue of holy obedience, under threat of the Divine judgment, and pain of excommunication latet sententia . . . . we prohibit the cardinals of the Holy Roman Church, all and single, and likewise the Sacred Congregation of the Holy Office, who take part in the Conclave, to receive even under the form of a simple desire the office of proposing the veto in whatever manner, either by writing or by word of mouth. . . . And it is our will that this prohibited will be extended . . . . to all intercessions, etc., and whatever the lay persons endeavor to intrude themselves in the election of a pontiff. . . . "Let no man infringe this our inhibition . . . under pain of incurring the indignation of God Almighty and of his Apostles, Sts. Peter and Paul." The new form of oath to be taken by all cardinals contains these words: "we shall never in any way accept, under any pretext, from any civil power whatever, the office of proposing a veto of exclusion under the form of a mere desire . . . and we shall not lend favour to any intercession, or intercession, or any other method whatever, by which the lay powers of any grade or order may wish to interfere in the election of a pontiff."

JOHANNES BAPTISTE SAGMÜLLER.

Excommunication.—This subject will be treated under the following heads: I. General Notions and Historical Summary; II. Kinds of Excommunication; III. Who Can Excommunicate? IV. Who Can Be Excommunicated? V. Effects of Excommunication; VI. Excommunication from Excommunication; VII. Excommunications Late Sententia Now in Force.

I. GENERAL NOTIONS AND HISTORICAL SUMMARY.

Excommunication (Lat. ex, out of, and communio or communicatio, communion—exclusion from the communion), the principal and severest censure, is a medical spiritual penalty that deprives the guilty Christian of all participation in the Eucharistic society. Being a penalty, it supposes guilt; and being the most serious penalty that the Church can inflict, it naturally supposes a grave offence. It is also a medicinal rather than a vindictive penalty, being intended, not so much to punish the culprit, as to correct him and bring him back to the path of righteousness. It necessarily, therefore, contemplates the future, either to prevent the recurrence of certain culpable acts that have grievous external consequences, or, more especially, to induce the malefactors to satisfy certain moral obligations with the growth of a customary right are present; reasonableness and prescription are especially lacking. To debar precisely the most capable candidates is an onerous limitation of the liberty of the electors, and injurious to the Church. Moreover, the cases of exclusion by Catholic states are few in comparison with the exclusion of a right acquired by customary possession. Recent legislation by Pope Pius X has absolutely repudiated and abolished forever this jus exclusivum. In the Constitution "Commissum Nobis" (20 Jan., 1904) he declared that the Apostollic See had never approved the civil veto, though previous legislation had not succeeded in preventing it: "Wherefore in virtue of holy obedience, under threat of the Divine judgment, and pain of excommunication latet sententia . . . . we prohibit the cardinals of the Holy Roman Church, all and single, and likewise the Sacred Congregation of the Holy Office, who take part in the Conclave, to receive even under the form of a simple desire the office of proposing the veto in whatever manner, either by writing or by word of mouth. . . . And it is our will that this prohibited will be extended . . . . to all intercessions, etc., and whatever the lay persons endeavor to intrude themselves in the election of a pontiff. . . . "Let no man infringe this our inhibition . . . under pain of incurring the indignation of God Almighty and of his Apostles, Sts. Peter and Paul." The new form of oath to be taken by all cardinals contains these words: "we shall never in any way accept, under any pretext, from any civil power whatever, the office of proposing a veto of exclusion under the form of a mere desire . . . and we shall not lend favour to any intercession, or intercession, or any other method whatever, by which the lay powers of any grade or order may wish to interfere in the election of a pontiff."

JOHANNES BAPTISTE SAGMÜLLER.
Christian centuries it is not always easy to distinguish between excommunication and penitential exclusion; to differentiate them satisfactorily we must await the decline of the institution of public penance and the well-defined separation between those things pertaining to the forum internum, or tribunal of spiritual censure, and the forum externum, or public ecclesiastical tribunal; nevertheless, the admission of a sinner to the performance of public penance was consequent on a previous genuine excommunication. On the other hand, formal exclusion from reception of the Eucharist and the other sacraments was only mitigated excommunication or a species of interdict, which moves the bishop or some other ecclesiastical authority, begot eventually a contempt for excommunication. Consequently the Council of Trent was forced to recommend to all bishops and prelates more moderation in the use of censures (Sess. XXV, c. iii, De ref.). The passage is too significant to be here unduly condensed. The reason for the use of excommunication is the very sinews of ecclesiastical discipline, and very salutary for keeping the people to the observance of their duty, yet it is to be used with sobriety and great circumspection; seeing that experience teaches that if it be wielded rashly or for slight causes, it is more despised than feared, and works more evil than good. Wherefore, such excommunications which are wont to be issued for the purpose of provoking a revelation, or on account of things lost or stolen, shall be issued by no one whosoever but the bishop; and not then, except on account of some uncommon circumstance or occasion, nor is it ever possible for the Church to obtain from the civil power the execution of such penalties.

Excessive Number of Excommunications.—In the course of time, also, the number of canonical excommunications was excessively multiplied, which fact, accompanied with their frequent repetition, made it difficult to know whether many among them were always in force. The difficulty was greater as a large number of these excommunications were reserved, for which reason theologians with much ingenuity construed favourably said reservation and permitted the majority of the faithful to obtain absolution without presenting themselves in Rome, or indeed even writing thither. In recent times the number of excommunications in force has been greatly diminished, and a new method of absolving from them has been inaugurated; it will doubtless find a place in the future legislation of the canon law that is being prepared. Thus, without change of nature, excommunication in foro externo has become an exceptional penalty, reserved for very grievous offences detrimental to Christian society; in foro interno it has been diminished and mitigated, at least in regard to the conditions for absolution from it. However, as can readily be seen from a perusal of the excommunications actually in force, it still remains true that what the Church aims at is not so much the cringe as the satisfaction to be obtained from the culprit in consequence of his offence.

Refusal of Ecclesiastical Communion.—Finally, real excommunication must not be confounded with a measure formerly quite frequent, and sometimes even known as excommunication, but which was rather a refusal of spiritual communion. It was the refusal by a bishop to communicate in sacris with another bishop and his church, in consideration of an act deemed reprehensible and worthy of chastisement. It was undoubtedly with this withdrawal of communion that Pope Victor threatened (or actually punished) the bishops of Asia in the paschal controversy (Council Hist. Eccl., V, xxiv); it was certainly the measure to which St. Martin of Tours had recourse when he refused to communicate with the Spanish bishops who caused Emperor Maximinus to condemn to death the heretic Priscillian with some of his adherents (Sulpicius Severus, Dial., iii, 15). Moreover, a similar pri-
Excommunication was in early Christian times imposed by councils as a regular penalty for bishops found guilty of certain minor faults; the most frequent example is that of bishops who, without good reason, neglected to attend the provincial council (so the Council of Carthage, 401, can. 506, can. xxxv; Tarragona, 510, can. vi; II Macon, 555, can. xx; etc.). These bishops were evidently not excommunicated, properly speaking; they continued to govern their dioceses and publicly to hold ecclesiastical services; they were simply deprived, as the aforesaid texts show, of the consolation of communion with their episcopal brethren.

II. Kinds of Excommunication.—(1) Major and Minor.—Until recently excommunication was of two kinds, major and minor. (a) Minor excommunication is uniformly defined by canonists and by Gregory IX (cap. lx, De sent. exc. lib. V, tit. xxxix) as prohibition from receiving the sacraments, what theologians call the passive use of the sacraments. In order to receive the Eucharist and the other sacraments, those who had incurred this penalty had to be absolved therefrom; as it was not reserved, this could be done by any confessor. Indirectly, however, it entailed other consequences. The canonical law (cap. x, De cler. excomm. ministrante, lib. V, tit. xxvii) taught that the priest who celebrates Mass while under the ban of minor excommunication sins grievously; also that he sins similarly in administering the sacraments; and finally, that while he cannot vote with the others, he himself is imputable to a canonical offense. This is readily understood when we remember that the cleric thus excommunicated was presumed to be in the state of grievous sin, and that such a state is an obstacle to the lawful celebration of Mass and the administration of the sacraments. Minor excommunication was merely identical with the state of the penitent of older times, who, prior to his reconciliation, was admitted to public penance. Minor excommunication was incurred by unlawful intercourse with the excommunicated, and in the beginning no exception was made of any class of excommunication. Hence, however, to any inconstancy arising from this condition of things, especially after excommunications had become so numerous, Martin V, by the Constitution “Ad evitanda scandalia” (1415), restricted the aforesaid unlawful intercourse to that held with those who were formally excommunicated as persons who were therefore known as vitandi (Lat. vitare, to avoid), also with those who were notoriously guilty of striking a cleric. But as this twofold category was in modern times greatly reduced, but little attention was paid to minor excommunication, and eventually it ceased to exist after the publication of the Constitution “Apostolice Sedis” (4 Jan., 1884, ad 4).

(b) Major excommunication, which remains now the only kind in force, is therefore of the kind of which we treat below, and to which our definition fully applies. Anathema is a sort of aggravated excommunication, from which, however, it does not differ essentially, but simply in the matter of special solemnities and outward display.

(2) A jure and ab homine.—Excommunication is either a jure (by law) or ab homine (by judicial act of minors or juries). The first, the law itself, which declares that whosoever shall have been guilty of a definite crime will incur the penalty of excommunication. The second is inflicted by an ecclesiastical prelate, either when he issues a serious order under pain of excommunication or imposes this penalty by judicial sentence and after a criminal trial.

(3) Latæ and Ferendæ Sententiae.—Excommunication, especially a jure, is either latæ or ferendæ sententiae. The first is incurred as soon as the offence is committed; the second, on the contrary, even without intervention of any ecclesiastical judge; it is recognized in the terms used by the legislator, for instance: “the culprit will be excommunicated at once, by the fact itself [statim, ipso facto]”. The second is indeed foreseen by the law as a penalty, but is inflicted on the culprit only by a judicial sentence; in other words, the delinquent is rather threatened than visited with the penalty, and incurs it only when the judge has summoned him before his tribunal, declared him guilty, and punished him according to the terms of the law. It is recognized when the law contains these or similar words: “under pain of excommunication”; “the culprit will be excommunicated”.

(4) Public and Occult.—Excommunication ferendæ sententiae can be public only, as it must be the object of a declaratory sentence pronounced by a judge; but excommunication latæ sententiae may be either public or occult. It is public through the publicity of the law when it is imposed and published by ecclesiastical authority; it is public through notoriety of fact when the offence that has incurred it is known to the majority in the locality, as in the case of those who have publicly done violence to others, or of the purchasers of the contrary property. The contrary is occult when the offence entailng it is known to no one or almost no one. The first is valid in the forum externum and consequently in the forum internum; the second is valid in the forum internum only. The practical difference is very important. He who has incurred excommunication for himself as excommunicated and be absolved as soon as possible, submitting to whatever conditions will be imposed upon him, but this only in the tribunal of conscience; he is not obliged to denounce himself to a judge nor to abstain from external acts connected with the exercise of jurisdiction, and he may ask absolution without making himself known either in confession or to the Sacred Penitentiary. According to the teaching of Benedict XIV (De synodo, X, i, 5), “a sentence declaratory of the offence is always necessary in the forum externum, since in this tribunal no one is pronounced unless he is shunned and condemned as a crime that entails such a penalty”. Public excommunication, on the other hand, is removed only by a public absolution; when it is question of simple publicity of fact (see above), the absolution, while not judicial, is nevertheless public, inasmuch as it is given to a known person and appears as an act of the forum externum.

(5) Vitandi and Tolerati.—Public excommunication in foro externo has two degrees according as it has or has not been formally published, or, in other words, according as excommunicated persons are to be shunned (vitandi) or tolerated (tolerati). A formally published or nominally existing excommunication is called latæ sententiae; it is not removed when the sentence has been brought to the knowledge of the public by a notification from the judge, indicating by name the person thus punished. No special method is required for this publication; according to the Council of Constance (1414–18), it suffices that “the sentence has been published or made known by the judge in a special and express manner” Persons thus excommunicated are to be shunned (vitandi), i. e. the faithful must have no intercourse with them either in regard to sacred things or (to a certain extent) to profane matters, as we shall see farther on. All other excommunicated persons are to be tolerated (tolerati), i. e. the law no longer obliges the faithful to abstain from intercourse with them, even in religious matters. This distinction dates from the aforesaid Constitution “Ad evitanda scandalia”, published by Martin V at the Council of Constance in 1415; until
then one had to avoid communion with all the excommunicated, once they were known as such. "To avoid scandal and numerous dangers", says Martin V, "and to relieve timorous consciences, we hereby mercifully grant to all the faithful that henceforth no one need refrain from communicating with another in the reception or administration of the sacraments, or in other matters Divine or profane, under pretext of any ecclesiastical sentence or censure, whether promulgated in general form by law or by a judge, nor avoid anyone whosoever, nor observe an ecclesiastical interdict, except when this sentence or censure shall have been published or made known by the judge in special and express form, against some certain, specified person, college, university, church, community, or place." But while notoriously excommunicated persons are no longer vitandi, the pope makes an exception of those who have "incurred the penalty of excommunication by reason of sacrilegious violence against a cleric, and so notoriously that the fact can in no way be disseminated or excused". He declares, moreover, that he has not made this concession in favour of the excommunicated, whose condition remains unchanged, but solely for the benefit of the faithful. Hence, in virtue of ecclesiastical law, the latter are no longer deprived of themselves of intercourse with those of the excommunicated who are "tolerated". As to the vitandi, now reduced to the two aforementioned categories, they must be shunned by the faithful as formerly. It is to be noted now that the minor excommunication incurred formerly by these persons has been suppressed; also, that of the major excommunications inflicted on certain definite acts of communion with the vitandi, only two are retained in the Constitution "Apostolicæ Sedis" (II, 16, 17): that inflicted on any who have been excommunicated in a crime that has merited nominal excommunication by the pope, and that pronounced against clerics alone for spontaneous and conscious communion in sacris with persons whom the pope has excommunicated by name. Moreover, those whom bishops excommunicate by reason of minor excommunicable vitiandi as are similarly excommunicated by the pope.

(6) Reserved and Non-Reserved.—Finally, excommunication is either reserved or non-reserved. This division affects the absolution from censure. In the forum internum any confessor can absolve from non-reserved excommunications; but those reserved can only be remitted, except through indulg or delegation, by those to whom the law reserves the absolution. There is a distinction between excommunications reserved to the pope (those being divided into two classes, according to which they are either specially or simply reserved to him) and those reserved to bishops or ordinaries. As to excommunications ab homine, absolution from them is reserved by law to the judge who has inflicted them. In a certain sense excommunications may also be reserved in view of the persons who incur them; thus absolution from an excommunication imposed by a bishop is reserved to the pope; again, custom reserves to him the excommunication of sovereigns.

III. Who Can Excommunicate?—Excommunication is an act of ecclesiastical jurisdiction, the rules of which it follows. Hence the general principle: whoever has jurisdiction in the forum externum, properly so called, can excommunicate, but only his own subjects. Therefore, whether excommunications be a jury (by the law) or ab homine (under form of sentence or precept), they may come from the pope alone or a general council for the entire Church; from the hierarchies in their ecclesiastical provinces; from the bishop for his diocese; from the prelate nullius for quasi-diocesan territories; and from regular prelates for religious orders. Moreover, anyone can excommunicate who, by virtue of his office, even when delegated, has contentious jurisdiction in the forum externum; for instance, papal legates, vicars capitular, and vicars-general. But a parish priest cannot inflict this penalty nor even declare that it is incurred, i.e. he cannot do so in an official and judicial manner. The subjects of these various authorities are those who fall under their jurisdiction, chiefly on account of domiciliary or quasi-domiciliary crimes, by reason of the offence committed while on such territory; and finally by reason of personal right, as in the case of regulars.

IV. Who Can Be Excommunicated?—Since excommunication is the forfeiture of the spiritual privileges, all those who are not reserved to the pope may be excommunicated. As the baptized cease, at death, to belong to the Church Militant, the dead cannot be excommunicated. Of course, strictly speaking, after the demise of a Christian person, it may be officially declared that such person incurred excommunication during his lifetime. However, the excommunication of the dead cannot be absolved after his death; indeed, the Roman Ritual contains the rite for absolving an excommunicated person already dead (Tit. III, cap. iv: Ritus absolvendi excommunicatum san mortuorum). However, certain excommunications are not only the private wrongs of one against another, but are the moral guilt of the community of the faithful, notably ecclesiastical burial. With the foregoing exceptions, all who have been baptized are liable to excommunication, even those who have never belonged to the true Church, since by their baptism they are really her subjects, though of course rebellious ones. Moreover, the Church excommunicates not only those who abandon the true faith to embrace schism or heresy, but also the members of religious and schismatic communities who have been born therein. As to the latter, however, it is not a question of personal excommunication; the censure is pronounced on the corporate capacity, as members of a community in revolt against the true Church of Jesus Christ.

Catholics, on the contrary, cannot be excommunicated unless for some personal, grievously offensive act. Here, therefore, it is necessary to state with precision the conditions under which this penalty is incurred. Just as exile presupposes a crime, excommunication presupposes a grievous external fault. Not only would it be wrong for a Christian to be punished without having committed a punishable act, but justice demands a proportion between the offence and the penalty; hence the most serious of spiritual chastisements, i.e. forfeiture of all the privileges common to Christians, is inconceivable unless for a grave fault. Moreover, in order to fall within the jurisdiction of the forum externum, which alone can inflict excommunication, this fault must be external. In other words, the offence must be consummated, i.e. complete and perfect in its kind (in genere suo), unless the legislator has ordained otherwise. This, however, is a rule of interpretation rather than a real condition for the incurring of censure, and is tantamount to saying that attempting at a crime does not entail the penalty meted out to the crime itself,
EXCOMMUNICATION

but that if the legislator declares that he wishes to punish even the attempt, excommunication is incurred (cf. Const. "Apost. Sedis", III, 1, for attempt at marriage on part of clerics in major orders).

Considered from a moral and juridical standpoint, the sentence for the incurring of excommunication implies, first, the full use of reason; second, sufficient moral liberty; finally, a knowledge of the law and even of the penalty. Where such knowledge is lacking, there is no contumacy, i.e., no contempt of ecclesiastical law, the essence of which consists in performing an act known to be forbidden, and for which a certain penalty is incurred. The prohibition and the penalty are known either through the text of the law itself, which is equivalent to a juridical warning, or through admonitions or proclamations issued expressly by the ecclesiastical judge. Hence arise various extenuating causes (causes excusantes), based on lack of guilt, which prevent the incurring of excommunication: (1) Lack of the full use of reason. This excuses children, also those who have not attained the age of puberty, and, a fortiori, the demented. (2) Lack of liberty resulting from grave fear. Such fear impairs the freedom of the will, and while it exists contumacy or rebellion against the laws of the Church cannot be presumed. Evidently, a proper estimation of this extenuating reason depends on the circumstances of each particular case and will be more readily accepted as an excuse for violating a positive law than in pellamation of an offense against the natural or Divine law. (3) Ignorance. The general principle is, that whosoever is ignorant of the law is not responsible for transgressing it; and when ignorance is not the reason, the penalty does not incur it. But the application of this principle is often complicated and delicate. The following considerations, generally admitted, may serve as a guide: (a) All ignorance, both of law and fact, is excusable. (b) The ignorance known as "invincible" always excuses; it may also be called culpable or probable ignorance. (c) There are two kinds of culpable ignorance, one known as crassa or supina, i.e., gross, improvable ignorance, and opposing a grievously guilty neglect in regard to knowledge of the law; the other is affected ignorance, really a deliberate ignorance of the law through fear of its penalty. (d) Ordinarily, gross ignorance does not excuse from punishment. But it does so only when the law formally exacts a positive knowledge of the prohibition. The laws that inflict excommunication contain as a rule two kinds of expressions. Sometimes the offense only is mentioned, e.g. "all apostates, heretics", etc., or "those who absolve their accomplices in a sin against chastity" (Const. "Apost. Sedis", I, I, 10). Sometimes causes are inserted that exact, as a necessary condition, the knowledge of the penalty. "Regulars who have the audacity to administer the Viaticum without permission of the parish priest." (Const. "Apost. Sedis", I, 2; II, 14). Gross ignorance excuses in the second case but not in the first. (e) For many authors, affected ignorance is equivalent to a knowledge of the law, since by it some avoid enlightening themselves concerning a dreaded penalty; these authors conclude that such ignorance never excuses. Other canonists consider that this penal law is to be strictly interpreted; when, therefore, it positively exacts knowledge on the part of the culprit, he is excommunicated for affected ignorance. Such is the case of the uncatechized adult. It is not always easy to establish the shades of difference, it will suffice to remark that in a case of occult excommunication the culprit has the right to judge himself and to be judged by his confessor according to the exact truth, whereas, in the forum externum the judge decides according to presumptions and proofs. Consequently, in the tribunal of conscience he who is reasonably persuaded of his innocence cannot be compelled to treat himself as excommunicated and to seek absolution; this conviction, however, must be prudently established.

V. EFFECTS OF EXCOMMUNICATION.—If we consider only its nature, excommunication has no degrees: it simply deprives clerics and laymen of all their rights in Christian society, which total effect takes on a visible shape in details proportionate to the rights or advantages of which the excommunicated cleric or layman has been deprived. The effects of excommunication must, however, be considered in relation also to the rest of the faithful. From this point of view arise certain differences according to the various classes of excommunicated persons. These differences were not introduced out of regard for the excommunicated, rather for the sake of the faithful. The latter would suffer serious inconveniences if the nullity of all acts performed by excommunicated clerics were rigidly maintained. They would also be exposed to grievous perils of conscience if they were strictly obliged to avoid all contacts with persons so excommunicated. Hence the practical rule for interpreting the effects of excommunication: severity as regards the excommunicated, but mildness for the faithful. We may now proceed to enumerate the immediate effects of excommunication. They are summed up in the following:

Res sacre, ritus, communio, crypto, potestas, praedia sacra, forum, civilia iura vetantur, i.e. loss of the sacraments, public services and prayers of the Church, ecclesiastical burial, jurisdiction, benefices, canonical rights, and social intercourse.

(1) Res Sacrae.—These are the sacraments; the excommunicated are forbidden either to receive or administer them. The sacraments are of course validly administered by excommunicated persons, except those (penance and marriage) for whose administration jurisdiction is necessary; but the reception of the sacraments by excommunicated persons is always illicit. The licit administration of the sacraments by excommunicated ecclesiastics hinges upon the benefit to be derived by the faithful. Ecclesiastics excommunicated by name are forbidden to administer the sacraments except in cases of extreme necessity; a greater degree of severity pertains to those administered by such ecclesiastics are null (Decret. "Ne temere", art. iv). Excommunicated ecclesiastics tolerati, however, may licitly administer the sacraments to the faithful who request them at their hands, and the acts of jurisdiction thus posited are maintained by reason of the benefit accruing to the faithful, most frequently also because of common error (error communes), i.e., a general belief in the good standing of such ecclesiastics. The faithful, on their side, may, without sin, ask tolerated excommunicated ecclesiastics to administer sacraments to them; they would, however, sin grievously in making this request of the vitandus, except in case of urgent necessity.

(2) Ritus.—Hericly are meant the Mass, the Divine Office, and other sacred ceremonies. An excommunicated person may not and should not assist at these ceremonies. If he be a toleratus, his presence need not be taken into account, and the service can be continued. If he be a vitandus he must be warned to retire, and in case of refusal he must be forcibly compelled to withdraw; but if he still persists in remaining, the service must be discontinued, even the Mass, unless the Canon has been commenced (Decret. Privi. V, De sac. Miss. I, p. 117). Nevertheless, since the condition of an excommunicated person, even a vitandus, is no worse than that of an infidel, he may assist at sermons, instructions, etc., venerate images and relics, take holy water, and use privately other sacramentals. The excommunicated cleric is
not released from any of his obligations in regard to the Divine Office and, if bound to it, must recite it, but privately and not in the choir. A toleratus may be admitted to the choir, but a vitandus must be expelled therefrom. All excommunicated clerics are prohibited from exercising Mass and performing all liturgical functions, under penalty of the irregularity ex delicto for violation of the censure; participation in the liturgical acts performed by an excommunicated cleric is a forbidden communicatio in sacris; however, no censure would result from it except in the case of clerics voluntarily communicating in church. Those whose hope had been extirpated by name (Const. "Apost. Sedis" II, 17). In each case the fault should be estimated according to circumstances.

(3) Communio.—These are, properly speaking, the public suffrages of the Church, official prayers, indulgences, etc., in which the excommunicated have no share. But they are not excluded from the private suffrages (i.e. intercessory petitions) of the faithful, who can pray for them.

(4) Cura.—This word signifies ecclesiastical burial, of which the excommunicated are deprived. In chapter vii, de senulitis (lib. II, tit. xvii), Innocent III says: "The canons have established that we should not hold communion after their death with those with whom we did not communicate during their lifetime, and that all those should be deprived of ecclesiastical burial who were separated from the unity of the Church, and at the moment of death were not reconciled thereunto." The Ritual (tit. VI, cap. ii, n. 2) renews this prohibition for those publicly excommunicated, and most writers interpret this as meaning those whose excommunication has been publicly proclaimed (Many, De locis sacris, p. 354), so that, under the ancient canons, the person excommunicated, is no longer amenable, except to the vitandus. However, this does not mean that the tolerati can always receive ecclesiastical burial; they may be deprived of it for other reasons, e.g. as heretics or public sinners. Apropos of this leenuity, it must be remembered that it is not the excommunicated Church wishes to favour, but rather the faithful for whose sake communion with the toleratus is allowed in the matter of burial as well as in other matters. The interment of a toleratus in a consecrated cemetery carries with it no longer the desecration of said cemetery: this would follow, however, in the case of the vitandus. (See also BURIAL.)

(5) Potestas signifies ecclesiastical jurisdiction, of which both the passive and the active use, to speak canonically, are forbidden the excommunicated. Jurisdiction is used passively when a person is the object of one of its acts, of a concession. Now, ecclesiastical authority has no official relations with the exile unless, at his request, it negotiates the conditions for his return to society. Connected with this discipline is the rule forbidding the excommunicated to receive from the pope any kind of rescript (of grace or justice), except in regard to their excommunication, under pain of nullity of such rescript (c. xxi, de rescriptis, lib. I, tit. iii, and c. i, eod., in VI). Hence the custom of inserting in papal rescripts the so-called ad effectum absolution from censures, intended solely to ensure the value of the rescript, but affecting in no wise the excommunication, if already decreed. Jurisdiction is also used actively when exerected by its depositaries. It is easy to understand that the Church cannot leave her jurisdiction in the hands of those whom she excludes from her society. In principle, therefore, excommunication entails the loss of jurisdiction both in foro externo and in foro internum and renders null or without the necessary jurisdiction. However, for the general good of society, the Church maintains jurisdiction, despite occult excommunication, and supplies it for acts performed by the toleratus. But as the vitandus are known to be such, this merciful remedy cannot be applied to them except in certain cases of extreme necessity, when jurisdiction is said to be "supplied" by the Church.

(6) Prædicta sacra are ecclesiastical benefices. The excommunicated ecclesiastic is incapable of acquiring such benefices, and his presentation to it would be legally null. A benefice also becomes null and cannot be re-presented, even when to the censure the law adds privation of benefice: this is carried into effect only through a sentence which must be at least declaratory and issue from a competent (i.e. the proper) judge. Nevertheless, from the very first the excommunicated beneficium is null, and those whose benefice belonging to the choir service, provided he is bound thereunto. Moreover, should he live a year in the state of excommunication, he can be deprived of his benefice through judicial sentence. The aforesaid effects do not result from occult excommunication.

(7) Forum.—The excommunicated person is an exile from ecclesiastical society, consequently from its tribunals; only inasmuch, however, as they would be to his advantage. On the other hand, if he be summoned before them to satisfy a third party he is obliged to appear. Hence he cannot appear as plaintiff or defendant, he may be the defendant, or the party accused. At this point the difference between the vitandus and the toleratus consists in this, that the former must be prevented from introducing any legal action before an ecclesiastical tribunal, whereas the latter can be debarred from so doing only when the judge proves ex delicto the delict which has already incurred. It is a question here only of public excommunication and before ecclesiastical tribunals.

(8) Civilia jura, i.e. the ordinary relations between members of the same society, outside of sacred and judicial matters. This privation, affecting particularly the person excommunicated, is no longer applicable once on the faithful except in regard to the vitandus. The medieval canonists enumerated the prohibited civil relations in the following verse:

Os, orare, vale, communio, mensa negatur,
namely: (a) conversations; (b) exchange of letters; (c) tokens of benevolence (osculum); (b) prayer in common with the excommunicated; (c) marks of honour and respect; (d) business and social relations; (e) meals with the excommunicated. But at the same time they specified the reasons that rendered these relations licit:

Utile, lex humilis, res ignota, necesse,
that is to say: (a) both the spiritual and the temporal benefit of the excommunicated and of the faithful; (b) conjugal law; (c) the submission owed by children, servants, vassals, and subordinates in general; (d) ignorance of excommunication or of the prohibition of a particular kind of intercourse; (e) finally, any kind of necessity, as human law, is not binding to this degree.

Remote Effects.—All the effects that we have just enumerated are the immediate results of excommunication, but it also causes remote effects, which are not a necessary consequence and are only produced when the person censured occasions them. They are three in number: (1) The cleric who violates excommunication by exercising one of the liturgical functions of his order, inures an irregularity ex delicto. (2) The excommunicated person who remains a without making any effort to obtain absolution (insordescencia) becomes suspected of heresy and can be followed up and condemned as guilty of such (Council of Trent, Sess. XXV, cap. iii, De ref.; cf. Ferraris, s. v. "Insordescens"). (3) This neglect makes it the judge's duty to deprive the excommunicated cleric of all benefices, though some judges postpone for three years the fulfillment of this obligation (see Hollweck, Die kirchlichen Strafrecht, art. 1, note 3).

Effects of Invalid or Unjust Excommunication.—An excommunication is said to be null when it is invalid because of some intrinsic or essential defect, e.g. when
the person inflicting it has no jurisdiction, when the motive of the excommunication is manifestly incorrect and inconsistent, or when the excommunication is essentially defective in form. Excommunication is said to be unjust when, though valid, it is wrongfully applied, or when it really involves a just error or guilt. Here, of course, it is a question of excommunication late sentence and in foro interno, but only of one imposed or declared by judicial sentence. It is admitted by all that a null excommunication produces no effect whatever, and may be ignored without sin (cap. 1, de ecclesiis, in VI). But an abuse of unjust excommunication brings about in much a more general way the possibility of conflict between the forum internum and the forum externum, between legal justice and the real facts. In chapter xxviii, de sent. excomm., (Lib. V, tit. xxxi), Innocent III formally admits the possibility of this conflict. Some persons, he says, may be free in the eyes of God but bound in the eyes of the Church; vice versa, some may be free in the eyes of the Church but bound in the eyes of God; for God's judgment is based on the very truth itself, whereas that of the Church is based on arguments and premises which are sometimes erroneous. He concludes that the chain by which the sinner is bound in the sight of God is loosened by remission of the fault committed, whereas that which binds him in the sight of the Church is severed only by removal of the sentence. Consequently, a person unjustly excommunicated in the same state an excommunicated sinner who has repented and recovered the grace of God; he has not forfeited internal communion with the Church, and God can bestow upon him all necessary spiritual help. However, while seeking to prove his innocence, the censured person is meanwhile bound to obey legitimate authority confined to the delinquents under the ban of excommunication, until he is rehabilitated or absolved. Such a case seems practically impossible nowadays.

VI. Absolution from Excommunication.—Apart from the rare cases in which excommunication is imposed for a fixed period and then ceases of itself, it is always removed by absolution. It is to be noted at once that, though the same word is used to designate the sacramental sentence by which sins are remitted and that by which excommunication is removed, there is a vast difference between the two acts. The absolution from excommunication invokes excommunication and has nothing sacramental about it. It reinstates the repentant sinner in the Church; restores the rights of which he had been deprived, beginning with participation in the sacraments; and for this very reason, it should precede sacramental absolution, which it thenceforth renders possible and efficacious. After absolution from excommunication has been given in foro externo, the judge sends the person absolved to a confessor, that his sin may be remitted; when absolution from censure is given in the confessional, it should always precede sacramental absolution, conformably to the instruction in the Ritual and the very tenor of the formula for sacramental absolution. It may be noted at once that the principal effect of absolution from excommunication may be acquired without the excommunicated person being with the confessio in his former position. Thus, an ecclesiastical might not necessarily recover the benefice which he had lost; indeed he might be admitted to lay communion only. Ecclesiastical authority has the right to posit certain conditions for the return of the culprit, and every absolution from excommunication carries for the fulfillment of certain conditions which vary in extent, according to the cases. Excommunication, it must be remembered, is a medicinal penalty intended, above all, for the correction of the culprit; therefore his first duty is to solicit pardon by showing an inclination to obey the orders given him, just as if he were of ecclesiastical authority to receive back the sinner as soon as he repents and declares himself disposed to give the required satisfaction. This satisfaction is often indicated in the law itself; for instance, usurers of ecclesiastical property are excommunicated until such time as they make reparation. Nevertheless, this is not always necessary; these measures are executed prior to absolution, which is frequently granted on the solemn promise of the excommunicated party either to accomplish a specified act, such as coming to an agreement with the Church for the property usurped, or simply to abide by the orders of ecclesiastical authority (standi mandatus ecclesiae). In such cases absolution is not unusually given under pain of "reincidence" (ad reincidendum), i.e., if within a definite period the person censured has not accomplished a certain specified act, he renews the same excommunication; his status is just as if he had never been absolved. Moreover, this clause of reincidence is assumed; when occasion requires, it is inserted in the sentence of absolution or in the indulgences for that purpose.

The formula of absolution from excommunication is not strictly determined, and, since it is an act of jurisdiction, it suffices to make the sentence of absolution in the form of a profane formula. It is very clearly the effect which it is desired to attain. The formula for remitting the excommunication in foro externo should be such as to absolve validly from public excommunication. Similarly, an excommunication imposed by judicial sentence is to be revoked by an absolution in the same form; excommunion may be revoked in the confessional by the sacramental formula. The Roman Ritual (tit. III, c. ii) gives the formula of absolution used in foro externo and states that in foro interno absolution is given in the usual sacramental form.

Who Can Absolve from Excommunication?—The answer is given in the customary rules of jurisdiction. The right to absolve evidently belongs to him who can excommunicate and who has imposed the law. Moreover, to any person delegated by him to this effect, since this power, being jurisdictional, can be delegated. First, we must distinguish between excommunication ab homine, which is judicial, and excommunication a jure, i.e., late sentence. For the former, absolution is given by the judge who inflicted the penalty (or by his successor), in other words by the pope, or the bishop (ordinary), also by the superior of the judge when acting as judge of appeal. As to excommunication late sentence, the power to absolve is either ordinary or delegated. Ordinary power is determined by the law itself, which indicates to what authority the censure is reserved in each case. Delegated power is of two kinds: that granted in the law of jurisdiction and set down in the enactments which excommunicate or remit excommunication by personal act, e.g., by authority (faculties) of the Roman Penitentiary, by episcopal delegation for special causes, or bestowed upon certain priests. Of this second kind of delegation there is no need to speak, as it belongs to each one to verify the power (faculties) that he possesses. Delegation of the first kind carries with it the power to absolve from excommunication without special request or particular faculties. Such power is in this case conferred by the law itself. Nevertheless, this power is subject to the general law that governs delegation and is valid only for the cases and under the conditions mentioned in the concession. Thus faculties granted for the forum internum cannot be extended to the forum externum, nor can those granted for specially reserved excommunications be used for simply reserved cases, and so on. However, the faculties proceeding from
both kinds of delegation may be "cumulated," i.e., may be held and exercised by the same person.

These principles admitted, we must remember that with reference to reservation or the right to absolve, excommunications are divided into four classes: excommunications specially reserved to the pope; excommunications reserved to the bishop (ordinary); and, finally, excommunications that are not reserved (nemini reservato). According to this classification, as a general rule, only the pope can absolve from the first two kinds of excommunication, although his power extends to the others; bishops (ordinaries) have not other priests, can remove excommunications of the third class; finally, those of the fourth class, and those only, can be revoked by any approved priest, without further special delegation. At this point, however, must be considered certain concessions of the law that may be grouped in three categories: the permanent faculties of bishops; concessions for urgent cases; and concessions for the point of death.

(1) The Faculties of Bishops.—The Council of Trent (Sess. XXIV, c. vi, De ref.) authorizes bishops to absolve their own subjects in their own dioceses from excommunication from personal sins, if subsequently found, reserved to the Holy See, when occult or, rather, not pertaining to the forum externum. They can exercise this power either in person or through a special delegate of their choice, but in the tribunal of conscience only. However, the Constitution "Apostolicae Sedis" (Reprint, Lec. 19, c. xix, de sent. excomm., lib. V, tit. xxxvii.) of Innocent III sets forth the principle that governs such cases: "When it is difficult for the excommunicated person to go to him who excommunicated him, he may be absolved by his bishop or even by his own priest, on promising to obey the orders of him by whom excommunication was pronounced." This is the principle that moralists and canonists formulated as an axiom: Imperdata causa papalis fit episcopalis: in case of one who is prevented from presenting himself to the pope, the excommunication reserved to the pope may be removed by the bishop, but most authors carried the analogy still farther: for him who is prevented from presenting himself to the bishop, the excommunication may be removed by any confessor. In regard to the obligation of submitting to the orders of the pope or the bishop, the moralists and canonists generally taught as follows: First, no one was obliged to apply in writing (correct as to the removal of excommunication, though Innocent III says nothing of this kind concerning a request for information). Then they distinguished between obstacles that were more or less prolonged: perpetual obstacles were such as exceed five years; obstacles of long duration were those lasting over six months; and obstacles of short duration, those continuing for less than six months. When the obstacle was perpetual the bishop or, if he could not be reached, any priest might absolve without appealing to the pope. If this could not be done, but not without obligation of recourse to the superior on the cessation of the obstacle, when the latter was of long duration, provided there were urgency. Finally, the authors drew up a long list of those who were supposed to be unable to present themselves in person to the pope, and almost every one of them was provided with a special faculties. Thus, for example, if one, after having made a serious promise to the pope, was unable to go to Rome, the pope might grant him the faculties to absolve him over the sea; if, however, the penitent was not able to go to the pope, the special faculties were invalid. The Constitution "Constitution de una filia" expresses this principle: "Nullus nobis a peculiaribus servitutibus, et veluti a plebis, non servire pateretur," etc. Henceforth "in urgent cases when absolution cannot be deferred without danger of grave scandal or infancy, which is left to the conscientious appreciation of the confessor, the latter, after having imposed the necessary satisfaction, can absolve, without other faculties, from all censures, even those specially reserved to the Holy See, but under the pain of recursively incurring the same censure if, within a month, the penitent thus absolved does not recur to the Holy See by letters and through the medium of the confessor." This new method has been more precisely explained and even rendered easier by subsequent papal decisions. The absolution thus given is direct (H. P., 19 July, 1891), although recourse to the Penitentiary is obligatory, its object is not to ask a new absolution, but only to solicit the order of the Church, the penitent, as stated above, having had to make a serious promise to conform to them (Stamati monasfis Ecclenii). The power thus granted in urgent cases is valid for all cases, without exception, reserved by law to the pope or the ordinary, even for the absolution of an accomplice (Holy Office, 7 June, 1899).

As to what constitutes a state of urgency, the reply of 15 June, 1897, is very reassuring, since it permits "as soon as the distressed person is not in distressing to the penitent to remain in the state of sin during the time necessary for soliciting and receiving from Rome the power to absolve." Now, according to the moralists it is too much to remain even a day or two in the state of sin, especially for priests.

(2) Absolution for the Dead.—In cases of excommunication of the second kind, the excommunicated person may be absolved by his own priest or by the bishop, if it is not himself or his heir who has incurred the excommunication, or by the pope himself, if the excommunicated person has incurred the excommunication, even though it be only for a short time. In such cases, however, it is necessary that the absolution should be communicated either to the heir of the excommunicated person or to the pope himself, if he does not so desire to communicate it to the heir. If the absolution is not communicated, it is the invalidation of the excommunication, and the law of absolution is not applicable. However, the authority of the Pope or the bishop is not necessary for the absolution of the deceased, unless it is a case of excommunication reserved to the pope.

(3) In Danger of Death.—It is a principle repeatedly set forth in canon law that at the point of death all reservations cease and all necessary jurisdiction is supplied by the Church. "At the point of death," says the Council of Trent (Sess. XIV, c. vii), "in danger of death," says the Ritual (tit. III, cap. i, n. 25), any priest can absolve from all sins and censures, even if he be without the ordinary faculties of confessors, or if he himself be excommunicated; he may do so even in the presence of another priest as soon as it is authorized (Holy Office, 29 July, 1891). The Constitution "Apostolicae Sedis" expressly maintains this merciful concession, merely adding, for the case in which the mortification is restored to health, the obligation of having recourse to the Holy See, if he has been absolved from excommunication specially reserved to the pope, unless he prefers to ask absolution of a confessor provided with special faculties. This recourse, although identical with that of which we have just spoken for urgent cases, nevertheless differs, as one point: it is not imposed for the absolution from excommunications simply reserved, and the short delay
of a month is not counted from the time of receiving absolution, but from the time of recovery.

VII. Excommunications late sententiae now in force.—In the preamble of the Constitution "Apostolica Sedis"; Pius IX stated that during the conciliar era, the number of censures late sententiae had increased inordinately, that some of them were no longer expedient, that many were doubtful, that they occasioned frequent difficulties of conscience, and finally, that a reform was necessary. On this head Pius IX had anticipated the almost unanimous request of the Catholic episcopate at the Vatican Council (Collectio Lacinii, VII, col. 840, 874, etc.). The number of excommunications late sententiae enumerated by the moralists and canonists is really formidable: Ferraris (Prompta Biblioth., s. v. Excommunication, art. ii-i) gives almost 200. The principal ones were destined to protect the Catholic Church, the ecclesiastical hierarchy and its jurisdiction, and figured in the Bull known as "In Curna Domini" read publicly each year in Rome, on Holy Thursday. In time, this document had received various additions (Ferraris, loc. cit., art. ii, the text of Clement XI), and finally, if the Constitution "Apostolica Sedis" derives excommunications especially reserved, except a few, from the Council of Trent; the Constitution of Pius IX deals with no penalties other than censures; it leaves intact all censures ferenda sententiae but suppresses all censures late sententiae that it does not retain. Now, besides those which it enumerates it retains: (1) the censure of denied (and not simply mentioned) by the Council of Trent; (2) the censures of special law, i.e. those in vigour for papal elections, those enforced in religious orders and institutes, in colleges, communities, etc. As to the censures enumerated, they should be interpreted as if pronounced for the first time, and ancient texts should be consulted for them only in so far as such texts have not been modified by the new law.

Thus the excommunications late sententiae enforced to-day by common law in the Catholic Church proceed from three sources: (A) those enumerated in the Constitution "Apostolica Sedis"; (B) those pronounced by the Council of Trent; and (C) those introduced subsequently to the Constitution "Apostolica Sedis", i.e. later than 12 October, 1869. We enumerate them here with a brief commentary.

Excommunications of the Constitution "Apostolica Sedis".—These are divided into four categories: (a) those specially reserved to the pope; (b) those simply reserved to the pope; (c) those reserved to the bishop (ordinary); (d) those not reserved to anyone.

(a) Excommunications specially reserved to the Pope. These are twelve in number and are imposed upon the following persons:

(1) "All apostates from the Christian faith, heretics of every name and sect, and those who give them credence, who receive or countenance them, and generally all those who take up their defence." Strictly speaking, an apostate is one who goes over to a non-Christian religion, e.g. Islam; to such apostates are assimilated those who publicly renounce all religion; this apostasy is not to be presumed; it is evident that both kinds of apostates exclude themselves from the Church. A heretic is one who rejects a Catholic dogma. The first to be considered is the heretic who becomes such of his own volition; who, being in the Catholic Church, obstinately repudiates a真实 of faith. Excommunication is incurred by him, if, with full knowledge, he exteriorly formulates an heretical proposition; and if he seeks to propagate his error he is immediately subject thereto and shall be deprived of the title of the ecclesiastical order to which he belongs. For such a person his heretical membership alone is sufficient to bring him under sentence of excommunication. In his case the penalty is incurred by admission to the heresy, notably by wilful and active participation in sacris (i.e. in public worship) with heretics; hence the excommunication of those who contract a mixed marriage before a heretical minister as such (Holy Office, 25 Aug., 1888). Finally, the penalty extends to those who believe in heretics (credo); to those who receive them, i.e. who give them shelter in their homes, so as to protect them from the pursuit of authority; and to those who countenance or defend them as heretics and in view of the heresy, provided it be a positive and efficacious assistance.

(b) "All those who, knowing well, and without permission of the Apostolic See, books by these same apostates and heretics and upholding heresy, as also the books of any authors whomsoever specifically prohibited by Letters Apostolic, and all who keep, print, or in any way defend these same books. After heretical persons come heretical books. The act that incurs excommunication is, first, reading done to a considerable extent and culpably, i.e. by one who knows the nature of the books and of the excommunication, and who, moreover, has not the necessary permission. The secondary acts punishable with the same penalty are the keeping in their possession (rather than the publishing), and, finally, the defence, by word or by writing of the books in question. These books are of two kinds: first, those written by apostates, or heretics, and which uphold and command heresy, two conditions that must exist simultaneously; second, books specifically prohibited, in any of their parts, by the titles, not by decree of the Index, but by Letters from the pope himself, Bulls or Briefs, and under pain of excommunication (for a list of these books see Higlers, "Der Index der verbotenen Bücher", Freiburg, 1904, p. 96; and "Die Bücherverbote in Papst- bullen", Freiburg, 1907).

(c) "Schismatics and those who elude or obstinately withdraw from the authority of the reigning Roman pontiff." The schismatics here referred to are of two kinds: those who are such because they belong to separated Churches which reject the authority of the pope, and those who, being Catholics, become schismatics by reason of obstinate disobedience to the authority of the pope as such.

(4) "All of no matter what state, rank, or condition, who appeal from the ordinances or mandates of the reigning Roman pontiff to a future ecumenical council, and all who have not gone in aid, countenance to this appeal." The appeal of the command of the pope to a future ecumenical council, not only implies the superiority of the council over the pontiff, but is pre-eminently an act of injurious disobedience to the Head of the Church. Were this appeal efficacious it would render all church government impossible, unless it be accepted that the normal state of the Church is a general council in perpetual session, or at least meeting at short intervals. This extreme Gallicanism is justly punishable with excommunication. The penalty is visited upon all those who have influenced such act of appeal, either by aid, counsel, or support. This excommunication, however, is to be strictly interpreted; it would not be incurred in consequence of an appeal made to a future pope, the Holy See being vacant, or to a general council actually assembled.

(5) "All who kill, mutilate, strike, seize, incarcerate, detain or pursue with hostile intent, cardinals, patriarchs, archbishops, bishops, and even the nuncios of the Holy See, or drive them from their dioceses, jurisdictions, estates, or domains, as also those who ratify these measures or further them by aid or countenance." The object of this penalty is to protect the members of the clergy, like the celebrated excommunication of the canon "Si quis suadente diabolo," of which we shall speak below, but rather to safeguard the prelates or superiors in whom the Church has lodged her jurisdiction. The text clearly
indicates the acts punished by excommunication, i.e. all violent attacks on the person of a prelate as such; it likewise provides the culprits, i.e. those who perpetuate such assaults and those who are responsible for them, as also their active accomplices.

Who directly or indirectly prevent the exercise of ecclesiastical jurisdiction, either in foro interno or in foro externo, and who, for this purpose, have recourse to the secular tribunal; also those who provoke or deliver the orders of this tribunal or lend it their aid, counsel, or support. The preceding article protects those who are the depositaries of jurisdiction; the present article protects the exercise of said jurisdiction. It punishes any obstacle raised against the delivery or execution of a sentence or decision of the ecclesiastical authority. It is not question here of the power of order (potestas ordinis) or of facts that do not really imply jurisdiction, e.g. a simple contract. Nor is it question of measures taken with prelates so as to influence them into exercising their jurisdiction in a given direction, e.g. to confer a benefice on Caius or withhold one from Titius; this censure is meant to punish any obstacle that really prevents action on the part of a prelate who wishes to perform an act of jurisdiction, to carry it into effect. He is adversely affected when violence is used against him; indirectly, when his subordinates are prevented from acting. The chief opposition here considered is recourse to secular and especially judicial authority. Excommunication is therefore incurred under this head by all who provoke or direct the intervention and provide such intervention actually follow; by all who deliver orders or directions intended to prevent the exercise of ecclesiastical jurisdiction; finally, by all who co-operate in these acts with aid, counsel, or support, unless under compulsion. Moralist and canonists exempt from this penalty the clerks and servants of the secular courts.

(7) "Those who directly or indirectly oblige lay judges to judge ecclesiastical persons before their tribunal, except in cases provided for by canonical agreements, also those who enact laws or decrees against the liberty or rights of the Church." The first part of this article has for its object the protection of the privileges of the ecclesiastical forum, i.e. of those ecclesiastics whose right it is to be judged by ecclesiastical tribunals; consequently, those are excommunicated who oblige lay judges to judge subordinates for ecclesiastical tribunal in cases where this ecclesiastical privilege (privilegium fori) should be respected. But the judges themselves, who act by virtue of their office, are not excommunicated (Holy Office, 1 Feb., 1870). Those who thus force lay judges to violate the privilegium fori are of two kinds: namely, those who actually cite ecclesiastics before secular judges, and the legislators or makers of laws detrimental to the rights of the Church. The first are not excommunicated provided they have no other means of obtaining justice, i.e. when the laws of the country in question do not recognize the aforesaid ecclesiastical privilegium fori (Holy Office, 23 Jan., 1886). There remains, therefore, of this censure little more than the second part of the article, which now affects chiefly the legislators responsible for laws and decrees against the liberty and rights of the Church.

The faithful with Rome. The letters in question are: first, Apostolic Letters, in which the pope himself speaks, Bulls, Briefs, Encyclicals, etc.; second, the Acts of the Holy See emanating from Roman Congregations or other organs of the Curia, which constitute but one authority with the pope (Holy Office, 13 Jan., 1782); finally, the acts of the official representatives of the pope, e.g. papal legates and delegates. The excommunication considers not only Letters that concern all the faithful, but also those regarding individuals, e.g. grants of benefices, dispensations, etc. This admitted, the penalty applies to three classes of persons, namely: those who resort to secular power, not only judicial but administrative, to preoccupy letters from being published or from producing their effect; those who, by means of authority, prevent such publication or execution; and finally, those who, on the occasion of these Letters, strike or terrify either the beneficiaries or even third parties who take part in their publication or execution. In the more probable opinion, excommunication is incurred even if these measures of opposition do not produce the intended results.

(9) "All falsifiers of Apostolic Letters, even in the form of a Brief, and all persons committing matters of grace or justice signed by the Roman pontiffs or an ordinal vice-chancellors or those who replace them, or simply by command of the pope; also those who falsely publish Apostolic Letters, even in the form of a Brief; and finally, those who falsely sign petitions of this kind through the name of the pope, as vice-chancellors or of those who replace them." This excommunication punishes what is generally known as forgery, not in all its forms, but in so far as it affects such pontifical letters or grants as are issued through the tribunals known as the "Segnatura Gratiae" and the "Segnatura Justitiae", i.e. when issues of purely benevolent or connected with litigation. It does not therefore attain forgeries affecting the letters of grants of the Roman Congregations or of prelates. It may be somewhat of a surprise to know that this excommunication does not include those who fabricate an entire Apostolic Letter, the definition of falsification (falsum) meaning only a notable alteration of authentic Letters either by suppression, erasures, writing over, or substitution. Petitions addressed to the pope, when granted, are first signed by him, or by other common clergy or by officials, then become official, but the petition thus signed serves as a basis for the wording of Apostolic Letters (Bulls or Briefs) that actually grant the favour requested. In this process three acts are punishable with excommunication: the false signing of a petition; the falsification of Apostolic Letters; and the publication of Letters thus falsified, in order to use them.

(10) "Those who absolve an accomplice in a sin against chastity, and that even at the moment of death, provided another priest, although he be not approved for confession, can hear the confession of the dying person without serious danger of infamy or scandal." This excommunication is not derived from the Bull "In Crem Domini", but from the celebrated Constitution of Benedict XIV, "Sacramentum Poni- tum" (1 June, 1741), completed by its Constitution "Apostolici muneri" (5 Feb., 1745). By these Bulls the pope, with a view to protecting the Sacrament of Penance from sacrilegious abuse, withdraws all jurisdiction from a confessor for absolving from sins against chastity which he may have committed with another person, whether man, or woman; the absolution he might impart for such sin would be null, and the mere attempt to absolve would incur excommunication. The sin thus withdrawn from the jurisdiction of the confessor is any grievous exterior sin against the Sixth Commandment, but it must be such on both sides. The confessor accessory to it cannot pardon it, but,
EXCOMMUNICATION

This article contains two distinct parts. In the first it is not question of all propositions condemned by popes or councils in terms less condemnatory (e.g. rash, offensive, etc.) than the specific stigma heretical (to define heretical propositions being heresy itself and on the occasion of absolution, even if he only feign to absolve (Holy Office, 5 Dec., 1883), thereby allowing the penitent to suppose that he has absolved him or her; or again if he be the cause of the penitent's refraining from accusing himself or herself of this sin (S. Peniten., 19 Feb., 1886). Neither group (1a-8, 9b-16) nor the intention of absolution even if he only feign to absolve (Holy Office, 13 Jan., 1892). There are but two cases in which excommunication is not incurred: first, under absolutely exceptional circumstances where the penitent could not approach another confessor, as the human law does not bind at the cost of such serious disadvantage; again, at the moment of death. But even then Benedict XIV does not restore the power of absolving nor exempt from excommunication, unless it be morally impossible for the dying person, without grave danger of slaughter or scandal, to call in another confessor; this condition, however, should be interpreted broadly.

(11) “Those who usurp or sequester the jurisdiction, property, or revenues belonging to ecclesiastical persons by reason of their churches or benefices.” To usurp is to take as if it legitimately belonged to oneself that which belongs to another; hence it is that this article applies to titles belonging to ecclesiastical persons (Holy Office, 5 March, 1570). To sequester is formally and authoritatively to place in the custody of a third party property withdrawn from the possession of a previous owner. The rights and property protected by this article do not include all church property, but only the rights and property of beneficed clerics as such; they are, as a matter of fact, the principal possessions of the Church. Other property, e.g. that belonging to pious establishments (opera pia) or confraternities and that intended for the maintenance or repair of churches, is protected, indeed, by distinct censures, but its usurpation or sequestration does not incur the excommunication contemplated by this article, which was declared applicable to intruded parish priests in Switzerland (Pius IX, Encyclical of 21 Nov., 1857; S. Cong. of the Council, 23 May, 1874) and in Prussia (25 Feb., 1875). It applies quite certain to governments that despoil the Church of her property.

(12) “Those who themselves or through others, invade, destroy, or detain cities, lands, places, or rights of the Roman Church, those who hold possession of, disturb, or detain its sovereign jurisdiction, and all who give aid, counsel, or countenance to these offenses.” This penalty applies to the authors and accomplices of the invasion and detention of the temporal domains of the Holy See.

1. Excommunication Simply Reserved to the Pope—Before enumerating those it intends to retain, the Constitution “Apostolicae Sedis” speaks only of excommunication as reserved to the pope. It is the first excommunication of this kind against “those who presume to absolve, without the requisite faculties and under any pretext whatsoever, from excommunications that are specially reserved.” This article is directed against those who dare to absolve in bad faith or rashly; a well-founded doubt, however, and even gross ignorance may be pleaded as excuses. Then follow seventeen excommunications simply reserved, declared against the following persons:

(1) “Those who either publicly or privately teach or defend propositions condemned by the Holy See under pain of excommunication, or that those who teach or maintain as lawful the practice of asking the penitent the name of his or her accomplice, a practice condemned by Benedict XIV in his Constitutions ‘Suprema’ (7 July, 1741), ‘Ubi primum’ (2 July, 1746), and ‘Ad eradicandam’ (26 Sept., 1746).”
EXCOMMUNICATION

EXCOMMUNICATION

article maintains the faculties possessed by bishops and others, such as we have heretofore indicated.

(3) "Those who fight duels, those who challenge or accept challenge thereto, all accomplices, all who help or countenance such combats, all who designedly assist them, finally all who permit duelling or who do whatever it in so far as lies in their power to prevent what their rank or dignity, be it royal or imperial." This severe discipline against duelling dates from the Council of Trent (Sess. XXV, c. xix, De ref.); here, however, only the excommunication in question is considered. It aims at duelling, properly so called, and not at that of religious men with each other, and at other single combats or altercations. University duels, so common in Germany, are included (S. Cong. of the Council, 29 Aug., 1890). The malice of the duel lies in the fact that it makes right depend upon the fate of arms; this penalty is extended to all who take any part whatever in these detestable combats. The excommunication is incurred, first, by the duelists themselves, not only when they actually fight, but as soon as they have proposed or accepted a challenge; next, by the official witnesses or seconds, also by physicians expressly brought upon the scene (Holy Office, 28 May, 1870), and by all spectators not accidentally present; likewise by those who permit these affairs, when such permission is necessary, e. g. in the army, and by those who, although able to prevent duelling, refrain from doing so.

(4) "Those who become members of the Masonic so-called of the Carbonari, or of other similar secret societies that plot either openly or secretly against the Church or legitimate authorities; all who countenance these societies in any way whatever, and finally, all who do not inform against the occult chiefs or leaders, i.e. until they have made such denunciations." Certain associations are prohibited because of their evil or dangerous object; this article deals only with those to which it is forbidden to belong under pain of excommunication later sententiae. These are known by their aim, which is to plot against the Church or legitimate authorities, obviously by illicit or criminal means; this excludes at once purely political groups. It matters little whether or not these societies exist secrecy from their members, though the element of secrecy constitutes an unfavourable presumption. The article names two of these sects, the Freemasons and the Carbonari; to these must add the Fenians (Holy Office, 24 Aug., 1870). There are four productive American societies: the Independent Order of Good Templars (Holy Office, 9 Aug., 1893), the Odd Fellows, the Sons of Temperance, and the Knights of Pythias (Holy Office, 20 June, 1894), but not under pain of excommunication. In regard to the sects of which our article treats, three distinct acts incur excommunication: the inscribing of one’s name as a member, the positive favouring of the sect as such, and failure to denounce the occult leaders. For this last act censure is not incurred if the leaders be not occult, if they be not known with sufficient certainty. The denunciation, if imperative, must be made within a month; once it is made the excommunication is no longer reserved, and one is in a condition to receive absolution from any confessor without further formality.

(5) "Those who command the violation of or who themselves rashly violate the immunity of ecclesiastical asylum." Immunity, or right of sanctuary, protected criminals who took refuge near the altar or within sacred edifices; it was forbidden to remove them from such places of refuge either by public or private force. This immunity, although formally benefited from modern life; the excommunication here retained has hardly more than the value of a principle; it may be noted that the article is cautiously worded. By its terms excommunication would be incurred only by those who rashly, and without being constrained thereto, violate the right of sanctuary as such (Holy Office, 1 Feb., 1871; 22 Dec., 1880).

(6) "Persons of any kind, condition, sex, or age who violate the clausura [i.e. canonical enclosure] of nuns by penetrating into their monasteries, those introducing or admitting along with others at least their clausura, except in the cases and in the manner provided for by the Constitution ‘Decori’ of St. Pius V.

The reader will find in the article Cloister further details; here it suffices to add that the enclosure in question is that of the papal enclosure (clausura papalis), which is that of religious men with a solemn vow. The Constitution ‘Decori’ (24 Jan. 1570) limits the reasons of egress to fire, leprosy, or an epidemic; even in the two latter cases it is necessary for such nuns to have written the authorization of the bishop.

(7) "Women who violate the enclosure [clausura] of male religious and the superiors and others who admit them." Here also it is qutation of religious with solemn vows; moreover, it has not seemed necessary to provide for exceptional cases nor for permission.

(8) "Those who are guilty of real simony [simonia rea] for the obtaining of any favours whatever, and of any of their accomplices." (For this article and the two that follow see SIMONY.)

(9) "Those who are guilty of confidential simony [simonia confidentialis] apropos of any benefice or any dignity whatever.

(10) "Those who are guilty of real simony for the purpose of entering a religious order.

(11) "All who traffic in Indulgences or other spiritual favours are excommunicated by the Constitution of St. Pius V, ‘Quam plenum’ (2 Jan., 1569)." This Constitution enumerates the abuses that the pope wished to remedy. Certain Spanish bishops were accused of having promised indulgences or various other spiritual favours, but in a manner for which they were unauthorized; the abuse consisted mainly in the pecuniary conditions they imposed for obtaining these favours (Indulgences, choice of a confessor for the absolution of reserved cases, Mass and burial in time of interdict, etc.); it is pretended that these abuses of inferior rank were excommunicated. The penalties against bishops have been suppressed; excommunication, however, is retained to punish those who would reap unlawful profit from the publication or granting of Indulgences or of the spiritual favours enumerated.

(12) "Those who collect stipends for Masses and make profits out of them by having the Masses celebrated in places where the stipends are not so high." The object of the penalty is to remedy all shameful traffic in Mass-stipends; to incur it two things are necessary: not only must the stipends be received (referred to as missae manuales) be collected, but a portion of them must be withheld when remitting them to the priests who are to fulfil the obligation of saying the Masses. Despite the wording of the article, it is not necessary that both conditions be fulfilled; the object of the penalties and the celebration of the Masses, occur in different places (Holy Office, 19 Aug., 1891, ad 4).

(13) "All those excommunicated by the Constitutions of St. Pius V, ‘Admonet nos’ (29 March, 1567); Innocent IX, ‘Quo ab hinc Sede’ (4 Nov., 1591); Clement VIII, ‘Ad Romani Pontificis curam’ (26 Aug., 1592); and Alexander VIII, ‘Inter easteras’ (24 Oct., 1660), concerning the alienation and enfeoffment of cities and places belonging to the Holy Roman Church.

This article deals with the temporal domains of the Church and calls here for no special comment.

V.-44
(14) “Religious who, without permission of the parish priest, venture to administer extreme unction or the Eucharist as Viaticum, to ecclesiastics or laymen, except in cases of necessity.” The penalty affects religious with solemn vows and profession, but is not inflicted on persons domiciled in their convents. Those who, without legitimate permission, take relics from the cemeteries or catacombs of Rome or its territory, and who give such persons aid or countenance.” The penalty is to be sought from the Roman Vicariate, and excommunication is incurred only by carrying away from the catacombs genuine relics, not other objects. Relics are the remains, not of anyone happening to be buried in the catacombs, but only of martyrs, or of those regarded as such by reason of the “signs of martyrdom” that distinguish their tombs, notably the phial of blood, according to the Sacred Congregation of Rites, 10 April, 1903, 27 Nov., 1893.

(15) “Those who hold communion in criminal crime with a person whom the pope has excommunicated by name, is, those who give him assistance or countenance.” The “criminal crime” (crimen criminosum) is the very one for which the culprit was excommunicated in the article, of course, contaminants in the act, itself, since excommunication by name is necessarily posterior to such an act. The penalty is inflicted for subsequently assisting or countenancing the excommunicated person. This is a survival [see above, II (5)] of the penalties incurred by intercourse with the excommunicated. It must be noted that this censure is not imposed for intercourse with all excommunicated persons, but only with the Catholics, whom the pope has excommunicated by name, not such as have been excommunicated by a Roman Congregation (Holy Office, 16 June, 1897) or by the bishop.

(16) “Clerics who knowingly and wilfully hold communion in divinis with persons whom the pope has excommunicated by name and receive them at Divine service.” The excommunicated in question are the same as in the preceding article, and they cannot be admitted to Divine service; however, the penalty incurred concerns ecclesiastics only, when acting freely and with full knowledge [see above, II (5)].

(c) Excommunications Reserved to the Bishop (Ordinary).—These are three in number and affect the following persons—

(1) “Ecclesiastics in Holy orders and regulars or nuns who dare to contract marriage after having made a solemn vow of chastity, also those who dare to contract marriage with one of these persons.” The ecclesiastics whose marriage is null in consequence of the impediment of Holy orders are subdecons and the inferior orders; the same is true of nuns and monks, religious whose marriage is null through the impediment of vow are members of the great orders. Nevertheless, the impediment does not exist from the time of their first profession that follows the novitiate, but only from the solemn profession made three years later. The penalty is incurred by an attempt at marriage, not by an act of betrothal: such an attempt is recognized in any contract having the figura matrimonii, i.e. which would constitute a marriage if there were no impediment; consequently the penalty is incurred for civil marriage (Holy Office, 22 Dec., 1880), even where other impediments, e.g. concubinage (Holy Office, 16 Jan., 1892).

(2) “Those who efficaciously procure abortion.” The fruitless attempt is not punished with excommunication; authors do not agree as to whether the woman guilty of self-abortion is excommunicated.

(3) “Those who knowingly make use of counterfeit Apostolic Letters or who co-operate in the crime.” [See above, (a) (9).] This article is not directed against forgers but against those who endeavour to profit by falsified letters. Petitions signed by the pope or in his name have all the presumed permission of the parish priest, if they be in ignorance, finally if it be a case of necessity. Those to whom these religious must not administer the sacraments are seculars, ecclesiastics or laymen; they may, however, administer them to persons domiciled in their convents.

(4) “Those who knowingly make use of counterfeit Apostolic Letters or who encourage the giving of ecclesiastical burial to notorious heretics or to persons excommunicated by name or placed under interdict.” The article does consider funeral ceremonies, but only material interment in consecrated ground. Those who admit heretics or others to ecclesiastical burial are not punished, but only those who, by authority or force, compel such an interment, thereby violating the prohibition of the Church. Nor is it questionable here of all who, according to the Ritual, should be deprived of ecclesiastical burial, but merely of the two categories indicated.

(5) “Those who wound or terrify the inquisitors, informers, witnesses, or other ministers of the Holy Office, those who lacerate or burn the writings of this tribunal and all who give to the aforesaid assistance, counsel, or countenance.” This excommunication does not apply in countries where the Holy Office has not the initiatives invested in such countries on the bishop who is protected by the specially reserved excommunications described above, under (a) (5), (6), (8).

(6) “Those who alienate and those who have the audacity to receive church property without Apostolic authorization, according to the terms of the Constitution ‘Ambitiose, de rebus eccles. alienandi.’” The author of this Constitution (Extravagantes, lib. III, tit. iv, inter comm.) was Paul II (1 March, 1467). It forbids under pain of reserved excommunication and of the nullity of the acts, not only alienations (properly so called) of ecclesiastical property, sales, donations, etc., but also all contracts savouring of alienation, such as mortgages, emphyteusis or perpetual lease, long-term leases, etc. For the manifest benefit of the Church these contracts must be authorized by the pope; only objects of small value are excepted (see Third Plenary Council of Baltimore, no. 20).

(7) “Those who, through their own fault, neglect or omit to denounce within a month the confessors or priests by whom they have been solicited to immodest acts, in all the cases set forth by our predecessors Gregory XV in the Constitution ‘Universi’ (20 Aug., 1622) and Benedict XIV in the Constitution ‘Sacramentum poenitentiae’ (1 June, 1741).” This excommunication is not intended to punish those solicited to sin (they are not therefore guilty), but to protect the administration of the Sacrament of Penance. Persons thus solicited are strictly obliged to make known to the inquisitor or the bishop those priests who have solicited them to the aforesaid acts; if, through their own fault, such denunciation is not made within a month they incur excommunication, which ceases only when they have made known in the aforesaid manner the guilty party. The solicitation here alluded to is not any provocation to evil, but to sins against chastity on the part of confessors or priests, and in connection with the Sacrament of Penance, this being the abuse that the legislator especially seeks to punish. Said connexion exists when the solicitation takes place “during the very act of penance, or immediately before or after, on the occasion or under the pretext of confession, or finally, in the confessional.”

B. Excommunications Pronounced by the Council of Trent.—These are eight in number, the first being sim-
ply reserved to the pope and the other seven non-reserved:—

(1) Sess. XXII, c. ii, De ref.: against usurpers, whether ecclesiastics or laymen, of any kind of church property, until the time of restitution and absolution. This protects all ecclesiastical property. This is called, i.e. of which the administration belongs to ecclesiastical authority, such as real and personal property, revenues, etc. Excommunication is incurred by usurpers, namely by those who claim for themselves the ownership of this property, and passes on to the successive acquirers of such property until restitution or composition (compensation) is made. The penalty was applied at the time of the recent spoliations in Italy and France.

(2) Sess. IV, De edictum et usu sacrum librorum.

—The excommunication pronounced by the council was restricted by the Constitution "Apostolica Sedis" to those who, without the approbation of the bishop, print, or have printed, books treating of sacred things; this must here be understood solely of the text of Holy Writ and of notes and commentaries on the same (Holy Office, 22 Dec., 1860).

(3) Sess. XXIV, c. vi, De ref. matr.: against those who willfully and guilty of the crime of abduction, in regard to any woman, with a view to marriage, and all who lend them advice, aid, or countenance.

(4) Sess. XXIV, c. ix, De ref. matr.: against temporal rulers and magistrates who directly or indirectly oppose the liberty of their subjects in the matter of contracting marriage, or in太少 those who unjustly oblige a woman to enter a monastery unwillingly, or to take the habit, or make a profession, and those who thereunto give their counsel, aid, or countenance, as also against those who, without good reason, prevent a woman from taking the veil or making her profession.

(5) Sess. XXV, c. v, De regul.: against secular magistrates who at the request of the bishop, do not give the support of the secular arm in re-establishing the clausura or enclosure of nuns. This excommunication is abrogated in practice or at least is inapplicable.

(6) Sess. XXV, c. xviii, De regul.: against those who unjustly oblige a woman to enter a monastery unwillingly, or to take the habit, or make a profession, and those who thereunto give their counsel, aid, or countenance, as also against those who, without good reason, prevent a woman from taking the veil or making her profession.

(7) Sess. XXV, c. i, De ref. matr.: against "those who deny that clandestine marriages [before the legislation of the council] are true and valid; as also those who falsely affirm that marriages contracted by the children of a family without the consent of their parents are invalid and that parents can make such marriages valid or invalid."

(8) Sess. XIII, can. xi: "This council ordains and declares that sacramental confession, when a confessor may be had, is of necessity to be made before Communion by those whose conscience is troubled by mortal sin, how contrite soever they may think themselves. But if anyone shall presume to teach, preach, or obstinately to assert, or even in public disputation to defend the contrary, he shall be thereupon excommunicated.

C. Excommunications Pronounced or Renounced Since the Constitution "Apostolica Sedis".—These are four, in number, the first being specially reserved to the pope, the third to the ordinary; the fourth is non-reserved.

(1) The Constitution "Romani Pontifex" (28 Aug. 1870), besides other penalties, declares specially reserved excommunication: first, against the dignitaries and canons of cathedral churches (or those having the administration of vacant cathedrals) who would dare to concede and transfer the administration of their church with the title of vicar to the person elected, or named as all ecclesiastical property, properly by lay power; second, against those so elected or presented; and third, against all who aid, advise, or countenance the aforesaid offenders.

(2) Excommunication specially reserved against the members of the "Catholic Italian Society for the restoration of the rights of the Christian and especially of the Roman people", and against its promoters, supporters, and adherents (S. Peniten., 4 Aug., 1876; Acta S. Sed., IX, 552). Amongst other rights this society proposed to restore popular participation in the election of the sovereign pontiff.

(3) Excommunication reserved to the ordinary against laymen (for ecclesiastics the penalty is suspension) who traffic in Mass-stipends and trade with priests for books and other merchandise (S. Cong. of the Council, decrees "Vigilanti studio", 25 May, 1893).

(4) Excommunication, non-reserved, against missionaries, both regulars and seculars, of the East Indies (Parther Orient) or the West Indies (America) who devote themselves to commerce or who participate in it, and their immediate superiors, provincial or general, who fail to punish the culprits, at least by removal, and even after a single offence. This excommunication comes down from the Constitutions of Urban VIII, "Ex delicto" (22 Feb., 1633), and Clement IX, "Solluitudo" (17 July, 1669), but was suppressed by reason of non-mention in the Constitution "Apostolica Sedis"; it was re-established, however, at the request of the S. Cong. of the Inquisition, 1 Dec., 1872. This excommunication is non-reserved, but the culprit cannot be absolved prior to making restitution, unless he at the point of death.

Canonists usually treat of excommunication in their commentaries on the Corpus Juris Canonici, at the title De excommunicatione (lib. V, tit. xxix). Moralists deal with it apropos of the treatise on censures (De Censura). One of the chief works is that of D’Annibale, Summa morum (5th ed., Rome, 1908). For details consult the numerous commentaries on the Constitution Apostolica Sedis. Special works by ancient writers: Avela, De censura (Lyons, 1599); Stobae, De censura (Coimbra, 1603); Aldri, De censurae ecclesiasticis (Rome, 1618); Of. Rorens, De censura et inquisitioni (Tbingen, 1597); Idem in Kirchenlex., s. v. Bann, Hollweck, Die kirchlichen Strafgesetze (Mainz, 1899); Hilarius a Sexten, De censura (Mainz, 1898); Muncher, De canonica censura et inquisitione (Cologne, 1783); Starcke, De censura et inquisitione (Cologne, 1874); Taunton, The Law of the Church (London, 1900), s. v. Excommunication; Smith, Elements of Ecclesiastical Law (New York, 1884); Saint-Justes, Rapport. Jur. Canon. (New York, 1905), V, 210-15; Luga, De Justitia Ecc. (Rome, 1906).

A. Boudinon.

Exeat. See Incarceration.

Execution, same as Desecration (q.v.).

Executor, Apostolic, a cleric who puts into execution a papal rescript, completing what is necessary in order that it be effective. The executor is to be discovered from the tenor of the document itself. In matters which regard the government of the regulars, the executor of Apostolic Letters is the superior of the order, namely, the general, the procurator general, or the provincial. Rescripts containing favours are sometimes granted by the Holy See directly to the petitioners; in which case, the executor merely has the office of executing the favour asked for, without any obligation of judicial inquiry into the opportuneness of the grant, or the reasons alleged for seeking it. Nevertheless, if it is notorious that the favour has been surreptitiously obtained, he must abstain from executing the rescript. Rescripts, however, are not usually sent direct to the parties interested, but, in the external forum, to the ordinary, either of the petitioners or of the territory in question, and in the internal forum, to any approved confessor chosen by the persons concerned. In the latter case the grant is remitted entirely to the judgment and conscience of him who is to execute it. He enjoys delegated power, and must act within the limits of his mandate. The Apostolic Letters must first of all be in his hands before he may act; from them he determines whether he is the one delegated, and what are his powers. He must verify the force of the reasons alleged for granting the request, as well as the truth of other statements found in the petition. As a delegate of the Holy See he may, ordinarily, subordinate another to execute the rescript, unless this is expressly
EXEDEA

692

EXEGESIS

forbidden in the grant, or unless it is apparent that he is selected by reason of his knowledge or other personal qualities specially fitting him for the office. It is important to know whether an executor is chosen for his personal characteristics, or on account of his office: in the latter case the delegation is personal, and if the latter it is attached to the position, and passes on to the successor of the same office. A rescript given to the ordinary may likewise be executed by the vicar general. An executor must know the rules for interpreting rescripts, also, when they are rendered void, because surreptitiously obtained, or for other causes. Rescripts emanating from the Sacred Penitentiaria are executed in the confessional, and are then destroyed by the confessor, as they treat of matters of conscience. When the rescript pertains to the external forum, a deacon should be drawn up to the effect that all necessary formalities have been observed in its execution; these formalities should be specified. No fee is allowed for the execution of Apostolic Letters, lest the executor's judgment be influenced thereby.

Andrew B. Meehan.

Exeza.—A semicircular stone or marble seat; a rectangular or semicircular recess; the portico of the Greek palestrn, or gymnasium, in which disputations of the learned were held among the ancients; also, in private houses, the place set apart for conversation. The term is sometimes applied to a porch or chapel which projects from a larger building. Also used, as synonymous with cathedra, for a throne or seat of any kind; for a small private chamber; the space between an oriel window and the small chapel between the buttresses of a large church or cathedral.

Thomas H. Poole.

Exegesis (Biblical) is the branch of theology which investigates and expresses the true sense of Sacred Scripture. The exegete does not inquire which books constitute Sacred Scripture, nor does he investigate their genuine text, nor, again, does he study their double authorship. He accepts the books which, according to the concurrent testimony of the church and ecclesiastical authority, belong to the Canon of Sacred Scripture. Obedient to the decree of the Council of Trent, he regards the Vulgate as the authentic Latin version, without neglecting the results of sober textual criticism, based on the readings found in the other versions approved by Christian antiquity, in the liturgical citations of the Fathers, and in the more ancient manuscripts. With regard to the authorship of the Sacred Books, too, the exegete follows the authoritative teaching of the Church and the prevalent opinions of her theologians on the question of Biblical inspiration. Not that these three questions concerning the Canon, the genuine text, and the inspiration of Sacred Scriptures exert no influence on Biblical exegesis: unless a book forms part of the Canon, it will not be the subject of exegesis at all; only the best supported readings of its text will be made the basis of its theological explanation; and the doctrine of inspiration with its logical corollaries will be found to have a constant bearing on the results of exegesis. Still, exegesis, as such, does not deal with these three subjects; the reader will find them treated in the articles CANON OF THE HOLY SCRIPTURES; CRITICISM, BIBLICAL, SUBTITULAR, CRITICISM, PERIPTETICAL, AND CRITICISM, INTERPRETATION.

The early Reformers were wont to claim that the genuine text of the inspired and canonical books is self-sufficient and clear. This contention does not owe its origin to the sixteenth century. The words of Origen (De principi., IV), St. Augustine (De doctr. christ., I-III), and St. Jerome (ad Paulin., ep. liii, 6, 7) show that similar views existed among the scholastics in the early age of the Church. The exegetical results flowing from the supposed clearness of the Bible may be inferred from the fact that one century after the death of Bossuet could give to the world two volumes entitled, “A History of the Variations of the Protestant Churches”. A Protestant theologian, S. Werenfels, sets forth the same truth in a telling epigram:

Tunc liber est in quo sua quattuor dogmata quiesque,
Inveniet et pariter quattuor quiesque sua,
Et sic est in quatuor commensuris,
Quae in quattuor commensuris quies est. [It may be rendered in an English paraphrase:"
Men ope this book, their favourite creed in mind; Each seeks his own, and each his own doth find. Agreeing with the warning of the Fathers, Pope Leo XIII, in his Enyclic 1, 1 "Providentissimus Deus", insisted on the difficulty of rightly interpreting the Bible. "It must be observed", he wrote, "that in addition to the usual reasons which make ancient writings more or less difficult to understand, there are some which are peculiar to the Bible. For the language of the Bible is employed to express, under the inspiration of the Holy Ghost, many things that are beyond the power and scope of the reason of man— that is to say, Divine mysteries and all that is related to them. There is sometimes in such passages a fullness and a hidden depth of meaning which the letter hardly expresses and which the laws of grammatical interpretation hardly penetrate. Moreover, the sense itself frequently admits other senses, adapted to illustrate dogma or to confirm morality. Wherefore, it must be recognized that the Sacred Writings are vise in a certain religious obscurity, and that no one can enter into their interior without a guide; God so disposes the Holy Fathers conversely to teach, in order that men may investigate them with greater ardour and earnestness, and that what is attained with difficulty may sink more deeply into the mind and heart; and, most of all, that they may understand that God has delivered the Holy Scriptures to the Church, and that in reading and making use of His word, they must follow the Church as their guide and their teacher."]

But it is not our purpose so much to prove the need of Biblical exegesis as to explain its aim, describe its methods, indicate the various forms of its results, and outline its history. Exegesis aims at investigating the sense of Sacred Scripture: its method is contained in the rules of interpretation; its results are expressed in the various ways in which the sense of the Bible is wont to be communicated; its history comprises the work done by Christian and Jewish interpreters, by Catholics and Protestants. We shall endeavour to consider these various elements under the four heads: I. Sense of Sacred Scripture; II. Hermeneutics; III. Sacred Rhetorics; IV. History of Exegesis.

I. Sense of Sacred Scripture.—In general, the sense of Sacred Scripture is the truth actually conveyed by it. We must well distinguish between the sense of a word and the significance of a word. The former will give us, in the case of most words, a list of their various possible meanings or significations; but no reader will be tempted to believe that a word has all these meanings wherever it occurs. The context or some other restrictive element will determine the meaning in which each word is used in any given passage, and this meaning is the sense of the word. The significance of the word is its possible meaning; the sense of a word is its actual meaning in any given context. A sentence, like a word, may have several possible significations, but it has only one sense or meaning, as intended by the author. Here, again, the distinction denotes the possible meaning of a sentence, while the sense is the meaning which the sentence here and now conveys. In the case of the Bible, it must be kept in mind that God is its author, and that God, the Sovereign Lord of all things, can manifest truth not
merely by the use of words, but also by disposing outward things in such a way that one is the figure of the other. In the former case we have the literal sense; in the latter, the typical (cf. St. Thomas, Quodli., vii, Q vi, a. 14).

(i) Literal Sense.—(i) What is the Literal Sense?—The literal sense of Sacred Scripture is the truth really, actually, and immediately intended by its author. The fact that the literal sense must be really intended by the author distinguishes it from the truth conveyed by any mere accommodation. This latter applies a writer's language, on the ground of analogy, to some thing or other that is not in itself on analogy. The literal sense is actually intended by the writer, it differs from the meaning conveyed only virtually by the text. Thus the reader may come to know the literary capacity of the author from the style of his writing; or he may draw a number of logical inferences from the writer's direct statements; the resultant information is in neither case actually intended by the writer, but it constitutes the so-called derivative or consequent sense. Finally, the literal sense is limited to the meaning immediately intended by the writer, so that the truth mediately expressed by him does not fall within the range of the literal sense. This point is to this point that the literal sense differs from the typical. To repeat briefly, the literal sense is not an accommodation based on similitude or analogy; it is not a mere inference drawn by the reader; it is not an antitype corresponding to the immediate contents of the text as its type; but it is the meaning which the author intends to convey really, not by a stretch of the imagination; actually, not as a syllogistic potency; and immediately, i. e., by means of the language, not by means of the truth conveyed by the language.

(ii) Division of the Literal Sense.—What has been said about the immediate character of the literal sense must not be misconstrued in such a way as to exclude figurative language from its range. Figurative language is really a single, not a double, sign of the truth it conveys. When we speak of the "arm of God," we do not imply that God really is endowed with such a bodily member, but we directly denote his power of action (St. Thomas, Summa, I, Q. i, a. 10, ad 3a). This principle applies not merely in the metaphor, the synecdoche, the metonymy, or the irony, but also in those cases in which the figure extends through a whole sentence or even an entire chapter or book. The fact that the real sense of the expression differs from its usual verbal meaning. In Matt. v, 13 sqq., e. g., the sentence, "You are the salt of the earth," etc., is not to be understood in its nonfigurative sense, and then in the figurative; it does not first class the Apostles among the mineral kingdom, and then among the social and religious reformers of the world, but the literal meaning of the passage coincides with the truth conveyed in the allegory. It follows, therefore, that the literal sense comprises both the proper and the figurative. The fable, the parable, and the example must also be classed among the allegorical expressions which signify the intended truth immediately.

It is true that in the passage according to which the trees elect a king (Judges, ix, 6-21), in the parable of the prodigal son (Luke, xv, 11 sqq.), and in the history of the Good Samaritan (Luke, x, 32), a number of words and of means in order to construct the fable, the parable, and the example respectively; but this does not interfere with the literal or immediate sense of the literal devices. As such they have no meaning independent of, or prior to, the moral lesson which the author intends to convey by them. We are not always entitled to consider such devices as mere contrivance which calls a watch immediately. The more contrivance we call it, the more it shows the time in spite of the subordinate action of its spring and wheels; why, then, should we question the truth that the literary device called fable, or parable, or example, immediately points out its moral lesson, though the very existence of such a device presupposes the use of a number of words and even sentences?

(iii) Ubiquity of the Literal Sense.—The Fathers of the Church were not blind to the fact that the literal sense in some Scripture passages appears to imply certain incongruities, not to say impossibilities. On the other hand, they regarded the language of the Bible as truly human language, and therefore always endowed with a literal sense, whether proper or figurative. Moreover, St. Jerome (in Is., xiii, 19), St. Augustine (De tent. Abrah. serm., ii, 7), St. Gregory (De fide, i, 37) agree, while St. Augustine (ibid., vii, 64, vi, a. 14) in his conviction that the typical sense is always based on the literal and springs from it. Hence if these Fathers had denied the existence of a literal sense in any passage of Scripture, they would have left the passage meaningless. Where the patristic writers appear to reject the literal sense, they really exclude only the proper sense, leaving the figurative. Origen (De princ., IV, xi) may be regarded as the only exception to this rule; since he considers some of the Mosaic laws as either absurd or impossible to keep, he denies that they must be taken in their literal sense. It is probable even in his case, attempts have been made to give to his words a more acceptable meaning (cf. Vincenzi, "In S. Gregorii Nysseni et Origenis scripta et doctrinam novae recessio," Rome, 1864, vol. II, cc. xxv-xxix). The great Alexandrian Doctor distinguishes between the body, the soul, and the spirit of Scripture. The same has been observed (and surpasses) in the three elements its proper, its figurative, and its typical sense respectively. He may, therefore, with impunity deny the existence of any bodily sense in a passage of Scripture without injury to its literal sense. But it is more generally admitted that Origen went astray on this point, because he followed Philo's opinion too faithfully.

(iv) Is the Literal Sense One or Multiple?—There is more solid ground for a diversity of opinion concerning the unicity of the literal sense contained in each passage of Sacred Scripture. This brings us face to face with a double question: (a) Is it possible that a Scriptural passage has more than one literal sense? (b) Is there any Biblical text which actually has more than one literal meaning? It must be kept in mind that the literal sense is taken here in the strict meaning of the word. It is agreed on all hands that a multiple consequent sense or a multiple accommodation may be regarded as the rule rather than the exception. Nor is there any difficulty about the multiple literal sense found in various readings or in different versions of the same text; we ask here whether one and the same genuine Scripture text may have more than one literal sense.

(a) Possibility of a Multiple Literal Sense.—Since a word, and a sentence too, may have more meanings than one, there is no a priori impossibility in the idea that a Scriptural text should have more than one literal sense. If the author of Scripture really intends to convey the truth contained in the various possible meanings of a text, the multiple literal sense will be the natural resultant. Some of the expressions found in the writings of the Fathers seem to emphasize the possibility of having a multiple literal sense in Sacred Scripture.

(b) Actual Occurrence of a Multiple Literal Sense.—The subject becomes more complicated if we ask whether a multiple literal sense is not merely possible, but actually found anywhere in Scripture. There is no good authority for its frequent occurrence, but it does really exist even in the few Scriptural passages which seem to contain it, such as Is. ii, 7; Is., iii, 4, 8; Dan., ix, 27; John, xi, 51; ii, 19? Did God wish in these texts to convey a multiple literal sense? Revelation, as coming down to us in Scripture and tradition, furnishes the only clue to the solution of the question.
(a) Arguments for the Multiple Literal Sense.—The advocates of a multiple literal sense advance the following arguments for their view: First, Sacred Scripture supposes its existence in several passages. Thus Heb., i, 5, understands Ps. ii, 7 (this day have I begotten thee) literally, as referring to the external generation, but Acts, xxii, 33, understands the text of the Resurrection; Heb., v, 5, of the eternal priesthood of Christ. Again, the Latin Vulgate and the Septuagint, together with I Pet., ii, 24, understand Is. lii, 4 (he hath borne our iniquities), of our sins; Matt., viii, 17, understands the words of our bodies, and again, I Mach., i, 57, applies some words of Dan., ix, 27, to his own subject, while Matt., xxiv, 15, represents them as a prophecy to be fulfilled in the destruction of the Holy City. Finally, John, i, 19, was understood by the Jews in a sense different from that intended by Jesus Christ; and John, xi, 51, expresses two disparate meanings, one intended by Caiphas and the other by the Holy Ghost. The second argument is, that tradition too upholds the existence of a multiple sense in several passages of the Bible. Its witnesses are St. Augustine (Conf., XII, xxvi, xxxi, xxxii; De doctr. Christi, etc.); St. Gregory the Great (Ezech., iii, 13, Lib. i, Rom. x, n. 50 sq.). St. Basil, St. Chrysostom, St. Jerome, St. Bernard, and, among the Scholastics, St. Thomas (I, q. i, a. 10; “De potent.,” IV, i, “in ii sent.,” dist. xii, q. i, a. 2, ad 7”), Carl. Cajetan (ad I, q. i, a. 10), Melchior Cano (Loc. theol., Lib. vii, ad 7 arg., ad 8 Bezae (ad i, q. i, a. 10). Sylvius (ad id.), John of St. Thomas (I, q. i, disp. ii, a. 12), Billart (De reg. fidei, dissert. i, a. 8), Vasquez, Valenti, Molina, Serrarius, Cornelius a Lapide, and others.

(9) Reasons against the Multiple Literal Sense.—Patristic, Eusebian, Kabbalistic, Reimarus, and the greater number of recent writers deny the actual existence of a multiple literal sense in the Bible; they urge the following reasons for their opinion: First, the Bible is written in human language; now, the language of other books usually presents only one literal sense. Second, the genuine sense of Sacred Scripture must be discovered by means of the rules of hermeneutics. A commentator would render these rules meaningless, if he were to look for a second literal sense of a passage after discovering one true meaning by their means. Third, commentators implicitly assume that the given text of Scripture has only one literal sense; for after finding out the various meanings which are philologically probable, they endeavour to ascertain which of them was intended by the Holy Ghost. Fourth, a multiple literal sense would create equivocation and confusion in the Bible. Finally, the multiple sense in Scripture would be a supernatural fact wholly depending on the free will of God. We cannot know it independently of revelation; its actual occurrence must be solidly proved from Scripture or tradition. The patrons of the multiple literal sense have not thus far advanced any such proof.

(1) Where Scripture, Law, Cornelius, Kabbalabur, Reim- mayr, and the greater number of recent writers deny the actual existence of a multiple literal sense in the Bible; they urge the following reasons for their opinion: First, the Bible is written in human language; now, the language of other books usually presents only one literal sense. Second, the genuine sense of Sacred Scripture must be discovered by means of the rules of hermeneutics. A commentator would render these rules meaningless, if he were to look for a second literal sense of a passage after discovering one true meaning by their means. Third, commentators implicitly assume that the given text of Scripture has only one literal sense; for after finding out the various meanings which are philologically probable, they endeavour to ascertain which of them was intended by the Holy Ghost. Fourth, a multiple literal sense would create equivocation and confusion in the Bible. Finally, the multiple sense in Scripture would be a supernatural fact wholly depending on the free will of God. We cannot know it independently of revelation; its actual occurrence must be solidly proved from Scripture or tradition. The patrons of the multiple literal sense have not thus far advanced any such proof.

(2) The testimony of the Fathers and the Scholastic theologians is not sufficient in our case to prove the existence of a dogmatic tradition as to the actual occurrence of the multiple literal sense in Scripture. There is no trace of it before the time of St. Augustine; this great Doctor propounds his view not as the teaching of tradition, but as a pious and probable opinion. The expressions of the other Fathers, excepting perhaps St. Gregory the Great, urge the depth and weight of thought contained in Scripture, and they refer to meanings which they consider as authentic, typical, derivative, or consequent sense, and perhaps even to mere accommodations of certain passages.

Among the Scholastics, St. Thomas follows the opinion of St. Augustine, at least in one of the alleged passages (De potent., IV, I, 1) and a number of the later Scholastics follow the opinion of St. Thomas. The other early Scholastics maintain rather the opposite view, as may be seen in St. Bonaventure (IV Sent. dist. xxi, I, 1. dub. 1) and Alexander of Hales (Summa, I, q. i., m. 1, a. 2).

(v) The Derivative or Consequent Sense.—The consequent or derivative sense of Scripture is the truth legitimately inferred from its genuine meaning. It would be wrong to identify the consequent sense with the more latent literal sense. This depth of the literal sense may spring from the fact that the predicate changes somewhat in its meaning if it be applied to a morally different subject. The word would be found in the meaning if predicted of God, and quite another if predicted of created beings. Such a variety of meaning belongs to the literal meaning in the strict sense of the word. The consequent sense may be said to be the conclusion of a syllogism whose premises are true. The Holy Ghost often applies the passage to a holy author; but God has foreseen all the legitimate conclusions derived from Biblical truths, so that they may be said, in a certain way, to be His intended meanings. If the Bible itself makes use of such inferences, and if by way of grace He has made a reconciliation, as Paul (I Cor., i, 31) quotes such an inference based on Jer., ix, 23, 24, with the express addition “as it is written”; in I Cor., ix, 10, 11, he derived the consequent sense of Deut., xxv, 4, indicating the second premise, while in I Tim., v, 18, he states the consequent sense of the same passage without adding the second premise. Theologians and ascetical writers have, therefore, a right to utilize dogmatic and moral inferences from the genuine sense of Sacred Scripture. The writings of the Fathers illustrate this principle most copiously.

(27) Accommodation.—By accommodation the writer’s words are applied, on the ground of analogy, to something not originally meant by him. If there be no analogy between the original and the imposed meaning, there is no accommodation of the passage, but rather a violent perversion of its true meaning, such a contorted meaning is not merely outside, but against, the genuine sense. Accommodation is usually divided into two classes: extensive and allusive. Extensive accommodation takes the words of the Bible in their genuine sense, but applies them to a new subject. Thus the words, he “was found perfect, just, in the time of his power,” were regarded as indicating the types of companionship, which Eclesius, xlv, 17, predicates of Noe, are often applied to other saints. Allusive accommodation does not employ the words of Scripture in their genuine sense, but gives them an entirely different meaning; here the analogy does not exist between the objects, but between the verbal expressions. Ps. xvii, 26, 27, “With the holy, thou wilt be holy; and with the innocent man thou wilt be innocent; and with the elect thou wilt be elect: and with the perverse thou wilt be perverted,” expresses originally the attitude of God to the good and the wicked; but by accommodation the words are employed to infer an analogy between the case of companionship. That the use of accommodation is legitimate, may be inferred from its occurrence in Scripture, in the writings of the Fathers, and from its very nature. Examples of accommodation in Scripture may be found in Matt., vii, 23 (cf. Ps., vi, 9), Rom.,...
x, 18 (cf. Ps. xviii, 5), II Cor., viii, 15 (cf. Ex., xvi, 18), Heb., xiii, 5 (cf. Jos., i, 5), Apoc., xi, 4 (cf. Zach., iv, 14). The liturgical books and the writings of the Fathers are so replete with the use of accommodation that it is needless to refer to any special instances. Finally, there is no good reason for interdicting the practice of accommodation, seeing that it is right and proper in itself and that its use does not involve any inconvenience as far as faith and morals are concerned. But two exceptions are to be avoided: first, it cannot be maintained, that all the citations from the Old Testament which are found in the New are mere accommodate—adaptations. Certain passages are found in the writings of those who endeavour to destroy the value of the Messianic prophecies; they are not confined to our days, but date back to Theodore of Mopsuestia and the Sojourners. The Fifth Ecumenical Council rejected the error of Theodore; besides, Christ Himself (Matt., xxii, 41 sqq.; cf. Ps. cix, 1), St. Peter (Acts, iii, 25 sqq.; cf. Gen., xii, 3; xvii, 15; xxi, 18, and St. Paul (Heb., i, 5; v, 5; Acts, iii, 33; cf. Ps. ii, 7) have theological arguments on Old Testament citations, so that these latter cannot be regarded as mere accommodation. Secondly, we must not except the proper limits in the use of accommodation. This we should do, if we were to present the meaning derived from accommodation as the genuine sense of Scripture, or if we were to use it as the premise in an argument, or again if we were to accommodate the words of Scripture to ridiculous, absurd, or wholly disparate subjects. The fourth session of the Council of Trent warns most earnestly against such an abuse of Sacred Scripture.

(2) Typical Sense.—The typical sense has its name from the fact that it is based on the figurative or typical relation of Biblical persons, or objects, or events, to a new truth. This latter is called the antitype, while its Biblical correspondent is named the type. The typical sense is also called the spiritual, or mystical, sense: mystical, because of its more recondite nature; spiritual, because it is related to the literal, as the spirit is related to the body. What we call type is called shadow, allegory, parable, by St. Paul (Rom., x, 14; I Cor., x, 6; Heb., vii, 5; Gal., iv, 24; Heb., ix, 10; once he refers to it as antitype (Heb., ix, 24), though St. Peter applies this term to the truth signified (I Pet., iii, 21). Various other designations for the typical sense have been used by the Fathers of the Church; but the following questions are of more vital importance.

(i) Nature of the Typical Sense.—The typical sense is the Scriptural truth which the Holy Ghost intends to convey really, actually, but not immediately. Inasmuch as its meaning is really conveyed, the typical sense differs from accommodation; inasmuch as its meaning is actually expressed, it differs from the consequent sense; inasmuch as its meaning is not immediately signified, it differs from the literal sense. While we arrive at the latter immediately by way of the literal expression, we cannot know the typical sense only by way of the literal. The text is the sign conveying the literal sense, but the literal sense is the sign expressing the typical. The literal sense is the type which by a special design of God is directed to signify its antitype. Three conditions are necessary to constitute a type: (a) It must be described in the Old Testament. (b) It must be referred to the antitype by its very nature. This prohibits the similitude from serving as a type, of its own likeness to the object. (c) God himself must have established the reference of the type to its antitype; this excludes objects which are naturally related to others. The necessity of these three conditions explains why a type cannot be confounded with a parable, or an example, or a symbol, or a similitude, or a comparison, or a metaphor, or a symbolic prophecy—e.g., the statue seen in the dream of Nebuchadnezzar. It should be added, however, that at times the type may be expressed by the Scriptural representation of a subject rather than by the strict literal sense of Scripture. Gen., xiv, 18; xvi, 14, introduces Melchizedek as the figure of Christ's genealogy; hence Heb., vii, 3, represents him "without father, without mother, without genealogy, having neither beginning of days nor end of life", and makes him as such a type of Jesus Christ. Thus far we have spoken about the typical sense in its strict meaning. In a wider and looser sense, many of the Old Testament are sometimes considered as types, provided they resemble persons, events, or objects in the New Testament, whether the Holy Ghost has intended such a relationship or not. The Egyptian Joseph is in this way frequently represented as a type of St. Joseph, the foster-father of Christ.

(ii) Division of the Typical Sense.—The division of the typical sense is based on the character of the type and the antitype. The antitype is either a truth to be believed, or a boon to be hoped for, or again a virtue to be practised. This gives us a triple sense—the literal, the analogical, and the typological. The objects of faith in the Old Testament centered mainly around the future Messias and his Church. The allegorical sense may, therefore, be said to refer to the future or to be prophetic. The allegory here is not to be sought in the literary expression, but is to be found in the persons or things expressed. This division of the typical sense was expressed by the Scholastics in two lines:

- Littera gesta docet; quid credas, allegoria; Moralis quid agas; quo tendas, anagoria.
- Jerusalem, e. g., according to its literal sense, is the earthly City; taken allegorically, it denotes the Church Militant; understood topologically, it stands for the just soul; finally, in its anagogical sense, it stands for the Church Triumphant.

(iii) The Existence of the Typical Sense.—Scripture and tradition agree in their testimony for the occurrence of the typical sense in certain passages of the Old Testament. Among the Scriptural texts which establish the typical sense, we may appeal to Col., iv, 16—17; Heb., vii, 5—8; Rom., v, 14; Gal., iv, 24; Matt., vi, 15 (cf. Os., xi, 1); Heb., i, 5 (cf. II K., vii, 14). The testimony of tradition concerning this subject may be gathered from Barnabas (Ep.7, 5, 8, 12, etc.); St. Clement of Rome (I Cor., xiv, 42); St. Irenaeus (Adv. haer., IV, xxv, 3; II, xxiv, 2 sqq.; IV, xxvi, II Tertullian (Adv. Marc., V, vii); St. Jerome (Ep. iii, ad Paulin., 8), St. Thomas (I, Q. i, a. 10), and a number of other patristic writers and Scholastic theologians. That the allegory is ascribed to the Christian writers on this point, may be inferred from Josephus (Antiq., XVII, iii, 4; Procm. Antiq., n. 4; III, vi, 47; De bello Jud., V, ii, 1). The Talmud (Berachot, c. v, ad fn.; Quiddus, fol. 11, col. 1), and the writings of Philo (de Abraham; de migrat. Abraham; de vitæ contempl.), though this latter writer goes excess in the allegorical interpre-
tation. The foregoing tradition may be confirmed by the language of the liturgy and by the remains of Christian archæology (Kraus, "Roma sotterranea," pp. 242 sqq.). Striking instances of the liturgical proof may be seen in the Preface of the Mass for Excommunication of the Devil, in the Divine Office recited on the feast of Corpus Christi. All Catholic interpreters readily grant that in some passages of the Old Testament we have a typical sense besides the literal; but this does not appear to be granted with regard to the New Testament, at least not subsequently to the death of Jesus Christ. Distinguishing between the New Testament as it signifies a collection of books, and the New Testament as it denotes the Christian economy, they grant that there are types in the New Testament books, but only as far as they refer to the pre-Christian economy. For the New Testament has brought us the reality in place of the figure, light in place of darkness, truth in place of shadow (cf. Patrizi, "De interpretacione Scripturarum Sacrarum"., p. 199, Rome, 1544). On the other hand, it is urged that the New Testament is the figure of glory, as the Old Testament was the figure of glory, as the New Testament was the figure of glory. But in the New Testament, the mystical body, and the mystical acts of the Church's members, analogically of their future glory (St. Thom., Quodl. VII, a. 15, ad 5o). Similar views are expressed by St. Ambrose (in Ps. xxx, n. 25), St. Chrysostom (in Matt., hom. ixvi), St. Augustin (in Joh., ix), St. Gregory (in Hom., iv), St. John Damascene (De fide orth., iv, 13); besides, the word of Peter is usually regarded as a type of the Church, the destruction of Jerusalem as a type of the final catastrophe.

(ii) How Everything in the Old Testament a Typical Sense?—If such passages as Luke, xxiv, 14, I Cor., x, xi, be taken out of their context, they suggest the ubiquity of the typical sense in the Old Testament; the context limits these texts to their proper range. If some of the Fathers, e.g. St. Augustin (De doctr. christ., III, xxii) and St. Jerome (Ad Dard., Ep. cxxix, 6), claim for the whole of the Old Testament a typical sense, their language refers rather to the figurative than to the spiritual sense. On the other hand, Tertullian (De resurrect. carn., c. xx), St. Augustin (De civ. Dei, XVII, iii; C. Faust., XXII, xiv), St. Jerome (in Joann., c. i; cf. in Jer. xcvii, c. 9; xxiv, 14), and St. Thomas (Quodl., vii, a. 15, ad 5o), explicitly reject the opinion which maintains that the whole of the Old Testament has a typical sense. The opposite opinion does not appeal to reason; what could be the typical sense, e.g. of the command to love the Lord our God (Deut., vi, 5)?

(iii) How Can the Typical Sense be Known?—In the typical sense God does not merely select an existing person or object as the sign of a future person or object, but he directs the course of nature in such a way that the very existence of the type, however indirect it may be in itself, refers to the antitype. Man, too, can, in one or another particular case, perform an action in order to typify what he will do in the future. But as the future is not under his complete control, such a way of acting would be ludicrous rather than instructive. The typical sense, therefore, properly speaking, cannot be God's own work. Hence it is that, as is already stated, the determination of the precise sense in which the literary expression is employed in any given passage; thirdly, the historical description of the idea thus determined. What has been said in the preceding paragraphs sufficiently shows the difference between the signification and the sense of a word or a sentence. The importance of describing an idea historically may be exemplified by the successive shades of meaning attaching to the concept of Messias, or of Kingdom of God.

(iv) Significations of the Literary Expression.—The signification of the literary expression of the Bible is best learned by a thorough knowledge of the so-called sacred languages in which the original text of Scripture was written, and by a familiar acquaintance with the Scriptural way of speaking.

(a) Sacred Languages.—St. Augustin (De doctr.
chris., II, xi; cf. xvi) warns us that "the knowledge of languages is the great remedy against unknown signs. Men of the Latin tongue need two others for a thorough knowledge of the Divine Scriptures, viz. the Hebrew and the Greek, so that recourse may be had to the older tongues, if the infinite variety of their translators occasions any doubt." Pope Leo XIII, in the Encyclical "Providentissimus Deus", agrees with the great African Doctor in urging the study of the sacred languages. "It is most proper," he writes, "that professors of Sacred Scripture and theologians should master these tongues in which the Sacred Books were originally written, and it would seem that church students also should cultivate them, more especially those who aspire to academic degrees. And endeavours should be made to establish in all academic institutions—as has already been laudably done in many—chairs of the other ancient languages, especially the Semitic, and of other subjects connected therewith, for the benefit principally of those who are intended to profess sacred literature." Nor can it be urged that for the Catholic interpreter the Vulgate is the authentic text, which can be understood by any Latin scholar. The pontiff considers this exception in the Encyclical already quoted. "Although the meaning of the Hebrew and Greek is substantially rendered by the Vulgate, nevertheless wherever there may be ambiguity or want of clearness, the 'examination of elder tongues,' to quote St. Augustine, will be useful and advantageous." Recourse to the original text is the only scholarly approach to any work of sacred literature. A translation is never a perfect reproduction of the original; no language can fully express the thoughts conveyed in another tongue, no translator is capable of seizing the exact shades of all the truths contained in any work, and in case of Biblical versions, we have often reason for doubt as to the genuineness of their readings.

(b) Scriptural Language.—The Scriptural language presents several difficulties peculiar to itself. First, the Bible is not written by one author, but presents in almost every book the style of a different writer. Secondly, the Bible was not written at a single period; the Old Testament covers the time between Moses and the last Old-Testament writer, i.e. more than one thousand years, so that many words must have changed their meaning during this interval. Thirdly, the Biblical Greek is not the classical language of the authors with whom we are acquainted; up to about fifteen years ago, Biblical scholars used to speak about New-Testament Greek, they compiled New-Testament lexicons, and wrote New-Testament grammars. The discovery of the Egyptian papyri and other literary remains has broken down this wall of separation between the language of the New Testament and that of the time in which it was written; with regard to this point, our present time may be considered as a period of transition, leading up to the composition of lexicons and grammars that will rightly express the relation of the Biblical Greek to the Greek employed in profane writings. Fourthly, the Bible deals with the greatest variety of topics, requiring a corresponding variety of vocabulary; moreover, its expressions are often figurative, and therefore subject to more frequent changes of meaning than the language of profane writers. How can we be acquainted with the Scriptural language in spite of the foregoing difficulties? St. Augustine (De doctr. Christ., II, ix sqq.) suggests the continual reading of the Bible as the first remedy, so that we may acquire "a familiarity with the language of the Scriptures." He adds this a careful comparison of the Bible text with the language of the ancient versions, a process calculated to remove some of the native ambiguities of the original text. A third help is found, according to the same great Doctor, in the diligent reading of the works of the Fathers, since many of them formed their style by a constant reading of Holy Scripture (loc. cit., II, xiii, xiv). Nor must we omit to study the writings of Philo and Josephus, the contemporaries of the Apostles and the historians of their nation. They are helpful illustrations of the cultured language of the Apostolic time. The study of the etymology of the sacred languages is another means of becoming skilled in languages themselves. For a proper understanding of the etymology of Hebrew words, the knowledge of the cognate languages is requisite; but here it must be kept in mind that many derivatives have a meaning quite different from the signification of their respective individual forms, so that an argument based on etymology alone is open to suspicion.

(ii) Sense of the Literary Expression.—After the foregoing rules have aided the interpreter to know the various significations of the words of the sacred text, he must next endeavour to investigate in what precise sense the inspired writer employed his expressions. He will be assisted in this study by the subject-matter of the book or chapter, to its occasion and purpose, to the grammatical and logical context, and to the parallel passages. Whatever meaning of the literary expressions is not in keeping with the subject-matter of the book, it is necessary to consider the sense in which the writer employed it. The same criterion directs us in the choice of any particular shade of meaning and in the limitation of its extent. The subject-matter of the Epistles to the Romans and the Galatians, e.g., shows in what sense St. Paul used the expressions law and the spirit of God, wisdom and understanding, which occur in Ex., xxxi, 3, must be determined in the same way. The occasion and purpose of a book or of a passage will often determine whether certain expressions must be taken in their proper or figurative sense, whether in a limited or an unlimited sense. Attention to this point will aid us in explaining ariight such passages as John, vi, 53 sqq.; Matt., x, 5; Heb., i, 5, 7; etc. Thus we shall understand the first of these passages of the real flesh and blood of Christ, not of their figure; we shall see the true import of Christ's command contained in the second passage, "Go ye not into the way of the Gentiles, and into the city of the Samaritans enter ye not"; again, we shall appreciate the full weight of the theological argument in favour of the eternal generation of the Son as stated in the third passage, contained in the Epistle to the Hebrews.

The context is the third aid in determining the precise sense in which each single word is used by the writer. We need not insist on the necessity of explaining an expression in accordance with its grammatical environment. The commentator must make sure of the grammatical connexion of an expression, so as not to do violence to the rules of inflection or of syntax. The so-called poetical parallelism may be considered as constituting part of grammar taken in a wider sense. But the logical context, too, requires attention; a commentator must not explain any expression in such a sense as to make the author contradict himself, being careful to assign to each word a meaning that will best agree with the thought of the sentence, of the chapter, and even of the book. Still, it must not be overlooked that the context is sometimes psychological rather than logical; in lyric poetry, in the words of the Prophets, in the sayings of Christ, and in the apocalyptic visions, the expressions at times brought into juxtaposition, the logical connexion of which is not apparent. Finally, there is a so-called optical context which is found in the visions of the Prophets. The inspired seer may perceive groupings together in the same vision events which are widely separated from each other in time and space.

The so-called real or verbal parallelisms will aid the commentator in determining the precise sense in which the inspired writer employed his words. In case of verbal parallelism, or in the recurrence of the same literary expressions in different parts of the
spired books, it is better to explain the language of Paul by that of Paul, the expressions of John by those of John, than to explain Paul by Matthew, and John by Luke. Again, it is more natural to explain an expression occurring in the Fourth Gospel by another found in the book than by a parallel passage taken from the Apocalypse. Finally, it should be kept in mind that parallelism of thought, or real parallelism, is a more reliable aid in finding the exact sense of a passage than a mere material recurrence of a sentence or a phrase.

(iii) Historical Setting.—The inspired writers connected with their words the ideas which they themselves possessed, and which they knew to be intelligible to their contemporaries. When they spoke of a house, they expressed a habituation to which their contemporaries were accustomed, not a contrivance in use among the barbarians. In order to arrive at the precise sense of a passage, we must therefore bear in mind its historical setting, we must consult the testimony of history. The true sense of the Bible cannot be found in an idea or a thought historically untrue. The commentator must therefore be well acquainted with sacred history and sacred archaeology, in order to know, to certain extent at least, the various customs, laws, habits, natural prejudices, etc. under the influence of which the inspired writers composed their respective books. Otherwise it will be impossible for him to understand the allusions, the metaphors, the language, and the style of the sacred writings. What has been said about the historical-grammatical interpretation of Scripture is synthesized, as it were, in the Encyclical already quoted: "The more our adversaries contend to the contrary, so much the more solicitously we should adhere to the received and approved canon of Scripture. But, by weighing the meanings of words, the connexion of ideas, the parallelism of passages, and the like, we should by all means make use of such illustrations as can be drawn from opposite erudition of an external sort."

(2) Catholic Interpretation.—Since the Church is the one teacher and interpreter of the Bible, her teaching concerning the Sacred Scriptures and their genuine sense must be the supreme guide of the commentator. The inferences which flow from this principle are partly negative, partly positive.

(i) Negative Directions.—The following directions are called negative not because they do not reflect a positive attitude of mind or because they do not lead to positive results, but because they appear to emphasize at first sight the avoidance of certain methods of proceeding which would be legitimate in the exegesis of profane books. They are based on what the Church teaches concerning the sacred character of the Bible.

(a) Avoid Irreverence.—Since the Bible is God’s own book, its study must be begun and prosecuted with a spirit of reverence and prayer. The Fathers insist on this need in many passages. St. Athanasius calls the Scriptures the fountain that quenches our thirst for justice and supplies us with the doctrine of piety (Ep. fest. xxxix; St. Augustine (C. Faust., XIII, xviii) wishes them to be read for a memorial of our faith, for the consolation of our hope, and for an exhortation to charity; Origen (Ep. ad Gregor. Nect. c. iii) considers pious prayer as the most essential means for the understanding of the Divine Scriptures; but he wishes to see humility joined with prayer; St. Jerome (In Mich., I, 30) agrees with St. Augustine (De doctr. christ., III, xxxiv) in regarding prayer as the principal and most necessary aid for the understanding of the Sacred Writings. It might add all these patriarchal writers, if the alleged references were not clear and explicit enough to remove all doubt on the subject.

(b) No Error in Scripture.—Since God is the principal Author of Sacred Scripture, it can contain no error, no self-contradiction, nothing contrary to scientific or historical truth. The Encyclical “Providentissimus Deus” is most explicit in its statement of this prerogative of the Bible: "All the books which the Church receives as sacred and canonical, are written wholly and entirely, with all their parts, at the dictation of God, and so far as it was possible that any error can exist with inspiration, that inspiration not only is essentially incompatible with error, but excludes and rejects it as absolutely and necessarily, as it is impossible that God Himself, the Supreme Truth, can utter that which is not true."

The Fathers agree with this teaching almost unanimously: we may refer the reader to Sts. Jerome (In Nah., I, iv), St. Irenaeus (C. her., II, xxiii), Clement of Alexandria (Stronn., VII, xvi), St. Augustine (“C. Faust.,” II, ii; cf. "In Ps. xxviii," serm. xxxi, 5: Ad Hier.,” ep. lxxii, 2), Ad Oros. c. Prisc., xi), St. Gregory the Great (Pref. in Job, n. 2). The great African Doctor suggests a simple and radical remedy against apparent errors in the Bible: "Either my codex is wrong, or the translator has blundered, or I do not understand."

But inerrancy is not the prerogative of everything that happens to be found in the Bible; it is necessary for us, to what the inspired writers state as their own, unless they quote the words of a speaker who is infallible in his utterances, the words of an Apostle, e. g., or of a Divinely authorized speaker, whether angel or man (cf. Luke, i, 42; ii, 25; Nuch., vii, 21), or again words regarded as historical. But even those supposed to be historical will be found to be subject to the same kind of a test as a concrete, historical. In the history of the Bible, the test is the historical authorship of the Sacred Scripture (cf. I Cor. iii, 19; Gal. iv, 30) or by the Church (e. g., the Magnificent). Biblical words that do not fall under any of these classes carry merely the authority of the speaker, the weight of which must be studied from other sources. Here is the place to take notice of a decision issued by the Biblical Commission on 13 Feb., 1905, according to which certain Scriptural statements may be treated as quotations, though they appear on the surface to be the utterances of the inspired writer. But this can be done only when there is certain and independent proof that the inspired writer really quotes the words of another without intending to make them his own. Recent writers call such passages "tacit" or "implicit" citations.

The inerrancy of Scripture does not allow us to admit contradictions in its statements. This is understood of the genuine or primitive text of the Bible. Contradictions, we must say, are not encountered to meet contradictions in details of minor importance; in weightier matters such discrepancies have been avoided even in our present text. Discrepancies which may appear to obtain in matters of faith or morals should put the commentator on his guard that the same Biblical expressions are not everywhere taken in the same sense, that various passages may differ from each other as the complete statement of a doctrine differs from its incomplete expression, as a clear presentation differs from its obscure delineation. Thus "works" has one meaning in James, ii, 24, and in those "brothers" denouncing the relationship in Matt., xii, 40, quite a different kind in most other passages; John, xiv, 28, and x, 30, Acts, vii, 12, and Matt., xxviii, 19, are respectively opposed to each other as a clear statement is opposed to an obscure one, as an explicit one to a mere implication. In apparent Biblical discrepancies found in historical passages, the commentator must distinguish between statements made by the inspired writer and those merely quoted by him (cf. I Kings, xxxii, 9, and II Kings, i, 6 sqq.), between a double account of the same fact and the narrative of two similar incidents, between chronologies which begin with different starting-points, finally between a compendium and a detailed report of an event. Lastly, apparent discrepancies which occur in prophetic passages necessitate an investigation, whether the respective texts emanate from the Prophets as Prophets (cf. II Kings, vii, 3, 17),
whether they refer to the same or to similar subjects (the destruction of Jerusalem, e.g., and the end of the world), whether they consider their subject from the same point of view (e.g., the suffering and the glorious Messias), whether they use proper or figurative language.

The Prophet Nathan, in his private capacity, encourages David to build the Temple (II Kings, vii, 3), but as Prophet he foretells that Solomon will build the house of God (ibid., 13).

The inerrancy of Scripture excludes also any contradiction between the Bible and the certain tenets of science. It cannot be supposed that the inspired writers were not familiar with all the works of the greatest thinkers of their time, and with the opinions of scientists assumed to-day and rejected to-morrow; but the commentator will be required to harmonize the teaching of the Bible with the scientific results which rest on solid proof. This rule is clearly laid down by the Encyclical in the words of St. Augustine: "Whatever they can really demonstrate to be true of physical nature, we must show to be capable of reconciliation with our Scriptures, and whatever they assert in their treatises which is contrary to these Scriptures of ours, that is to say, in Catholic faith, we must either prove as well as we can to be entirely false, or at all events without the smallest hesitation, believe to be so" (De Gen. ad litt., I, xxvi, xlii). But the commentator must also be careful "not to make rash assertions, or to assert what is not known as known" (St. Aug., in Gen. op. imperf., ix, 30). The Encyclical appeals here again to the words of the great African Doctor, St. Augustine: "The Holy Ghost who spoke by them [the inspired writers], did not intend to teach men these things [i.e., the essential nature of the things of the visible universe], things in no way profitable unto salvation. The pontiff continues: "Hence they . . . described and depicted with things in more or less figures, or in terms which were commonly used at the time, and which in many instances are in daily use at this day, even by the most eminent men of science. Ordinary speech primarily and properly describes what comes under the senses; and somewhat in the same way, the sacred writers—as the Angelic Doctor reminds us (Summa, I, Q. Ixx, a. 1, ad 3°)—‘went by what visibly appeared’, or put down what God, speaking to men, signified in a way men could understand and were accustomed to.’ In Gen., i, 16, e.g., the sun and the moon are called two great lights; in Job, xxi, 12, the sun is commanded to stand still; in Ecl., i, 5, the sun returns to its place; in Job, xxvi, 11, the firmament appears solid and brazen; in other passages the heavens are upheld by columns, and God rides on the clouds of heaven.

Finally, the commentator must be prepared to deal with the seeming discrepancies between Biblical and profane history. The considerations to be kept in mind here are similar to those laid down in the preceding paragraph. First, not all statements found in profane sources can be regarded a priori as Gospel truth; some of these statements are entirely without fabulous or figurative language, or in terms which were commonly used at the time, and which in many instances are in daily use at this day, even by the most eminent men of science. Ordinary speech primarily and properly describes what comes under the senses; and somewhat in the same way, the sacred writers—as the Angelic Doctor reminds us (Summa, I, Q. Ixx, a. 1, ad 3°)—‘went by what visibly appeared’, or put down what God, speaking to men, signified in a way men could understand and were accustomed to.’ In Gen., i, 16, e.g., the sun and the moon are called two great lights; in Job, xxi, 12, the sun is commanded to stand still; in Ecl., i, 5, the sun returns to its place; in Job, xxvi, 11, the firmament appears solid and brazen; in other passages the heavens are upheld by columns, and God rides on the clouds of heaven.
Exegesis

Encyclical "Providentissimus Deus", repeats the principles concerning the authority of the Fathers laid down by the Vatican and Tridentine Councils: "The Holy Fathers, to whom, after the Apostles, the Church owes its growth—who have planted, watered, built, or gathered, as the case may be—(1) the Holy Fathers, we say, are of supreme authority whenever they all interpret in one and the same manner any text of the Bible, as pertaining to the doctrine of faith or morals; for their unanimity clearly evinces that such interpretation has come down from the Apostles as a matter of Catholic faith." These conditions are, therefore, required in order that the patristic authority may be absolutely decisive: first, they must interpret texts referring to matters of faith or morals; secondly, they must speak as witnesses of Catholic tradition, not merely as private theologians; thirdly, there must be a moral unanimity in their interpretation. This unanimity is not destroyed by the silence of some of the foremost Fathers, and is sufficiently guaranteed by the consentient voice of the principal patristic writers living at any critical period, or by the agreement of commentators living at various times. Such unanimity is destroyed if some of the Fathers openly deny the correctness of the interpretation given by the others, or if they explain the passage in such a way as to render impossible the explanation given by others. But the Encyclical warns us to treat the opinion of the Fathers with reverence, even if it be adverse: "The opinion of the Fathers is always considered with great respect by the Church, not as a rule which must be rigorously adhered to, any more than the Holy Scriptures. In the judgment of the Church, it is justly elsewhere called the holy pontiff, "is also of very great weight when they treat of these matters in their capacity of doctors, unofficially; not only because they excel in their knowledge of revealed doctrine and in their acquaintance with many things which are useful in understanding the Holy Book, but because they are men of eminent sanctity and of ardent zeal for the truth, on whom God has bestowed a more ample measure of his light."

(c) The Analogy of Faith.—Here again the Encyclical "Providentissimus Deus" is our guide: "In the other passages it reads, "the analogy of faith should be followed, and Catholic doctrine, as authoritative proposed by the Church, should be held as the supreme law; for, seeing that the same God is the author both of the Sacred Books and of the doctrine committed to the Church, it is clearly impossible that any teaching can be correct which has been decreed by those who shall in any respect be at variance with the latter." This principle has a double influence on the interpretation of Scripture, a negative and a positive influence. First, the commentator cannot admit in Scripture a statement contrary to the teaching of the Church; on the other hand, the agreement of an explanation with the doctrine of the Church does not prove its correctness, since more than one explanation may agree with the ecclesiastical teaching. Secondly, the Catholic interpreter must explain the obscure and partial teaching of the Scriptures by the clear and complete teaching of the Church. Thus, for instance: the glossa ordinaria, a thorough exposition of the glossa interlinearis by Anselm of Laon. (4) The Dissertations.—Origin, Eusebius, and St. Jerome were asked by their contemporaries concerning certain difficult texts of Scripture; a similar need of special elucidations of particular passages has been felt by the faithful of all ages. The answers to such questions we may call dissertations or treatises. It is understood that only really important texts ought to be made the subject of such scholarly explanations. In order to satisfy the inquisitive reader, the essayist should examine the text critically; he should be versed in the various interpretations given by the commentators and weigh them in the light of the principles of hermeneutics; finally, he should give the true solution of the difficulty, prove it by solid arguments, and defend it against the principal exceptions. (5) The Commentary.—The commentary is a continu-
EXEGESIS

uous, full, learned, well-reasoned, and complete explanation, touching upon not merely the more difficult passages, but everything that stands in need of elucidation. Hence the commentator must discuss all the variants, state and prove the genuine sense of the text. He explains, add all the necessary personal, geographical, historical, ethirical information, and indicate the sources whence it is drawn, harmonize the single sentences with each other and with the scope of the entire book, consider its apparent contradictions, and explain the sense in which its quotations from the Old Testament must be understood. With a view of securing an orderly exposition, the author should arrange the various historic-critical studies belonging to the whole book; he should divide and subdivide the book into its principal and subordinate parts, clearly stating the special subject of each; he should, finally, arrange the various opinions concerning disputed questions in a neatly distributed list, so as to lighten the work of the reader. What has been said sufficiently shows the qualities which a well-written commentary ought to possess; it must be faithful in presenting the genuine sense of Scripture; it must be complete, and brief; and it ought to show the private work of the commentator by the light it throws on the more complicated questions. The commentaries which consist of mere lists of the patristic views on the successive texts of Scripture are called catene (q. v.). Perhaps the homily may be added to the foregoing methods of Biblical exposition. It is written in a popular way, and, so is of a practical tendency. It is not concerned with the subtle and more difficult questions of Scripture, but explains the words of a Biblical section in the order in which they occur. A more elevated kind of homily seizes the fundamental idea of a Scriptural section, and to the light of it throws the rest in relation to it. The Church has always encouraged such homiletic discourses, and the Fathers have left a great number of them in their writings.

IV. History of Exegesis.—The history of exegesis shows its first beginnings, its growth, its decay, and its restoration. It points out the methods which may be safely recommended, and warns against those which rather corrupt than explain the Sacred Scriptures. In general, we may distinguish between Jewish and Christian exegesis.

Jewish Exegesis.—The Jewish interpretation of the Scriptures began almost at the time of Moses, as may be inferred from traces found both in the more recent canonical and the apocryphal books. But in their method of interpretation the Palestinian Jews differed from the Hellenistic.

(i) Palestinian Exegesis.—All Jewish interpreters agree in admitting a double sense of Scripture, a literal and a mystical, though we must not understand these terms in their strictly technical sense.

(a) The literal exposition is mainly represented by the so-called Chaldee paraphrases or Targumim, which came into use at the time of the Captivity, because few of the returning exiles understood the reading of the Sacred Books in their original Hebrew. The first place among these paraphrases must be given to the Targum Onkelos, which appears to have been in use as early as the first century after Christ, though it has been reduced its present form only about the first century. It explains the Pentateuch, adhering in its historical and legal parts to a Hebrew text which is, at times, nearer to the original of the Septuagint than the Massoretic, but straying in the prohetic and poetical portions so far from the original as to leave hardly recognizable.

(b) The Palestinian Exegesis is the Targum Pseudo-Jonathan, or the Jerusalem Targum. Written after the seventh century of our era, it is valueless both from a critical and an exegetical point of view, since its explanations are wholly arbitrary.—The Targum Jonathan, or the paraphrase of the Prophets, began to be written in the first century, at Jerusalem; but it owes its present form to the Jerusalem rabbi of the fourth century. The historical books are a fairly faithful translation from the original text; in the poetical portions and the later Prophets, the paraphrase often presents fiction rather than truth.—The paraphrase of the Haggadot deals with the Book of Job, the Psalms, the Canticle of Canticles, Ruth, the Lamentations, Ecclesiastes, Esther, and Paralipomena. It was not written before the seventh century, and is so replete with rabbinic fiction that it hardly deserves the notice of the serious interpreter. The notes on (Cant., Ruth, Lam., Eccles., and Esth.) rest on public tradition: those on the other Hagiographa express the opinions of one or more private teachers; the paraphrase of Par. is the most recent and the least reliable.

(b) The method of arguing employed in the First Gospel and the Epistle to the Hebrews shows that the Jews before the commence the studied a mystical sense of Scripture; the same may be inferred from the letter of Pseudo-Aristaeas and the fragment of Aristobulus. The Gospel narrative, e.g., Matt., xxiii, 16 sqq., testifies that the Pharisees endeavoured to derive scriptural traditions from the Law by way of the most extraordinary contradictions. The mystic interpretation of Scripture practised by the Jewish scholars was not followed by the time of Christ, may be reduced to the following systems.

(a) The Talmudists ascribed to every text several thousand legitimate meanings belonging either to the Halakah or the Haggadah. The Halakah contained the legal inferences derived from the Mosaic Law, all of which the Talmudists referred back to Moses himself; the Haggadah was the collection of all the material gathered by the Talmudists from history, the primitive, the law, and other extraneous sources, not excluding the most fictitious ones. In their commentaries, these writers distinguished a twofold sense, the proper, or primitive, and the derivative. The former was subdivided into the plain and the recondite sense; the latter, into logical deductions, and inferences drawn on the way in which the Hebrew words were written or on association of ideas. As to the hemicuval rules followed by the Talmudists, they were reduced to seven by Hillel, to thirteen by Ismael, and to thirty-two by R. Jose of Galilee. In substance, the rules of the Talmudists did not differ from those prevalent in our day. The interpreter is to be guided by the relation of the genus to the species, of what is clear to what is obscure, of verbal and real parallelisms to their respective counterparts, of the example to the exemplified, of what is logically coherent to what appears to be contradictory, of the scope of the writer to his literary production. The commentaries written according to these principles are called Midrashim (plural of Midrash); the following must be mentioned: Mekhila (measure, rule, law) explains Ex., xii, 1-26, 30; xxxi, 12-17; xxvi, 1-4, and is variously assigned to the second or third century, or even to more recent times; it gives the Halakah of the ceremonial rites and laws, but contains also material belonging to the Haggadah.—Sipra explains the Book of Leviticus; Sipri, the Books of Numbers and Deuteronomy; Pesiqta, the Sabbath sections.—Rabboth (plural of Rabba) is a series of Midrashim explaining the single books of the Pentateuch and the five Megilloth or the five Hagiographa which were read in the synagogues: the allegorical, anagogical, and moral sense is preferred to the literal, and the fables and sayings of the rabbi are highly valued.—Tanchuma is the first continuous commentary on the Pentateuch; it contains some valuable traditions, especially of Palestinian origin.—Yalqut Simoni contains annotations on all the books of the Old Testament.
ists, as the Sadducees were related to the Pharisees. They rejected the Talmudic traditions, just as the Sadducees refused to acknowledge the authority of the Pharisaic teaching (cf. Joseph., Ant., XVIII, x, 6). The Pharisees derived their origin from Anan, born about A. D. 750; he founded this movement several generations after the Israelites had established the kingdom. From Bagdad, the place of its birth, the sect soon spread into Palestine and especially into the Crimea, so that about A. D. 750 it occasioned what is practically a schism among the Jews. The Pharisees rejected all tradition, and admitted only the Mosaic Law. By means of Israel's thirteen hermeneutical rules, they established the literal sense of Scripture, and this they supplemented by means of the syllogism and the consensus of the Synagogue. Owing to their rejection of authentic interpretation and their claim of private judgment, they have been called by some writers "Jewish Protestants".

(ii) Hellenistic Exegesis.—Generally speaking, the Alexandrian Jews were favourable to the allegorical explanation of Scripture, thus endeavouring to harmonize the inspired records with the principles of Greek philosophy. Eusebius has celebrated "Guide of the Perplexed" of this Hellenistic exegesis in the fragments of Aristobulus (Hist. Eccles., VII, xxxii). Prepar. evang., VIII, x) and in the letter of Pseudo-Aristas (Prepar. evang., VIII, ix), both of whom wrote in the second century B. C. Philo attests that the Essenes adhered to these allegorical principles (d. after 1508), (Hist. Just., i, 23); but Philo (died about 1135) himself is the principal representative of this manner of interpretation. According to Philo, Abraham symbolizes virtue acquired by doctrine; Isaac, inborn virtue; Jacob, virtue acquired by practice and meditation. Egypt denotes the better, China, the worse; the dove, Divine wisdom, etc. (De Abraham, ii).

The Cabbalists exceeded the preceding interpreters in their allegorical explanation of Scripture. Traces of their system are found in the last pre-Christian centuries, but its full development did not take place till the end of the first millennium B. C. In accordance with their name, which is derived from a word meaning "to receive", the Cabbalists claimed to possess a secret doctrine received by way of tradition from Moses, to whom it had been revealed on Mount Sinai. They maintained that all earthly things had their heavenly prototypes; they believed the literal sense of Scripture included the allegorical sense, as the body includes the soul, though only the initiated could reach this veiled meaning. Three methods helped to attain it: Gematria takes the numerical value of all the letters which make up a word or an expression and derives the hidden meaning from the resultant number; Notaricon forms new entire words out of the single letters of a word, or it forms a word out of the initial letters of the several words of a phrase; Temura consists in the transposition of the letters which make up a word, or in the systematic substitution of other letters. Thus they transpose the consonants of mal'akhi (my angel; Ex. xxiii, 23) into Mikha'el (Michael). There is a twofold system of substitution: the first, Athbash, substitutes the last letter of the alphabet for the first, the second last for the second, etc.; the second system substitutes the letters of the second half of the alphabet for the corresponding letters of the first half. The Cabbalistic doctrine has been gathered in two principal works, one of which is called "Yiqra'ah", the other "Zohar".

We may add the names of the more prominent Jewish commentators: Sadaqa Gâon (b. 892; d. 912), in the seventh century, explained the Old Testament into Arabic and wrote commentaries on the same. Moses ben Samuel ibn Chiqilla, of Cordova, explained the whole of the Old Testament in Arabic, between A. D. 1050 and 1090; only fragments of his work remain. Rabbi Solomon ben Isaac, known also under the names Rashi and Yarchi (b. about 1040, at Troyes; d. 1015), explained the whole of the Old Testament, except Par. and Esd., according to its literal sense, though he did not neglect the allegorical; he shows an anti-Christian tendency.—Rabbi Abraham ibn Ezra (b. 1092; d. 1167 on the Island of Rhodes). Among his many other works he left an incomplete commentary on the Pentateuch and other parts of the Old Testament; he renders the literal sense faithfully without excluding the allegorical, e. g. in Cant.—Rabbi David Kimhi (b. 1190 at Narbonne; d. 1230), explained nearly all the books of the Old Testament in the literal sense, without excluding the spiritual; his anti-Christian feeling shows itself in his treatment of the Mesbiahic prophecies.—Rabbi Moses ben Maimon, commonly called Maimonides, or Rambam (b. 1135 at Cordova, Spain; d. 1204 in Egypt), became a convert to Mohammedanism in order to escape persecution, and fled to Egypt, where he lived as a Jew, and where, for the guidance of those who could not harmonize their philosophical principles with the teaching of Sacred Scripture, he wrote his great work "Guide of the Perplexed", and it is in this work that he presents some of the Biblical stories as mere literary expressions of certain ideas.—Rabbi Isaac Abravanel (d. 1508), explained the Pentateuch, the prophethical books, and Daniel, adding often irrelevant matter and arguments against Christian revelation.—Rabbi Elias of Medina (The St. of Troph.), is known as one of the best Jewish grammarians, and as the author of the work "Tradition of Tradition", in which he gives the history of Masoretic criticism.—Among the Cabbalists we must mention: Rabbi Jacob ben Ruben (twelfth century), who wrote brief scholia on all the books of Scripture; Rabbi Aaron ben Joseph (d. 1394), author of a literal commentary on the Pentateuch, the earlier Prophets, Isaiah, the Psalms, and the Book of Job; Rabbi Aaron ben Elia (fourteenth century), who explained the Pentateuch.—Among the Cabbalists, Rabbi Moses Naehamidas, also known as Ram- bian, d. about 1250, deserves mention, and his "Exegetes" of the Pentateuch, which is several times quoted by Paul of Burgos.—The principal Jewish commentaries have been reprinted in the so-called Rabbinic Bibles which appeared at Venice, 1517, Venice, 1525, 1548, 1568, 1617; Basle, 1618; Amster- dam, 1724.

(2) Christian Exegesis.—For the sake of clearness we may distinguish three great periods in Christian exegesis: the first ends about A. D. 604; the second brings us up to the Council of Trent; the third embraces the time after the Council of Trent.

(a) The Patristic Period.—The patristic period embraces three distinct classes of exegetes, the Apostolic and apologetical writers, the Greek Fathers, the Latin Fathers. The amount of exegetical literature produced by these three classes varies greatly; but its character is so distinctively proper to each of the three that we can hardly consider them under the same heading.

The Apostolic Fathers and Apologists. The early Christians made use of the Scriptures in their religious meetings as the Jews employed them in the synagogues, adding however the writings of the New Testament more or less completely to those of the Old. The Apostolic Fathers did not write any professional commentaries; their use of Scripture was incidental and casual rather than technical; but their citations and allusions show unmistakably their acceptance of some of the New Testament writings. Neither do we know of any among the apostolic writings the whole of the New Testament. The only commentary of any professional treatises on Sacred Scripture. St. Justin and St. Irenaeus are noted for their able defence of Christianity, and their arguments are often based on texts of Scripture. St. Hippolytus appears to have been the first Christian theologian who at-
tempted an explanation of the whole of Scripture; his method we learn from the remaining fragments of his writings, especially of his commentary on Daniel. It may be said in general that these earliest Christian writers admitted both the literal and the allegorical sense of Scripture. The latter sense appears to have been favoured by St. Clement of Rome, Barnabas, St. Justin, St. Irenaeus, while the literal seems to prevail in the writings of St. Hippolytus, Tertullian, the Clementine Recognitions, and among the Ghosties.

(b) The Greek Fathers.—The Enchiridion of Origen is addressed mainly to the Greek Fathers when it says: "When there arose, in various sees, catechetical and theological schools, of which the most celebrated were those of Alexandria and of Antioch, there was little taught in those schools but what was contained in the reading, the interpretation, and the defence of the Divine written word. From them came forth numbers of Fathers and writers whose laborious studies and admirable writings have justly merited for the three following centuries the appellation of the golden age of Biblical exegesis."

(a) The School of Alexandria.—Tradition loves to trace to the second half of the third century the Evangelist St. Mark. Be that as it may, towards the end of the second century we find St. Pantaenus president of the school; none of his writings are extant, but Eusebius (Hist. Eccl., V, x) and St. Jerome (De vir. ille., c. xxxvii) testify that he explained Sacred Scripture to Alexandria, and offers him among those who did not write any book (Strömer, I, i); he died before 200. His successor was Clement of Alexandria, who had first been his disciple, and after 190 his colleague. Of his writings are extant "Cohortatio ad Gentiles" ("Pedagogus"), and "Stromata"; also the Liber de Translatio of part of his works (Migne, P. G., IX, 729–740). Clement was followed by Origen (b. 183; d. 254), the principal glory of the whole school. Among his works, the greater part of which is lost, his "Hexapla" and his threefold explanation of Scripture, by way of scholia, homilies, and commentaries, deserve special notice. It was Origen, too, who fully developed the hermeneutical principles which distinguish the Alexandrian School, though they are not applied in their entirety by any other Father. He applied Plato's distinction of body, soul, and spirit to the Scriptures, admitting in them a literal, a spiritual, and a transcendent, or spiritual sense. Not only that the whole of Scripture has this triple sense. In some parts the literal sense may be neglected, in others the allegorical may be lacking, while in others again the three senses may be found. Origen believes that the apparent discrepancies of the Evangelists can be explained only by the means of the spiritual sense, that the whole ceremonial and ritual law must be explained mystically, and that all the prophetic utterances about Judea, Jerusalem, Israel, etc., are to be referred to the Kingdom of Heaven and its citizens, to the good and bad angels, etc. Among the eminent writers of the Alexandrian School must be classed Julius Africanus (c. 215), St. Dionysius the Great (d. 265), St. Gregory Thaumaturgus (d. 270), Eusebius of Cæsarea (d. 340), St. Athanasius (d. 373), Didymus of Alexandria (d. 397), St. Ephraim (d. 403), St. Cyril of Alexandria (d. 444), and St. John Cappadocian (d. 480). St. Basil the Great (d. 379), St. Gregory Nazianzen (d. 389), and St. Gregory of Nyssa (d. 394). The last three, however, have many points in common with the School of Antioch.

(b) The School of Antioch.—The Fathers of Antioch adhere to the hermeneutical principles which insist more on the so-called grammatico-historical sense of the Sacred Books than on their moral and allegorical meaning. It is true that Theodore of Mopsuestia urged the literal sense to the detriment of the typical, believing that the New Testament applies some of the prophecies to the Messias only by way of accommoda-

(ii) Second Period of Exegesis, a. d. 604–1546.—We consider the following nine centuries as one period of exegesis, not on account of their uniform productiveness or barrenness in the field of Biblical study, nor on account of their uniform tendency, nor on account of their characteristic dependence on the work of the Fathers. Whether they synthesized or amplified, whether they synthesized or derived new conclusions from old premises, they always started from the patristic premises as their basis of operation. Though during this period the labours of the Greek writers can in no way compare with those of the Latin, still it will be found convenient to consider them apart.

(a) The Greek Writers.—The Greek writers who lived between the sixth and the thirteenth centuries composed partly commentaries, partly compilations. The Bishop of Cæsarea, Andreas and Athanasius, who are variously assigned to the fifth and sixth, or to the eighth and ninth centuries, explained the Apocalypse; Procopius of Gaza (324) wrote on the Oecateuch, Is. and Prov.; Hesychius of Jerusalem wrote probably on the Johannine Epistles; Photius (891), and especially St. Gregory Thaumaturgus (d. 910), and Euthymius (d. 1118) were...
adherents of the Greek Schism, but their exegetical works deserve attention. The above-named compilations are technically called catena. They furnish continuous explanations of various books of Scripture in such a way that they give after each text the various patristic passages either full or by way of synopsis, usually adding the name of the particular Father whom they have copied. Several of these catena have been printed, such as Nicephorus, on the Octateuch (Leipzig, 1775); B. Corderius, on the Jss. (Antwerp, 1643-1616); A. Schottius, on Prov. (Bern, 1632); Angelo Mai, on Dan. (1638), Cramer, on the New Testament (Oxford, 1638-1640).

(b) The Latin Writers.—The Latin writers of this epoch may be divided into two classes: the Pre-Scholastic and the Scholastic. The two are not of equal importance, but they are too different to be treated under the same heading.

(a) The Pre-Scholastic Period.—Among the many writers of this age who were instrumental in spreading the Biblical expositions of the Fathers, the following are deserving of notice: St. Isidore of Seville (d. 636), the Venerable Bede (d. 735), Alcuin (d. 804), Haymo of Halberstadt (d. 855), Maurus (d. 849), Walafrid Strabo (d. 849), who compiled the glossa ordinaria, Anselm of Laon (d. 1117), author of the glossa interlinearis, Rupert of Deutz (d. 1153), Hugh of St. Victor (d. 1141), Peter Abelard (d. 1142), and St. Bernard (d. 1153). The particular writings of each of these great men will be found under their respective names.

(b) The Scholastics.—Without drawing a mathematical line of distinction between the writers of this period, we may say that the works which appeared in its beginning are remarkable for their logical and theological methods; the subsequent ones showed a more philological erudition; and the final ones began to offer material for textual criticism. The first three groups of these writings coincide with the so-called golden age of scholastic theology which prevailed about the thirteenth century. Its principal representatives are well known that we need only mention their names. Peter Lombard hereby heads the list (d. 1164), for he appears to be the first who fully introduced into his exegetical work the scholastic divisions, definitions, and method of argumentation. He was followed by Stephen Langton (d. 1228), archbishop of Canterbury, in his De principiis scholastici in our Bible; Card. Hugh of Saint-Cheir (d. 1260), author of the so-called "Dominican Correctory," and of the first Biblical concordance; Blessed Alberic Magnus (d. 1280); St. Thomas Aquinas (d. 1274); St. Raymondo Martini (d. 1260), who wrote the polemical work known as "Pugio Fidelis" against the Moors and Jews; a number of other names might be added, but they are of less importance. In 1311 Pope Clement V ordained, in the Council of Vienne, that chairs of the Oriental languages were to be erected in the principal universities, so that the Jews and Mohammedans might be refuted from their own sources. The philological results of this enactment may be seen in the celebrated "Postilla" of Nicholas of Lyra (d. 1340), a work which received notable additions by Paul of Burgos (d. 1455). Alphonso Tosta (d. 1494), Jordan Abulenos (d. 1419), returned to the more scholastic method of interpretation; Laurentius Valla (d. 1557) applied the results of his Greek studies to the explanation of the New Testament, though he is usually opposed to the Latin Vulgate. Not to insist on the less illustrious rogue of this period, we may pass on to those who applied to Scripture not merely their philological erudition, but also their acumen for textual criticism in its inceptive stage. Ang. Justiani edited an Octapla of the Psalter (Genoa, 1316); Card. Ximenez finished his Complutensian Polyglot (1517); Erasmus published the first edition of his Greek New Testament (1517); Card. Cajetan (d. 1535) attempted an explanation of the Scriptures according to the original texts; Santes Pagninus (d. 1541) translated the Old and the New Testament anew from their original texts; a number of other scholars worked in the same direction publishing either new translations of Scripture, or ancient commentaries in which new light was shed on one or more books of the Sacred Scriptures.

(iii) Third Period of Exegesis.—A few decades before the Council of Trent, Protestantism began to make its inroads into various parts of the Church, and its results were felt not only in the field of dogmatic theology, but also in Biblical literature. We shall therefore, have to distinguish after this between Catholic and Protestant exegesis.

(a) Catholic Exegeses.—Catholic exegeses subsequent to the Council of Trent may be divided into three stages: the first may be regarded as the terminus of the Scholastic period; the second forms the transition from the old to the new exegeses; and the third comprises the exegetical work of recent times. The first stage begins about the time of the Council of Trent, and ends about 1660; the second reaches to the beginning of the eighteenth century; and the third deals with our own times.

(b) The Golden Age of Catholic Exegesis, 1546-1660.—We have spoken above of the golden age of Christian exegesis, as distinct from the exegesis of the Jews; the following period is by some writers called the golden age of Catholic exegesis, as distinct from the Biblical work done by Protestants. During this period more than 350 Catholic writers were engaged in Biblical study; we can only classify the work done, and indicate some of the principal writers engaged in it. The revised Clementine edition of the Vulgate appeared in 1592; the Antwerp Polyglot, which was a later revision, appeared in 1569-1572; the Paris Polyglot, in the years 1629-1645. The introductory questions were treated by Sixtus Senensis (d. 1569), Christ. Adrichomius (d. 1588), Flaminius Nobilius (d. 1590), Ben. Arias Montanus (d. 1598), Petrus Morinus (d. 1608), Lucas Brugensis (d. 1619), de Tena (d. 1622), Ioannes Morinus (d. 1659), and Franc. Quaresmius (d. 1660).—All or most of the books of the Scripture were interpreted by Sa (d. 1596), Mariana (d. 1624), Tirinus (d. 1636), a La pole (d. 1637), Gordon (d. 1641), Menochius (d. 1659), de la Haye (1661).—Select books of both the Old and the New Testament were explained by Desmolets (d. 1575), Maldonatus (d. 1583), Ribera (d. 1618), Serarius (d. 1609), and Lorinus (d. 1634).—Certain books of the Old Testament were explained by Andreas Musius (d. 1573), Forerius (d. 1581), Pradus (d. 1585), Villalpandus (d. 1608), Gombrardus (d. 1607), Agellius (d. 1608), Pererius (d. 1610), Card. Bellarmine (d. 1621), Sertinians (d. 1628), Malvenda (d. 1628), de Pineda (d. 1637), Bonifreius (d. 1612), de Muis (d. 1644), Gislerius (d. 1646), de Salazar (d. 1646), and Corderius (d. 1655).—Finally, all or part of the books of the New Testament were explained by Desmolets (d. 1585), Card. Taulerius (d. 1596), Estius (d. 1613), de Alcaraz (d. 1613), and Ben. Justiniyiri (d. 1622).

(c) The Transition Period, 1660-1800.—During this period, historical studies were more cultivated than scholastic. It is here that we meet with the father of the historical and critical introduction, Richard Simon (d. 1712). Fransen (d. 1711) adopts a new exegetical method, but there is no return to the historical in the works of Bern. Cotelier (d. 1715), Daniel Huet (d. 1721), and Nat. Alexander (d. 1722). The bibliography of exegesis was treated by Bartoleo (d. 1687), Imbonatus (d. 1694), Dupin (d. 1719), Lelong (d. 1721), and Desmolettes (d. 1760). Old documents belonging to Scriptural studies were edited by
B. de Montfaucon (d. 1741), P. Sabatier (d. 1742),
and Jos. Blanchinus (d. 1764), while Calmet (d. 1757)
and Bossuet (d. 1704) are noted for their exegetical
work. Burek (d. 1710) has recourse to the original
text in order to explain doubtful or obscure readings.
If one compares this period with that which
preceded, one is struck with its poverty in Biblical
scholars; but textual criticism is fairly well
represented by Houbigant (d. 1784) and de Rossi
d. 1831).

(y) Recent Times.—The perturbed state of
the Church at the beginning of the nineteenth century
introduced, however, to the French a number of
ecclesiastical study. After peace had returned,
the study of Sacred Scripture flourished more lustily than
ever. In three respects, the modern commentary
surpasses that of any past age: First, the interpreter
attends in our times not merely to the immediate
context of a phrase or a verse, but to the whole literary
form of the book, and to the purpose for which it was
written; secondly, he is assisted by a most abundant
wealth of historical information practically unknown
in former days; thirdly, the philology of the sacred
tongues has been highly cultivated during the last
century, and its rich results are laid under contribution
by the modern commentator. It would lead us
far too far here to retrace the history of all the
recent excavations and discoveries, the contents of the
various tablets, papyri, and ostraka, the results of
literary criticism, archaeology, and history of religion; it
must suffice to say that the modern commentator can
leave none of these various sources of information un-
noticed in so far as they bear on his special subject of
investigation. It would be invidious to mention only
some names of modern scholars, excluding others;
still, they cannot all be enumerated. We may draw
attention, however, to the French periodicals of
which the most noteworthy are worthy of mention:
Drusius (d. 1616), de Dieu (d. 1642), Grotius
d. 1645), Vitringa (d. 1722), Cocceius (Koch, d. 1669),
and Clericus (d. 1736). Brian Walton (d. 1638) is celebrated for the edition of
the London Polyglot, which easily surpasses all
previous works of the same kind. The "Cursus
(Born, d. 1660; Frankfort, 1696; Amsterdam, 1695),
collected by John and Richard Pearson's, and the
"Synopsis criticorum" (London, 1669; Frankfort,
d. 1799), edited by Matt. Polus, may be regarded as
fairly good summaries of the exegetical work of the
nineteenth century.

(z) After the Rise of Rationalism.—The Arminians,
Socinians, the English Deists, and the French Ency-
clopedists refused to be bound by the "analogy of
faith" as their supreme hermeneutic rule. They
followed the principle of private judgment to its
corensequences. The first to adhere to the
modern Biblical rationalism was Semler (d. 1791), who denied
the Divine character of the Old Testament, and
explained away the New by his "system of accom-
modation," according to which Christ and the Apostles
were conformed to the tradition of the Jews. In order
to repress the true teaching of Christ, we must first eliminate
the Jewish doctrines, which may be learned from the
books of Josephus, Philo, and other Jewish writers.
—Kant (d. 1804) destroyed the small remnant of super-
natural revelation by his system of "authentic inter-
pretation"; we must seek to find through the words of the
Biblical writers said, but what they should have said in
order to remain within the range of the natural
Jewish religion. —But this did violence to the historical
character of the Biblical records; H. E. G. Paulus (d.
d. 1851) apparently does justice to the historicity of the
Bible, but removes from it all miracles by means of his
"nietologico-philosophical" or "psychological" system
of interpretation. He distinguishes between the fact
or the occurrence to which the witnesses testify, and
the judgment of the fact or the particular view which
the witnesses took of the occurrence. In interpreting
the Old Testament, e. g., we have a record of the views of the
Disciples concerning the events in Christ's life. —This
explanation left too much of Christ's history and doc-
trine intact. Hence David F. Strauss (d. 1857) ap-
plicated to the New Testament the system of Biblical
mythicism, which Semler, Eichhorn, Vater, and de
Wette had employed in their explanation of part of
the Old Testament; about thirty years after its first
appearance, Strauss's system was popularized by
E. Renan. A great many Protestant commentators
now began to grant the existence of myths in the
Sacred Scriptures, though they might adhere to the
general outlines of the Jewish and the Gospel history.
The principles which are at least implicitly maintained
by the mythicists, are the following: First, miracles
and prophecies are impossible; secondly, our religious
soules are not really historical; thirdly, the history
of the religion of all nations begins with myths, the Chris-
tian religion not excluded; fourthly, the Messianic
idea of the New Testament was adopted from the Old,
and all the traditional traits of the Messias were attrib-
uted to Jesus of Nazareth by a really myth-forming
process. But as it was hard to explain the growth of
this whole Christian mythology within the narrow
space of forty or fifty years, Ferd. Christ. Baur (d.
d. 1860) reconstructed the origin of the Christian Church,
making it a compromise between judaizing and uni-
versalistic Christians, or between the Petrine and the
Pauline parties. Only Rom., I and II Cor., Gal.
EXEMPTION

authentic; the other books of the New Testament were written during or after the amalgamation of the two parties, which occurred in the second century. The adherents of this opinion form the New Tubingen or the Critical school.—It is true that Baur's theory of the growth of the New Testament has been discredited by the great majority of Protestant commentators who have ranked themselves among the followers of Harnack; but the opinion that the Sacred Books of the New Testament lack historicity in its true sense, is more common than ever.

Of this it is necessary we have to distinguish between the various classes of exegetical works in order to give a true estimate of the value possessed by the numberless recent Protestant contributions to Biblical literature; their philological and historical studies are, as a general rule, of great assistance to the commentaries of the nineteenth century. But, their conclusions are not sound enough to elicit commendation. Some of them adhere so entirely to the principles of the advanced criticism; others belong to the ranks of the conservatists; others again are more concerned with general and philological than theological questions; others, finally, try to do the impossible by combining the conservative with the advanced critical principles.

When we are asked what attitude the Catholic reader ought to maintain with regard to these numerous commentaries, we must remember that Leo XIII, found in the Encyclical Providentissimus Deus: “Though the study of non-Catholics, used with prudence, may sometimes be of use to the Catholic student, he should, nevertheless, bear well in mind—as the Fathers also teach in numerous passages—the sense of Holy Scripture can never be found incorrupt outside of the Church, and cannot be expected to be found in writers who, being without the true faith, only gnaw the bark of the Sacred Scripture, and never attain its pith.”

A. J. MAAS.

EXEMPTION

is the whole or partial release of an ecclesiastical person, corporation, or institution from the authority of the ecclesiastical superior next higher in rank, and the placing of the person or body thus released under the control of the authority next higher to the former superior, or under a still higher one, or under the highest authority of all, the pope. Originally, according to canon law, all the subjects of a diocese, and all diocesan institutions, were under the authority of the bishop. On account of the oppressive manner in which bishops at times treated the monasteries, these were soon taken under the protection of synods, princes, and popes. The papal protection often developed later into exemption from episcopal authority. The first privilege of this kind was given by Pope Honorius I, in 618, to the old Irish monastery of St. Molaise in Upper Bathy. The Law of the Decretalists, and the Papal Bull of Poppino, in 1442. Since the eleventh century, papal activity in the matter of reforms has been a frequent source or occasion of exemptions; in this way the monks became more closely bound to the popes, as against the bishops, many of whom were often inimical to the reformal power. It thus came about that not only individual monasteries, but also entire orders, obtained exemption from the authority of the local ordinary. Moreover, from the reign of Urban II, the broadly general "protection" of the Holy See (libertas Romana), which many monasteries enjoyed, came to be regarded as exemption from the authority of the bishop. From the twelfth century, it may be said the exemption of orders and monasteries became the rule. Exemptions were also granted to cathedral chapters, collegiate chapters, parishes, communities, ecclesiastical institutions, and single individuals. Under these circumstances the jurisdiction of the bishops was frequently crippled (Trent, Sess. XXIV, De ref. c. xi), consequently the bishops complained of such exemptions, while, on the other hand, the parties exempted were wont to accuse the bishops of violating acquired privileges. The Council of Trent sought to correct the abuses by giving the exemptions, in every case, three years of grace; under the ordinary jurisdiction of the bishops, or at least under the bishops as papal delegates. This provision of the council was never fully executed, owing to the frequent opposition of the monasteries. About the beginning of the nineteenth century, however, many monasteries were suppressed by the process known as secularization, in part accepted by the Holy See. In some countries more recent civil legislation does not permit exemption.

Exemption, as a rule, arises when the privilege is granted by competent authority (exemto dari). It can also rest on immemorial use (exemto praescriptivo). Finally exemption can be original (exemto nationi), when the respective church or monastery has always been free and distinct from the later diocesan organization. The claimant of exemption must prove the fact.

Exemption ceases by the complete or partial withdrawal of the privilege by the giver, customary exercise of a contrary usage, or by extinction of the rightful subject of the privilege.

Another kind of exemption applies to bishops, when released from the authority of the metropolitan, either by their own request or as a gracious act on the part of the Apostolic See, under whose direct control they are then placed. However, to prevent injury to the Church, the bishops, thus made independent of their proper metropolitans, are obliged to attend the synods of the province for which they have opted. Bishops who did not connect themselves with a synod in which their exemption was suppressed, by Benedict XIII, to attend the Roman synod of 1725. Exemption also frequently occurs in connexion with the system of military chaplaincies. In Austria, since 1720, the "Feldbischof" (army bishop), nominated by the emperor, is exempt. In Prussia, since 1803, the "Feldpravost" or army provost, is appointed by the pope after nomination by the German emperor. In France military chaplains who serve permanent garrisons remote from a parish church are exempt. In Spain and elsewhere vicar generals, i.e. army vicars-general, are appointed.

As applied to monasteries and churches, exemption is known as passiva or activa. In the former case the jurisdiction of the monastic or ecclesiastical prelate is confined to the ecclesiastics and layly belonging to his monastery or church. On the other hand, prelates
having “active” exemption may exercise a more extensive jurisdiction. They are (1) those who have certain episcopal rights over a clearly defined territory; and, are known, canonically, as praevati nullius i.e., dioeceses cuius território separato; (2) those who have episcopal jurisdiction over a definite territory entirely distinct from the diocese, and known as praevati nullius cuius territorio separato. The latter are praevati nullius in the proper sense; such, e. g. are the abbots of Monte Cassino, in Italy, and of St. Moritz, and Einsiedeln, in Switzerland. Prelates actively exempted have almost the same privileges and powers as a bishop. They may elect and vote in a general council, make laws within their proper territory, exercise canonical jurisdiction in matrimonial, disciplinary, and criminal matters. They may also grant faculties to hear confessions, reserve to themselves the right of absolving from certain sins, inflect ecclesiastical punishments and censures, grant faculties for preaching, make visits within their jurisdiction, found an ecclesiastical seminary for priests, and appoint a vicar-general. Correspondingly, such a prelate must reside in his district, offer the Holy Sacrament for the people, every Sunday and feast day, or at stated times to visit the Apostolic Visitor or the Apostolic Administrator of the Apostolic Prefecture (visitationis a pontificii a postulorum), and attend the synod of the province, for which option has been declared. He is not, however, obliged to attend the diocesan synod. As a rule, such prelates are not consecrated bishops. They must consequently apply to some bishop, given a known chancery for confirmation of their subjects, and for the consecration of the holy oils; for the ordination of their subjects, however, they must apply to the nearest bishop. When such praevati nullius are also regular abbots they may confer on their subjects the ecclesiastical tonsure, and ordain to the lower orders, or to this effect make dispensations to their subjects (Conc. Trid. Sess. VI, De ref. ch. iii; Sess. XXV, De regul. ch. xiv). Besides the papal confirmation, the consent of the bishop is also necessary for the founding of a monastery (Conc. Trid. Sess. XXV, De regul. ch. iii). The bishop has the right to bless an abbott confirmed by the pope (Conc. Trid. Sess. XXV, De regul. ch. vi). Monasteries of men are subject to episcopal visitation only in respect of parochial work (cura animarum) carried on by them outside of the monasteries (Conc. Trid. Sess. XXV, De regul. ch. xi). The bishop has the right to confer the order on regulars, and to use the pontificalia in their churches. When the regulars have no special privilege the diocesan bishop consecrates their churches; and they must obtain episcopal permission for processes outside the immediate vicinity of such churches. They must also ask the episcopal bishop before they can preach (coram episcopo), and the churches of the order, while, in order to preach in any other than their own churches, canonical authorization (missio canonica) must be obtained from the bishop (Conc. Trid. Sess. V, De ref. ch. ii). To hear the confessions of the laity, and to grant absolution in cases reserved to the bishop, regulars must receive episcopal permission (Conc. Trid. Sess. XXIII, De ref. ch. xv). The writings and books of regulars must be submitted, before publication, to the diocesan censor for the place of issue (Leo XIII, “Officiorum ac numerorum”, 25 January, 1897, no 36). It is also obligatory on members of orders, to observe the resignations of the bishop respecting the Church feast days, church services, and processions (Conc. Trid. Sess. XXV, De regul. ch. xii, and ch. xiii).

The rights of the bishop in respect to exempt orders of women are still more extensive. The bishop, or his representative (commissarius), presides at the election of abbesses, processions, or other superiors (Conc. Trid. Sess. XXV, De regul. ch. vii). The right to visit canonically religious houses of women belongs to the bishop; he is charged in particular, with the entire superintendence of the observance of the clausura or cloister (Conc. Trid. Sess. XXV, De regul. ch. viii). The bishop appoints the confessors, ordinary and extraordinary; for religious houses of women; in cases where such an appointment belongs to some one else the bishop must, at least, give his approbation (Conc. Trid. Sess. XXV, De regul. ch. x). It is the bishop who examines into, either personally, or by representative, the voluntary character of the end, therefore, suitable for promulgation. Modern statesmen draw a distinction between the Exequatur and the Regimen Placit. The latter, according to them, is given to episcopal acts or acts of any other ecclesiastical superior belonging to the nation for which they are approved; while the former is connected to the bispontes of foreign power, that is, to papal Constitutions; the pope, as head of the whole Church, being formally considered as an authority not belonging to any particular country. In both cases, however, state authorities have the power of examining church laws and giving permission for their promulgation, by which permission ecclesiastical decrees acquire legal value and binding force.

As to the origin of this supposed right of the State over the Church, it is now beyond doubt, contrary to the assertions of Gallicans and Jansenists, that no trace of it can be found in the early centuries of the Church, or even as late as the fourteenth century. It is true that during all that period of time general councils, like those of Nicaea and Ephesus, requisitioned the sanction of State authorities for ecclesiastical laws; it was not, however, juridical, but only by papal force that was exercised, as it did not always involve the promulgation of decrees, in order to enforce their execution by the secular arm. Moreover, had such a power in the State been at that time known, rulers of nations who were sometimes anxious to prevent the promulgation and execution of papal Constitutions in their domains would have readily appealed to it, instead of resorting to more difficult and troublesome means, in order to impede in every possible way papal letters from ever being introduced into their dominions, e. g. in the conflicts of Philip the Fair of France with Boniface VIII, and of Henry II of England with Alexander.
III. The Regnum Placentia really dates from the great Western Schism, which lasted from the pontificate of Urban VI to the Council of Constance and the election of Martin V (1378-1417). In order to guard against spurious papal letters issued by antipopes during the so-called Western Schism, and to prevent ecclesiastical superiors the faculty of examining papal Constitutions and ascertaining their authenticity before promulgation and execution. Civil authorities felt bound to adopt the same precautionary measure, though they did not attribute such a power to themselves as a right at the outset of their office: and frequently its use was continued when, after the access of Martin V, he condemned the Regnum Placentia in his Constitution “Quod antidota” (1148). In the fifteenth century, however, it was revived in Portugal by King John II and claimed by him as a right inherent in the crown. In the sixteenth century the Viceroy of Naples, the Duke of Alcalá, made it obligatory by law, and in the seventeenth century it was introduced into France in order to preserve the so-called Gallican Liberties, and afterwards into Spain, Belgium, Sicily, Naples, and other countries.

In theory this supposed right of the State was first proclaimed and defended as a true doctrine by Luther, Pasquier Quesnel, and other heretics who denied the supreme jurisdiction of the pope; later on it was advocated by Gallicans and Jansenists, e. g. Van Espen, Febronius, De Maree, and Stockmans, who attributed this power to the State as a necessary means of defence against possible temptations of the Church to injure the rights of civil society. More recently it has been defended with particular vigour by Italian jurists and statesmen, e. g. Cavallari, Mancini, Piola, appros of particular of the “Law of Guarantees” passed in 1871 by the Italian Government in favor of the Holy See. However, not only is historiographically erroneous, as shown above, that such a right has been exercised from time immemorial, but it is also juridically false that such power naturally belongs to the State, particularly as a necessary means of self-defence. The injustice of that claim and the consequent usurpation of authority by the State appear manifest in the light of Catholic faith. If the binding force of church laws depended on the approval and consent of the State, it would no longer be true that the Church received legislative power directly from her Divine Founder, and that whatever is required by the Church on earth, is approved and bound or loosed in heaven (Matt., xvi, 19). Again the Church would, in that case, immediately cease to be a supreme, self-sufficient, and perfect society, and would be deprived of her characteristics of unity, sanctity, catholicity, and apostolicity. Moreover, the use of the Exequatur to prevent possible usurpation of rights is contrary not only to Divine law but also to natural social law and is, therefore, an abuse of power, even if exercised by a State not professing the Catholic religion. A possible conflict of rights of two societies and the fear of a consequent injury to their respective jurisdictions do not entitle one of them to impede the free exercise of its ordinary jurisdiction by the other. Differences, if they arise, may be settled by private mutual understanding or arbitration. It is needless to say that the fear of any usurpation or conflict on the part of the Church is unfounded, as appears from her doctrine and history.

The Church, as a matter of fact, never claimed the power of revising and approving civil laws before promulgation, although, indeed, past experience would justify her in fearing on the part of the State usurpation of her powers. She contents herself with condoning the inapplicable laws as passed by the State. This is injurious to Catholic interests. We need not wonder, then, that the Church has always condemned the doctrine and use of the Regnum Placentia. Boniface IX first condemned it in his Constitution “Intenta Salutis” and after him a great number of pontiffs, down to Pius IX in Propositions 28 and 29 of the Syllabus “Quanta Curam” and in the Allocution “Luctuosissim Exagitati” (12 March, 1877), also the Vatican Council in the Constitution “De Ecclesiâ Christi”. To assert an autonomy contrary to the established practice is another way of seeking concessions from the State as to the exercise of the Regnum Placentia. In some other instances she has tolerated its acknowledgment by ecclesiasties, particularly to enable them to take possession of benefices and other temporalities. At present the Exequatur, or Regnum Placentia, is seldom, if ever, used, least in its strict sense, by modern civil rulers. In the two Sicilies it was abolished by the Concordat of 1818, and in Austria by that of 1855. It must likewise be regarded as abolished in Spain, France, Portugal, and Hungary. According to Aichner, it exists still, but in a mitigated form, in Saxony, Bavaria, and some parts of Switzerland. In Italy the strict Exequatur, i.e., previous to promulgation of papal Constitutions, is not in use, but it is retained in a mild form for the possession of ecclesiastical benefices. According to the Law of Guarantees (13 July, 1871), ecclesiasties which have been provided with benefices must present the Bull of their appointment to the State authorities; after approval the latter concede the Exequatur and put the incumbents of benefices in possession of the temporalities hitherto controlled by the government. In this form the Exequatur is at present tolerated by the Church, though it is not devoid of inconvenience. As Leo XIII complains in a letter written to his Secretary of State Cardinal Nino (27 August, 1878).

Exequatur, De promulgationem legum eccl. (Louvain, 1729); Bouix, De principiis juris (Paris, 1764); Zaccaria, Commentarii de principiis et sententiarum dni. (1763); Calendb. Jur. Publ. Eccl. Innt. (Rome, 1908); Barba, Il Diretto Publ. Eccl. (Naples, 1890); Tarnow, Dittr. dei Sovrani (Rome, 1862); De Dominica, Il Regio Exequatur (Naples, 1869).

Exeter (Exonia, Isca Dumnnoniorum, Cark Wyrse, Exancker, Ancient Diocese of (Exoniensis), in England, chosen by Leflrié, Bishop of Crediton, as his cathedral city in 1050. Originally Devonshire formed part of the Diocese of Wessex. About 703 Devonshire and Cornwall became the separate Bishopric of Sherborne and in 900 this was divided into the Diocese of Exeter, the Devonshire bishopric of Crediton, and the Bishopric of Devon. The two dioceses were again united when Leflrié became first Bishop of Exeter. The present cathedral was begun by Bishop William de Warelhurst in 1112; the abbey church of St. Mary and St. Peter, founded by Athelstan in 932 and rebuilt in 1019, serving till then as the cathedral church. The transept towers built by Warelhurst still remain, being the only part of the Norman cathedral existing. This Norman building was completed by Bishop Marsh all the close of the twelfth century. The cathedral as it now stands is in the decorated style, being begun by Bishop Quivil (1280-1291), continued by Byton and Stapeldon, and completed by the great Bishop Grandison during his long pontificate of forty-two years, who left it much as it now stands. In many respects it resembles the French cathedrals rather than those of England. The special features of the cathedral are the transeptal towers and the choir. The latter contains much early stained-glass and a magnificent episcopal throne, and is separated from the nave by a choir-screen of singular beauty (1324). The absence of a central tower and a general lack of elevation prevent the building from ranking among the greatest English cathedrals, though the exterior west front is alone sufficient to render it remarkable.

The bishops of Exeter always enjoyed considerable independence and the see was one of the largest and richest in England. "The Bishop of Exeter," writes
EXETER CATHEDRAL.
Professor Freeman, "like the Archbishop of York was the spiritual head of a separate people." The remoteness of the see from London prevented it from being bestowed on statesmen or courtiers, so that the roll of bishops is more distinguished for scholars and administrators than for men who played a large part in national affairs. This was fortunate for the diocese, and gave it a long line of excellent bishops, one of whom, Edmund Lacy, died with a reputation for sanctity and the working of miracles (1455). The result of this was seen in the fidelity with which Devon and Cornwall adhered to the Catholic Faith at the time of the Reformation. The following are the bishops with the dates of their accession:

- Leofric, 1046
- Osbern, 1072
- William Warelawst, 1107
- Robert Chichester, 1198
- Robert Warelawst, 1135
- Bartholomew Icanus, 1161
- John the Chauenter, 1186
- Vacancy, 1191
- Henry Murrell, 1194
- Vacancy, 1206
- Simon de Apulia, 1214
- William Bruerre, 1224
- Richard Blondy, 1245
- Walter Bronescombe, 1257
- John Quivill, 1280
- Thomas de Button, 1292
- Walter de Stapeldon, 1308

The diocese, originally very wealthy, was plundered during the reign of Henry VIII, when Bishop Vesey was induced to surrender fourteen out of twenty-two manors, and the value of the bishopric was reduced to a third. Vesey, though a Catholic at heart, held the see until 1551, when he was made to resign, and the Reformer, Miles Coverdale, was intruded into the see, where he made himself most unpopular. On the accession of Mary, in 1553, Vesey was restored. He died in 1554 and was succeeded by James Turcherville, beloved by Catholics and Protestants alike. He was deprived of the see by Elizabeth in 1559 and died in prison, probably in or about 1570, the last Catholic Bishop of Exeter. The diocese contained four archdeaconries, Ciderbridge, Exeter, Tavistock, and Bideford; the parishes, except Totnes, were in six hundred and four parishes. There were Benedictine, Augustine, Franciscan, Dominican, and Norbertine houses, and four Cistercian abbeys. The cathedral was dedicated to St. Peter, and the arms of the see were: Gules, a sword in pale blade and hilt proper, two keys in saltire or.

**Exodus**, the second Book of the Pentateuch, second also of the whole Old Testament Canon (see **PENTATEUCH**).
and bound him in the desert of upper Egypt;" and the instruction previously given to young Tobias (VI, 13, and 19), to roast the fish's heart in the bridal chamber, would seem to have been merely part of the angel's plan for concealing his own identity. But in early Jewish literature there are instances of exorcising demons, examples of which may be seen in the Talmud (Schabbath, xiv, 3; Aboda Zara, xii, 2; Sanhedrin, x, 1). These were sometimes inscribed on the interior surface of earthen bowls, a collection of which (estimated to be from the seventh century on) is preserved in the Royal Museum at Berlin; and inscriptions from the collection have been published, and translated, by Wohlestein in the "Zeit-schrift für Assyriologie" (Dec., 1895; April, 1891).

The chief characteristic of these Jewish exorcisms is their naming of names believed to be efficacious, i.e., names of good angels, which are used either alone or in combination with El (=God); indeed reliance on mere names had long before become a superstitious custom with the Jews, and it was considered the most important that the appropriate names, which varied for different times and occasions, should be used. It was this superstition without doubt, that prompted the words of Jesus to the demoniac Sebna, who had witnessed St. Paul's successful exorcisms in the name of Jesus, to try on their own account the formula, "I conjure you by Jesus whom Paul preacheth", with results disastrous to their credit (Acts, xix, 13). It was a popular Jewish belief, according to a learned commentary like Josephus, that Solomon had received the power of expelling demons, and that he had composed and transmitted certain formulæ that were efficacious for that purpose. The Jewish historian records how a certain Eleazar, in the presence of the Emperor Vespasian and his officers, succeeded, by means of a magical incantation, in driving the demon through the noses of the vestments, which were enclosed in a casket made of a rare and precious wood, and that the demon confessed itself a spirit of the good angel, and that it was exceedingly difficult to obtain the consent of the angel to the demon's departure from the casket. Thus we have an account of a person who was not a disciple of Paul but a demon-caster who was unequal to the task of casting out demons in Christ's name, and whose actions Christ refused to reprehend or forbid.

EXORCISM IN THE NEW TESTAMENT: Assuming the reality of demonic possession, for which the authority of Christ is pledged (see OBSSESSION, POSSESSION), it is to be observed that Jesus appealed to His power over demons as one of the signs of His Messiahship (Matt., xii, 28; Luke, xi, 20). He cast out demons, He declared, by the finger or spirit of God, not, as His adversaries alleged, by collusion with the prince of demons (Matt., xii, 24, 27; Mark, iii, 22; Luke, xi, 15, 19); and that He exercised no mere delegated power, but a personal authority that was properly His own, is clear from the direct and imperative way in which He commands the demon to depart (Mark, ix, 21; cf. i, 25 etc.): "He cast out the spirits with his word, and healed all that were sick" (Matt., viii, 16). Sometimes, as with the daughter of the Canaanean woman, the example was added (Mark, vi, 13; cf. i, 26): "He cast out the spirits with his word, and they were healed at once." Sometimes again the spirits expelled were allowed to express their recognition of Jesus as "the Holy One of God" (Mark, i, 24) and to complain that He had come to torment them "before the time", i.e., the time of their final punishment (Matt., viii, 29 sqq.; Luke, viii, 29 sqq.). If demonic possession was generally accompanied by some disease, yet the two were not confounded by Christ or the Evangelists. In Luke, xiii, 32, for example, the Master Himself expressly distinguishes between the exorcism of evil spirits and the curing of diseases. Christ also empowered the Apostles and Disciples to cast out demons in His name while He Himself was still on earth (Matt., x, 1 and 8; Mark, vi, 7; Luke, ix, 1; x, 17), and to believers generally He promised the same power (Mark, xvi, 17). But the efficacy of this delegated power was conditional, as we see from the fact that the Apostles themselves were not always successful in their exorcisms: certain kinds of spirits, as Christ explained, could only be cast out by prayer and fasting (Matt., xvii, 15, 20; Mark, ix, 27, 28; Luke, ix, 40). In other words the success of exorcism by Christians, in Christ's name, is subject to the same general conditions on which both the efficacy of prayer and the use of charismatic power depend. Yet consistent success was promised (Mark, xvi, 17).

ECCLESIASTICAL EXORCISM: Besides exorcism in the strictest sense, i.e., for driving out demons from the possessed, Catholic ritual, following early traditions, has retained various other exorcisms, and these also call for notice here. (1) Baptismal exorcism. We have it on the authority of all early writers who refer to the subject at all in the first centuries not only the clergy, but lay Christians also were able by the power of Christ to deliver demons or exorcisms, and their success was appreciated by the early Apostles as a strong argument for the Divinity of the Christian religion (Justin Martyr, Apol., 6; P. G., VI, 453; Dial., 30, 85; ibid., 537, 676 sq; Minutius Felix, Octav., 27, P. L., III; Origen, Contra Celsum., I, 25; VII, 4, 47; P. G., XI, 705, 1225, 1516; Tertullian, Apol., 22, 23; P. L., I, 404 sqq., etc.). As is clear from the formulæ, only the names of demons referred to, no magical or superstitious means were employed, but in those early centuries, as in later times, a simple and authoritative aduration addressed to the demon in the name of God, and more especially in the name of Christ crucified, was the usual form of exorcism. But sometimes in addition to words some symbolic action was employed, such as breathing (in宿放) or laying of hands on the subject, or making the sign of the cross. St. Justin speaks of demons flying from the touch and breathing of Christians (I Apol., 6) as from a flame that burns them, says St. Cyril of Jerusalem (Cat., xx, 3, P. G., XXXIII, 1080). Origen mentions the laying on of hands, and St. Ambrose (Paulinus, Vit. Amb., n. 28, 43, P. L., XIV, 36, 42), St. Ephraem Syrus (Greg. Nyss., De Vit. Ephr., P. G., XLVI, 548) and others used this ceremony in exorcisms; the sign of the cross, that by its simplicity was the simplest way of expressing one's faith in the Crucified and invoking His Divine power, is extolled by all Fathers for its efficacy against all kinds of demonic possession (Lactantius, Inst., IV, 27; P. L., XLVI, 531 sqq.; Athanasius, De Incarn. Verbi., n. 47, P. G., XXVII, 180; Basil, In Isai., XI, 249, P. G., XXX, 537; Cyril of Jerusalem, Cat., XIII, 3 coll. 773; Gregory Nazianzen, Carm. adv. iram, v, 415 sq.; P. G., XXXII, 812). The Fathers further recommend that the adjuration and accompanying prayers should be couched in the words of Holy Writ (Cyril of Jerusalem, Procat., n. 9, col. 346; Greg. Nyss., De Vit. Ephr., P. G., XLVI, 548). The present rite of exorcism as given in the Roman Ritual fully agrees with patristic teaching and is a proof of the continuity of Catholic tradition in this matter.

(2) Baptismal exorcism. At an early age the prac-

711

tice was introduced into the Church of exorcising cate-
chumens as a preparation for the Sacrament of Bap-
tism. This did not imply that they were considered to be
obscured, like demons, but merely that they were
in consequence of original sin (and of personal sins in case of adults), subject more or less to the power of
"works" or "pompe" thew, we called upon to renounce, and from whose dominion the
grace of baptism was about to deliver them. Exor-
cism in this connexion is a symbolical anticipation of
one of the chief effects of the sacrament of regenera-
tion; and since it was used in the case of children who
had personal sins, St. Augustine could appeal
against the Pelagians as implying clearly the doctrine
of original sin (Ep. exeq. n. 46, P. L. XXXIII, 890;
C. Jul. III, 8; P. L., XXXIV, 705, and elsewhere).
St. Cyril of Jerusalem (Procat. 14, col. 355) gives a
detailed description of baptismal exorcism, from which
it appears that anointing with exorcised oil formed a
part of this exorcism in the East. The only early
Western witness which treats unction as part of the
baptismal exorcism is that of the Arabic Canons of
Hippolytus (n. 19, 20). The Exsufflificio, or out-
breathing of the demon by the candidate, which was
sometimes part of the ceremony, was, St. Augustine
said, "in the name of Christ, and of the Holy Ghost"
(Par. 47, col. 1198). The baptismal exorcism was
to take part in baptismal exorcism. That catechumens
were exorcised every day, for some time before baptism, may be inferred from canon xc of
the same council, which prescribed the daily imposi-
tion of hands by the exorcists. A further duty is pre-
scribed in canons xxvi, xxvii, xxviii, of supplying the
general way to care for, evangelists who habitually
frequented the Church. There is no mention of pagan
demoners, for the obvious reason that the official
ministrations of the Church were not intended for
them. But even after the institution of this order,
exorcism was not for exorcists, but for the laity, to the
higher clergy; nor did those who exorcised always
use the forms contained in the Book of Exorcisms.
Thus the Apostolic Constitutions (VIII, 26, 27, P. G., I,
1122) say expressly that "the exorcist is not or-
dained", i.e. for the special office of exorcist, but that
if anyone possesses the charismatic power, he is to
be recognized, and if need be, ordained deacon or sub-
deacon. This is the practice which has survived in
the Eastern Orthodox Church.

As an example of the discretion allowed in the West,
in the use of the means of exorcising, we may refer to
what Sulphius Severus relates of St. Martin of Tours
(Dial., III (II), 6; P. L., XX, 215), that he was in
the habit of casting out demons by prayer alone, without
having recourse to the imposition of hands or the for-
mule usually employed by the clergy. After a time,
as conditions changed in the Church, the office of ex-
orcist, as an independent office, ceased altogether, and
was taken over by clerics in major orders, just as
the original functions of deacons and subdeacons have
with the lapse of time passed to a great extent into
the hands of priests; and according to the present disci-
pline of the Catholic Church, it is only priests who are
authorized to use the exorcising power conferred by
ordination. The change is due to the facts that the
catechumenate, with which the office of exorcist was
chiefly connected, has ceased, that infant baptism has
become the rule, and that with the spread of Chris-
tianity and the disappearance of paganism, demonic
power has been curtailed, and cases of obsession have become
much rarer. It is only Catholic missionaries labour-
ing in pagan lands, where Christianity is not yet domi-
nant, who are likely to meet with fairly frequent cases of
possession.

In Christian countries authentic cases of possession
sometimes occur and every priest, especially if he be
a parish priest, or pastor, is liable to be called upon
to perform his duty as exorcist. In doing so, he is to
be mindful of the prescriptions of the Roman Ritual and
of the laws of provincial or diocesan synods, which for
the most part require that the bishop should be consulted, and his authorization obtained before exorcism is attempted. The chief points of importance in the instructions of the Roman Ritual, prefixed to the rite itself, are as follows: 'The exorcism is lightly to be taken for granted. Each case is to be carefully examined and great caution to be used in distinguishing genuine possession from certain forms of disease.' (2) The priest who undertakes the office should be himself a holy man, of blameless life, intelligent, courageous, humble; and he should prepare for the work by special acts of devotion and mortification, particularly by prayer and fasting (Matt., xvii, 20). (3) He should avoid in the course of the rite everything that savours of superstition, and should leave the medical aspects of the case to qualified physicians. (4) He should admonish the possessed, in so far as the latter is capable, to dispose himself for the exorcism by prayer, fasting, confession, and communion, and while the rite is in progress to excite within himself a lively faith in God's goodness, and a patient resignation to His holy will. (5) The exorcism should take place in the Church or some other sacred place; if convenient, on account of the solemnity of the case, or for other legitimate reasons, it takes place in a private house, witnesses (preferably members of the family) should be present: this is specially enjoined, as a measure of precaution, in case the subject is a woman. (6) All idle and curious questioning of the demons should be avoided, and prayers and the like should be read with great faith, humility, and fervour, and with a consciousness of power and authority. (7) The Blessed Sacrament is not to be brought near the body of the obsessed during exorcism for fear of possible irreverence; but the crucifix, holy water, and images, if available, are to be so employed. (8) If expulsion of the evil spirit is not obtained at once, the rite should be repeated, if need be, several times. (9) The exorcist should be vested in surplice, and violet stole.

**Expectation of the Blessed Virgin Mary (Expectatio Partus B. V. M.).** Feast of the, celebrated on 18 December by nearly the entire Latin Church. Owing to the ancient law of the Church prohibiting the celebration of feasts during Lent (a law still in vigour at Milan), the Spanish Church transferred the feast of the Annunciation from 25 March to the season of Advent, the Tenth Council of Toledo (666) assigning it definitely to 18 December. It was kept with a solemn octave. When the Latin Church ceased to observe the ancient custom regarding feasts in Lent, the Annunciation came to be celebrated in Spain and Portugal on 25 March and 18 December, in the calendars of both the Mozarabic and the Roman Rite (Missale Gothicum, ed. Migne, pp. 170, 734). The feast of 18 December was commonly called, even in the liturgical books, "Sancta Maria de la O", because on that day the early Marian chansons were used to this church and protracted "O", to express the longing of the universe for the coming of the Redeemer (Tamayo, Mart. Hisp., VI, 483). The Roman "O" antiphons have nothing to do with this term, because they are unknown in the Mozarabic Rite. This feast and its octave were very popular in Spain, where the people still call it "Nuestra Señora de la O". It is not known what at time the term Expectatio Partus first appeared; it is not found in the Mozarabic liturgical books. St. Ildefonso cannot, therefore, have invented it, as some have maintained. The feast was always kept in Spain and was approved for Toledo in 1573 by Gregory XIII as a double major, without an octave. The church of Toledo has the privilege (approved 29 April, 1634) of celebrating this feast even when it occurs on the fourth Sunday of Advent. The "Expectatio Partus" spread from Spain to other countries; in 1695 it was granted to Venice and Toulouse, in 1702 to the Cistercians, in 1713 to Tuscany, in 1725 to the Papal States. The Office in the Mozarabic Breviary is exceedingly beautiful; it assigns special antiphons for every day of the octave. At Milan the feast of the Annunciation is observed as a double minor, kept on the last Sunday before Christmas. The Mozarabic Liturgy also celebrates a feast called the Expectation (or Advent) of St. John the Baptist on the Sunday preceding 24 June.

**F. G. Holweck.**

**Expectative (from Lat. expectare, to expect or wait for).**—An expectative, or an expectative grace, is the anticipatory grant of an ecclesiastical benefice, usually a vacant one, to an appointee who is not regularly, on the death of its present incumbent. In 1179 the Third Lateran Council, renewing a prohibition already in existence for a long time, forbade such promises or gifts. This prohibition was further extended by Boniface VIII. Nevertheless, during the Middle Ages expectatives were conferred upon applicants to canonical prebends in the cathedral and collegiate chapters. This fact was due to toleration by the Holy See, which even accorded to the chapters the right of nominating four canons in the way of expectatives (cc. ii, viii, De concesionibus, c. III, Lebendge, in cap. ii, 7, 12). The privilege of expecting benefices was conceded also to the delegates of the Holy See, the universities, certain princes, etc., with more or less restriction. This practice aroused grave opposition and gave rise to many abuses, especially during the Western Schism. The Council of Trent suppressed all expectatives excepting the designation of a coadjutor with the right of succession in the case of bishops and abbots; to these we may add the prefects Apostolic. (Sess. XXIV, cap. xix, De ref.; Sess. XXIX, cap. vii, De ref.). Although the papal Council intended to forbid also the collation of expectatives by privileges granted by the pope, still the latter is not bound by such a prohibition. However the only expectatives now in use are those authorized by the Council of Trent.

Expiation, Feast of. See Atonement, Day of.

Exposition of the Blessed Sacrament is a manner of honouring the Holy Eucharist, by exposing it, with proper solemnity, to the view of the faithful in order that they may pay their devotions before it. We will speak later of the conditions which constitute proper solemnity, but something must first be said of the history of the practice.

History.—There can be no reasonable doubt that the practice of exposition came in the wake of that most epoch-making liturgical development, the elevation of the Host in the Mass. The elevation itself (q. v.), of which we first hear in its present sense about the year 1200, was probably adopted as a practical protest against the teaching of Peter Comestor and Peter the Chanter, who held that the bread was not consecrated in the Mass until the words of institution had been spoken over both bread and wine. Those who refused to accept that when the Host is said "Pons meus" had been pronounced, the bread was at once changed into the flesh of our Lord, supported their opinion by adoring the Sacrament, and holding it up for the adoration of the people, without waiting for the words to be spoken over the chalice. At Paris, this elevation became a matter of synodal precept, probably before the year 1200. Before long it came to be regarded as a very meritorious act to look upon and salute the Body of the Lord. In this way, even before the middle of the thirteenth century, all kinds of fanciful promises were in circulation regarding the sanctifying graces enjoyed by him who, on any day, saw the Body of his Maker. He was believed to be protected from sudden death, or from loss of sight. Further, on that day he would be duly nourished by the food he took, and would grow no older, with many other superannuities. The development of these popular beliefs was also probably much assisted by a legendary element current in the romances of the Holy Grail, then at the height of their popularity. What is certain is, that among all classes the seeing the Host, at the moment it was lifted, was held in the highest of the people, became a primary matter of veneration—various devotions—for example, the hanging of a black curtain at the back of the altar, or the lighting of torches held behind the priest by a deacon or server—were resorted to, to make the looking upon the Body of Christ more easy.

Whether the institution of the feast of Corpus Christi with its procession, an innovation due to the visions of the Flemish contemplative, St. Juliana Corn- nelion, is to be regarded as the case, or rather the effect, of this great desire to behold the Body of Christ is somewhat doubtful. But the evidence points to it as an effect rather than as a cause, for, even before the close of the twelfth century, we find in the authenticated story of the last moments of Maurice de Sully, Bishop of Paris, according to which, being unable on account of sickness to receive Holy Viaticum, he satisfied his devotion by having the Blessed Sacrament brought to him to gaze upon. An exactly similar incident is recorded of St. Juliana herself. This also seems to show that the devout longing of the faithful to gaze upon the Sacred Host was not confined to the time of Mass. Moreover, we find it debated among scholastic theologians, as early as the thirteenth century, whether the looking upon the consecrated Host could be praiseworthy, if it were done with a reverent intention, and was likely to obtain for the sinner the grace of true contrition.

In the fourteenth century, we find the practice of Exposition already established, especially in Germany. The "Septilium" of Blessed Dorothea of Prussia who died a recluse, at an advanced age, in 1394, not only bears witness to the saint's extraordinary desire to see the Blessed Sacrament, a desire which was sometimes gratified as often as a hundred times a day, but also incidentally mentions that in certain churches near Danzig, the Blessed Sacrament was reserved all day long in a transparent monstrance, so that pious persons like Dorothea could come to pray before it. In practice, the practice of exposition was widespread, especially in Germany and the Netherlands. In the fifteenth century, we find numerous synodal decrees passed, prohibiting this continuous and informal Exposition, as wanting in proper reverence. The decree enacted at Cologne in 1432, under the presidency of Cardinal Nicholas de Cues, altogether forbids the reserving, or carrying of the Blessed Sacrament in such monastries, except during the octave of Corpus Christi. An earlier decree passed at Breslau, in 1416, speaks of permission having previously been given for the Body of Jesus Christ, on some few days of the week, to be visibly exposed and shown to public view." But the bishop declares that he has perceived, that, "by this frequent exposition, the devotion of the multitude only becomes greater, and reverence is lessened". It is clear that these prohibitions did not eradicate the custom, but they seem to have led to a curious compromise, by which the Blessed Sacrament, throughout a great part of central Europe, was reserved in "Sakramentshäuschen" (Sacrament houses), often beautifully carved of stone, and erected in the most conspicuous part of the church, near the sanctuary. There the Blessed Sacrament was kept in a transparent vessel, or monstrance, behind a locked metal door of lattice work, in such a way that the Host could still be dimly seen by those who prayed outside. In the convent of Vadstena in Sweden, the motherhouse of the Brigitines, we have a record of the erection of such a sacrament of 1454, in the following terms: "Circa festum Epiphaniae erectum est ciborium, sive columna, pro Corpore Christi, et monstrancia ibi posita cum lampade.

Another custom which seems to have been very prevalent in Germany and the Netherlands, before the close of the fifteenth century, was the practice of exposing the Blessed Sacrament during the time of Mass, apparently to add solemnity to the Holy Sacrifice thus offered. Numerous papal permissions for such Exposition will be found in the "Regesta" of Pope Leo X. (See e. g. 3 Nov., 1514; 20 Nov., 1514,
This practice is still a very favourite one in Belgium, though it seems directly to contravene the spirit of many directions in the official "Ceremonial Episcoporum" prescribing that the Blessed Sacrament should, when possible, be removed from the altar at which Mass is celebrated (Cer. Expos. XII, 8–9). Before the Council of Trent, the abuse of such frequent expositions, in Germany and elsewhere, seems to have been very much checked, if not entirely eliminated. In the sixteenth century and subsequently, the developments of popular devotion in this matter have been much more restrained, and there have always been subject to strict episcopal supervision. The practice of the Forty Hours' Devotion, and the service now known as Benediction of the Blessed Sacrament, are treated separately, and the reader may be referred to the articles in question. But a good many other varieties of services, involving Exposition of the Blessed Sacrament for a longer or shorter period, began to prevail in the time of St. Philip Neri and St. Charles Borromeo. Of one such variety known as the Oratio sine intermissione, and dating at least from 1574, a full account will be found in the "Liber Ordinariorum" in the "Sacrament-Houses", (Anathema; V. 1906). Not very long after this, we begin to come across various religious institutes founded, with the permission of the Holy See, for the express purpose of maintaining the perpetual adoration of the Blessed Sacrament. See the article ADORATION, PERPETUAL, where details are given.

**Conditions Regulating Exposition.** —The Church distinguishes between private and public Expositions of the Blessed Sacrament, and these, though the former practice is hardly known in northern Europe, or in America, it is clearly within the competence of a parish priest to permit such private exposition for any good reason of devotion, by opening the tabernacle door and allowing the ciborium containing the Blessed Sacrament to be seen by the worshippers. There is, however, in this case no enthroneing of the Blessed Sacrament or use of a monstrance. Public Exposition of the Blessed Sacrament may not take place without the permission, express or implied, of the ordinary. In English-speaking countries, a monstrance must always be used, and the Blessed Sacrament is set upon its throne, but in Germany, one frequently sees simply the ciborium, covered of course with its veil. A certain solemnity and decorum in the matter of lights upon the altar, incense, music, and attendance of worshippers is also required, and bishops are directed to refuse permission for public exposition where these cannot be obtained.

When Mass is celebrated, or the Divine Office recited, at the altar upon which the Blessed Sacrament is exposed, a new set of rubrics comes into force, birettas are not worn, genuflexions on both knees are made before the altar, and incense used. However, the celebrant's hand is not kissed, etc. The "Ceremoniale" seems only to contemplate the case of Mass before the Blessed Sacrament exposed during the octave of Corpus Christi, and at the Mass of Deposition of the Quaran' Ore, but, as already noticed, in many parts of Europe, local custom has made these Masses before the Blessed Sacrament of very common occurrence. For the candles that ought to burn upon the altar, and for the ritual to be followed the reader may be referred to the articles BENEDICTION, and Forty Hours Devotion. Other rubrical directions dealing with the external extazi, such as the use of a particular arrangement of the throne, etc., are given in detail in manuals like that of Hartmann, or works upon Pastoral Theology such as that of Schultze.

**Extension.** See ANATHEMA; DEGRADATION; EXCOMMUNICATION; RELIGIOUS ORDERS; VOW.

Extension (from Lat. ex-tenderre, to spread out).—That material substance is not perfectly continuous in its structure, as it appears to our gross senses, the physical sciences demonstrate. The microscope reveals pores in the most compact matter, while the permeation of gasses and even of liquids through solids indicates that the densest bodies would probably present to a sufficiently penetrating eye a sponge-like structure throughout. This fact, together with the difficulty of explaining how the senses can perceive extension, has led many theorists to deny its objectivity, although, on the other hand, the first of modern philosophers, Descartes, has expressed it. Kant makes extension a subjective form, an original condition of sensuous faculty which when stimulated by the sense-object stamps the impression accordingly. Others, with Leibniz, resolve matter into simple unextended substances, (monads), and the agitation is supposed to produce in us the impression of continuous extension. Others, with Bosovich (d. 1787), sublitize matter into simple forces which some hold to be 'virtually' extended. The Atomists (physical and chemical) dissolve bodies into minute particles (atoms) which are either added or removed by others only physically, indivisible of certain elementary substances, which hitherto have defied further analysis but which may eventually turn out to be merely varying arrangements of some primordial homogeneous maternal, the radical constituent of the universe. The present teaching of Catholic philosophy on the subject may be summarized as follows: Extension is either successive (frequent, as that of a stream and of time), or permanent. The latter may be viewed as either (a) continuous (mathematical), i.e. abstract, as a line, or physical, when the entitative or intersubstantial parts into which the material substance is divided, are united (perfectly or imperfectly) throughout, e.g. a homogeneous wire; (b) contiguous, when the said parts are conjoined only by contact, e.g. a brick wall; (c) interrupted, when those parts are in some degree disjointed, though connected by an intermediate, e.g. a string of beads. We are here occupied with continuous extension only.

Continuous extension may be described as that property in virtue whereof the parts into which material substance is divided are suitably arranged in orderly relation one beyond the other (internal and potential) and hence are not absolutely commensurate with the corresponding parts of the immediately surrounding surfaces (external and actual local extension). Consequent attributes of extension are divisibility, measurability, and impenetrability. Wherein precisely the essence of extension consists, is a controverted question. Probably the more general opinion is that extension radically and essentially consists in the internal distribution of the parts into which matter is divisible, and that external extension, or the correspondence of those parts to the parts of the locating surfaces, is a sequent property of essentially extended parts. Of course this distinction between internal and external extension. Some nearer approach to an explanation and an exposition may be found in the opinion of a recent writer (Peess) who makes extension consist in the expansive and cohesive forces of matter—the former causing the said parts to spread out, the latter keeping them united.
Continuous extension is an objective property of matter, not a mere mental form moulding the sensuous impression produced in the sensory organs by some sort of physical motion. What it is that extension immediately affects—whether the ultimate atoms, the contiguous molecules, or the gross mass of matter—we are unable in the present stage of physical science to decide. Even should it turn out, however, as many conjecture, that the densest solid—to say nothing of a liquid or a gas—is but what might be called an "infinite" complex arrangement of infinitesimal corpuscles—which is the case—then by gravitating in a matrix of ether, continuous extension would still remain (objective), though it would then be the immediate property of the constituent corpuscles and the ether instead of a property of the gross mass. It is experimentally demonstrable that sensuous impressions are aroused in us by bodies as extended and resistant. Now if bodies were constituted of simple, unextended points—monads or forces—these could not stimulate the sensory organs, since such elements, apart from the fact that they would all coalesce and co-penetrate, could not be the subjects of material activity (etherial or aural vibrations, chemical reactions, i.e. the immediate sense-stimuli). Nor could the organs evoke the sensation, since in the hypothesis they too, being made up of unextended elements, would be incapable of material action. Neither will it do to say that the motion of the supposed "points" might evoke sensation, since being unextended they would be imperceptible in motion or at rest.

Extension is an "absolute accident", that is not a mere mode in which substance exists, as, for instance, are motion and rest. It seems to have a certain distinct entity of its own. This, of course, would most probably never have been suspected by the human mind unaided by Revelation; but it is given in the dogma of the Real Presence of Christ in the Sacrament of the Eucharist, wherein the extensional dimensions and sensible qualities of bread and wine persist after the conversion of the substance of the bread and wine into His Body and Blood, reason, speculating on the doctrine, discerns some grounds for the possibility of the real distinction and even severance between substance and local extension. In the first place there are motives for inferring a real distinction between substance and extension (actual and local), or, in other words, that extension does not constitute the essence of physical substance (as Descartes maintained that it does): (a) substance is the root principle of action; extension as such is either inactive or at most a proximate principle; (b) substance is the ground of specification; extension as such is indifferent to any species, since shape or figure which is the dimensional termination of extension depends upon the specific form; (c) substance is identical in the entire mass and in each of its parts (e.g. in gold), while extension is not the same in the whole and in each of its parts; (d) substance is the principle of unity; extension is the formal principle of plurality; (e) substance essentially demands three dimensions; extension may be realized in one or two; (f) substance remaining the same, extension may increase or decrease.

Given a real distinction between extension and substance, no intrinsic impossibility can be proven to explain the separation of one from the other; although internal extension naturally demands external, there is no evidence that the demand is so essentially imperative that Omnipotence cannot supernaturally suspend its realization and by other means afford the accidents—extension and the rest—the substance naturally supplies. Since material substance owes the distribution of its integral parts to extension, the question arises whether, independently of extension, it possesses any such parts (it, of course, possesses parts essential to corporeal substance, matter and form), or is simple, indivisible. St.

Thomas and many others maintain that substance as such is indivisible. Suarez and others hold that it is divisible. For this and the other questions concerning the divisibility of extension, and the psychology of the subject, the reader is referred to the works mentioned below.

definition of "Corpus Juris Canonici." This explains the favour they enjoyed among canonists. For a critical text of these collections see Friedberg, "Corpus Juris Canonici" (Leipzig, 1879–1881), II. 

III. SACRAMENTAL EFFICACY OF THE RITE. — (A) Catholic Doctrine.—The Council of Trent (Sess. XIV, cap. i, De Extr. Unct.) teaches that "this sacred union of the sick was instituted by Christ Our Lord as a sacrament of the New Testament, truly and properly so called, being insinuated indeed in Mark vii, 13 but commended to the faithful and promulgated" by James [Ep. v, 14, 15]; and the corresponding canon (can. i, De Extr. Unct.) anathematizes anyone who would say that extreme unction is not truly a sacrament instituted by Christ Our Lord, and promulgated by the blessed Apostle James, but merely a rite received from the fathers, or a human invention." Already at the Council of Florence, in the Instruction of Eugene IV for the Armenians (Bull "ExulIatio") 22 Nov., 1442 (A.D. 1443), a prayer was composed in the unction with oil, specially blessed by the bishop, of the organs of the five external senses (eyes, ears, nostrils, lips, hands), of the feet, and, for men (where the custom exists and the condition of the patient permits his being moved), of the loins or reins; and in the case of repeated anointing with oil of the corresponding sense or faculty: "Through this holy unction and His own most tender mercy may the Lord pardon thee whatever sins or faults thou hast committed quid quidem deliquasti" by sight (sight by hearing, smell, taste, touch, walking, carnal delection). The unction of the loins is generally, if not universally, omitted in English-speaking countries, and it is of course everywhere forbidden in case of women. To perform this rite fully takes an appreciable time, but in cases of urgent necessity, when death is likely to occur before it can be completed, it is sufficient to unction with unction (orunction) which Wyeldes and Hustin have in the unmention of the corresponding sense or faculty: "Through this holy unction and His own most tender mercy may the Lord pardon thee whatever sins or faults thou hast committed." By the decree of 25 April, 1906, the Holy Office has expressly approved of this form for cases of urgent necessity.

In the Eastern Orthodox (schismatical) Church this sacrament is normally administered by a number of priests (seven, five, three; but in cases of necessity even one is enough); and it is the priests themselves who bless the oil on each occasion before use. The parts usually anointed are the forehead, chin, cheeks, hands, nostrils, and breast, and at such unmention with oil:

"Holy Father, physician of souls and of bodies, Who didst send Thy Only-Begotten Son as the healer of every disease and our deliverer from death, heal also Thy servant N. from the bodily infirmity that holds him, and make him live through the grace of Christ, by the intercessions of certain saints who are named], and of all the saints." (Goar, Euchologion, p. 417.) Each of the priests who are present repeats the whole rite.

II. NAME. — The name Extreme Unction did not become technical in the West till towards the end of the twelfth century, and has never been used in the East. Some theologians would explain its origin on the ground that this unmention was regarded as the last in order of the sacramental or quasi-sacramental unctions, being preceded by those of baptism, confirmation, and Holy orders; but, having regard to the conditions prevailing at the time when the name was introduced (see below, VI), it is much more probable that it was intended originally to mean "the unmention of those in extremis," i.e. the dying, especially as the corresponding name, sacramentum extirnum, came into common use at about the same time when the sacrament was known by a variety of names, e.g., the holy oil, or unction of the sick; the unmention or blessing of consecrated oil; the unmention of God; the office of the unmention; etc. In the Eastern Church the later technical name is σαρακομνιον (i.e. extreme unmention); but other names have been and still are in use, e.g. ελατον ἱερον (holy), or πηκτωσεν (consecrated), ελαιον, ελατο φρίνον, φρίζον, etc.

The teaching of the Council of Trent is directed chiefly against the Reformers of the sixteenth century.
Luther denied the sacramentality of extreme unction and classed it among rites that are of human or ecclesiastical institution (De Captivit. Babylonici, cap. de extr. unct.). Calvin had nothing but contempt and ridicule for this rite, which he described as a "public hypocrisy" (Instit. IV, xix, 18). He did not deny that the Jacobean rite may have had some authority in the Church, but held that it was a mere temporary institution which had lost all its efficacy since the charisma of healing had ceased (Comm. in Ep. Jacobi, v, 14, 15). The same position is taken up in the confessions of the Lutheran and Calvinistic Churches. In the first edition (1531) of the Edwardine Prayer Book for the reformed Anglican Church the rite of unction for the sick, with prayers that are clearly Catholic in tone, was retained; but in the second edition (1532) this rite was omitted, and the general teaching on the sacraments shows clearly enough the intention of denying that extreme unction is a sacrament.

The same is to be said of the other Protestant bodies, and down to our day the denial of the Tridentine doctrine on extreme unction has been one of the facts that go to make up the negative unani- mity of Protestantism. At the present time, however, there has been a reaction among some of the more extreme Anglicans of Catholic teaching and practice.

Some of our clergy," writes Mr. Puller (Anointing of the Sick in Scripture and Tradition, London, 1904), "see the plain injunction about unction in the pages of the New Testament, jump hastily to the conclusion that this is the only teaching and practice in regard to unction that is right, and seek to revive the use of unction as a channel of sanctifying grace, believing that grace is imparted sacramentally through the oil as a prepara- tion for death" (p. 307). Mr. Puller himself is not prepared to go so far, though he pleads for the revival of the Jacobean unction, which he regards as the sacrament instituted for the supernatural healing of bodily sickness only. His more advanced friends can appeal to the authority of one of their classical writers, Bishop Forbes of Brechin, who admits (Exposition of the XXXIX. Articles, vol. II, p. 463) that "the unction of the sick is the Lost Pleiad of the Angli- can firmament...There has been practically lost an apostolic practice, whereby, in case of grievous sickness, the faithful were anointed and prayed over, for the forgiveness of their sins, and to restore them, if God so willed, or to give them spiritual support in their maladies".

Previous to the Reformation there appears to have been no definite hereby relating to this sacrament in particular. The Albigensians are said to have rejected it, the meaning probably being that its rejection, like that of other sacraments, was logically implied in their principles. The abuses connected with its administra- tion which prevailed in the twelfth and thirteenth cen- turies and which tended to make it accessible only to the rich, gave the Waldenses a pretext for denouncing it as the ultima superstia (cf. Preger, Beiträge zur Gesch. der Waldenser im M. A., p. 60 sqq.). That the Wycliffites and Hussites were suspected of contemning extreme unction is clear from the interrogatory already referred to, but the present writer has failed to discover any evidence of its specific rejection by these heretics.

**Proof of Catholic Doctrine from Holy Scripture.**—In this connection there are only two texts to be discussed—Mark, vi, 13, and James, v, 14, 15—and the first of these may be disposed of briefly. Some ancient writers (Victor of Antioch, Theophylactus, Euthymius, St. Bede, and others) and not a few Scholastics have a reference to this rite. The majority of them did indeed suppose that they do convey it. A few verses further on the predominating spiritual and eschatological connot- ation of "saving" in S. James's mind emerges clearly in the expression, "shall save his soul from death" (v. 20), and without necessarily excluding a reference to deliverance from bodily death in verse 18.
we are certainly justified in including in that verse a reference to the saving of the soul. Moreover, the Apostle could not, surely, have meant to teach or imply that every sick Christian who was anointed would be cured of his sickness and saved from bodily death; yet the clause most clearly enjoined a permanent liturgical function in the Church for all the sick faithful, and the saying and raising up are represented absolutely as being the normal, if not infallible, effect of its use. We know from experience (and the same has been known and noted in the Church from the beginning) that restoration of bodily health does not as a matter of fact naturally result from the unction, though it does result with sufficient frequency and without being counted miraculous to justify us in regarding it as one of the Divinely (but conditionally) intended effects of the rite. Are we to suppose, therefore, that St. James thus solemnly recommends universal recourse to a rite which, after all, will be efficacious for the purpose intended only by way of a comparatively rare exception? Yet this is what would follow if it be held that there is reference exclusively to bodily healing in the clauses which speak of the sick man being saved and raised up, and if further it be denied that the clause of healing speaks in the following clause, and which is undeniably a spiritual effect, is attributed to the unction by St. James. This is the position taken by Mr. Puller; but, apart from the arbitrary and violent breaking up of the Jacobean text which it postulates, such a view utterly fails to furnish an adequate rationale for the universal and independent character of the Apostolic prescription. Mr. Puller vainly seeks an analogy (op. cit., pp. 289 sqq.) in the absolute and universal expressions in which Christ assures us that our prayers will be heard. We admit that our rightly disposed prayers are always and inevitably efficacious; and the use of the ultimate spiritual good, but not by any means necessarily so for the specific temporal objects or even the proximate spiritual ends which we ourselves intend. Christ's promises regarding the efficacy of prayer are fully justified on this ground; but would they be justified if we were compelled to verify them by reference merely to the particular temporal boons we ask for? Yet this is how, on his own hypothesis, Mr. Puller is obliged to justify St. James's assurance that the prayer-unction shall be efficacious. But in the Catholic view, which considers the temporal boon of bodily healing as being only a by-product and subordinate end of the unitive and its paramount spiritual purpose—to confer on the sick and dying graces which they specially need—may be, and is normally, obtained, not only is an adequate rationale of the Jacobean injunction provided, but a true instead of a false analogy with the efficacy of prayer is established.

But in defence of his thesis Mr. Puller is further obliged to maintain that all reference to the effects of the unction ceases with the words, “the Lord shall raise him up”, and that in the clause immediately following, “and if he be in sins, they shall be forgiven him”, St. James places an underived subject-matter. All three clauses are connected in the very same way with the unction, “and the prayer of faith... and the Lord... and if he be in sins...”, so that the remission of sins is just as clearly stated to be an effect of the unction as the saying and raising up. Had St. James meant to speak of the prayer of faith as directly and apart from the third clause, he could not have written in such a way as inevitably to mislead the reader into believing that he was still dealing with an effect of the priestly unction. In the nature of things there is no reason why unction as well as absolution by a priest might not be Divinely ordained for the sacramental remission of sin, and that it was so ordained is what every reader naturally concludes from St. James. Nor is there anything in the context to suggest a reference to the Sacrament of Penance in this third clause. The admonition in the following verse (16), “Confess, therefore, and pray one to another”, may refer to a mere liturgical confession like that expressed in the “Confiteor”; but even if we take the reference to be to sacramental confession and admit the genuineness of the connecting “therefore” (its genuineness is not beyond doubt), there is no compelling reason for connecting this admonition closely with the clause which immediately precedes. The “therefore” may very well be taken as referring vaguely to the whole preceding Epistle and introducing a sort of epilogue.

Mr. Puller’s is the latest and most elaborate attempt to evade the plain meaning of the Jacobean text that we have met with; hence our reason for dealing with it so fully. It would be an endless task to notice the many other similarly arbitrary devices of interpretation to which Protestant theologians and commentators have recourse in attempting to justify their denial of the Divine efficacy of the Sacrament of the unction. Mr. Puller’s “confession” is a clear case of this, and it is enough to remark that the principal argument which he offers is one that has been disapproved by the Church in the East and West. The reason which he offers to reject the definition of a sacrament in the strict sense, an agreement which became explicit and formal as soon as the definition of a sacrament in the strict sense was formulated, but which was already implicitly and informally contained in the common practice and belief of preceding ages. We proceed, therefore, to study the witness of Tradition.

(C) Proof from Tradition.—(1) State of the Argument.—Owing to the comparative paucity of extant testimonies from the early centuries relating to this sacrament, Catholic theologians habitually recur to the liturgical prescription as the general argument for the end of the unitive, while its paramount spiritual purpose—to confer on the sick and dying graces which they specially need—may be, and is normally, obtained, not only is an adequate rationale of the Jacobean injunction provided, but a true instead of a false analogy with the efficacy of prayer is established.

But in defence of his thesis Mr. Puller is further obliged to maintain that all reference to the effects of the unction ceases with the words, “the Lord shall raise him up”, and that in the clause immediately following, “and if he be in sins, they shall be forgiven him”, St. James places an underived subject-matter. All three clauses are connected in the very same way with the unction, “and the prayer of faith... and the Lord... and if he be in sins...”, so that the remission of sins is just as clearly stated to be an effect of the unction as the saying and raising up. Had St. James meant to speak of the prayer of faith as directly and apart from the third clause, he could not have written in such a way as inevitably to mislead the reader into believing that he was still dealing with an effect of the priestly unction. In the nature of things there is no reason why unction as well as absolution by a priest might not be Divinely ordained for the sacramental remission of sin, and that it was so ordained is what every reader naturally concludes from St. James. Nor is there anything in the context to suggest a reference to the Sacrament of Penance in this third clause. The admonition in the following verse (16), “Confess, therefore, and pray one to another”, may refer to a mere liturgical confession like that expressed in the “Confiteor”; but even if we take the reference to be to sacramental confession and admit the genuineness of the connecting “therefore” (its genuineness is not beyond doubt), there is no compelling reason for connecting this admonition closely with the clause which immediately precedes. The “therefore” may very well be taken as referring vaguely to the whole preceding Epistle and introducing a sort of epilogue.

Mr. Puller’s is the latest and most elaborate attempt to evade the plain meaning of the Jacobean text that we have met with; hence our reason for dealing with it so fully. It would be an endless task to notice the many other similarly arbitrary devices of interpretation to which Protestant theologians and commentators have recourse in attempting to justify their denial of the Divine efficacy of the Sacrament of the unction. Mr. Puller’s “confession” is a clear case of this, and it is enough to remark that the principal argument which he offers is one that has been disapproved by the Church in the East and West. The reason which he offers to reject the definition of a sacrament in the strict sense, an agreement which became explicit and formal as soon as the definition of a sacrament in the strict sense was formulated, but which was already implicitly and informally contained in the common practice and belief of preceding ages. We proceed, therefore, to study the witness of Tradition.
several early commentators on St. James’s Epistle (by Clement of Alexandria, Didymus, St. Augustine, St. Cyril of Alexandria, and others) in which briefly we should look for reference to the unction. The earliest accurately preserved commentary is that of St. Bede (d. 735; the passage, as a witness for the sacrament, as is also Victor of Antioch (fifth century), the earliest commentator on St. Mark. Second, it is clear, at the period when testimonies become abundant, that the unction was allotted to penance as a supplementary sacrament, and as such was administered regularly before the Viaticum. We may presume that this order of administration had come down from remote antiquity, and this close connexion with penance, about which, as privately administered to the sick, the Fathers rarely speak, helps to explain their silence on extreme unction. Third, it should be remembered that there was no systematic sacramental theology before the Scholastic period, and, in the absence of this system, the interests of public instruction would call far less frequently for the treatment of this sacrament and of the other offices privately administered to the sick than would subjects of such practical importance as the preparation of catechumens and the administration and reception of those sacraments which were solemnly conferred in the church. If these, and similar considerations which might be added, are duly weighed, it will be seen that the comparative fewness of early testimonies is not after all so surprising. It should be observed, moreover, that charismatic and other unctions of the sick, even with consecrated oil, distinct from the Jacobean unction, were practised in the early ages, and that the vagueness of not a few testimonies which speak of the anointing of the sick makes it doubtful whether the reference is to the Apostolic rite or to some other usage. It should finally be premised that in stating the argument from tradition a larger place must be allowed for the principle of development than theologians of the past were in the habit of allowing. Protestant controversialists were wont virtually to demand that the early centuries should speak in the language of Trent—even Mr. Puller is considerably under the influence of this standpoint—and Catholic theologians have been prone to accommodate their defence to the terms of their adversaries’ demand. Hence they have undertaken in many cases to prove much more than the strictly bound to extant testimony that extreme unction was clearly recognized as a sacrament in the strict sense long before the definition of a sacrament in this sense was drawn up. It is a perfectly valid defence of the Tridentine doctrine on extreme unction to show that St. James permanently prescribed the rite of unction in terms that imply its strictly sacramental efficacy; that the Church for several centuries simply went on practising the rite and believing in its efficacy as taught by the Apostle, without feeling the need of a more definitely formulated doctrine than is expressed in the text of his Epistle; and that finally, when the need had arisen, the Church, in the exercise of her infallible authority, did define for all time the true meaning and proper efficacy of the Jacobean prayer-unction. It is well to keep this principle in mind in discussing the witness of the early ages, though as a matter of fact the evidence, as will be seen, proves more than we are under any obligation to prove.

(2) The Evidence.—(a) Ante-Nicene Period.—The earliest extant witness is Origen (d. 254), who, in enumerating the several ways of obtaining remission of sins, comes (seventhly) to “charismatic” penance, which involves the confession of one’s sins to the priest and the acceptance at his hands of “the salutary medicine”. And having quoted the Psalmist in support of confession, Origen adds: “And in this [in quo] is fulfilled also what St. James the Apostle says: ‘if any one is sick, let him call in the priests of the Church, and let them lay hands on him, anointing him with oil in the name of the Lord, and the prayer of faith shall save the sick man, and if he be in sins they shall be remitted to him’” (Hom. ii, in Levit., in P. G., XI, 419). We might be content to quote this as a proof merely of the fact that the injunction of St. James was well known and observed in Origen’s time, and that the rite itself was commonly spoken of at Alexandria as “a laying on of hands.” But when it is urged that he here attributes the remission of sins of which the Apostle speaks, not to the rite of unction but to the Sacrament of Penance, it is clear that while it is true the reason alleged for this interpretation of the passage. Some weight must be given to it that Origen is allegorizing, and that he takes the sick man in St. James to mean the spiritually sick or the sinner, thus changing the Apostolic injunction to the following: If anyone be in sins, let him call in the priests, and if he be in sins, they shall be remitted to him. But we cannot suppose the great Alexandrian capable of such illogicalness on his own account, or capable of attributing it to the Apostle. According to Mr. Puller (op. cit., pp. 42 sqq.), Origen, while quoting the whole text of St. James, means in reality to support the rite only to the sacrament of Penance, which would have been very much to the point and could not have caused any confusion? The truth is that the relation the Jacobean rite to penance is very obscurely stated by Origen: but, whatever may have been his views of that relation, he evidently means to speak of the whole rite, uniction, and affixing to it to assert that it is performed as a means of remitting sin for the sick. If it be held on the obscurity of the connexion that he absolutely identifies the Jacobean rite with penance, the only logical conclusion would be that he considered the unction to be a necessary part of penance for the sick. But it is much more reasonable and more in keeping with what we know of the penitential discipline of the period—Christians were admitted to canonical penance only once—to suppose that Origen looked upon the rite of unction as a supplement to penance, intended for those who either had never undergone canonical penance, or after penance might have contracted new sins, or who, owing to their “hard and laborious” course of satisfaction being cut short by sickness, might be considered need just such a complement to absolution, this complement itself being independently efficacious to remit sins or complete their remission by removal of their effects. This would fairly account for the confused grouping together of both ways of remission in the text, and it is a Catholic interpretation in keeping with the conditions of that age and with later and clearer teaching. It is interesting to observe that John Cassian, writing nearly two centuries later, and probably with this very text of Origen before him, gives similar enumeration of means for obtaining remission of sins, and in this enumeration the Jacobean rite is given as an independent place (Collat., XX, in P. L., XLIX, 1161).

Origen’s contemporary, Tertullian, in upholding heretics for neglecting the distinction between clergy and laity and allowing even women “to teach, to dispute, to perform exorcisms, to undertake curial [cura] and laborious [laboriosa] penance,” which involves the confession of one’s sins to the priest and the acceptance at his hands of “the salutary medicine”. And having quoted the Psalmist in support of confession, Origen adds: “And in this [in quo] is fulfilled also what St. James the Apostle says: ‘if any one is sick, let him call in the
to the belief that its administration was reserved to the priests.

St. Aphraates, "the Persian Sage", though he wrote (336–345) after Nicaea, may be counted as an Ante-

Nicene witness, since he lived outside the limits of the great Council, and was not influenced through ignorance of the Arian schism. Writing of the various uses of holy oil, this Father says that it contains the sign of the sacrament of life by which Christians [in baptism], priests [in ordination], kings, and prophets are made perfect; [it] illuminates darkness [in confirmation], anointa the sick; and by its secret anointment restores patients" (Denzinger, No. 223, 3, in Graffin, "Patrol. Syriaca", vol. I, p. iv).

It is hardly possible to question the allusion here to the Jacoeban rite, which was therefore in regular use in the remote Persian Church at the beginning of the fourth century. Its mention side by side with other unctions that are not sacramental in the strict sense is characteristic of the period, and merely shows that the strict definition of a sacrament had not been formulated. As being virtually Ante-Nicene we may give also the witness of the collection of liturgical prayers known as the "Sacramentary of Sarapion" (Sera-

pion, a Bishop of Thymiur in the Nile Delta and the friend of St. Athanasius.) The seventeenth prayer is a lengthy form for consecrating the oil of the sick, in the course of which God is besought to bestow upon the oil a supernatural efficacy "for good grace and remis-
sion of sins, for a medicine of life and salvation, for healthfulness of soul, body, spirit" (see p. 529 of the English translation). Here we have not only the recognition in plain terms of spiritual effects from the unction but the special mention of grace and the remission of sins. Mr. Puller tries to explain away several of these expressions, but he has no refuge from the force of the words. A "good grace and remission of sins" but an hold that they must be a later addition to the original text.

(b) The Great Patriarchic Age: Fourth to Seventh Century.—References to extreme unction in this period are much abundant and prove beyond doubt the universal use of the Jacoeban unction in every part of the Church. Some testimonies, moreover, refer specifically to one or more of the several ends and effects of the sacrament, as the cure or alleviation of bodily sickness and the remission of sins, while some may be said to anticipate pretty clearly the definition of extreme unction as a sacrament, and illustrating the universal use of the Jacoeban unction, we may cite in the first place St. Ephraem Syrus (d. 373), who in his forty-sixth polemical sermon (Opera, Rome, 1740, vol. II, p. 541), addressing the sick person to whom the priests minister, says: "They pray over thee; one blows on thee; another seals thee." The "sealing" here undoubtedly means "anointing with the sign of the cross", and the reference to St. James is clear [see Bickell, Carmina Nisibena, Leipzig, 1866, pp. 223, 4, note, and the other passage (seventy-third carmen) there discussed]. Nor would we call attention to the witness of an ancient Ordo compiled, it is believed, in Greek before the middle of the fourth century, but which is pre-

served only in a fragmentary Latin version made be-

fore the end of the fifth century and recently discov-
ered at Verona ("Didascalie Apostolorum" in "Frag-

menta Veronensia", ed. Hauler, Leipzig, 1900), and in an Ethiopic version. This Ordo in both versions con-

tains a form for consecrating the oil for the Jacoeban rite, the Latin praying for "the strengthening and healing" of those who use it, and the Ethiopic for their "strengthening and sanctification". Mr. Puller, who elsewhere discourses on this Ordo (p. 45 sq.), is once more obliged to postulate a corruption of the Ethiopic version because of the reference to san-

cification. But may not the "strengthening" spoken of as distinct from "healing" be spiritual rather than corporal? Likewise the "Testamentum Domini", compiled in Greek about the year 400 or earlier, and preserved in Syriac (published by Rahmani), and in Ethiopic and Arabic versions (still in MSS.), contains a form for consecrating the oil of the sick, in which, besides bodily healing, the sanctifying power of the oil is referred to in imitation of the "extreme unction of Our Lord", tr. Cooper and Maclean, 1902, pp. 77, 78). From these instances it appears that Sera-

pion's Sacramentary was not without parallels during this period.

In St. Augustine's "Speculum de Spiritu et Agente" (an. 427; in P. L. XXXII, 223), he is moved up to almost entirely of Scriptural texts, without comment by the compiler, and is intended as a handy manual of Christian piety, doctrinal and practical, the injunction of St. James regarding the prayer-unction of the sick is quoted. This shows that the rite was a common-

place in the Christian practice of that age; and we are told by Possidius, in his "Life of Augustine" (c. xxvii, in P. L., XXXII, 56), that the saint himself "followed the rule laid down by the Apostle that he should visit only orphans and widows in their tribulation (James, i, 27), and that if he happened to be asked by the sick to pray for him to the Lord, and since he had done so, he did so without delay". We have seen Origen refer to the Jacoeban rite as an "imposition of hands"; and this title survived to a very late period in the Church of St. Ambrose, who was himself an ardent student of Origen and from whom St. Augustine very clearly borrowed Matt. xxviii, 19, xxix, 19, and xxiv, 33, as well as Origen in St. Athanasius. St. Augustine himself used to administer the Jacoeban unction to the sick. This would be exactly on the lines laid down by Augustine's contemporary, Pope Innocent I (see below). St. Ambrose himself, writing against the Novatians (De Pecc., VIII, in P. L., XVI, 477), asks: "Why therefore do you lay on hands and believe it to be an effect of the blessing [benedic-
tionis opus] if any of the sick happen to recover? Why do you baptize, if sins cannot be remitted by men?" The coupling of this laying-on of hands with baptism and the use of both as arguments in favour of extreme unction, shows that Augustine was in question at least of the charismatic healing by a simple blessing, but of a rite which, like baptism, was in regular use among the Novatians, and which can only have been the unction of St. James. St. Athanasius, in his encyclical letter of 341 (P. G., XXXV, 234), complaining of the evils to religion caused by the intrusion of the Arian Bishop Gregory, mentions among other abuses that many catechumens were left to die without baptism and that many sick and dying Christians had to choose the hard alternative of being deprived of priestly ministrations which they considered a more terrible calamity than the disease itself, "hence the Jacoeban rite to be laid on their heads". Here again we are justified in seeing a reference to extreme unction as an ordinary Christian practice, and a proof of the value which the faithful attached to the rite. Cassiodorus (d. about 570) thus paraphrases the in-

junction of St. James (Complexiones in Epp. Aposto-
lorum, in P. L., LXX, 1380): "a priest is to be called in, who by the prayer of faith [oratione fidei] and the unction of the holy oil which he imparts will save him who is afflicted [by a serious injury or by sickness]." To these testimonies may be added many instances of the use of extreme unction recorded in the lives of the saints. See, e. g., the lives of St. Leobinus (d. about 550; Acta SS., 14 March, p. 348), St. Tresanus (ibid., 7 Feb., p. 55), St. Eugene (Eoghan), Bishop of Ardbracc (modern Ardstraw), in the Diocese of Derry; d. about 618; ibid., 23 Aug., p. 627). One instance
from the life of an Eastern saint, Hypatius (d. about 446), is worthy of particular notice. While still a young monk and before his elevation to the priesthood, he was appointed infirmary physician in his monastery (in Bithynia), and while occupying this office he gradually acquired a great deal of charity in his care of the sick, whom he sought out and brought to the monastery. “But if the necessity arose,” says his disciple and biographer, “of anointing the sick person, he reported to the abbot, who was a priest (ἀρτέρων ἔφη), and had theunction with the blessed oil performed by him. And it often happened that in a few days, by persevering in these efforts, he saved a man home restored to health” (Acta SS., 17 June, p. 251).

It appears from this testimony that the Jacobean unction was administered only to those who were seriously ill, that only a priest could administer it, that consecrated oil was used, that it was distinct from the sacrament of unction (which the saint himself used to perform, while still a layman, using consecrated oil), and finally that bodily healing did not always follow and was not apparently expected to follow, and that when it did take place it was not regarded as miraculous. It is, therefore, implied that other effects besides bodily healing were believed to be produced by the Jacobean unction, and these must be understood to be spiritual.

As evidence of the use of the unction by the Nestorians we may refer to the nineteenth canon of the synod held at Seleucia in 554 under the presidency of the Patriarch of Antioch, and in which St. Cyril of Alexandria, speaking of the fathers who have been addicted to various disoblitative and superstitious practices, prescribes that any such person on being converted shall have applied to him, “as to one who is corporally sick, the oil of prayer blessed by the priests” (Chabot, Synodicon Orientale, 1902, p. 363). Here, besides the Jacobean unction, we have an early instance of an abuse, which prevails in the modern Orthodox (schismatical) church, of permitting the euchelaios to be administered, on certain days of the year, to people who are in perfect health, as a complement of penance and a preparation for Holy Communion (see below VI, (3)).

That the Monophysites also retained the Jacobean unction after their separation from the Catholic Church (451) is clear from the fact that their liturgies (Armenian, Syrian, and Coptice) contain the rite for blessing the oil. There is reason to suppose that this practice has developed, in its present form, from a rite borrowed from, or modelled upon, the Byzantine rite of a later period (see Brightman in “Journal of Theological Studies”, 1, p. 261), but this rite supposes that they already possessed the unction itself. It has nowadays fallen into disuse among the Nestorians and Armenians, though not among the Coptes.

Many testimonies might be quoted in which the Jacobean unction is recommended specifically as a means of restoring bodily health, and the faithful are urged to receive it instead of recurring, as they were prone to do, to various superstitious remedies. This is the burden of certain passages inProcopius of Gaza [c. 465-525; “In Levit.” xix, 31, in P. G. LXXVI (1), 762 sq.], Isaac of Antioch (b. about 380; Opp. ed. Bickell, Pl. i, pp. 187 sq.), St. Cyril of Alexandria (De Adorat. in Spiritu et Veritate, VI, in P. G., LXVIII, 475 sq.), and John Mandakuni (Montagouni), Catholicos of the Armenians from 480 to 487 (Schmid, Reden des Jeanes Mandakuni, pp. 222 sq.). This particular effect of the prayer-unction is the one especially emphasized in the form used to this day in the Orthodox Eastern Church (see above, I).

Mention of the remission of sins as an effect of the Jacobine rite is also fairly frequent. It is coupled with bodily healing by St. Caehistorius in the passage just referred to: the sick person will “receive both health of body and remission of sins, for the Holy Ghost has given this promise through James”. We have mentioned the witness of John Cassian, and the witness of his master, St. Chrysostom, may be given here. In his work “On the Priesthood” (III, vi, in P. G., XLVIII, 475 sq.), St. Chrysostom proves the dignity of the priesthood by showing, among other arguments, that the priests by their spiritual ministry do more than any one of our own parents can do. Whereas our parents only bestow our bodies, which they cannot save from death and disease, the priests regenerate our souls in baptism and have power, moreover, to remit post-baptismal sins. A power which St. Chrysostom proves by quoting the text of St. James. The passage, as orig- gen discussed above, has given rise to no little controversy, and it is claimed by Mr. Puller (op. cit., pp. 45 sqq.) as a proof that St. Chrysostom, like Origen, understood St. James as he (Mr. Puller) does. But if this were so it would be still true that only clinical penance is referred to, and this text of the sick that St. James can be understood to speak; and the main point of Mr. Puller’s argument, viz., that it is inconceivable that St. Chrysostom should pass over the Sacrament of Penance in such a context, would have lost all but hardly any of its force. We know very little, except by way of inference and assumption, about the practice of clinical penance in that age; but we are well acquainted with canonical penance as administered to those in good health, and it is to this obviously we should expect the saint to refer, if he were bound to fill the text so. Mr. Puller is probably aware how very difficult it would be to prove that St. Chrysostom anywhere in his voluminous writings teaches clearly and indisputably the necessity of confessing to a priest: in other words, that he recognizes the Sacrament of Penance as Mr. Puller recognizes it; and in view of this great obscurity in the meaning of the passage, the fundamental importance it is not at all so strange that penance should be passed over here. We do not pretend to be able to enter into St. Chrysostom’s mind, but assuming that he recognized both penance and unction to be efficacious for the remission of post-baptismal sins—and the text before us plainly states this in regard to the unction—we may perhaps find in the greater affinity of unction with baptism, and in the particular points of contrast he is developing, a reason why unction rather than penance is appealed to. Regeneration by water in baptism appears to be of greater importance than the oil from spiritual disease and eternal death to the inability of parents to save their children from bodily disease and death. St. Chrysostom might have added several other points of contrast, but he confines himself in this context to these two; and supposing, as one ought in all cases, to suppose, that he understood the text of St. James as we do, in its obvious and natural sense, it is evident that the prayer-unction, so much more akin to baptism in the simplicity of its ritual character and so naturally suggested by the mention of sickness and death, supplied a much more illustrative point of priestly power of remitting post-baptismal sins than the judicial process of penance. And a single illustrative example was all that the context required.

Victor of Antioch (fifth century) is one of the ancient witnesses who, in the general terms they employ, speak of the Jacobean unction, anticipate more or less clearly the definition of a sacrament in the strict sense. Commenting on St. Mark, vi, 13, Victor quotes the text of St. James and adds: “Oil both cures pains and is a source of light and refreshment. The oil, then, used in anointing signifies both the mercy of God, and the cure of the disease, and the enlightening of the heart. For it is manifest to all that the prayer effected all this; but the oil, as I think, was the symbol of these things” (Cramer, Catena. Grec. Patrum, I, p. 324). Here we have the distinction, so well known in later theology, between the signification
and causality of a sacrament; only Victor attributes the signification entirely to the matter and the causality to the form (the prayer). This was to be corrected in the fully developed sacramental theory of later times, but the attribution of sacramental effects to the form, as the word of the minister, is characteristic of the patristic suggestions of a theory. Victor clearly attributes both spiritual and corporal effects to the prayer—unction; nor can the fact that he uses the imperfect tense (\(\text{\textit{a}}\,\text{\textit{p}}\text{\textit{ere}}\), "effected"); \(\text{\textit{\d{e}}\,\text{\textit{p}}}\text{\textit{ere}}\), "was") be taken to imply that the use of the unction had ceased at Anno. Both the latter day. The use of the present tense in describing the signification of the rite implies the contrary, and independent evidence is clearly against the supposition. In the passage from John Mandakuni, referred to above, the prayer-unction is repeatedly described as "the gift of grace," "the grace of God," Divinely instituted and prescribed, and which cannot be neglected and despised without incurring "the curse of the Apostles"; language which it is difficult to understand unless we suppose the Armenian patriarch to have reckoned the unction among the most sacred of Christian rites, or, in other words, regarded it as that which we describe as a sacrament in the strict sense (cf. Kern, op. cit., pp. 46, 47).

There remains to be noticed under this head the most celebrated of all patristic testimonies on extreme unction, the well-known passage in the Letter of Pope Innocent I (402–17), written in 416, to Decentius, Bishop of the same see, in answer to inquiries for charitable, not allowed by the latter for solution. In answer to the question as to who were entitled to the unction, the pope, having quoted the text of St. James, says:

"There is no doubt that this text must be received or understood of the sick faithful, who may be lawfully anointed with the holy oil of which he has been blessed by the bishop, it is permitted not only to priests but to all Christians to use for anointing in their own need or that of their families." Then he diverges to point out the superfluous character of a further doubt expressed by Decentius: We notice the superfluous addition of a doubt whether a bishop may do what is undoubtedly permitted to priests. For priests are expressly mentioned [by St. James] for the reason that bishops, hindered by other occupations, cannot go to all the sick. But if the bishop is able to do or thinks anyone specially worthy of being visited, he, with the assistance of God, is to consent to the anointing of the sick. Hence, the pope adduced the words, "if he be in sins they shall be remitted to him," after quoting I Cor., xi, 30, to prove that "many because of sins committed in the soul are stricken with bodily sickness or death he goes on to speak of the necessity of confession: "If, therefore, the sick be in sins and shall have confessed these to the priests of the Church and shall have sincerely undertaken to relinquish and amend them, they shall be remitted to them. For sins cannot be remitted without the confession of amendment. Hence the injunction is rightly added [by St. James]: "Confess, therefore, your sins" (op. cit., 59 sq.), omits all reference to the Holy Eucharist, though it is by far the most obvious and important of the "other sacraments" of which Innocent is speaking, and diverts his reader's attention to the eulogia, or blessed bread (\textit{paulo \textit{benedictum}}), a sacramental which was in use in many churches at that time and in later ages, but to which there is not the least reason for believing that the pope meant specially to refer. In any case the reference is certainly not exclusive, as Mr. Puller leaves his reader to infer. What Pope Innocent explicitly teaches is that the "sacrament" enjoined by St. James was to be administered to the sick faithful who were not doing canonical penance; that priests, and a fortiori bishops, can administer it; but that the oil must be blessed by the bishop. The exclusion of sick penitents from this "sacrament" must be understood, of course, as being subject to the same exception as their exclusion from the other sacraments", and the latter are directed to be given before the annual Easter reconciliation when danger of death is imminent: "Quando usque ad desperandum veniit, ante tempus passione relaxandum [est] ne de seculo [agrotus] absque communione discedat." If the words of Innocent—and the same observation applies to other ancient testimonies, e.g. to that of Cassarius of Arles referred to above—seem to imply that the laity were permitted to anoint themselves or members of their household with the oil itself, this is not impossible nor altogether unreasonable to understand the language used by Innocent and others in a causative sense, i.e. as meaning not that the laity were permitted to anoint themselves, but that they were to have the blessed oil at hand to secure their being anointed by the priest according to the prescription of St. James. We believe, however, that this is a forced and unnatural way of understanding such testimonies, all the more so as there is demonstrative evidence of the devotional and charitable use of sacred oil by the laity during the middle centuries.

It is worth adding, as a conclusion to our survey of this period, that Innocent's reply to Decentius was incorporated in various early collections of canon law, some of which, as for instance that of Dionysius Exiguus (P. L., LXVII, 240), were made towards the end of the fifth or the beginning of the sixth century. In this way Innocent's text became known and was received as law in most parts of the Western Church.

(c) The Seventeenth Century and Later.—One of the most important witnesses for this period is St. Bede (d. 735), who, in his commentary on the Epistle of St. James, tells us (P. L., XCIII, 19), that, as in Apostolic times, so now the custom of the Church is that the sick should be anointed by the priests with consecrated oil and through the accompanying prayer restored to health. He adds that, according to Pope Innocent, even the laity may use the oil provided it has been consecrated by a bishop; and commenting on the clause, "if he be in sins they shall be remitted to him," after quoting I Cor., xi, 30, to prove that "many because of sins committed in the soul are stricken with bodily sickness or death," he goes on to speak of the necessity of confession: "If, therefore, the sick be in sins and shall have confessed these to the priests of the Church and shall have sincerely undertaken to relinquish and amend them, they shall be remitted to them. For sins cannot be remitted without the confession of amendment. Hence the injunction is rightly added [by St. James]: "Confess, therefore, your sins" (op. cit., 59 sq.), omits all reference to the Holy Eucharist, though it is by far the most obvious and important of the "other sacraments" of which Innocent is speaking, and diverts his reader's attention to the eulogia, or blessed bread (\textit{paulo \textit{benedictum}}), a sacramental which was in
baptismal sins, a necessity recognized in Catholic teaching, Bede does not deny that theunction also may be efficacious in remitting, or at least in completing their remission, or in remitting the lighter daily sins which need not be confessed. The bodily sickness which the unctio, or intended to heal is regarded by St. Paschasius as being, often at any rate, the effect of sin, and it is interesting to notice that Amalarius of Metz, writing a century later (De Ecclesi. Offic., I, xii, in P. L., CV, 1011 sq.), with this passage of Bede before him, expressly attributes to the unctio not only the healing of sickness due to the unworthy reception of the Eucharist, but the remission of daily châtiments. The unctio saves the sick is manifestly the prayer of faith, of which the sign is the unction of oil. If those whom the unction of oil, i.e. the grace of God through the prayer of the priest, assist are sick for the reason that they eat the Body of the Lord unworthily, it is right that the consecration of the oil of which there is question should be associated with the consecration of the Body and Blood of the Lord, which takes place in commemoration of the Passion of Christ, by whom the author of sin has been eternally vanquished. The Passion of Christ destroyed the author of death; His grace, which is signified by the unction of oil, has destroyed his arms, which are daily sins.

The confusing way in which St. Bede introduces penance in connexion with the text of St. James is intelligible enough when we remember that the unction was regarded and administered as a complement of the Sacrament of Penance. The unction had yet been raised about their respective independent effects. In the circumstances of the age it was more important to insist on the necessity of confession than to discuss with critical minuteness the effects of the unction, and one had to be careful not to allow the text to be misunderstood or to be misunderstood with this necessity for the sick sinner. The passage in St. Bede merely proves that he was preoccupied with some such idea in approaching the text of St. James. Paschasius Radbertus (writing about 831) says from the same standpoint that "according to the Apostle when anyone is sick, recourse is to be had in the first place to confession of sins, then to the prayer of many, then to the sanctification of the unction (or, the unction of sanctification)" (De Corp. et Sang. Domini, c. viii, in P. L., CXX, 1292); and the same writer, in what he tells us of the death of his abbot, St. Adalbert of Corbie, in 821, speaks of the prevalence of an opinion that it was only those in sin who had need of the unction. The assembled monks, who regarded the holy ablution as "free from the burdens of sins", doubted whether they should procure the Apostolic unction for him. But the saint, overhearing the debate, demanded that it should be given at once, and with his dying breath exclaimed: "Now dismiss thy servant in peace, because I have received all the sacraments of Thy mystery" (P. L., CXX, 1547).

As proving the uninterrupted universality during this period of the practice of the Jacobean rite, with a clear indication in some instances of its strictly sacramental efficacy, we shall add some further testimonies from writers, synods, and the precepts of particular bishops. As doubts may be raised regarding the age of any particular expression in the early medieval liturgies, we shall omit all reference to any suggestion is all the less need to be exhaustive as the adversaries of Catholic teaching are compelled to admit that from the eighth century onwards the strictly sacramental conception of the Jacobean rite emerges clearly in the writings and legislation of both the Eastern and the Western Churches. Be this as it may, St. Hilary, Bishop of Lyons (315-367), in his Homily on Luke, ix. (6, P. L., CVIII, 573), and Amulo, Bishop of Lyons (about 841), in his letter to Theobald (P. L., CXLVI, 82), speak of the unction of the sick as an Apostolic practice. Prudentius, Bishop of Treves (about 843-861), tells how the holy virgin Maura asked to receive from his own hands "the Sacraments of the Eucharist and of Extreme Unction" (P. L., CVI, 1374; cf. Acta SS., 21 Sept., p. 272); and Jonas, Bishop of Orleans, in his "Institutio Laicæ" (about 829), after reprobating the popular practice of recurring in sickness to magical observances, ordains that "in sickness to demand, not from wizards and witches, but from the Church and her priests, the unction of sanctified oil, a remedy which [as coming from Our Lord Jesus Christ] will benefit him not only in body but in soul" (III, xiv, in P. L., CVI, 122 sq.). Already the Second Council of Orleans (818) in its first canon, had prescribed as obligatory the unction enjoined by St. James, "since a medicine of this kind which heals the sicknesses of soul and of body is not to be lightly esteemed" (Hardouin, IV, 1040). The Council of Aachen in 830 warns the priest not to neglect giving penance and unction to the sick person (once his illness becomes serious), and when the end is seen to be imminent the soul is to be commended to God "more sacerdotali cum receptione sacri munitionis" (cap. ii, can. v, ibid., 1397). The First Council of Mainz (847), held under the presidency of St. Paschasius Maurus (can. iii), prescribed the order of the administration of penance, unction, and the Viaticum (Hardouin, V, 13); while the Council of Pavia (850), legislating, as seems clear from the wording of the capitulary (viii), according to the traditional interpretation of Pope Innocent’s letter to Germanus, proscribes as those who commit the sins of consecrating the sacred anointing, and the blessed oil, in instructing the faithful regarding “that salutary sacrament which James the Apostle commands . . . a truly great and very much to be desired mystery, by which, if asked for with faith, both sins are remitted and as a consequence corporal health restored” (ibid., I, 27; Denzinger, 1908, no. 415). The statutes attributed to St. Sonnatus, Archbishop of Reims (about 600-631), and which are certainly anterior to the ninth century, direct (no. 15) that “extreme unction is to be brought to the sick person who asks for it”, and “that the priest himself is to visit him often, animating and duly preparing him for future glory” (P. L., LXXX, 445; cf. Hefele, Conciliumgesch., III, 77). The fourth of the canons promulgated (about 745) by St. Boniface, the Apostles of Germany (see Hefele, III, 350 sq.), forbids priests to "order the chalice, without the consecration, and the blessed oil, and the Eucharist", so that in any emergency they may be ready to offer their ministrations; and the twenty-ninth orders all priests to have the oil of the sick always with them and to warn the sick faithful to apply for the unction (P. L., LXXXIX, 382 sq.). In the "Exceptiones" of Egbert, Archbishop of York (732-766), the unction is mentioned between penance and the Eucharist, and ordered to be diligently administered (P. L., LXXXIX, 382). But no writer of this period treats of the unction so fully as, and none more unqualmily regards it as a true sacrament in the strict sense like, Theodulf, Bishop of Orleans, and with him we will conclude our list of witnesses. A long section of his second Capitulare, published in 789, is taken up with the subject (P. L., (V, 220 sq.)): "Priests are also to be admonished regarding the unction of the sick, and penance, and the Viaticum, lest any one should die without the Viaticum." Penance is to be given first, and then, “if the sickness allow it,” the patient is to be carried to the church, where the unction and Holy Communion are to be given. Theodulf describes the unction in detail, ordering fifteen, or three times more, crosses to be made with the oil to symbolize the Trinity and the five senses, but noting at the same time that the practice varies as to the number of anointings and the parts anointed. He quotes with approval the form used by the Greeks while anointing, in which re- mission of sins is expressly mentioned; and so clearly is the unction in his view intended as a preparation for
death that he directs the sick person after receiving it
to commend his soul into the hands of God and bid
farewell to the living. He enjoins the unction of sick
children also on the ground that it sometimes cures
them, and that penance is (often) necessary for them.
This teaching is so clear and definite that
Protestant controversialists recognize him as the
originator in the West of the teaching which, as they
claim, transformed the Jacobean rite into a sacrament.
But from all that precedes it is abundantly clear that
no such transformation occurred. Some previous
writers, also, have seen, had explicitly taught an
instrument which claimed the sanctity of Theodore's
doctrine, to which a still more definite expression was
later to be given. The Scholastic and Tridentine doc-
trine is the only goal to which patristic and medieval
teaching could logically have led.

IV. MATTER AND FORM.—(For the technical mean-
ing of these terms in sacramental law see Sacra-
ments.)—(1) The remote matter of extreme unction
is consecrated oil. No one has ever doubted that
the oil meant by St. James is the oil of olives, and in
the Western Church pure olive oil without mixture of any
other substance seems to have been almost always
used. But in the Eastern Church the custom was intro-
duced early of adding in some places a little water,
as a symbol of baptism, in others a little wine, in
memory of the good Samaritan, and, among the Nester-
ian, a little ashes or dust from the sepulchre of some saint.
But that the oil must be blessed or con-
secrated, or that the oil used is the homily oil, has
been the subject of much discussion from the begin-
ing of the ages. Some theologians, however, have held
consecration to be necessary merely as a matter of
precept, not essential for the validity of the sacrament,
E. g. Victoria (Summ. Sacrætorum, no. 219),
Jouin (Comm. hist. et dogm. de Saccram., D. vii, q. iii,
c. 18), Drouin (De Re Sacrætorum, Lib. vii, q. ii, c. 1, 2);
indeed Bertin, while holding the opposite himself, ad-
mitted the wide prevalence of this view among the
recent theologians of his day. But considering the
unchangeable character of the institution, and insist in on the oil being
blessed, and the teaching of the Council of Trent
(Sess. XIV) that “the Church has understood
the matter of this sacrament to be oil blessed by the
bishop,” it is not surprising that by a decree of the
Holy Office, issued 13 Jan., 1611, the proposition as-
serting the validity of extreme unction with the use of
oil not consecrated by the bishop should have been
proscribed as “rush and near to error” (Denzinger,
no. 1628—old no. 1194), and that, to the question whether a parish priest could in case of necessity val-
didly use for this sacrament oil blessed by himself, the
same Holy Office, reafirming the previous sentence,
should have replied in the negative (14 Sept., 1842;
ibid., no. 1629—old no. 1195). These decisions only
settle the dogmatic question provisionally and, so far
as they affirm the necessity of episcopal
consecration of the oil, are applicable only to the Western
Church as is well known, it is the officiating priest
who ordinarily bless the oil in the Western Church,
and there is no lack of evidence to prove the
antiquity of this practice (see Benedict XIV, De Synod.
Dioec. VIII, i, 4). For Italo-Greeks in communion with
the Holy See the practice was sanctioned by
Clement VII in 1535 and by Benedict XIV (see ibid.)
in 1742; and it has likewise been sanctioned for vari-
ous bodies of Eastern Unists down to our own day (see "Collect. Licencias", II, pp. 35, 150, 582, 479 sq.; cf.
Letter of Leo XIII, "De Discipl. Orient. conserv-
anda," in "Acta S. Nobilis", XXVII, pp. 257 sq.). The
reason, therefore, that priests can be dele-
gated to bless the oil validly, and though there is no
evidence on such delegation being given to Western
priests. But it is only the supreme authority
in the Church that can grant delegation, or at least it
may reserve to itself the power of granting it (in case
one should wish to maintain that in the absence of
reservation the ordinary bishop would have this
power). The Eastern Unists have the express appro-
bation of the Holy See for their discipline, and, as
regards the schismatical Orthodox, one may say either
that they have the tacit approbation since the res-
ervation of episcopal power does not ex-
tend to them. In spite of the schism the pope has
never wished or intended to abrogate the ancient
privileges of the Orthodox in matters of this kind.
The prayers for blessing the oil that have come down
to us differ very widely, but all of them bear
reference to the purpose of anointing the sick. Hence,
least in a case of a bishop, whose power is ordinary
and not delegated, no special form would seem to be
necessary for validity, provided this purpose is ex-
pressed. But where it is not at all expressed or
intended, as in the forms at present used for blessing the
chrism and the oil of catechumens, it appears doubtful
whether either of these oils would be valid matter
for extreme unction (cf. Kern, op. cit., p. 131). But in
the nature of things there does not seem to be any
reason why a composite form of blessing might not
suffice to make the same oil valid matter for more than
one of the sacraments.

(2) The proximate matter of extreme unction is
the unction with consecrated oil. The parts anointed
according to present usage in the Western and Eastern
Churches have been stated above (1), but it is to
be observed that even to-day there are differences of
practice in various branches of the Orthodox Church
(see Echos d'Orient, 1899, p. 194). The question is
whether several unctions are necessary for a valid
sacrament, and if so, which are the essential ones.
Arguing from the practice with which they were ac-
quired and which they assumed to have existed
away, the Scholastics and the Traditionalists usu-
ally think that the unctions of the five organs of sense were
essential. This was the teaching of St. Thomas (Suppl.,
Q. xxxii, a. 6), who has been followed pretty una-
niously by the School and by many later theologians
down to our own day (e. g. Billot, De Sacramentis, II,
p. 231) who set the method and tradition of the School
above positive and historical theology. But a wider
knowledge of past and present facts has made it in-
creasingly difficult to defend this view, and the best
theologians of recent times have denied that the un-
cion of the five senses, any more than that of the foot
senses, is essential for the validity of the unction.
The facts, broadly speaking, are these: that no ancient
testimony mentions the five unctions at all, much less
prescribes them as necessary, but most of them speak
simply of unction in a way that suggests the sufficiency
of a single unction; that the unction of the five senses
has never been extensively practised in the East,
and is not practised at the present time in the Orthodox
Church, while those Unists who practise it have sim-
ply borrowed it in modern times from Rome; and
that even in the Western Church down to the eleventh
century the practice was not very widespread, and did
not become universal till the seventeenth century.
This is proved by a number of sixteenth-century Rituals
that have been preserved (for details and sources see
Kern, op. cit., p. 133 sq.). In face of these facts it is
impossible any longer to defend the Scholastic view
except by maintaining that the Church has frequently
changed the essential matter of the sacrament, or that
she has allowed it to be invalidly administered during
the greater part of her history, as she still allows with-
out protest in the East. The only conclusion, there-
fore, is that as far as the matter is concerned nothing
more is required for a valid sacrament than a true un-
ction with duly consecrated oil, and that the unction
may henceforth be regarded as certain by reason of the
recent decree of the Holy Office already referred to
(1), which, though it speaks only of the form, evi-
dently supposes that form to be used with a single
unction. Besides the authority of the Scholastic tradition, which was based on ignorance of the facts, the only dogmatic argument for the view we have rejected is to be found in the instruction of Eugene IV to the Armenians [see above, III (A)]. But in reply to this it is enough to mark that this is not a dogmatic definition but a disciplinary instruction, and that, if it were a definition, those who appeal to it ought in consistency to hold the unction of the feet and hands to be essential. It is hardly necessary to add that, while denying the necessity of the unctions prescribed in the Roman Ritual for the validity of the sacrament, there is no mention of denouncing the grave obligation of adhering strictly to the Ritual except, as the Holy Office allows, in cases of urgent necessity.

(3) The forms of extreme unction from the Roman Ritual and the Euchologion have been given above (1). However ancient may be either form in its substance, it is certain that many other forms substantially different from the present have been in use both in the East and the West (see Martène, "De Antiquis Eccl. Rit.", I, vi, 4; and Kern, op. cit., pp. 142-152); and the controversy among theologians as to what precise form or kind of form is necessary for the validity of the sacrament has followed pretty much the same lines as that about the proximate matter. That some form is essential, and that what is essential is contained in both the Eastern and Western forms now in use, is admitted by all. The problem is to decide not merely whether a form in either case may be omitted without invalidating the sacrament, but whether the words retained as essential must necessarily express a prayer—"the prayer of faith" spoken of by St. James. Both forms as now used are depreciatory, and for the West the Holy Office has decided that words may be omitted in cases of necessity. But the form of the Roman Ritual. That the form, whether short or long, must be a prayer-form, and that a mere indicative form, such as "I anoint thee" etc., would not be sufficient for validity, has been the opinion of most of the great Scholastics and of many later theologians. But not a few Scholastics of eminence, and nearly all later theologians who have made due allowance for the facts of history, have upheld the opposite view. For the fact is that the indicative form has been widely used in the East and still more widely in the West, it is the form we meet with in the very earliest Church Orders preserved, viz., those of the Celtic Church (see Warren, "Liturgy and Ritual of the Celtic Church", e.g. p. 168: "I anoint thee with sanctified oil in the name of the Trinity that thou mayst be saved for ever and ever"; cf. p. 223). Among contemporary theologians Kern (op. cit., pp. 151 sq.), who is followed by Pohle (Lehrbuch der Dogmatik, 3d ed., Paderborn, 1908, III, 534), suggests a compromise by holding, on the one hand, that at least a virtual prayer-form is required by the text of St. James and, on the other hand, that the indicative forms that have been and are virtually depreciatory, if this seems to be only a subtle way of denying the raison d'être of the controversy; one might argue on the same principle that the forms of baptism, penance, and confirmation are virtually prayer-forms. Some of the so-called indicative forms may be reasonably construed in the same way, with Benedict XIV, that "we do not know how a prayer can be discovered in certain other forms published from very many ancient Rituals by Ménard and Martène, in which there is used merely the words "I anoint thee" without any thing else being added from which a prayer can be deduced." (De Sacram. Consecr., VIII, ii, 2).

If it be insisted that prayer as such must be in some way an element in the sacrament, one may say that the prayer used in blessing the oil satisfies this requirement. What has been said in regard to the matter is to be repeated here, viz., that the dogmatic contro-

versy about the form does not affect the disciplinary obligation of adhering strictly to the prescriptions of the Ritual, or, for cases of urgent necessity, to the decree of the Holy Office.

V. MINISTER.—(1) The Council of Trent has defined in accordance with the words of St. James that the proper ministers (ministros) are the priests of the Church alone, that is, bishops or priests ordained by them (Sess. XIV, cap. iii, and can. iv, De Extr. Unct.). And this has been the constant teaching of tradition, as is clear from the testimonies given above. Yet Launoi (Opp., I, 569 sq.) has maintained that deaconary and sub-deaconary can validly administer extreme unction, appealing in support of his view to certain cases in which they were authorized in the absence of a priest to reconcile dying penitents and give them the Viaticum. But in none of these cases is extreme unction once mentioned or referred to, and one may not gratuitously assume that the permission given extended to this sacrament, all the more so as there is not a particle of evidence from any other source to support the assumption. The Carmelite Thomas Waldens (d. 1430) inferred from the passage of Innocent I (see above, under III (C), (b)) that, in essence for the validizing of the sacrament has followed pretty much the same lines as that about the proximate matter. That some form is essential, and that what is essential is contained in both the Eastern and Western forms now in use, is admitted by all. The problem is to decide not merely whether a form in either case may be omitted without invalidating the sacrament, but whether the words retained as essential must necessarily express a prayer—"the prayer of faith" spoken of by St. James. Both forms as now used are depreciatory, and for the West the Holy Office has decided that words may be omitted in cases of necessity. But the form of the Roman Ritual. That the form, whether short or long, must be a prayer-form, and that a mere indicative form, such as "I anoint thee" etc., would not be sufficient for validity, has been the opinion of most of the great Scholastics and of many later theologians. But not a few Scholastics of eminence, and nearly all later theologians who have made due allowance for the facts of history, have upheld the opposite view. For the fact is that the indicative form has been widely used in the East and still more widely in the West, it is the form we meet with in the very earliest Church Orders preserved, viz., those of the Celtic Church (see Warren, "Liturgy and Ritual of the Celtic Church", e.g. p. 168: "I anoint thee with sanctified oil in the name of the Trinity that thou mayst be saved for ever and ever"; cf. p. 223). Among contemporary theologians Kern (op. cit., pp. 151 sq.), who is followed by Pohle (Lehrbuch der Dogmatik, 3d ed., Paderborn, 1908, III, 534), suggests a compromise by holding, on the one hand, that at least a virtual prayer-form is required by the text of St. James and, on the other hand, that the indicative forms that have been and are virtually depreciatory, if this seems to be only a subtle way of denying the raison d'être of the controversy; one might argue on the same principle that the forms of baptism, penance, and confirmation are virtually prayer-forms. Some of the so-called indicative forms may be reasonably construed in the same way, with Benedict XIV, that "we do not know how a prayer can be discovered in certain other forms published from very many ancient Rituals by Ménard and Martène, in which there is used merely the words "I anoint thee" without any thing else being added from which a prayer can be deduced." (De Sacram. Consecr., VIII, ii, 2).

If it be insisted that prayer as such must be in some way an element in the sacrament, one may say that the prayer used in blessing the oil satisfies this requirement. What has been said in regard to the matter is to be repeated here, viz., that the dogmatic contro-

versy about the form does not affect the disciplinary obligation of adhering strictly to the prescriptions of the Ritual, or, for cases of urgent necessity, to the decree of the Holy Office.
centuries by a single priest; this has been indeed at all times the almost universal practice in the West (for exceptions cf. Martène, op. cit., I, vii, 3; Kern, op. cit., p. 290). In the East, however, it has been more generally the custom for several priests to take part in the administration of the sacrament (in especially the number seven, chosen for mystical reasons, was the ordinary number in many parts of the East from an earlier period, it does not seem to have been prescribed by law for the Orthodox Church before the thirteenth century (cf. Kern, op. cit., p. 290). But even those Oriental theologians who with the exception of the so-called St. Bonaventure, “Breviloquium”, P. VI, c. xi; Scotus, “Deo Patre” (1472) for one priest merely to anoint and another merely to pronounce the form, and most theologians deny the validity of the unction in the case of the sick. The see, however, of the thirteenth century is for each priest in turn to repeat the whole rite, both matter and form, with variations only in the non-essential prayers. This brings rise to an interesting question which will best be discussed in connexion with the repetition of the sacrament (below, IX).

(1) Extreme  

(2) Grave or serious bodily illness is required for the valid reception of extreme  

(3) Down to the twelfth century in the Western Church the practice was to give the unction freely to all (except public penitents) who were suffering from any serious illness, without waiting to decide whether danger of death was imminent. This is clear from the three texts quoted above. The practice of giving the unction in the twelfth and thirteenth centuries a change of practice took place, and the sacrament came to be regarded by many as intended only for the dying. The causes contributing to this change were: a) the extortiory demands of the clergy on the occasion of administering the unction which might be interpreted as a pretext for moderate means of making a profit, while the number of other theologians that, as the principal effect of the sacrament was the last remission of venial sins, it should not be given except to those who could not recover, and were no longer able or at least likely to fall again into venial sin (St. Bonaventure, “Breviloquium”, P. VI, c. xi; Scotus, “Deo Patre”, dist. xiii, Q. unica). It was doubtless under the influence of this teaching that one or two provincial synods of the sixteenth century described the subject of extreme  

(4) The essential effect of extreme unction is to give, with sanctifying grace or its, in the present state of the sacrament, grace for spiritual and physical needs and temptations which specially beset in person in the  

(5) A careful observation of the above facts, the of several causes, during the disturbances of the thirteenth century, in its total abandonment in many parts of Germany and especially of Bavaria (Knöpfler, “Die Kelchbewegung in Central-Preussen”, p. 29 sqq.), in view of these facts, the repeated accusation of the Eastern schismatics, that the Latins gave the sacrament only to the dying and withheld it from the seriously ill who were capable of receiving it, is without foundation (Kern, op. cit., p. 274); but they were wrong in assuming that the Western Church was incapable of doing this. Church authority earnestly tried to correct the avarice of the clergy and the superstitions of the people, while the regarding the chief effect of the unction, was never generally admitted in the schools, and its post-Tridentine adherents have felt compelled to modify the practical conclusion which St. Bonaventure and Scotus had logically drawn from it. There still lingered in the popular mind traces of the erroneous opinion that extreme unction is to be postponed till a sickness otherwise serious has taken a critical turn for the worse, and the danger of death imminent; and by reason of this idea as strongly as they ought to, with the result that in many cases the Divinely ordered effect of corporal healing is rendered impossible except by a miracle. The best and most recent theological teaching is in favour of a lenient, rather than of
a severe, view of the gravity of the sickness, or the proximity of the danger of death, required to qualify for the valid reception of extreme unction; and this is clearly compatible with the teaching of the Council of Trent and is supported by the traditional practice of the first five centuries.

But if the Easterns have had some justification for their charge against the Westerns of unduly restricting the administration of this sacrament, the Orthodox Church is officially responsible for a widespread abuse of the opposite kind which allows the eucharist to be given to persons in perfect health as a complement of preparation for a possible death. Holy Cenacle, as in the Western Church, but without any outward preparation, the patient is surrounded by friends, and a priest... Many Western theologians, following Gaar (Eucharology, pp. 349 sqq.), have denied that this rite was understood and intended to be sacramental, though the matter and form were employed precisely as in the case of the sick; but, whatever may have been the intention in the past, it is quite certain at the present time that at least in the Constantinopolitan and Hellenic branches of the Orthodox Church the intention is to give the sacrament itself and no mere sacramental to those in sound health who are anointed (Kern, op. cit., 281). On the other hand, in the Russian Church, except in the metropolitan churches of Moscovia and Novgorod on Maundy Thursday each year, this practice is reprobated, and priests are expressly forbidden in their faculties to give the eucharist to people who are not sick (Kern, pp. 279 sqq.; Fortescue, The Orthodox Eastern Church, London, 1907, p. 425). We have already noted (III) that the eucharistic use of the sacrament appears to have been a similar abuse, but in the Orthodox Church till long after the schism there is no evidence of its existence, and the teaching of Eastern theologians down to modern times, to which the Russians still adhere, has been at one with the Western theologians in insisting that the sacrament must be labouring under a serious sickness.

4) Nor will danger, or even certainty, of death from any other cause than sickness qualify a person for extreme unction. Hence criminals or martyrs about to suffer death and others similarly circumstances may not be validly anointed unless they should happen to be seriously ill. But illness caused by violence, as by a dangerous or fatal wound, is sufficient; and old age itself without any specific disease is held by all Western theologians to qualify for extreme unction, i.e. when senile decay has advanced so far that death is imminent. In cases of lingering diseases, like phthisis or cancer, the danger has become really serious, extreme unction may be validly administered even though in all human probability the patient will live for a considerable time, say several months; and the lawfulness of administering it in such cases is to be decided by the rules of pastoral theology. If in the opinion of doctors the sickness will certainly be cured, and all probable danger of death removed by a surgical operation, theologians are not agreed whether the person who consents to undergo the operation can have thereby to be a valid subject for the sacrament. Kern holds that he does so (op. cit., p. 299), but his argument is by no means convincing.

VII. Effects.—The decree of Eugene IV for the Armenians describes the effects of extreme unction briefly as “the healing of the mind and, so far as it is expedient by the body also.” In the teaching of Trent (Sess. XIV, cap. i. De Pœnit.) regarding the absolute and universal necessity of repentance for the remission, even in baptism, of personal mortal sins, Schell has maintained (Kathol. Dogmatik, III, pp. 620 sqq.) that such an effect is not required for the validity of extreme unction, but that the general purpose and intention, which a Christian sinner may retain even when he is sinning, of afterwards formally repenting and dying in the friendship of God, is sufficient; but this view seems irreconcilable with the teaching of Trent, and has the whole weight of theological tradition against it.

Extreme unction likewise remits venial sins provided the subject has at least habitual attrition for them; and, following the analogoy of penance, which with attrition remits mortal sins, for the remission of which outside the sacrament perfect contrition would be required, theologians hold that with extreme unction a less perfect attrition suffices for the remission of venial sins than would suffice without the sacrament. But besides thus directly remitting venial sins, extreme unction also excites dispositions which procure their remission ex opere operantis.
The relics or effects of sin mentioned by the Council of Trent are variously understood by theologians to mean one, or more, or all of the following: spiritual debility and depression caused by the consciousness of having sinned; the influence of evil habits induced by sin; the penalties remaining after the guilt of sin has been forgiven; and venial, or even mortal, sins themselves. Of these only the remission of temporal punishment is distinct from the other effects of which the council speaks; and though some theologians have been loath to admit this effect at all, lest they might seem to do away with the reality, and of prayers and indulgences for the dying and dead, there is really no solid ground for objecting to it, if passing controversial interests are subordinated to Catholic theory. It is not suggested that extreme unction, like baptism, sacramentally remits all temporal punishment due to sin, and the extent to which it actually does so in any particular case may, as with baptism, fall short of what was Divinely intended, owing to obstacles or defective dispositions in the recipient. Hence there is still room and need for indulgences for the dying, and if the Church offers her prayers and applies indulgences for adults who die immediately after baptism, she ought, for instance, to offer them to those who have died after extreme unction. And if temporal punishment be, as it certainly is, one of the reliquia of sin, and if extreme unction be truly what the Council of Trent describes (Sess. XIV, De Exstr. Uecl., introduct.) as “the consummation of the sacrament of Penance, but not of the whole Christian life, which ought to be a perpetual penance”, it is impossible to deny that the remission of temporal punishment is one of the effects of this sacrament.

(2) The second effect of extreme unction mentioned by the Council of Trent is the alleviation and strengthening of the soul by inspiring the sick person with confidence in Divine mercy as will enable him patiently and even cheerfully to bear the pains and worries of sickness, and with resolve courteously to repel the assaults of the tempter in what is likely to be the last and only opportunity for the renovation of the soul. The outlook on eternity is brought vividly before the Christian by the probability of death inescapable from serious sickness, and this sacrament has been instituted for the purpose of conforming the graces specially needed to fortify him in facing this tremendous issue. It is unnecessary to explain here the appropriateness of such an institution, which, were other reasons wanting, would justify itself to the Christian mind by the observed results of its use.

(3) Finally, as a conditional and occasional effect of extreme unction, comes the remission of bodily ills, an effect which is vouched for by the witness of experience in past ages and in our own day. Theologians, however, have failed to agree in stating the condition on which this effect depends or in explaining the manner in which it is produced. ‘When it is expedient for the soul’s salvation’, is how Trent expresses the condition, and not a few theologians have understood this to mean that health will not be restored by the sacrament unless it is foreseen by God that a longer life will lead to a greater degree of glory—recovery being thus a sign or proof of predestination. But other theologians rightly reject this opinion, and of several explanations that are offered (cf. Kern, op. cit., pp. 155 sq.) the simplest and most reasonable is that which understands the condition mentioned not of the future and perhaps remote event of actual salvation, but of present spiritual advantage which, independently of the ultimate result, recovery may bring to the sick person: and under this condition, that this physical effect, which is in itself natural, is obtained mediately through and dependently upon the spiritual effects already mentioned. The fortifying of the soul by manifold graces, by which over-anxious fears are banished, and a general feeling of comfort and courage, and of humble confidence in God’s mercy and peaceful resignation to His Will inspired, react as a natural consequence on the physical condition of the patient, and this reaction is sometimes the factor that decides the issue of certain cases. This mediate and dependent effect of fortifying restoration of health is the way indicated by the Council of Trent in the passage quoted above, and the view proposed is in conformity with the best and most ancient theoretical teaching on the subject and avoids the seemingly unanswerable difficulties involved in opposing views. Nor does it reduce this effect of extreme unction to the level of those perfectly natural phenomena known to modern science as “faith cures”. For it is not maintained, in the first place, that recovery will follow in any particular case unless this result is spiritually profitable to the patient—and of this God alone is the judge—and it is admitted, in the second place, that the spiritual effect, from which the physical concomitantly results, is itself strictly supernatural (cf. Kern, loc. cit.).

(4) There remains the question, on which no little controversy has been expended, as to which of these several effects is the principal one. Bearing in mind the general theory that sacramental graces are...
effect which may be obtained independently: rather should the theory be enlarged and modified, and the primary and essential end of the sacrament so described as to comprehend these effects.

This is the solution of the whole question proposed by Dr. Poth, op. cit., pp. 535, 536) reviews Kern’s suggestion sympathetically. Besides being self-consistent and free from any serious difficulty, it is recommended by many positive arguments, and in connexion with the controverted point we have been discussing it has the advantage of combining and co-ordinating as parts of the principal effect—i.e., perfect spiritual health—not only the remission of venial sins and the invigoration of the soul, for which respectively Scotists and their opponents have contended too exclusively, but also the remission of temporal punishment, which not a few theologians have neglected.

II. Necessary.—Theologians are agreed that extreme unction may in certain circumstances be the only, and therefore the necessary, means of salvation for a dying person. This happens when there is question of a person who is dying without the use of reason, and whose soul is burdened with the guilt of a mortal sin, for which he has not habitual contrition; and for this and similar cases in which the reason in obtaining justification are certainly or even probably unavailing, there is no doubt as to the grave obligation of procuring extreme unction for the dying. But theologians are not agreed as to whether or not a sick person in the state of grave sin, per se, under a grave obligation of seeking the sacrament before death. It is evident ex hypothesi that there is no obligation arising from the need of salvation (necessitate mediis), and the great majority of theologians deny that a grave obligation per se has been imposed by Divine or ecclesial law. The invocation of St. James, It is said, may be understood as being merely a counsel or exhortation, not a command, and there is no convincing evidence from tradition that the Church has understood a Divine command to have been given, or has ever imposed one of her own. Yet it is recognized that, in the words of Trent, “contempt of so great a sacrament cannot take place without an enormous crime and an injury to the Holy Ghost Himself” (Sess. XIV, cap. iii); and it is held to depend on circumstances whether mere neglect or express refusal of the sacrament would amount to contempt of it. The sounder view, however, of the reasons alleged for this common teaching is open to doubt, and the strength of the arguments advanced by so recent a theologian as Kern (pp. 364 sq.) to prove the existence of the obligation which so many have denied is calculated to weaken the same in the mind of the reader.

IX. REPERTORIUM.—The Council of Trent teaches that “if the sick recover after receiving this unction, they can again receive the aid of this sacrament, when they fall anew into a similar danger of death” (Sess. XIV, cap. iii, De Extr. Uect.). In the Middle Ages there were entertained by some ecclesiastics on this subject, as we learn from the correspondence between Abbot (later Cardinal) Godfried and St. Yves, Bishop of Chartres (d. 1117). Godfried considered the custom in vogue in the Benedictine monasteries, of repeating extreme unction, reprehensible on the ground that “no sacrament ought to be repeated” (P. L., CLVII, 87 sq.); but he wished to have St. Yves’s opinion, and the latter quite agreed with his friend (ibid., 88). Not long afterwards Peter the Venerable, Abbot of Cluny, was asked by Abbot Theobald to explain “why it was that the unction of the sick was the only unction [out of seven] repeated, and why this took place only at Cluny;” and Peter in reply justified the repetition of the Benedictine practice, his main contention being that the person anointed may recover on recovery have sinned again and be in need of the remission of sins promised by St. James, and that the Apostle himself not only does not suggest that the unction may be given only once, but clearly implies “ut quales quis infirmatus fuert, totes inimputatur” (P. L., CLXXIX, 392 sq.). After this all opposition to the repetition of the sacrament disappears, and subsequent writers unanimously teach, what has been defined by the Council of Trent, that it may under certain conditions be validly and lawfully repeated. It should be noted, moreover, that the practice of repeating it at this period was not confined to the Benedictines or to Cluny. The Cistercians of Clairvaux, for example, were also in the habit of repeating it, but subject to the restriction that it was not to be given more than once within the same year; and the invalidation of the particular Churches dating from the ninth, tenth, eleventh, and twelfth centuries, have a rubric prescribing the repetition of the unction for seven successive days (cf. Kern, op. cit., pp. 334, 335 sq.).

Coming to the more accurate determination of the circumstances or conditions which justify the repetition of extreme unction, theologians, following the authority of Trent, are agreed that it may be validly and lawfully repeated as often as the sick person, after recovery, becomes seriously ill again, or, in cases of lingering illness where no complete recovery takes place, as often as the probable danger of death, after disappearing, returns. For verification of this latter condition some theologians would require the lapse of a certain interval, say a month, during which the danger would seem to have passed; but there is really no reason for insisting on this any more than on the year which medieval custom in some places was wont to require. St. Bonaventure’s remark, that “it is absurd for a sacrament to be regulated by the motion of the stars” (in IV Sent., dist. xxiii, a. 2, q. iv, ad 2), applies to a month as well as to a year. Not a few recent ones, e.g., De Augustinis, “De Re Sacramentaria,” II, 408) understand, by the new danger of death, proximate or imminent danger, so that, once imminent danger has passed and returned, the sacrament may be repeated without waiting for any definite interval to elapse. The majority of theologians, however, deny the validity of extreme unction repeated while the danger of death remains the same, and they assume that this is the implicit teaching of the Council of Trent. But among contemporary authors, Kern, following the lead of several positive theologians eminent for their knowledge of sacramental history (Ménard, Launois, Martène, Juénin, Drouven, Poignet, Pellarin, Bintzerum, Heinrich. — See references in Kern, op. cit., pp. 337, 538), maintains the probable validity of extreme unction repeated, no matter how often, during the same danger of death; or it will be found easier to ignore, than to meet and answer, the argument by which he supports his view.

He furnishes, in the first place, abundant evidence of the widespread practice in the Western Church from the ninth to the twelfth, and even in some places, to the thirteenth century, of repeating the unction for seven days or indefinitely while the sickness lasted; and he is able to claim the authority of Oriental theologians for explaining the modern practice in the Eastern Church of a sevenfold anointing by seven priests as being due to a more ancient practice of repeating the unction for seven days—a practice to which the Coptic Liturgy bears witness. By admit-
ting the validity of each repeated unction we are able to
give a much more reasonable explanation of the
medieval Western and modern Eastern practice than
can possibly be given by those who deny its validity.
The latter are bound to maintain either that the
proper sacramental effect may not be increased by
repetition, as happens in Penance and Holy Commu-
nication—that is, with an increase of sanctifying grace,
the right to spiritual invigoration may be increased,
and more abundant actual graces become due. And
this, on internal grounds, would suffice to justify
repetition, although the effect of the previous admin-
istration remains. Finally, in reply to the principal
dogmatic reason urged against his view—viz., the teaching
of the Council of Trent—Kern fairly maintains that the intention of the council was merely positive, and not exclusive, i.e., it wished to define, in opposition to the restrictive views that had been held, the validity of extreme unction repeated in the circum-
stances it mentions, but without meaning to deny its validity if repeated in other circumstances not men-
tioned. The exhaustive examination of tradition which is supposed to precede a definition had not, so far as the principal point in question, been brought out at the time of Trent; and the point itself was not ripe for definition. Modern discipline in the Western Church can be explained on other than dogmatic grounds: and if it be urged as dogmatically decisive, this will imply a very sweeping condemnation of much earlier and modern Eastern practice, which the prudent theologian will be slow to pro-
nounce.

X. REVIVISCENCE.—The question of reviviscence arises when any sacrament is validly administered, but is hindered at the time from producing its effect, owing to the want of due dispositions in the recipient. Thus, in regard to extreme unction, the subject may be unconscious and incapable of spiritual invigoration in so far as this requires co-operation with actual grace. Or he may, for want of the necessary attribution, be indisposed to receive remission of sins, or disposed in such manner as to exclude the influence of sanctifying grace. And the want of disposition—the obstacle to the effi-
cacy of the sacrament—may be inexcusable or gravely culpable; in the latter case the reception of the sacra-
ment will be sacrilegious. Now the question is, does extreme unction revive, that is, does it afterwards (during the same serious illness) produce such effects as are hindered at the time of reception, if the obstacle is afterwards removed or the requisite disposition exci-
ted? And theologians all teach that it certainly does revive in this way: that for its reviviscence, if no sacrifice has been committed in its reception, nor any grave sin in the interval, all that is needed is that the impediment should be removed, that conscious-
ness, for instance, should be recovered, or habitual attrition excited; but that, when a grave sin has been committed at or since the reception, this sin must be remitted, and sanctifying grace obtained by other means (e.g. penance or perfect contrition) before ex-
treme unction can take effect. From this doctrine of reviviscence—which is not, however, defined as a dog-
ma—there follows an important practical rule in re-
gard to the administration of extreme unction, viz., that, notwithstanding doubts about the dispositions of a particular subject, the sacrament should be conferred absolutely, never conditionally, since a condition making its validity dependent on the actual dispositions of the recipient would exclude the possibility of reviviscence. The conditional form (sibi capax es) should be used only when it is doubtful whether the person is a valid subject for the sacrament, e.g., whether he is not already dead, whether he has been baptized, and has attained the use of reason, or has the implicit habitual intention of dying in a Christian manner.

Exouctians. See ARIANISM.

Exulter Hibernicus, the name given to an Irish stranger on the Continent of Europe in the time of Charles the Great, who wrote poems in Latin, several of which are addressed to the emperor. He is sometimes identified with Dungal (see DUNGAL). The designation exul is one which the Irish frequently adopted. The poems of this exile show that he was not only a poet but a grammari-
ian and dialectician as well. They also reveal his status as that of a teacher, probably in the palace school of more than ordinary interest are the verses which describe the attitude of the ninth-century Irish teacher towards his pupils. His metrical poem on the seven liberal arts devote two lines to each of the branches, grammar, rhetoric, dialectic, &c., showing the origin, scope, and utility of each in succession. Like the lines on the same subject by Theodulf of Orleans, they may have been incorporated into a set of pictures in which the seven liberal arts were rep-
resented. The style of these poems, while much inferior to that of the classical period, is free from many of the artificialities which characterize much of the versification of the early Middle Ages.

WILLIAM TURNER.

Exultet, the hymn in praise of the paschal candle sung by the deacon, in the liturgy of Holy Saturday. In the missal the title of the hymn is “Praeconium”, as appears from the formula used at the blessing of the deacon: “ut digna et competenter annuntiantes suum Paschalem praecominem”? Outside Rome, the use of the paschal candle appears to have been very ancient in Italy, Gaul, Spain, and perhaps, from the reference by St. Augustine (De Civ. Dei, xiv. 33), in Africa. The “Libri Pontificales” attribute its introduction in the local Roman Church to Pope Zosimus. The formula used for the “Praecominium” was not always the “Exul-
tet”, though it is perhaps true that this formula has survived, where other contemporary formulæ have disappeared. In the “Liber Ordinarii”, for instance, the formula is of the nature of a Benediction, and the Gelasian Sacramentary has the prayer “Deus mundi conditor”, not found elsewhere, but containing the remarkable “praise of the bee”—possibly a Ver-
gilian reminiscence—which is found with more or less modification in all the texts of the “Praecominium” sections to the present day. The requity of the paschal cur-
al from the title of the hymn “Exultet” would lead us to place the date of its composition perhaps as early as the fifth century, and not later than the seventh. The earliest Missæ in which it appears are those of the three Gallican Sacramentaries—the Bobbio Missal (seventh
EXUPERIUS (Exuperius), Saint, Bishop of Toulouse in the beginning of the fifth century, place and date of birth unascertained; d. after 410. Succeeding St. Silvius as bishop, he completed the basilica of St. Saturninus, begun by his predecessor. St. Jerome praises him for his munificence towards the monks of Palestine, Egypt, and Libya, and for his charity to the people of his own diocese, who were then suffering from the depredations of the Vandals, Alans, and Suevi. Of great austerity and simplicity of life, he sought not his own, but gave what he had to the poor. For their sake he even sold the altar vessels and was compelled in consequence to carry the Sacred Host in an oyster basket and the Precious Blood in a vessel of glass. In esteem for his virtues and in gratitude for his gifts, St. Jerome dedicated to him his Commentarius in Psalmodiam. Exuperius was best known in connexion with the Canon of the Sacred Scriptures. He is mentioned in a letter to Innocent I (for instructions concerning the Canon and several points of ecclesiastical discipline. In reply, the pope honoured him with the letter Consulenti tibi; dated February, 405, which contained a list of the canonical Scriptures as we have them to-day, including the deutero- canonical books of the Catholic Canon. The assertion of some writers that the Canon of Innocent I excluded the Apocrypha is not true, if they mean to extend the term Apocrypha to the deutero-canonical books.

The opinion of Barolius, that the bishop Exuperius was identical with the rhetor of the same name, is quite generally rejected, as the rhetor was a teacher of Hannibalarius and Dalmatius, nephews of Constantine the Great, over half a century before the period of the bishop. From St. Jerome's letter to Furia of Rome, in 394, and from the epistle of St. Paulinus to Amandus of Bordeaux, in 397, it seems probable that Exuperius was a priest at Rome, and later at Bordeaux, before he was raised to the episcopate, though it is possible that in both of these letters reference is made to a different person. Just when he became bishop is unknown. That he occupied the See of Toulouse in February, 405, is evident from a reference in Innocent I mentioned above; and from a statement of St. Jerome in a letter to Rusticius it is certain that he was still living in 411. It is sometimes said that St. Jerome reproved him, in a letter to Riparius, a priest of Spain, for tolerating the heretic Vigilantius; but, as Vigilantius did not belong to the Diocese of Toulouse, St. Jerome was probably speaking of another bishop.

Exuperius was early venerated as a saint. Even in the time of St. Gregory of Tours he was held in equal veneration with St. Saturninus. His feast occurs on 29 September. The first martrology to assign to his date was Usuard, who wrote towards the end of the tenth century.

**Acta SS., Sept. VII. 623-30:** St. Jerome, Ep. iv. c. x. lv. 1475. After preliminary studies at Erfurt he went to Italy and devoted himself to humanistic study at the Universities of Pavia and Bologna. He returned to Germany in 1451, having in the meantime been appointed canon at Eichstatt and Bamberg. In 1452 to 1459 he was again a student at Bologna, win-
EYCK

Eyck, Hubert and Jan van, brothers, Flemish illuminators and painters, founders of the school of Bruges and consequently of all the schools of painting in the North of Europe. Hubert was born at Maeseyck (i.e. Eyck on the Meuse in the Diocese of Liége, about 1366, and his brother Jan about twenty years later, 1385). They had a sister named Margaret who was an illuminator.

A document of 1413 makes the earliest mention we have of a painting by "Master Hubert." In 1421 he was living at Ghent, and he died there on the 18th of September, 1426. We have no further definite knowledge concerning the elder of the brothers. Of the younger we know that in 1420 he presented a M. Jhon's head to the Guild of Antwerp, that in 1422 he decorated a paschal candle for the cathedral of Cambrai, and that in 1425 he was at The Hague in the service of Jean Sans Merci. Afterwards he went to Bruges and to Lille to the court of Philip the Good, Duke of Burgundy, as peintre et voleur de chample. He was already a man of some influence at court, and he travelled in the embassy charged to ask the hand of Isabella of Portugal for Philip, and it was his privilege to paint her portrait "true to life," thereby fixing Philip's choice. This journey lasted from the 16th of October to the end of December, 1429. In 1430 he went to Heidelberg to superintend, for the Duke, the work going on at the castle there; and afterwards he returned to Bruges, which he seldom left again. He married, and a child of his was baptized in 1434. In 1436 he entered once more that he received 720 livres on account of "a certain secret of mastic;" doubtless in connection with some new miniature or journey. He died towards the end of June, 1441.

The most important work of the brothers Van Eyck, and the one that places their names among the great masters of painting for ever, is the famous altar-piece, "The Adoration of the Lamb," of which the central portion is preserved in St-Bavon at Ghent, while the wings have found their way to the Museums of Berlin and of Brussels. It is one of the emblems of art. All the questions bearing on it may, however, be reduced to two: Who was its author? and, What was it commissioned for? All who have looked on an inscription obscure enough, which is to be read on the edge of its frame:

Pictor Hubertus e Eyck major quo nemo repertus
Incept pondus: quod Johannes arte secundus
Susecet letus, Judaei Vyd prcecus tertius
Convers V. V. X. M. V. L. C. L. C. D. C. N. V. A. S. V. L. I. 

The faulty Latin of this cryptic inscription means: "Hubert van Eyck, the greatest painter that ever lived, began this work [pondus], which John, his brother, second only to him in skill, had the happiness to continue at the request of Josce (Josse) Vyd. By this line, on the 6th of May, you learn when the work was completed, i.e., MCCCLXXIII." That it is their joint work is certain, but it is impossible to distinguish which portion belongs to each brother. Very soon Jan began to get all the credit for it. Düer mentions only Jan in his "Journal" of 1521. But the inscription clearly states that Hubert was the artist and asserts that he was the greater artist, his brother being called in only at his death, and in order to complete it. But how far had Hubert progressed with it? How far back had he been commissioned to paint it? In 1426 were portions of it finished, or was it merely the sketch? Or when Jan took charge? Who suggested the subject? Who planned its treatment? Can we believe that a painter of any school living in a fifteenth century atmosphere could have elaborated by himself from a few texts of the Apocalypse (v. 6–14) such a wealth of detail, such sympathy of symbolism and imagery? Who was the theologian who inspired this mighty poem as others had inspired the learned allegories of the 'Chapel of the Spaniards,' and of the Hall of the Segnatura? And again, in the history of painting from the miniatures of the Irish Apocalypse (eleventh century) to the Angers tapestries, what were the artistic sources of this great work?

This moral encyclopaedia of the Middle Ages, if we may call it such, treats of all things in heaven and on earth (there was a predella to it depicting hell, but it disappeared in the sixteenth century); it portrays God and man in all their historical and mystical relations; it tells us of the heavenly paradise, of the earth and the world, of the ages that have followed one another in the flight of time, of the Dogma of the Fall, and of the Redemption, of Adam and Eve, and of the first sacrifices; of the death of Abel (type of Christ); of the years of expectation of the patriarchs and just men of the Old Law; of the mystery of the Incarnation; of the Trinity; of the world subject to the law of Christ; of the life of the Church in its saints, her hermits, her virgins, her martyrs, her pontiffs, her confessors, her warrior princes; of all Christendom in a landscape filled with cathedral spires (Rome, Jerusalem, Utrecht, etc.).

And can we in reason be surprised to see this wonderful pictorial epic arising out from the beginning to the consummation of the world and ending in a glimpse of the eternal life to come as full in conception and as orderly in arrangement as the "Divina Commedia" itself; summing up the Old as well as the New Testament, drawing its inspiration from St. Augustine's "Tivitas Dei," and Vincent of Beauvais' "Speculum Majus," as well as Jacobus de Voragine's "Legenda Aurea," and Dante's "De Monarchia;" a compendium of politics, history, and theology, and which crowns the representation of man's life on earth by a "glimpse of the Infancy," when we are asked to believe that this lofty expression of the ideals of Christendom in the Europe of the Middle Ages sprang Minerva-like, fully formed from the brain of a single artist?

No one can adopt this supposition except for the
purpose of ascribing all the honour of having conceived this painting to the elder of the brothers. As an assumption, however, it is altogether gratuitous. There is not one of the scenes that can be attributed to Hubert with any degree of certainty; and no work that Van Eyck have left us (with the exception of the “Fount of Salvation” in the Prado Museum, Madrid, and this is the work of a school) shows a similar dogmatic and theological character, a like power of design and richness of thought that this “Lamb” does. Taken as a whole the work of the Van Eycks has a totally different quality. It is frankly naturalistic in fact, as well as in intention. So that when Hubert is labelled a thinker, it is for no other reason than the wish to differentiate him, and to separate him from Jan. How futile this distinction is, is made clear if we look into the results obtained by applying it as a criterion to the work of the two brothers. On not a single disputed painting has agreement been reached; and every painting that has been attributed to Hubert by one connoisseur, has been adjudged by others for equally good reasons to Jan.

The catalogue of their work has been reconstructed more than twenty times. The altarpiece of the “Lamb” has been divided in two, and immured in the walls, and each in turn has been given to first one brother and then to the other over and over again. Each year sees a new theory proposed. After Waagen came James T. F. Staerck, after Staerck, Waagen; and we are as far from the solution as we were at the outset. The masterpiece has been attributed to Hubert, to Jan, and to both probably never give it up. In any case, seeing that the whole painting was retouched at least twice during the sixteenth century, all evidence of individual technique must have been buried beneath these restorations, and in all likelihood the little points and peculiarities attributed to Hubert or to Jan have been removed. The scheme of the work of Michael Coxie. But there is a larger and a wider question at issue than such idle wranglings that can never be settled, the question as to the effect and the nature of the artistic revolution to which the brothers Van Eyck have given their names.

What constitutes the altarpiece of the “Lamb” a unique monument in the history of art, and gives it its supreme interest in our eyes, is the fact that it unites in itself the styles and the genius of two opposing epochs. Whereas its general plan belongs to the Middle Ages, its execution, its manner of seeing things and putting them on canvas, are truly modern. The masterpiece has a double nature, so to speak. The genius of the Renaissance for what was concrete and realistic is wedded to the majesty of the Gothic and its love of the abstract. It shows us the wondrous blending of two principles that would seem necessarily to exclude each other, like the past and the future, and that we never meet with again save in opposition. It is this that constitutes the supreme interest of the work, that it contains the noblest expression of the old mystical genius together with the most powerful example of modern naturalism. In the sincerity, breadth, and daring of their naturalism, no one at any time nor of any school has excelled the Van Eycks. Nature, which, prior to their day, men had looked at as through a veil of formulaire and symbols, they seem suddenly to have unveiled. They invented, so to speak, the world of realities. The happenings of all sorts in the world of nature, the sylla rerum, with which they have endowed the art of painting, are always true to life. Landscapes, atmosphere, types, physiognomies, a wealth of studies and sketches of all sorts, rich materials, cloths, cimars (robes), copies, slavishly and brilliancy of pre-civilizations, the goldsmith’s art; all are copied to perfection, and the deference of the work is beyond compare. The masterpiece inaugurates a new era in painting. If the object of the painter’s art is to depict the visible world, if his aim ought to be not so much the expression of a thought as to hold up the mirror to life, then for the first time in its history painting entered into its birthright in this altarpiece, and gave proof of its legitimacy in this first attempt. Life under all its sensible forms and aspects sweeps through this mighty scene like a motif, with all its myriad changes and variety of moods, brushing aside like dusty hieroglyphs and crumbling hieroglyphs of the Middle Ages.

The absolute is abandoned, and the relative brought into fashion. The eye is turned away from the vision of the ideal, but the feet are more firmly planted on the real. The word nature undergoes a change of meaning, since it had been a vague Platonistic idea, a nothing like the nonsensical formulae of the schools, which are understood by the intelligence rather than perceived by the senses. In that lofty plane of thought in which art in the thirteenth century loved to move, the universe existed really in the intellect. Henceforth, however, nature changes her aspect for the painter; he refrains from expressing any opinion as to the essence of things, but delights in all their accidental qualities. The actual, the fact, whether it be positive, complex, capricious, or odd, becomes of more importance than the idea of it. The absolute cause of all things is neglected in favour of the rich and the rich vegetation of nature; principles have less value than their consequences, less importance is given to types than individuals. The vast harvest of phenomena from the ever teeming field of reality and experience is accepted as an object for the expression of the painter’s personality, and to act as the safest confidante of his emotional experiences.

The altarpiece of Ghent marks the triumph of this basic artistic revolution from which all modern art has sprung. Never was a richer shrine of nature and of life got together by a painter. In two hundred figures of every size, sex, race, and costume we behold a résumé of the human race. We see before us all the beauty of the physical world, the woods, the fields, the rocks, the desert places; a geography of earth with its climates, the forms of all the objects of creation (which foolishly has led some to believe that Hubert must have travelled in the East). And the world of art is not forgotten; styles of architecture, towers, cupolas, statues, bas-reliefs, are all brought in. In a word, life out-of-doors and within doors, with all its social activities and moral colouring, is portrayed. There are interiors, such as the room of the Blessed Virgin, a young Flemish maiden, with its prie-Dieu, its nicely tiled floor, its washstand and basin, and its open window looking out on to the pointed roofs of a row of brick houses. There are pictures of a marvellous realism, such as those of the donor and his wife; epic figures, such as God the Father under the guise of Charlemagne crowned with a triple tiara, type of the pontiff-king; and there are figures full of charm and poetry, such as the singing angels (Berlin museum), symbolizing the harmonious paradise, under the form of enthralling minstrelsy, or of the chanting of choir boys. Other figures are fearful in their naturalism, such as the figures of our first parents (Brussels museum) which would suffice alone to immortalize their creator, because of their audacious nudity, their stiff and awkward manner, and their eloquent ugliness.

Such a transformation, of course, exceeds the powers of any one man, or even of two brothers. And like all great works, the altarpiece of Ghent is but the result of the labours of more than one generation. It was not a local movement; its influences were at work up and down throughout Christendom.
In Italy the work of Jacopo della Quercia, of Ghiberti, the frescoes of Masolino and of Masaccio (1428), are contemporary with the labours of the Van Eycks, and bear traces of similar tendencies. But the birthplace of the movement was not on Italian soil. It is in France first that the earliest traces of it, about the beginning of the fourteenth century. A few statues, like the Visitational group in the great doorway at Reims (1310), the tombs of St. Denis, the portraits of King Charles V and his wife Eleanor (in the Louvre), mark the last stages in the victorious progress. The same school that in the fourteenth century had developed the Gothic ideal, was about to produce by a natural evolution the new principles and the new methods. An important factor in this evolution was the creation of the Duchies of Berry and of Burgundy, and the alliance of Flanders and Burgundy by marriage (1364). At the Court of the Valois, the most brilliant in the world, famous for its voluptuousness, its elegance, and its worship of all the arts of life, and under the patronage of its princes, no less famous for their dissolute lives than for their artistic taste and love of luxury, there rapidly grew up a school of painters, sculptors, goldsmiths, and miniaturists, cosmopolitans by birth, but Parisian by education, who were the nucleus of the Renaissance.

The larger part of the paintings, frescoes, and stained glass of this epoch have perished; but the miniatures supply all the proof we need. Especially in the manuscripts of the Duc de Berry there are many rare and valuable miniatures, which are the earliest evidence of the school. It is impossible to prevent the links of this glorious history. Many of the books collected by this incomparable Meeenas have come down to us; some of them illustrated by André Beauneveu, Jacquemart of Hosdin, or Jacques Cohn of Antwerp. But the most important of all is the so-called MS. of the Hours of the Duc de Berry, known as the "Book of Hours of the Duc de Berry." This wonderful book was adorned from 1413 to 1416 by three artists: "the three illuminator-brothers" spoken of by Guillebert de Metz, the brothers of Limbourg or simply the Limpourgs. Nearly all the poetic fancy of the Van Eycks is already outlined in this "Book of Hours," especially on their landscape side; and whereas the Limpourgs kept to the country around Liège, the Van Eycks followed the same route, and doubtless experienced the same influences. But there was nothing more. Another MS., "The Hours of Turin," which was unfortunately destroyed in the fire at the library of that town, 20 January, 1904, belonged successively to the Duc de Berry (d. 1416) and to Duke William IV of Bavaria-Hannaut. And it has been proved that Hubert van Eyck spent some time in the latter's service. Paul Durrieu has given very weighty reasons for attributing the MS. to him, and for believing that he began it for the Duc de Berry. Thus the art of the Van Eycks would be but the culminating point of the great Renaissance movement inaugurated at the Court of the Valois in France, and which reached its apogee in 1400. Perhaps this was what the Italian Bishop Fieschi meant to imply when in 1436 he spoke of Jan van Eyck as Johannes Gallieus.

This is a partial solution of the enigma of the altar-piece. Hubert and Jan van Eyck are but continuators, in a way, of an art that had begun before them, without them. But what was it they added that caused the new style in art to date only from their work? If we are to credit Vasari, Van Mander, and all the historical writers, their great discovery was the art of painting with oils. Painting with oil had been discovered before; the more or less successful recipe for it in the eleventh century. And as we have seen, the new aesthetic had been already formulated in the miniatures of the Limbourgs and of the Van Eycks themselves. Whatever importance in art its material and mechanical methods may have, it would be too humiliating to make it depend entirely on the particular fluid, water, gum, or albumen used in mixing the colours. Moreover, on canvases 500 years old from which all moisture has long since dried up he would be a daring critic who would venture to assert the proportion of oil or distemper used by the artist. Yet in the fifteenth century an artist had discovered the secret of capturing the shape, the colour, of a thing like seeking the scent of the "Roses of Sadi." The real merit of the Van Eycks is elsewhere. By a chain of circumstances (The Battle of Agincourt, the madness of Charles VI, and the minority of Charles VII), France was brought to the edge of ruin, and suddenly lost control of the movement that had been started in Flanders.

Comfort, art, luxury began to cluster around the new fortunes of the Duchy of Burgundy, as the home of wealth in the North. Ghent, Bruges, Brussels, Antwerp became the centres of the new school. In these new towns of little culture and traditional refinement, and lacking in reserve (Taine, "Philosophie de l'Art aux Pays-Bas" — description of the festivities known as the "Veu du Jouvan") Naturalism, freed from the restraints French taste would have imposed on it, was enabled to grow at its ease and spread without restriction. The Germanic element which had already been seen as Beaufremont in the Limbourgs, burst out, and carried everything before it in the work of the Van Eycks. For the first time the genius of the North shook off all those cosmopolitan influences which had hitherto refined it, and gave it its free scope.

We paused not to think of what had gone before, and it was not concerned with such things as taste, nobility, or beauty. Such preoccupations as these, as the antique began to have an influence, became more and more the distinguishing characteristics and limitation of Italian naturalism. It is enough to consider the influence of Adam and Eve by Jan van Eyck, with those by Masaccio in the Brancacci Chapel to be convinced of this. On the one side there is realism, but the painter has scruples, reserves, a sense of modesty; on the other there is absolute cruelty, what we might call naturalism pure and simple. What does this mean, but that painting, which had hitherto been a universal, international art, is beginning to localize itself; and that what had hitherto been a European, or better still, Western, colour-language is about to split up into many dialects and national modes of speech? It is the real glory of the Van Eycks, their triumph which was unfortunately destroyed in the fire at the library of that town, 20 January, 1904, and which gave it its first full expression. During a whole century (1430-1530) the school they founded at Bruges was always producing new works and renewing its own strength. During a century, painters from Flanders, from Holland, and Germany — Crispius, Gérard de St-Jean, Ouywear, Hugo van der Goes, Roger van der Weyden, Memlinek, Gérard David, Martin Schongauer, Dürer, Lucas of Leyden — never ceased to draw their inspiration more or less directly from their work. In 1445 the Catalan Luis Dalmau made a copy of the altar-piece of Ghent. In France, Jean Fouquet, Nicolas Fronten, on the banks of the Loire and of the Rhone, were disciples of Jan van Eyck. Even Italy did not escape their sovereign influence. As early as the middle of the fifteenth century paintings by Jan van Eyck were being treasured at Naples and in Urbino. Antinello of Messina went to study art in Flanders. Ghirlandajo imitated the famous Portinari altar-piece by H. van der Goes, and whenever an Italian painter relaxed a moment his strain register art to snatch a breath of gayety or a lesson in realism, it was always to the Flemish school he turned; after all the triumph of the art of Raphael and Michelangelo, by the constraining revelation of its beauty, had restored for a time the reign of the ideal. Their triumph was, however, short-lived; the pagan and aristocratic ideal of art and life, with all its loftiness and rigidity, began to give way to the
beginning of the seventeenth century, with its new schools at Antwerp and Amsterdam, before the naturalism of the North, before the more homely, heartily, and winning genius of the Van Eycks. It is therefore impossible to exaggerate the importance of the Eycks, whose position throughout the fifteenth century, led the way in the evolution which two centuries later produced such painters as Rubens and Rembrandt.

The following is a list of the signed and dated works of Jan van Eyck: The "Consecration of St. Thomas Aquinas" (1432—1435); The "Madonna" (1432—1435); portraits of two men (1432—1434); National Gallery; "Arnolfini and his Wife" (1434—1435); National Gallery; "Portrait of Jan de Leeuw" (1436—1438); "The Virgin", with kneeling figure of Canon van der Pael (1436—1438); "St. Barbara" (1438); "The Woman in Black" (1439—1440); "The Artist's Wife" (1439—1440); "The Virgin" (1439—1440); "Antwerp". The principal works without date or signature that can be certainly attributed to the brothers Van Eyck are "Portrait of An Old Man" (Vienna); "The Man with the Pinks" (Berlin); "The Man in a Blue Cap" (Frankfort); "The Madonna" executed for Chancellor Rolin (Louvain); "The Virgin" (Burleigh House, Exeter); "The Virgin" (Paris, Rothschild); triptych, not completed (Van Hellenpute collection, Mechlin).

FACETE, De vita illustris (1456, published at Florence, 1748), an account of the life of Jan van Eyck, in the Notizie d'opere di disegno (Bens, 1898); VAZARI, Le Vite (Florence, 1550) (preface and life of Messina); VAN MANÉE, Het Schilderboek (Amsterdam, 1604); WAAGEN, H., and J. VAN EYCK (Breslau, 1862); WEALE, Notes on Jan van Eyck (Bruges, 1864); IDÉM, The date of Jan van Eyck's Death in The Burlington Magazine (London, 1904); DE LABORDE, Les ducs de Bourbogne (Paris, 1847); VAN MEERGEN and ERNEST KERSTEN, Docsours sur l'art des PEINTRES de l'ÉCOLE FLAMANDE au XVIIe siècle (Paris, 1906); CROWE and CAVALLO, The Early Flemish Painters (London, 1857); TAYNE, Philosophie de l'art (Paris, 1872); ECK, Les maîtres d'œuvre de l'Église Flamande (Paris, 1876); KNACKBURG, Hubert and Jan van Eyck (Bielefeld, 1897); COURJARD, Lécons professées à l'école du Louvre (Paris, 1898—1899); DURIEUX, Les origines des Van Eyck (Paris, 1904); LES NEUVES DE TURIN, Photographic reproduction (Paris, 1905); HOLL, Dedication and the Primitives Flamands, an arranged catalogue (Bruges, 1902); DUMONT, Das Büsten der Brüder von Eyck (Berlin, 1908); WURZBACH, Niederländisches Künstlerlexicon (Leipzig, 1906).

LOUIS GILLET.

EYCKEN, JEAN BAPTISTE VAN, painter, b. at Brussels, Belgium, 16 September, 1809; d. at Schaerbeek, 19 December, 1853. He was the son of Cornelle van Eyck and Louise Cordemans, and as a boy was employed in commercial pursuits, but from 1829, when his father died, he gave himself over entirely to the study of art. In 1830 he became a member of the Academy of Belgium, in 1833 gained an important prize with high distinctions, and four years afterwards was appointed professor of drawing and painting. In 1838 he went to Italy, returning in 1839 and resuming his professorship. In that year he exhibited his great picture of "Divine Pity", which was warmly received and brought him a gold medal and a high position in the Société des Beaux Arts of France. He entered in 1840 Julie Noel, who died 11 Feb., 1843. Two of his most important pictures were those representing "Captive Christians" and "St. Boniface", for the church of La Chapelle; but for the same building he carried out no less than fourteen pictures representing the Passion of Christ and these were exhibited in 1844 and gained for him the Order of Leopold. His best-known picture perhaps is entitled "L'Abondance", a replica of which the artist was employed to make for the Prince Consort of England, according to the instructions of Louise Marie, Queen of the Belgians. He was intensely interested in the subject of mural decoration, and, besides working on a series of paintings representing the Beatitudes, in order to exemplify his ideas in this direction. He also gave some attention to sculpture and to designing medalions. He was a very devout man, true to his faith and to his friends, and very much respected by all who knew him. His pictures are marked by considerable religious feeling, grace, tenderness, and delicacy. (For further details, see a life of the artist published privately in Brussels by Emile van Arenberg, no date.)

GEORGE CHARLES WILLIAMSON.

EYMERIC, PIETRE-JULIEN, VENERABLE, founder of the Society of the Blessed Sacrament, and of the Servants of the Blessed Sacrament, b. at La Mure d'Isère, Diocese of Grenoble, France, 4 Feb., 1811; d. there 1 Aug., 1868. From early childhood he表现出 a unique position throughout the fifteenth century, led the way in the evolution which two centuries later produced such painters as Rubens and Rembrandt.

In January of 1851 Père Eymard made a pilgrimage to the shrine of Our Lady of Fourvières, and there promised Mary to devote his life to founding a congregation of priests whose principal duty should be to honour the Blessed Sacrament. He having obtained the necessary ecclesiastical permission, he procured a small house in Paris, in which he and his single companion took up their abode. Here, on 6 Jan., 1857, the Blessed Sacrament was exposed, and the nascent community of two priests continued the adoration of the Blessed Sacrament as prescribed by their rule. Their founder received his first encouragement for the work in a laudatory Brief, blessing the work and his author, and signed by Pius IX, in 1857. Five years after, in 1862, Père Eymard had enough spiritual sons to open a regular novitiate at the same date the congregation spread rapidly, until now its houses may be found in Rome, Belgium, Holland, Spain, Canada, the United States, and South America. The Servants of the Blessed Sacrament, a congregation of cloistered women who carry on perpetual adoration in their churches, were also founded by him in 1858. Père Eymard's writings have been collected, and form four volumes: "The Real Presence", which has been translated into English; "Retreat at the Foot of Jesus Eucharistic", "La Sainte Communion", and "L'Eucharistie et la Perfection Chrétienne". These writings have received the approbation of the Holy See. The author was declared Venerable, 11 August, 1908, and the process for Père Eymard's canonization is now in progress.

EYRE, the support of Cardinal Legate Guido, Eymeric, in the interest of peace, was removed from office at the general chapter held at Perpignan in 1360. Two years later, at the general chapter held at Ferrara, he was chosen vicar of the Dominican province in England. Shortly afterwards, when a general council was to be elected for the same province, there was a hopeless division among the Dominicans, one party supporting Eymeric, the other Father Bernardo Ernengaudi. Pope Urban V confirmed neither, but appointed a third, Jacopo Dominici. Meanwhile Eymeric showed great activity as a preacher, as well as a writer on theological subjects. Some years later he was again made inquisitor general of Aragon; we find him in this office in 1366, and several tracts on dogmatic subjects date from the years immediately following. He combated in particular Raymond Lully, in whose writings he found numerous errors. He influenced Gregory XI to forbid the faithful to read certain writings of Lully's and to condemn by a special decree (26 Jan., 1376) several theses extracted from his works. Eymeric was in high esteem with King Pedro IV of Aragon, as well as with Pope Clement XI. In 1376 he visited Avignon, and accompanied the pope on his return to Rome. He was still there at the election of Urban VI and the nomination of the antipope Clement VII, whose claims he vigorously championed against those of the Roman pope. Towards the end of 1378 he returned to Aragon, but on the interests of his own grand inquisitor often went to the court of Clement VII at Avignon. Eymeric continued his campaign against the Lullists by word as well as by pen. In his "Tractatus contra doctrinam Raymundi Lulli", dedicated to Clement VII, he indicates 153 heresies, 36 errors, and many misleading statements of Lully. He also composed a "Disputatio contra Lullistas" and other tracts. Lully's partisans, however, won over to their side, soon after his accession, King John I of Aragon. Eymeric was banished and went to the papal court of Avignon, where he was welcomed both by Clement VII and later by Benedict XIII. He wrote numerous theological works and also special tracts defending the legitimacy of the Avignon popes, e.g. his "Tractatus de potestate papali" (1383), which he composed for Clement VII, and two tractates for Benedict XIII. Notwithstanding his sentence of banishment, he still retained his post of grand inquisitor of Aragon. As early as 1376 he had compiled, as a guide for inquisitors, his "Directorium inquisitorum", the only one of his more extensive works that was afterwards printed (Barcelona, 1503; Rome, 1578, ed. Francesco Pegna, with a copious commentary; reissued several times). Towards the end of 1378 Eymeric returned to his native land and his monastery of Gerona, where he died. His epitaph describes him as "predictor veridicus, inquisitor intrepidus, doctor egregius.

Quærte et esquirr, Script. or. ord. (Paris, 1719), I, 709-17, with the titles of thirty-five of Eymeric's works, contained in eleven MSS.; HEBR, Nominat. Insunbruck, 1900; BURTON in his "Archiv für Literatur- und Kirchengesch. des M. A.," I, 48 sqq.

J. P. KIRCH.

Eyre, Thomas, first president of Ushaw College; b. at Glaisop, Derbyshire, in 1748; d. at Ushaw, 8 May, 1810. He was the fourth son of Nathaniel Eyre and Jane Broomhead. On 24 June, 1758, he, with his brothers Edward and John, arrived at Esquerrich, near Douai, the preparatory school for the English college. Having passed through school and college alike with credit, he remained after his ordination as general preacher and reader of the English language of rhetoric and poetry. In 1775 Mr. Eyre returned to England to take charge of the Stella mission near Newcastle, on the invitation of his kinsman, Thomas Eyre. While he here brought out a new edition of the works of Gother and also made a collection of materials (now in the Ushaw archives) with the intention of continuing Dodd's "Church History". His scheme for a new edition of Bishop Challoner's Bible was given up at the request of Bishop Thomas Talbot. In 1792 Eyre removed from Stella to Pontop Hall in Durham. In 1794 Bishop Gibson desired him to take charge of the Northern students who had been expelled from Douai, and who were then temporarily at Tudem under Lingard, the famous historian, who had not yet been ordained priest. Mr. Eyre removed these students first to Pontop Hall and in October, 1794, to Crook Hall, where he became president of the new college. Though he was willing to resign this post in favour of Mr. Daniel, president of Douai, this suggested arrangement came to nothing and Mr. Eyre remained president. In 1803 an estate called Ushaw was bought by the bishop, and here, early in 1804, the new college was begun, and in July, 1808, Mr. Eyre began to remove his community thither. On 2 August he himself entered and the transfer of St. Cuthbert's College from Crook Hall to Ushaw was complete. Mr. Eyre died at Ushaw, having secured a considerable sum from his landed property and from numerous benefactions. The foundation was again enlarged by the foundation of the endowed college, together with the works of Gother's other brought out, in separate form, Gother's "Instructions for Confirmation" (Newcastle, 1783), and Gobinet's "Instruction for Youth in Christian Piety".

EDWIN BURTON.

EYTON, Charles, antiquary, b. 1667; d. 5 Nov., 1721; he was a member of the ancient family of Eyton, then and still of East Hendred, their house being one of the few places in England where the Blessed Sacrament has always been preserved. He was eldest son of George Eyton and of Ann, daughter of Robert Dormer of Peterley. On the death of his father in 1691 he succeeded to the family estates, and in 1692 married Winifred Dorothy, daughter of Busil Fitheberth of Swinerton, Staffordshire, by whom he had a large family. He was a good scholar and it was in his antiquarian researches that he became a friend of Thomas Hearne, who wrote of him: "He was a Roman Catholic and so charitable to the poor that he was known by all who saw him. He was a man of a sweet temper and was an excellent scholar and so modest that he did not care to have it at any time mentioned." (Reliq. Hearnianae, cit. inf.) On his death he was succeeded by his son, Charles. It is generally stated that another of his sons joined the Jesuits, but though his son, William George, entered the Society in 1736, he left it almost at once. Several of his daughters became nuns. He wrote: "A Little Monument to The Once Famous Abbey and Borough of Glastonbury", published by Hearne in his "History and Antiquities of Glastonbury" (Oxford, 1722); reprinted by the Rev. R. WOOD in his "Antiquities of the Abbey of Glaston and the town of Glastonbury" (Bath, 1826). There is in the library at Hendred an unpublished MS. entitled "A Poor Little Monument to All the Old Pious Dissolved Foundations of England: or A Short History of Abbies, all sorts of Monasteries, Colleges, Chapels, Churchies, etc." Another MS. mentioned under his name by Gillow was merely his property and not his work; and the same writer corrects Charles Butler's error in ascribing to Eyton a "History of the Reformation", published in 1685.

EDWIN BURTON.
Ezechias (Heb. יְהֹשֵׁע, יְהֹשֵׁעַ = “The Lord strongetheth”); Sept. Ἰσχαίας; in the cuneiform inscriptions Ha-za-qi-ya-hu, King of Judah, son and successor of Achaz. We learn from IV Kings, xviii, that he began his reign in the third year of Osee, King of Israel, that he was then twenty-five years of age, that he reigned twenty-nine years, and that his mother was Abi, daughter of Zacharias. The account of his reign is beset with unsolved chronological difficulties, and there exists a difference of opinion among scholars as to the year in which he ascended the throne. The commonly received computation reckoning his reign from 722 to 697 B.C. is based on an error in the policy. Ezechias was pious and agreeable to God. He took a strenuous civil and religious reformer, and on this account the sacred writer compares him to King David. The events of his reign are related in the Fourth Book of Kings, and also in the parallel account in the Second Book of Paralipomenon, but in the latter, as might be expected, stress is laid chiefly on the religious reforms which he carried out, whereas the earlier account mentions these briefly, and dwells at greater length on the civil and political aspects of his reign.

Among the religious reforms are mentioned the purification of the Temple, which had been closed by Achaz, the irreligious predecessor of Ezechias (II Par., xxviii-xxix), the resumption and proper celebration of the feast of the Passover which had been neglected (II Par., xxx), and in general the extirpation of idolatry and the reorganization of the Hebrew worship (IV K., xviii, II Par., xxxi). In a title prefixed to the twenty-fifth chapter of Proverbs, it is stated that the sayings contained in the following collection (xxv-xxix) were copied out by the “men of Ezechias.” This would seem to indicate, on the part of the king, some interest and activity in the reorganization of the religious cult. The events of Ezechias under the influence of Sennacherib, and the invasion of Sennacherib. The story of the sickness of Ezechias is narrated in IV K., xx, and in Is., xxxvii.

The king having stricken with some mortal disease, the prophet Isaiah comes in the name of Yahweh to him to put his affairs in order, for he is about to die. But Ezechias prays to the Lord, Who sends the prophet back to announce to him that he will recover, and that fifteen years are to be added to his life. As a sign of the fulfillment of this promise, Isaiah causes the shadow to recede a distance of ten lines on the sundial. Connected with this event is the sending of an embassy by Berodach Baladan, King of Babylon, who having heard of the illness of Ezechias, sent messengers to him with presents. The motive of this action on the part of the Babylonian king was probably to enlist the services of Ezechias in a league against Sennacherib, King of Assyria. Ezechias received the envoys with great honour, and exhibited to them his various treasures and armaments of war. This spirit of ostentation was displeasing to the Lord, and Isaiah was sent to announce that the treasures, in which the king had acted to place himself, would be all carried off as plunder to Babylon. Not long after (according to the cuneiform inscriptions, in the year 701), Sennacherib undertook a great campaign against Syria and Egypt. The story of this expedition is told, from the Assyrian standpoint, in the official cuneiform inscription known as the Tamar inscription. The policy of Sennacherib was first, to vanquish the kings of Ascalon, Sidon and Juda who had formed a coalition against him, and then to turn his attention to the land of the Pharaohs.

After subduing Ascalon and Acearon, the Assyrian invader captured and plundered all the fortified towns of Juda, and carried their inhabitants into exile. Then he besieged Jerusalem, and Ezechias, finding himself shut up “like a bird in a cage,” resolved to come to terms with his enemy. Sennacherib demanded thirty talents of gold and three hundred talents of silver, and, in order to supply it, Ezechias was obliged to yield up not only the contents of the royal treasury, but also the silver belonging to the Temple, and the plates of gold which were on the doors thereof (IV K. xvii). But when in addition to this, the Assyrian demanded the surrender of Jerusalem with a view to subduing its inhabitants into exile, in characteristic fashion Ezechias was revived, and he prepared himself for a vigorous resistance. Haughty demands of surrender were repulsed, and the king taking counsel with the prophet Isaiah turned in supplication to Yahweh; he received the assurance that the enemy would soon abandon the siege without doing any harm to the city. This prophecy was shortly verified when the angel of the Lord slaying in the night 185,000 of the besieging forces, the remainder fled with Sennacherib, and returned to Assyria. Ezechias survived this deliverance only a few years, and he was buried with great solemnity in the tomb of the sons of David (IV K. xx, 21; II Par. xxxii, 33).

James F. Driscoll.

Ezechiel, whose name, Yehészqel (בשֶׁךֹל) signifies “strong is God”, or “whom God makes strong” (Ezech., i, 3; iii, 8), was the son of Buzi, and was one of the priests who, in the year 598 B. C., had been deported together with Joachim as prisoners from Jerusalem (cf. Ezech., vi, 17, and in the Acts, xxi, 1, v 1, and in the xxv, 21). With the other exiles he settled in Tell-Abib near the Chobar (Ezech., i, 1; iii, 15) in Babylonia, and seems to have spent the rest of his life there. In the fifth year after the captivity of Joachim, and according to some, the thirtieth year of his life, Ezechiel received his call as a prophet (Ezech. i, 2; 4 etc.) in the vision which he describes in the beginning of his prophecy (Ezech. i, 4; iii, 15). From Ezech. xxix, 17 it appears that he prophesied during at least twenty-two years.

Ezechiel was called to foretell God’s faithfulness in the midst of trials, as well as in the fulfillment of His promises. During the first period of his career, he foretold the complete destruction of the kingdom of Juda, and the annihilation of the city and temple. After the fulfillment of these predictions, he was commanded to announce the future return from exile, the re-establishment of the people in their own country and, especially, the triumph of the Kingdom of the Messiah, the second David, so that the people would not abandon themselves to despair and perish as a nation, through contact with the Gentiles, whose gods had apparently triumphed over the God of Israel. This is the principal burden of Ezechiel’s prophecy, which is divided into three parts. After the introduction, the vision of the calling of the prophet (Ezech., i, 1-21), the first part contains the prophecies against Juda before the fall of Jerusalem (Ezech. xxvii, 22-xxiv). In this part the prophet declares the hope of saving the city, the kingdom, and the temple to be vain, and announces the approaching judgment of God upon Juda. This part may be subdivided into five group of prophecies.

(1) After a second revelation, in which God discloses to the prophet His course of action (iii, 22-27), the prophet foretells by symbolic acts (iv, v) and in words (vi-vii), the siege and capture of Jerusalem, and the banishment of Juda. (2) In a prophetic vision, in the presence of the elders of Israel, God reveals to him the cause of these punishments. In spirit he witnesses...
the idolatry practised in and near the temple (viii); God commands that the guilty be punished and the faithful be spared (ix); God's majesty departs from the temple (x), and also, after the announcement of guilt and punishment, from the city. With this the judgment which the prophet communicates to the exiles ends (xi).

(3) In the third group (xii-xix) many different prophecies are brought together, whose sole connexion is the relation they bear to the guilt and punishment of Jerusalem and Judah. Ezekiel prophesies by symbolic actions the exile of the people, the flight of Se-decis, and the devastation of the land (xii, 1-20). Then follow Divine revelations regarding belief in false prophecies, and disbelief in the very presence of the true prophet. This was one of the causes of the horrors (xiii, 21-xiv, 11), to be visited upon the remnant of the inhabitants of Jerusalem (xiv, 12-23). The prophet likens Jerusalem to the dead wood of the vine, which is destined for the fire (xv); in an elaborate denunciation he represents Judah as a shameless harlot, who surpasses Samaria and Sodom in malice (xvi), and in a new simile, he condemns King Se-decis (xvii). After a discourse on the justice of God (xviii), there follows a further lamentation over the princes and the people of Juda (xix). (4) In the presence of the elders the prophet denounces the whole people of Israel for the abominations they practised in Egypt, in the Wilderness, and in Canaan (xx). For these Juda shall be consumed by fire, and Jerusalem shall be exterminated by the sword (xxi). Abominable is the immorality of Jerusalem (xxii), but Juda is more guilty than Israel has ever been (xxiii).

(5) On the day on which the siege of Jerusalem began, the prophet represents, under the figure of the rusty pot, what was to befall the inhabitants of the city. On the occasion of the death of his wife, God forbids him to mourn openly, in order to teach the exiles that they should be willing to lose that which is dearest to them without grieving over it (xxiv).

In the second part (xxv-xxxii), are gathered together the prophecies concerning the Gentiles. He takes, first of all, the neighbouring peoples who had been exalted through the downfall of Juda, and who had humiliated Israel. The fate of four of these, the Ammonites, the Moabites, the Edomites, and the Philistines, is condensed in chapter xxv. He treats Ezechiel as a force at length of Tyre (xxvi, 18-21), after which he casts a glance at Sidon (xxviii, 20-21).

Six prophecies against Egypt follow, dating from different years (xxix-xxxii). The third part (xxxiii-xlv), is occupied with the Divine utterances on the subject of Israel's restoration. As introduction, we have a dissertation from the prophet, in his capacity of authorized champion of the mercy and justice of God, after which he addresses himself to those remaining in Juda, and to the perverse exiles (xxxiii). The manner in which God will restore His people is only indicated in a general way. The Lord will cause the evil shepherds to perish; He will gather in, guide, and feed the sheep by means of the second David, the Messiah (xxxiv).

Though Mount Seir shall remain a waste, Israel shall return unto its own. There God will purify His people, animate the nation with a new spirit, and re-establish in it its former splendour for the glory of His name (xxxv-xxxvii). Israel, though dead, shall rise again, and the dry bones shall be covered with flesh and endowed with life before the eyes of the prophet. Ephraim and Juda shall, under the second David, be united into one kingdom, and the Lord shall dwell in their midst (xxxvii). The invincibleness and un- destructibility of the restored kingdom are then symbolically presented in the war upon Gog, his inglorious defeat, and the annihilation of his armies (xxxviii-xlix). In the last prophetic vision, God shows the new temple (xl-xlii), the new worship (xlili-xlv), the return to their own land, and the new division among the twelve tribes (xlvi-xlvii), as a figure of His foundation of a kingdom where He shall dwell among His people, and where He shall be served in His tabernacle according to strict rules, by priests of His choice, and by the prince of the house of David.

From this review of the contents of the prophecy, it is evident that the prophetic vision, the symbolic actions and examples, comprise a considerable portion of the book. The completeness of the description of the vision, actions and similes, is one of the many causes of the obscurity of the book of Ezechiel. It is often difficult to distinguish between what is essential to the matter represented, and what serves merely to make the image more vivid. On this account it happens that, in the circumstantial descriptions, words are used, the meaning of which, inasmuch as they occur in Ezechiel only, is not determined. Because of this obscurity, a number of controversial questions present them- selves in the text, and that at an early date. Since the Septuagint has some of them in common with the earliest Hebrew text we have. The Greek version, however, includes several readings which help to fix the meaning. The genuineness of the book of Ezechiel is generally conceded. Some few consider chapters xl-xlvii to be apocryphal, because the plan there described in the building of the temple was not followed, but they overlook the fact that Ezechiel here gives a symbolic representation of the temple, that was to find spiritual realization in God's new kingdom. The Divine character of the prophecies was recognized as early as the time of Jesus the son of Sirach (Eccles. xlix, 10, 11). In the New Testament, there are no verbatim references, but allusions to the prophecy and figures taken from it are frequent. Compare St. John x etc. with Ezech. xxxiv. 11 etc.; St. Matthew xxii, 39 with Ezech. xxvii. 23. In particular, The Apocalypse, has often followed Ezechiel. Compare Apoc. xviii-xii with Ezech. xxvii, xxxviii etc., xlvii etc.

Eznik, a writer of the fifth century, b. at Golp, in the province of Taikh, a tributary valley of the Chorokh, in Northern Armenia. He was a pupil of Isaac, the catholicos, and of Mesrop. At their request he went first to Edessa, then to Constantinople to perfect himself in the various sciences and to collect or copy Syriac and Greek manuscripts of the Bible, and the writings of the Fathers of the Church. He returned to Armenia after the Council of Ephesus (431), and is probably identical with Eznik, Bishop of Artashat, who took part in the Synod of Artashat in 449. In addition to his labours in connexion with the new version of the Bible (see Versions of the Bible) and various translations, he composed several works, the principal of which is his remarkable treatise "Against the Sects". It was written between 441 and 449, and contains four books or chapters. In the first, against the heathens, Eznik combats the eternity of matter and the substantial existence of evil. In the second he refutes the chief doctrines of Parseism. The third is directed against the Greek philosophers (Pythagoreans, Platonists, Peripatetics, Stoics, and Epicureans), the writer taking his arguments from the Bible rather than from reason. The fourth book is an exposition and refutation of Marcionism. In the work Eznik displays much acumen and an extensive erudition. He was evidently as familiar with Persian as with Greek literature. His Armenian diction is of the choicest classical type, although the nature of his subject-matter forced him to use quite a number of Greek words. The work "Against the Sects" was first published at Smyrna in 1762; again, much more correctly and from several manuscripts, by the Mechitarists at Venice in 1826 and in 1865. An indifferent French translation was made by Le Vaillant de Florial, "Réfutation des différentes sectes", etc. (Paris, 1853). A good German translation is that by J. M. Schmidt, "Eznik von Kolb, Wider die Sekten" (Leipzig, 1900). Langlois published a general introduction to the whole treatise and a translation of part of book II (section 5, 1-11, containing Magism) in his "Collection des historiens anciens et modernes de l'Arménie", II, pp. 371 sq. Eznik is also the author of a short collection of moral precepts, printed with his more important treatise.

H. HYVERNAT.

Ezzo, a priest of Bamberg in the eleventh century, author of a famous poem known as the "Song of the Miracles of Christ" (Cantilena de miraculis Christi), or the "Angenge" or "Beginning". The poem was found by Burack in a Strasbourg MS. of the eleventh century, but only a few strophes are given. The whole song, thirty-four strophes, is preserved, though in a later version, in the Vorau MS. The "Vita Altmanni" relates that in 1065, when rumours of the approaching end of the world were rife, many people started on a pilgrimage to Jerusalem under the leadership of Bishop Gunther of Bamberg, and that Ezzo composed the poem on this occasion. The opening strophe of the Vorau MS. does not mention the pilgrimage, but simply states that the bishop ordered Ezzo to write the song. The effect, we are told, was such that everybody hastened to take monastic vows. The poem is written in the East Franconian dialect; it relates in earnest language the Creation, Fall, and Redemption of mankind. It was edited by P. Piper (op. cit. infra) and Steinmayer (in Müllenhoff and Scherer "Denkmäler deutscher Poesie und Prosa aus dem VIII-XII Jahrhundert", Berlin, 1892).

ARTHUR F. J. REMY.
Faa di Bruno, Francesco, an Italian mathematician and priest, b. at Alexandria, 7 March, 1825; d. at Turin, 26 March, 1888. He was of noble birth, and held, at one time, the rank of captain-of-staff in the Sardinian Army. Coming to Paris, he resigned his commission, studied under Cauchy, an admirable type of the true Catholic savant, and Leverrier, who shared in the discovery of the planet Neptune, and he became intimate with Abbé Moigno and Hermite. On his return to Turin, he was ordained, but the remainder of his life was spent as Professor of Mathematics at the University. In recognition of his achievements as a mathematician, the degree of Doctor of Science was conferred on him by the Universities of Paris and Turin. In addition to some ascetical writings, the composition of some sacred melodies, and the invention of some scientific apparatus, Faa di Bruno made numerous and important contributions to mathematics. These include about forty original articles published in the "Journal de Mathématiques" (Liouville), Crolle's "Journal", "American Journal of Mathematics" (Johns Hopkins University), "Annali di Tortolini", "Les Mondes", "Comptes rendus de l'Académie des sciences", etc.; the first half of an exhaustive treatise on the theory and applications of elliptic functions which he planned to complete in three volumes, "Théorie générale de l'élimination" (Paris, 1859); "Calcolo degli errori" (Turin, 1867), translated into French under the title of "Traité élémentaire du calcul des erreurs" (Paris, 1869); and most important of all, "Théorie des formes binaires" (Paris, 1876), translated into German (Leipzig, 1881). For a list of the memoirs of Faa di Bruno, see the "Catalogue of Scientific Papers of the Royal Society" (London, 1869, 1877, 1891), t. II, viii, and ix.

Paul H. Linehan.

Faa di Bruno, Joseph. See Pious Society of Missions.

Faber, Felix, German writer, b. about 1441 at Zurich, of a famous family commonly known as Schmid; d. in 1502 at Ulm, Germany. He made his early studies under the Dominicans at Basle and Ulm, where he spent the greater part of his life. He became a master of sacred theology, was head preacher at Ulm during 1477-78, became provincial of the German province in 1486, attended two general chapters of his order in 1480, and made a pilgrimage to Palestine and Syria in 1483-4. He wrote two accounts of his travels, one in German (Ulm, 1556); the other in Latin. The former is rather brief; the other is very complete and accurate in its descriptions of the places visited, and is of great value to students of Palestinian topography, who recognize Faber as the most distinguished and learned writer of the fifteenth century. This work was republished by the Stuttgart Literary Society in three octavo volumes (1843-49) under the title, "Fr. Felixis Fabri Evagatorium in Terrae Sanctae, Arabiae et Egyptiae peregrinationem". He was also the author of a verified pilgrim's book, edited by Brilinger (Munich, 1861). In 1489 Faber completed a history of the Swiss (Historia Suevorum) down to the death of Godolphin, 1488, in his Latin, and presented it to the Frankfort edition of 1604 (later ed., Ulm, 1727), says of him that he was praised by few but copied by many. Faber translated a life of Blessed Henry Suso from the Latin. Some of his manuscripts are still unpublished.

Quintus and Euchard, Scriptores Ord. Pred., I, 871; Haebel- lin, Dissert. scient. vienn., t. iv, scripta Fr. F. Faber (Göttingen, 1742); cf. also preface to the Stuttgart ed. of the Enumeri.

Arthur L. McMahon.

Faber, Frederick William, Oratorian and devotional writer; b. 28 June, 1814, at Calverley, Yorkshire, England; d. in London, 26 Sept., 1883. After five years at Harrow School he matriculated at Bulloll in 1832, became a scholar at University College in 1834, and a fellow of that College in 1837. Of Huguenot descent Faber was divided in his university days between a tendency to Calvinism, in the form of individual piety, and the Church theory then being advocated by Newman. Eventually the latter triumphed, and Faber threw himself unreservedly into the Tractarian movement and cooperate in the translation of the works of the Fathers then in progress. He received Anglican ordination in 1839, and took work as a tutor, till, in 1843, he was appointed Rector of Elton, Northamptonshire. During the years 1839-1843 Faber made two continental tours, and his letters give strikingly poetic descriptions of the scenes he visited; they glow with enthusiasm for Catholic rites and devotion. On his return to Elton in 1844, he established the practice of confession, preached Catholic doctrine, and wrote the life of St. Wilfrid, openly advocating the claims and supremacy of Rome. In October 1845, Newman was received into the Church at Littlemore; in November, Faber was also received by Bishop Waring, at Northampton. In 1846, Faber established a religious community, the "Brothers of the Will of God" or "Wilfridians," as they were called from St. Wilfrid, their patron, at Cotton Hall, near Cheddle, Staffordshire, the gift of the Earl of Shrewsbury. In 1847 Faber was ordained priest and with his zealous community, now forty in number, converted the whole parish, except "the parson, the pew-opener, and two drunken men." In 1848, Newman arrived from Rome with his new congregation of the Oratory of St. Philip Neri, and established himself at Old Oscott, Birmingham, then renamed Maryvale. With singular disinterestess, Faber placed himself under Newman as a simple novice, taking with him all his community who were willing to follow his example. In 1849 he was sent by Newman to found the Oratory at King William Street, London, and was appointed its superior. In the poor chapel there, once a tavern, Faber laid the foundation of his future works. Poor schools, nightly services, and sermons with hymns and procession of the Blessed Sacrament, till then unknown, formed its chief...
characteristics. Faber's hymns, composed especially for these services, display a combination of accurate theological doctrine, fervent devotion, musical rhythm, and true poetical talent. As a preacher he was remarkable for his delivery, choice of expression, absence of calculation, and personal exhortations of surpassing force.

In 1847 Faber began the publication of "Lives of Modern Saints," not as biographies, but as showing the growth of sanctity under the operation of grace and the supernatural perfection attained. The series of forty-nine Lives supplied a want of the time and, after some opposition, met with full approval. His knowledge of the spiritual life and the extent of his theological and ascetic reading were seen in the eight works that now came from his pen: "All for Jesus, 1853; Growth in Holiness, 1854; The Blessed Sacrament, 1855; The Creator and the Creature, 1858; The Foot of the Cross, 1858; Spiritual Conferences, 1859; The Precious Blood, 1860; Bethlehem, 1860. The many foreign translations of these works, their circulation now maintained for more than fifty years, their constant quotation by successors, and the殊作 of a master in mystical theology. He wrote also two volumes of "Notes on Doctrinal Subjects" (1866), giving the skeleton of various sermons and of two projected works, "Calvary" and "The Holy Ghost." A volume of poems, various essays, and other minor works are also from his pen. The fascination and grace of his presence rendered him personally attractive, while as confessor his sympathy with souls in trouble, his spiritual insight, and his supernatural unworldliness, gave to his counsel a lifelong and force.

The Oratory removed to South Kensington in 1854, and there Faber spent the remaining nine years of his life, occupied primarily in establishing his community on the strict observance of St. Philip's Institute, being convinced that fidelity to its Roman model was its one vital principle. The sacraments, prayer, including the reverent performance of the ecclesiastical functions, and the daily Word of God were St. Philip's weapons, and Faber would never engage in other external works, however good. Unswerving loyalty to the Holy See was his watchword, and devotion to the Mother of God, was for him the safeguard of faith and the support of twofold.

Henry S. Bowden.

Faber, Johann, theologian, b. at Leutkirch, in Swabia, 1478; d. in Vienna, 21 May, 1541. He studied theology and canon law at Tubingen and Freiburg; was made doctor of sacred theology in Freiburg; became in succession minister of Lin- dul, Utkirch, Vicar-General of Constance, 1518; chaplain and confessor to King Ferdinand I of Austria, 1524; was appointed Bishop of Vienna, 1530. While a canon of the cathedral of Basle he formed a friendship with Erasmus that lasted throughout his life. Erasmus persuaded Faber to take up the study of the Fathers. Like others of his time Faber was at first friendly with the Reformers, Melanchthon, Zwingli, and Oecolampadius, sympathizing with their efforts at reform and opposing certain abuses himself; but when he realized that neither dogmas nor the Church herself were spared by the Reformers, he broke with them and became their most consistent opponent. He wrote his first polemic against Luther, "Opus adversus novam quaedam dogmata Martini Lutheri" (1522). This was soon followed by his "Mallev Hereticorum, sex libri ad Hadrianum VI summum Pontificem" (Cologne, 1524; Rome, 1509). From this latter work he is some-
times called the "hammer of heretics." He entered into public debate with Zwingli at Zurich; was prominent in all the diets held to restore peace to the Church; and was one of the committee appointed to draw up a refutation of the Confession of Augsburg. On some points, e. g. the celibacy of the clergy, he was willing to recognize certain of the errors of the Reformers if an agreement could be reached to prevent similar conditions in the future, but no agreement was possible. He was sent by Ferdinand to Spain and then to Henry VIII in England to seek aid against the invading Turks. Ferdinand also had him enlist the services of the University of Vienna to defend the doctrines of Luther in Austria. As bishop his zeal was unbounded; he protected his flock by frequent preaching and numerous writings, and he held regular conferences with his clergy. He founded twelve scholarships for boys who wished to become priests but did not have the means to realize their ambition.

His works (German and Latin) are homiletical and polemical in character. Besides those already mentioned he wrote treatises on faith and good works, on the Sacrifice of the Mass; an instruction and answer to questions of the King of England, on the Middle Ages against the more recent tenets of Luther; a comparison of the writings of Hus and Luther; the power of the pope in the case of Luther; an answer to six articles of Zwingli; defence of Catholic belief against the chief Anabaptist, Balthasar of Friedberg; a book on the sacraments on the Russian Empire, and on the Blessed Sacrament; sermons of consolation and courage while the Turks were besieging Vienna. His works in three folio volumes (Cologne, 1537-40) do not contain his polemical writings; these are found in "Opuscula quaedam Joannis Fabri, Episcopi Viennensis" (Leipzig, 1520).

M. Schumacher.

Faber, Johann, of Heilbronn, controversialist and preacher; b. 1504, at Heilbronn in Wittenberg; d. at Augsburg, 27 Feb., 1558. At the age of sixteen he entered the Dominican Order and made his ecclesiastical studies at Wimpfen; the earliest missionary labours little is known. In 1534 he was charged with the duty of preaching in the cathedral of Augsburg, but owing to the Lutheran heresies and the bitter attitude of the heretics towards the Church, in consequence of which he was forbidden to preach, his usefulness there was of short duration. Thence he went to the University of Cologne, where he devoted himself for several years to the higher clerical studies. Here he published in 1535 and 1536 several unedited works of the English mystic, Richard Rolle. Returning to Wimpfen he engaged in the work of preaching and refuting the errors of the Reformers, which had already taken deep root among a large portion of the people. His unwarred zeal, however, in upholding the ancient faith and the marvellous results attending it, caused his enemies to turn against him with such bitterness that he was forced to leave the city. In 1539, at the solicitation of the citizens of Colmar, he proceeded to that city, where the new doctrines had by this time gained considerable ground. On 2 Sept. of the same year he matriculated at the University of Freiburg as "unfortunate." It was at this time, in all probability, that he received the baccalaureate. In 1545 he was elected prior of the convent in Schlettstadt, but he had served only two years in this capacity when he was again appointed to take charge of the pulpit in the cathedral of Augsburg. Being compelled to accept this appointment, in 1552, he proceeded to the University of Ingolstadt, where he received the degree of Doctor of Theology
under the presidency of Peter Canisius, who succeeded him later in the pulpit of Augsburg. In the following year he returned again to Augsburg, where he died. 

Faber was a man of vast theological erudition. His zeal to stem the tide of heresy and the invincible courage he displayed in exposing the prevailing errors brought him into conflict with many heretical leaders. He is the author of a number of excellent works, including the following: (1) "Quod fides esse positum sit caritate, exposito pia et catholica" (Augsburg, 1548); (2) "Testimonia Scripturae et Patrum B. Petri in fuisse" (Antwerp, 1553); (3) "Gründliche und christliche Anzeigungen aus der heiligen Schrift und kirchlichen Kirchenlehren was die evangelische Messe sei" (Dillingen, 1558); (4) "Enchiridion Bibliorium concionatorum in popularibus declamationibus utile" (Cologne, 1568); (5) "Precaitiones Christianae ex sacris litteris et D. Augustino singulario studio concinnatia et selecta" (Cologne, 1568).

**Arthur L. McMahon.**

**Faber, Matthias**, writer and preacher, b. at Altomünster, Germany, 24 Feb., 1586; d. at Tyrunau, 26 April, 1653. He embraced the ecclesiastical state, became curé of the parish of St. Maurice at Ingolstadt, and was a professor at the University of that city. He succeeded in winning for him a reputation as a sacred orator when he entered the Society of Jesus at Vienna. He was then fifty years old. The sermons which he has left are remarkable for soundness of doctrine, and learning. He is even more a controversialist than an orator in the ordinary sense of the word. His object in preaching was, before everything, either to convert heretics, or to safeguard Catholics from the false doctrines of the Reformation. According to the custom of the times he made extensive use of Scriptural texts, which crowed his instructive sermons and render the reading of them difficult. They are all written in Latin, and have been published in modern editions.

**Faber (FABRIL), Philipp, theologian, philosopher, and noted commentator of Duns Scotus; b. in 1564, at Spinaia di Braghiella, district of Faenza, Italy, and d. at Padua, 28 Aug., 1630. In 1582 he entered the Order of St. Francis (Conventuals), at Cremona. After completing his studies, he taught in various monastic schools till he was appointed professor of philosophy in 1603, and in 1606 professor of theology, at the University of Padua, where he was highly successful as a lecturer. In 1625 he was elected provincial of the order, and he again took up his work as professor, expounding the teachings of Duns Scotus with ability and judgment, and abandoning the superlative style of other commentators. His important works are: "Philosophia naturalis Scoti in theorematum distributa" (Parma, 1601, revised at Venice, 1606, 1616, 1622, and at Paris, 1622). "Commentaria in quatuor libros sententiarum Duns Scoti" (Venice, 1613; 3rd ed. Paris, 1622). "De Predicatione" (Venice, 1623), a supplement to the first book of the "Sentences"; "De restitutione, et extrema unione" (Venice, 1624), an addition to the fourth book of the Sentences; "A treatise de Sacramento Ordinis, parvis et censuris ecclesiasticis" (Venice, 1628). His "Preface to the Primata" and "Roma Pontificum" and "His Commentaries on the Metaphysics of Aristotle" were published, after Faber's death, by his friend Matthew Ferechius, O.F.M., who prefaced the "Commentaries", with a biography of the author.

**Fabin (FABIANUS), Saint, Pope, 236-250, the extraordinary circumstances of whose election is related by Eusebius (Hist. Eccl., VI, 29). After the death of Anterus he had come to Rome, with some others, from his farm and was in the city when the new election began. While the names of several illustrious and noble persons were being considered, a dove suddenly descended upon the head of Fabian, of whom no one had even thought. To the assembled court-proceedings the "Liber Pontificalis" says that he divided Rome into seven districts, each supervised by a deacon, and appointed seven subdeacons, to collect, in conjunction with other notaries, the "acta" of the martyrs, i.e. the reports of the court-proceedings on the occasion of their trials (Eus. Hist., VI, 34). The practice of having the pope divide the city into districts is a tradition that he instituted the four minor orders. Under him considerable work was done in the catacombs. He caused the body of Pope St. Pontianus to be exhumed, in Sardinia, and transferred to the catacomb of St. Callistus at Rome. Later accounts, more or less trustworthy, attribute to him the consecration (245) of seven bishops as missionaries to Gaul, among them St. Denis of Paris (Greg. of Tours, Hist. Franc., I, 28, 31). St. Cyprian mentions (Ep., 59) the condemnation by Fabian for heresy of a certain Privatus (Bishop of Lambessa) in Africa. The praebens Origens did not hesitate to declare Fabian, the orthodoxy of his teaching (Eus. Hist. Eccl., VI, 34). Fabian died a martyr (20 Jan., 250) at the beginning of the Decian persecution, and was buried in the Crypt of the Popes in the catacomb of St. Callistus, where in recent times (1850) de Rossi discovered his Greek epitaph (Roma Sotteranea II, 59): "Fabin,
FABIOLA 743

bishop and martyr.” The decreals ascribted to him in Pseudo-Isidore are apocryphal.

P. Gabriel Meir.

Fabiola, Saint, a Roman matron of rank, d. 27 December, 399 or 400. She was one of the company of noble Roman women who, under the influence of St. Jerome, gave up all earthly pleasures and devoted themselves to the practice of Christian asceticism and to good works. At the time of St. Jerome’s stay at Rome (382-84), Fabiola was not one of the ascetic circle which gathered around him. It was not until a later date, that, upon the death of her second consort, she took the decisive step of entering upon a life of renunciation and labour for others. Fabiola belonged to the patrician Roman family of the Fabia. She had been married to a man who led so vicious a life that to live with him was impossible. She obtained a divorce from him according to Roman law, and, contrary to the ordinances of the Church, she entered upon a second union before the death of her first husband. On the day of Easter, following the death of her second consort, she appeared before the gates of the Latran basilica, dressed in penitential garb, and did penance in public for her sin, an act which made a great impression upon the Christian population of Rome. The pope received her formally again into full communion with the Church.

Fabiola now renounced all that the world had to offer her, and devoted her immense wealth to the needs of the poor and the sick. She erected a fine hospital at Rome, and waited on the inmates herself, not even shunning those afflicted with repulsive wounds and sores. Besides, she gave large sums to the churches and religious communities at Rome, and at other places in Italy. All her interests were centred on the needs of the Church and the care of the poor and suffering. In 395, she went to Bethlehem, where she lived in the hospice of the convent directed by Paula and applied herself, under the direction of St. Jerome, with the greatest zeal to the study and contemplation of the Scriptures, and to ascetic exercises. An incursion of the Huns into the eastern provinces of the empire, and the quarrel which broke out between St. Jerome and Bishop John of Jerusalem, respecting the teachings of Origen, made residence in Bethlehem unpleasant for her, and she returned to Rome. She remained, however, in correspondence with St. Jerome, who at her request wrote a treatise on the priesthood of Aaron and the priestly dress. At Rome, Fabiola united with the former senator Pammachius in carrying out a great charitable undertaking; together they erected at Porto a large hospice for pilgrims coming to Rome. Fabiola also continued her usual personal labours in aid of the poor and sick until her death. Her funeral was a wonderful manifestation of the gratitude and veneration with which she was regarded by the Roman populace. St. Jerome wrote a eulogistic memoir of Fabiola in a letter to her relative Oceanes.

Fabre, Joseph, second Superior General of the Oblates of Mary Immaculate, b. 14 November, 1824, at Cuges, Bouches-du-Rhône, France; d. at Royaumont near Paris, 26 October, 1892. He first studied at the Lycée of Marseilles, then entered the Grand Séminaire of the same city, and made his novitiate in the Congregation of the Oblates, pronouncing his final vows 17 February, 1845. After teaching philosophy for some time, he was ordained priest, 29 May, 1847. He was Director of the Grand Séminaire of Marseilles when, in 1850, a general chapter elected him procurator of the whole Institute. The Bishop of Marseilles, who was also the superior and founder of the Oblates, made him his trusted confidant; and when that prelate died Father Fabre was unanimously elected to succeed him (5 Dec., 1861) as Superior General of his congregation, in which capacity he from time to time addressed to the members of his congregation, encyclical letters which have remained models of spiritual direction. He instituted collective retreats for the superiors, and other foundations for the simple religious, and insisted on the observance of charity and humility, which Bishop De Mazenod had made the cardinal virtues of his Institute.

He introduced his missionaries into Italy, Spain, and Holland, established new houses in France, Great Britain, and Canada, and, in 1883, canonically erected into a separate province the houses already existing in the United States. Their activities in the missions of Ceylon, South Africa, and the extreme North, as well as the far West, of America, were no less remarkable during his tenure of office.

In the time of his Superior General, when he had been superior for thirty-one years, the roll of members had more than doubled in numbers, and the Oblates counted in their ranks ten bishops who were at the head of as many vicariates Apostolic. If Bishop De Mazenod had founded and consolidated the congregation, the last touches to the good work were given by his immediate successor. In addition to being their superior general, Father Fabre was the Director-General of the Association of the Holy Family, a religious institute composed of seven congregations of nuns founded at Bordeaux in the first half of the nineteenth century.

Notices saceroliques des Oblates de Marie Immaculée (Bar-le-Duc, 1899); BENOIT, Vie de Mgr. Tauché (Montreal, 1904).

A. G. Morice.

Fabri (LEFÈVRE), Honoré, Jesuit, theologian, b. about 1607 in the Department of Ain, France; d. at Rome, 8 March, 1688. He entered the Society of Jesus at Avignon, in 1626, and distinguished himself by a life of continuous mental work. He excelled especially in mathematics and physics, but he was also a formidable controversialist. For twenty-five years he taught philosophy and for six years mathematics in the Jesuit college at Lyons, attracting many pupils by the fame of his learning. Called to Rome, he became the theologian of the court of the papal penitentiary in the Vatican Basilica, a position he held for thirty years. His duties did not prevent him from writing a number of learned works on various subjects in keeping with the needs of his time. Sommervogel mentions thirty-one titles of published works in connexion with Fabri’s name; besides, there are fourteen of his productions in MS., now kept in the Library of Lyons.

The following are the more important of his publications: “Pithanophilus, seu dialogus vel opusculum de opinione probabilib,” etc. (Rome, 1683). This work was attacked by Stephanus Gradus, Prefect of the Vatican Library; in his “Disputatio de opinione probabilib” (Rome, 1678; Mechin, 1679). “Honoriati Fabri, Societatis Jesu, apologeticus doctrinae moralis ejusdem Societatis” (Lyons, 1670; Cologne, 1672). This treatise, in eleven dialogues, of probabilism, explaining its true nature, and refuting the charges of its opponents. The Cologne edition was considerably enlarged but did not meet with ecclesiastical approbation; it was placed on the Index of forbidden books soon after its appearance. “Una fides unius Ecclesiae Romanae contra indifferentes hujus saeculi tribus libros facile methodo asserta” (Rome, 1687). “Summula theologica in quinque questiones imennes aliquus momenti, qua Scholasticis agitati
solent, breviter descuntutur ac defunctor" (Lyons, 1669). The principles on which this work constructs its theological conclusions are far different from those of Aristotle. "Euphodieran seu vir ingeniosus", a little book, which may be useful to the student of literature (Lyon, 1669; Budapest, 1703). Most of Fabri's other works deal with philosophy, mathematics, physics, astronomy, and even zoology. In his treatise on man he claims to have discovered the circulation of the blood, prior to Harvey; but, after investigating this question, Father Fabri arrives at the conclusion that, at best, Father Fabri may have made the discovery independently of Harvey (cf. Bellamy, Cours de Zoologie, 1864, p. 23). Sommervogel, *Bibl. de la C. de J.* (Brussels and Paris, 1892), III, 511-523; Hunter, *Nomenclator Literarius* (Hannover, 1893), tom. II, 598-600.

A. J. MAA.

Fabriano and Matelica, Diocese of (Fabriano- nien-sis et Matelicensis). Fabriano, a city in the province of Macerata, Central Italy, is noted for its paper manufactories and its trade in salted fish. It is said to have been founded in the ninth century A.D. by refugees from the ancient Attidium (the modern Atti- ggio); even as late as 1351 the baptismal font of Fabriano was in the church of San Giovanni Battista in Attigio. The history of Fabriano is closely connected with that of the Marches. In the church of San Benedetto, of the Silvestrine monks, is the tomb of Blessed Giovanni Bonelli, a Silvestrine (d. 1290). St. Silvestro Guzzoli, the founder of this order, is buried at Monte Fino, not far from Fabriano, where Blessed Giuseppe dei Conti Atti and Blessed Ugo Laioco, both Silvestrines, are also buried. The relics of St. Romuald were transferred to the church of SS. Biagio and Romualdo in 1180. The city was under the jurisdiction of Camerino until 1785, when Pius II re-establish- ed it as see of Matelica and united it to the prince- pality with Fabriano.

The town of Matelica possesses some ancient in- scriptions. A Roman colony was established there in 89 B.C. In 487, Bishop Equitius of Matelica was at Rome; and in 531, Bishop Florentius accompanied Pope Viglius to Constantinople. No other bishops of the ancient see are known. Until 1755 Matelica was under the jurisdiction of Camerino. Mention may be made of Blessed Gentile da Matelica, a Franciscan, martyred in Egypt in 1351, and buried in Venice (ai Prati), where also is buried Mattia Lazaro, a Benedictine, also of Matelica, buried in the church of Santa Maria Maddalena. The diocese is immediately subject to the Holy See, and has 32,000 inhabitants, 42 parishes, 1 male and 2 female educational institutions, 6 religious houses of men and 4 of women. The painter, Gentile da Fabriano (q. v.), is one of the most famous of the natives of Fabriano. He worked at Foggia and Bari, and later in the palace of the doges at Venice, in the Strozzi chapel at Florence, and finally at Rome.

U. BENIGNI.

Fabrica Ecclesiae, a Latin term, meaning, etymologically, the construction of a church, but in a broader sense the funds necessary for such construction. This expression may also be applied to the fund for the repairing and maintenance of churches, the daily expenses of worship, and to the amount requisite for covering these expenses. In this particular con- nexion, the term expression is first met with in the law of Pope Simplicius to Gaudentius, Bishop ofAuxina (Nov. 475); however, even then it was not new, being borrowed from profane usage. During the first Christian centuries the temporalities intended to meet the expenses incurred by the religious services carried on throughout a diocese be- longed entirely to the cathedral church, and constituted a common fund which the bishop used, at his option, in defraying the expenses of religion, supporting its ministers, and caring for the poor. But in the fifth century, particularly in Italy, this fund was set aside for the *fabrica ecclesiae*. In Sicily, however, in 494, no portion was especially reserved for the fabric, and in Gaul, such an allotment seems to have been unknown. In Spain, a third of the ecclesiastical revenues was assigned to the *luminare* (lights), a term synonymous with fabrica. The rise of Christianity in the rural districts brought with it a change of discipline, according to which each church obtained a separate patrimony. In fact, benefactors no longer bestowed their gifts on the entire diocese, but on one particular church, frequently in honour of some saint specially venerated there. The common fund itself was divided among the churches of the diocese. Some writers maintain this division was owing to the establishment of ecclesiastical benefits; others claim that it followed the canonical recognition of the private ownership of churches. After vainly endeavouring to re- store the exercise of public worship to the church, the ownership had been completely renounced by the founders, the canon law eventually permitted public worship in churches that remained the private property of an individual, a monastery or even the episcopal *mena*, or estate. The owner, however, was obliged to set apart a special fund for the church (pro sertis tectis, or for the luminare). Hence- forth, when a bishop established a new parish, he was bound to provide for its needs by a specified income to be deducted from the common diocesan estate or fund—of course, if no benefactor had otherwise en- dedowed the parish. Some hold that in consequence of the principles governing feudal society all medieval churches and their revenues became private property, and that the conflict of Gregory VII and his successors against lay investitures was in reality an effort to restore its lost posessions to the ecclesiastical for the use of secular clergy. The result of so much strife was the transformation of former proprietary rights into the right of patronage (*Jus patronatus*).

While ecclesiastical ownership was going through these phases, the canon law decided who must contribute to the maintenance of the churches, to which those revenues must be applied, and to the fund for the church's ownership, and all recipients of its revenues (Synod of Frankfort, 794); under pain, therefore, of forfeiting his right of patronage, the patron of a church must share the burden of its maintenance; so too the incumbent of the ecclesiastical benefice and those to whom the tithes have been granted (decemvires), when the resources of the church were insufficient, the faithful themselves were bound to contribute to the expenses of Divine worship. These provisions were sanctioned by the Decretals of Gregory IX (cc. i and ii de ecclesia adiutornalis, III, 48); and by the Council of Trent (Sess. XXI, de ref. c. vii); they represent in this matter the common ecclesiastical law (see BUILDINGS, ECCLESIASTICAL). The *fabrica ecclesiae* means also the persons charged with the administration of church property, usually laymen. The origin and historical development of this institution has not yet been studied very closely. Their organization, moreover, has differed from one country to another; now there are generally organized in the same country. Churches subject to the right of patronage and those incorporated, frequently for temporal administration, with monasteries, were more closely affected than other churches by this condition of dependency. In such churches the patron occasionally appointed an officer to administer the temporalities. It is commonly believed, however, that "church fabrics" do not antedate the twelfth century. In the first ages of the Church the bishop administered church property with the aid of deacons and priests, but during the
fourth century there appeared in the Orient and in certain countries of the West, bursars (aeconomi), who, subject to the direction of the bishop, managed the temporal affairs of churches; in other countries the bishop continued to administer the church property with the assistance of some trustworthy man of his choice. When each church came to have its own particular patrimony, the bishop was naturally obliged to turn over the administration of such property to the local clergy, reserving nevertheless a right of control. During the long Investitures conflict this right, it may be, was completely annihilated; when peace was restored some property was often allowed to appeal to the inhabitants of the parish to defray the expenses of religion. In France and England especially, the assembled parishioners established the portion of expenses that ought to be borne by the community; naturally, therefore, this assembly was henceforth consulted in regard to the most important acts connected with the administration of the parish temporalities. For that purpose it selected lay delegates who participated in the ordinary administration of the ecclesiastical property set aside for parochial uses. They were called vestrymen, churchwardens, procurators (procuraturs), menorhauri, annatores, gossers, provisores, utilis, operarii, alitarniani, etc.

In the councils of the thirteenth century frequent mention is made of laymen, chosen by their fellow laymen to participate in the administration of temporal affairs; at the same time the rights of the parish priest and of ecclesiastical authority were recognized. A reaction is visible in the councils of the fourteenth, fifteenth, and sixteenth centuries which undertake to check the tendency towards an exclusively lay administration of the parochial property. Eventually the Council of Trent (Sess. XXII de ref. c. ix) admitted lay participation in the administration of ecclesiastical property, but demanded that at all times and in all places the lay administrators render an annual account to the bishop or to his delegate. As no general law has determined either the competency or the composition of fabric committees (conseils de fabrique) there has been in this respect very great variations. In modern times secular power has frequently interfered in the administration of ecclesiastical property set apart for purposes of worship, and in the organization of church fabrics. Even now, in most European countries, the State regulates the administration of ecclesiastical property and the proceedings of the fabric. (See under BUILDINGS, ECCLESIASTICAL, an outline of the regulations actually in force.)

A. VAN Hove.

**Fabricius, Andrew.** See Lefèvre, Family of.

**Fabricius, Hieronymus** (surnamed AB AQUAPENDENTE), a distinguished Italian anatomist and surgeon, b. in the little town of Aquapendente (Aqua-Pendente) in the province of Terni from Orvieto, in 1537; d. at Padua, 21 May, 1619. He is known by the name of his birthplace to distinguish him from his contemporary, the great German surgeon, Fabricius Hildanus. In English medical literature Fabricius is best known as the teacher of Harvey, who gives him the entire credit for the discovery of the valves in the veins which meant so much for Harvey's own discovery of the circulation of the blood. Some valves in the veins, however, had been seen and described by investigators before this, probably even by Erasistratus in ancient times. It was Fabricius' merit that he recognized the existence of a system of valves.

Sent by his parents to the University of Padua, Fabricius succeeded admirably in Greek, Latin, and philosophy. When he took up medicine he became the favourite pupil of Fallopius, being his demonstrator at Padua when only seventeen years of age. Though he was only twenty-five when Fallopius died, Fabricius was chosen his successor and a little later became professor of surgery, occupying both chairs for nearly half a century (1562-1609). His abilities were properly appreciated by the Senate of Venice, which built for him at Padua a spacious anatomical theatre bearing his name. He was created a Knight of St. Mark, and his annual salary was a thousand crowns, which was continued for ten years after his resignation. A statue was erected to his memory in Padua after his death. Fabricius was indifferent to money, refused regular fees, and never presents as wealthy patients forced on him. His work on anatomy (300 fol. pp.) is illustrated by hundreds of figures on sixty-one full-page plates, some of the best ever made. A monograph on the speech of brutes and a study of the comparative anatomy of the appendices are suggestive even for modern readers. His work on surgery is scarcely less valuable than that on anatomy and has gone through twenty editions in many languages. His principal works are: "De visione, voce, auditu," (Venice, 1600); "De brutorum loculibus" (Padua, 1609); "De formatio fetu," (Venice, 1627); "Traiectus anatomici triplex" (Frankfort, 1614). All his other works were reprinted at Frankfort shortly after this time, and all his works at Leipzig in 1587.

**Fabyan, Robert,** English chronicler, d. 25 Feb., 1513. He was a London clothier, a member of the Drapers' Company, and an alderman. He held several responsible positions, but resigned his aldermanship in 1502, probably to escape the financial burdens of the mayoralty. Fabyan belongs to the class of City chroniclers, men interested mainly in municipal life, but he is the first to take a wider view and to attempt to combine his London history with that of the country. He was not a very successful. His "Concordance of Histories" begins with Brutus and goes down to the death of Richard III, but his effort to harmonize different chroniclers is made without art or historical judgment. The work is of value mainly for its reference to London. The second edition (1533) contains a number of pithy scattered notes on municipal history under Henry VII. De Busch considers that these must be an abridgment of a lost chronicle of that reign. The best edition of Fabyan is that published by Ellis in 1811.

**Façade,** the face or front of any building. In ecclesiastical architecture the term is generally used to designate the west front; sometimes the transept fronts. For ritualistic reasons, the church architect was everywhere compelled to treat the end wall of the nave as the grand façade.

**EARLY CHRISTIAN PERIOD.** The façades of the
churches of the early period were generally built on the model of the old Roman basilicas, and were constructed according to Roman methods, and largely formed of columns and other features taken from Pagan buildings. Their interest is principally from a historical point of view. The façades of the early Roman basilicas were exceedingly simple in their upper surfaces. There were but two types; the central gable, following usually the outline of the structure behind it, and the screen façade, usually made to overhang for purposes of protection, and formed by a gradual projection of the cornice and brick both of the nave and aisles. In the more important churches the entire surface was concealed by a mosaic composition extending from summit to portico. Such were St. John Lateran’s, St. Peter’s, St. Paul’s, St. Mary Major’s, etc. This converted the façade above the porch into a blaze of colour. Toward the close of the Middle Ages more windows were sometimes opened in the façade. At St. Peter’s, in the thirteenth century, beside the wheel window in the gable, there were two rows of three tall mullioned windows, the lower row being flanked by two more. The lower part of the façade was always covered by a projecting pediment, consisting either of one side of the quadrangular atrium, or of an independent arcade or colonnade. The wall space underneath was usually broken by as many doors as there were aisles to the church, normally three, sometimes five. In the minor basilicas there was but a single door, and in exceptional cases, as at St. Peter’s, there was a supplementary door for special occasions.

Byzantine façades as a rule were left comparatively plain, partly, no doubt, on account of their location and surroundings. A Byzantine church usually stood apart in a cloister, and when possible terraces were planned about to give shade. In towns, the church, its grounds, etc., were generally surrounded with walls. It was entered through a cloistered forecourt or atrium, in the centre of which stood the phiale, or fountain, where the required ablutions were made. Across the lower portion of the front of the church stretched the narthex or vestibule, which sometimes had a porch or portico in front of it. Many churches had a double vestibule, the outer one being called the esonarthex, generally appointed for women. The narthex communicated with the church by means of three large doors in the centre of the columns and the profile of the arch is usually richly ornamented. The two others, situated one on each side, were small and not remarkable. The central door was called the Beautiful Gate, sometimes the royal or basilican gate.

In the larger churches, above the narthex there was often an enclosed upper gallery for the accommodation of women, called the gallery. This gallery was enclosed partly by the outside wall or walls and partly by grilles, and was reached by a staircase for the use of women only. From the outside it was lighted by a series of narrow windows, generally covered by round arches, or one or more objects were placed to give light through a certain extent. Especially in the Neo-Byzantine style, there are occasionally porches, balconies and machicolations, which give relief to the general flatness. These features are well marked with the grace peculiar to the Byzantines. Examples at Constantinople, S. Porcarius and Baechus (352–353), and Santa Sophia (353–357). The church of the Virgin at Mistra and the Catholicon, at Athens (both uncertain, 11th to 13th century), and St. Mark’s, Venice (1100–1350). Examples of Italian Byzantine are the cathedrals at Palermo and Cefalu. The present façade of St. Mark’s, Venice, is a later casing upon the original Byzantine façade and stands alone as regards its style, although generally classed as Byzantine. The first appearance of the Byzantine in Italy was the church of San Vitale, at Ravenna. The façades of the Italian Byzantine churches, in Russia, the cathedrals of Moscow, Kiev, and Novgorod, are among the best known examples.

Lombardic (sometimes called Lombard Romanesque) façades were the most unfortunate part of Lombard churches. The design of façades to the basilical plan and sections was much troubled to many different schools of architecture, but by none it was treated with such signal failure as by the Lombards. In declining to attach the campaniles to the church, the Italians rejected what apparently was the only possible solution. The use of the façade as a raised surface, like that of San Michele Maggiore, resulted in designs that obviously belied the basilican section. Even before this, it had been the custom, where the three aisles had been expressed, to raise the façade more than the actual roof of the church, perhaps with a view to make the church appear externally larger than it really was. This fraud continued to be practised in the churches of Verona, and indeed throughout Italy, so that it finally became characteristic of Italian church façades. On the false façade thus obtained, ornament, utterly irrelevant for the most part, was spread with a more or less lavish hand. The façade of S. Ambrogio, Milan, with its great open arches is, perhaps, the most successful one the Lombards ever erected.

Romanesque façades. Their characteristics, as a whole, may be summed up as follows: Buttresses formed as pilaster strips of slight projection, connected at the top by horizontal mouldings, or by a row of semicircular arches resting on a corbel-table projecting from the wall. Semicircular arches, resting on rudely formed capitals, also occur. Door and window openings are very characteristic. The principal, upon which the jambs were formed, was in receding planes, or rectangular recesses, known as “orders”, in which were placed circular columns or shafts. The arches followed the same method, being built in concentric rings. A continuous abacus often occurs over the doors and windows. The profile of the arch is called round the semicircular portion of the arch. The characteristic rose (or wheel) window occurs over the principal doorway of the façade. Mouldings were often elaborately carved. The carving and ornamentation was derived from many types of the vegetable and animal kingdom, and treated in a conventional way. Local influences were instrumental in producing different local characteristics.

In Central Italian Romanesque, beauty in detail was more sought after than completeness of style. Byzantine influence was strong, especially in Venice, Ravenna, Florence, and Pisa, the latter possessing a distinct style of its own, sometimes called Tuscan. San Miniato’s, in Florence, is interesting as marking the period of transition, in the eleventh century, from the Basilian to the Romanesque type. In Northern Italian Romanesque, arcades are restricted to the tops of galleries. The general character is less refined, owing to the use of stone and brick instead of marble. Details show a breaking away from Classical precedent. In sculpture, hunting and other scenes reflecting the life of the northern invaders are frequent, and in these grotesque elements is prevalent. S. Antonio’s, in Piacenza, is an example. Southern Italian Romanesque shows Byzantine and Mohammedan influence, as instanced in Monreale Cathedral, and the Martorana Church, in Palermo. The detail of these buildings is always refined and graceful, which may be due to some extent to the Greek descent.

FAÇADES
of the inhabitants of this part of Italy. Southern French Romanesque is remarkable for its rich decorative façades. Buttresses are generally mere strips, of slight projection, and the façades were arranged in storied, with window lights in pairs or groups. Imposing windows are characteristic of this style. The west fronts of the churches of the Charente District, in Aquitania, were elaborately treated with carved ornament representing foliage or figures of men and animals. On the ground story the capitals so treated were often continued as a rich, broad frieze. German Romanesque bears a strong resemblance to that of North Italy. In the façades the most richly ornamented parts are the doorways and capitals; there is also a wealth of circular and octagonal turrets and arcaded galleries. Examples: The church of the Apostles, at Cologne, the cathedrals of Worms, Mainz, Trier, and Speyer.

Gothic façades.—The first in point of dignity is undoubtedly that of Notre-Dame de Paris; in richness, those of Amiens and Reims. The façade of Amiens, of which only the three lower stories are of the thirteenth century, would doubtless have been the noblest of all Gothic façades, had it been finished according to the original design. The great French Gothic façades are all characterized by the fact that they somewhat disguise the true character of the edifice which they enclose; and it is, perhaps, true that an entirely satisfactory design for a western façade was hardly ever realized in a large Gothic church. As a rule, the façade merely wholly expresses the form of the building which it encloses, and is a mere covering of its mass, except in buildings of a very simple character. In the façades of smaller churches where the towers are omitted, as at Ncaster, Auvers, Heronville, and champagne, the whole structural form of the building is expressed as fully as it can be. The west fronts of Sens, Paris, Amiens, and Reims sufficiently illustrate the development and the characteristics of the French Gothic western façade.

In England, the Anglo-Norman western façade was, as a rule, both inappropriate as a termination to the building, and ill-composed as an independent architectural feature. Yet early façades were remarkable. The most important extant fronts of the thirteenth century are those of Lincoln, Salisbury, Wells, and Peterborough. The façade of Lincoln exhibits four different styles of architecture—the work of as many different periods of construction. The portals of English churches are in general insignificant and diminutive, and those of Wells are especially so. The façade of Peterborough is entirely unrelated to the building which it encloses. As a rule, the west front in England is devoid of Gothic character; but among exceptions is the western façade of Ripon cathedral. In the pointed architecture of England, western towers, when they occur, are less imposing than those of the Gothic churches of France.

The western Gothic façades in Germany call for no extended remarks. The façade of the Lorenzkirche of Nuremberg, dating probably from the second half of the thirteenth century, exhibits a strange combination of Romanesque and Gothic features. Towards the close of the thirteenth century, in Germany, the west front began to receive more elaborate and peculiar treatment. Acute open gables over the portals, free-standing mullions and tracery over the face of the wall above, and tall open gallery in front of the openings of the second stories of the towers, are among the new features. Entrances are often north or south, instead of being at the west end. Towers with spires were much used, open-work tracery in the spires is very characteristic. The typical examples of German Gothic are those of Strasburg, Fribourg, Ratisbon, Cologne, and Vienna cathedrals.

Italian Gothic façades show the influence of Roman tradition in their classic forms of construction and decoration, which was so great that the verticality which marks the Gothic architecture in the north of Europe does not pervade the Italian examples, to anything like the same extent. From the absence of vertical features and shadows in the façade, flatness is the predominating characteristic. There was a general absence of pinnacles. Stone or marble of different colours, carried in systematic hand-courses or patterns throughout the design, give a special charm to the cathedrals of Siena, Orvieto, Verona, etc. A large central circular window was a general feature. Windows are often semicircular-headed, and have shafts with square capitals of Corinthian type, often twisted and inlaid with mosaics known as "cosmatesque". The Spanish Gothic façades exhibit a variety of treatment; but in few cases is the French form closely followed. The front of the early church of San Pedro de Avila is an entirely logical design of simple character. The façade of Burgos is composed in the French manner. Toledo is a mixture of Gothic and Renaissance, and the west front of Leon dates from the thirteenth century, the later work being characterized by extreme, and even wild, ornamentation. Traowered open-work spires, as in Germany, were favoured, those at Burgos being worthy of attention.

Renaissance façades agree essentially in architectural treatment, growing out of a close contact with ancient monuments, though with no strict conformity to them. Examples in Italy: S. Lorenzo and Santo Spirito, in Florence; Santa Maria della Pace, S. Andrea's, The Gesù, S. Peter's, St. John Lateran's, in Rome; S. Maria dei Miracoli, S. Zaccaria and S. Maria della Salute, in Venice; Milan cathedral; and the Certosa of Pavia. French Renaissance: St. Eustache, St. Etienne du Mont, the church of the Sorbonne, the Pantheon and the Madeleine, at Paris. German Renaissance: St. Michael's at Munich and the Frauenkirche at Dresden. Spanish Renaissance: Santo Domingo at Salamanca; the cathedrals of Granada, Valladolid, Santiago, Malaga, and Carmona. English Renaissance: St. Paul's, London.

Thomas H. Poole.

Facciolati, Jacopo, lexicographer and philologist, b. at Torreglia, near Padua, Italy, 4 Jan., 1682; d. at Padua, 26 Aug., 1769. He was educated in the seminarv at Padua, and later was made professor of logic and regent of the schools in the university of that city, continuing in this position for forty-five years. In 1719 he brought out a revised edition of the "Lexicon Septem Linguarum," a Latin dictionary in seven languages, called the "Calepinus", from the name of the monk Ambrogio Calepio. In this work Facciolati was assisted by his pupil, Forecellini. Their labours on the "Calepinus" convinced them of the need of a totally new Latin lexicon. Therefore, putting aside all other works, they undertook the compilation of a lexicon which should be the most comprehensive vocabulary of the Latin language that had ever been made. For forty years, under the supervision of Facciolati, Forecellini laboured, reading through the entire body of Latin literature, as well as the whole collection of Latin inscriptions, including those on coins and medals. Their great lexicon, which bore the title, "Totius Latinitatis Lexicon", was published in four volumes, at Padua in 1771, after the death of both the editors. This monumental work, on which all Latin lexicons now in use are based, gives every Latin word, with its Italian and Greek equivalents and copious citations illustrating the various meanings. Subsequent editions are the English one of Bailey in two volumes (London, 1828), and that of De Vit (Prato, 1858-87). Facciolati also published a new edition of the "Thesaurus Ciceronianus" of Nolusius. He left a collection of the best of their elegant Latin, which were afterwards published. (See Forecellini.)

Faculties. Canonical (Lat. Facultates).—In law, a faculty is the authority, privilege, or permission, to perform an act or function. In a broad sense, a faculty is a certain power, whether based on one's own right, or received as a favour from another, of validly or lawfully performing some action or function. In a more restricted sense, it means the conferring on a subordinate, by a superior who enjoys jurisdiction in the external forum, of certain ecclesiastical rights which are denied him by common law; to act, namely, in the external or internal forum validly or lawfully, or at least safely. Faculties, then, will be classified, first of all, by reason of the object to which they relate, inasmuch as (1) jurisdiction is granted to absolve from sins and ecclesiastical censures, to dispense in vows, in irregularities relating to the reception of orders, in matrimonial impediments; (2) permission or licence is given to do something which would be otherwise forbidden, as the reading of prohibited books, saying two Masses on the same day; ordaining clerics under the prescribed age; (3) to avoid worry and qualms of conscience a precautionary dispensation or permission is granted to proceed in certain cases in relation to which the ordinary channels of the Sacred Congregation are opened for validity, even though they be episcopal; if the power or privilege conferred proceeds from a diocesan bishop, by virtue of his own power or ordinary jurisdiction, as for instance, the faculties of the diocesan, to hear confessions, say Mass, preach, etc., granted to priests who labour in a diocese for the salvation of souls. Faculties are regular when they proceed from superiors of the regular clergy by reason of their ordinary jurisdiction, or by virtue of extraordinary powers or privileges conceded to them by the Holy See. Lastly, faculties are general or particular: general, when granted for indeterminate periods, though they may be limited by time; particular, when granted to designated persons or for particular cases. General faculties conceded to bishops and other ordinaries are also called indults.

The distance of dioceses from Rome, together with peculiar local conditions render the granting of these faculties a matter of necessity, and in 1687 certain new grants or lists of faculties were drawn up by the Sacred Congregation of the Holy Office, and since then have been communicated by the Holy See, through the Congregation of the Propagation of the Faith, to bishops, vicars and prelates of Apostolic throughout the world, according to their various needs. These indults are given for a definite period, e.g. five years (facultates quinquennales), or for a definite number ofcases, and are ordinary and extraordinary; the former being issued in favour of grants under the previous formulae (Formula I, II, III), and the latter under capital letters (Formula A, B, C, etc.), others under small letters (Formula a, b, c), while others, finally, without special designation, begin: "In an audience with His Holiness". Formulae V, VII, VIII, IX are no longer in use, as they had been the practice in the United States grants I, C, D, and E. Of late, however, C, D, and E, with certain modifications, are combined in form T. Favours and privileges are granted likewise by the congregations in keeping with the Constitution "Sapienti Consilio" (1908), and are classified consequently in accordance with the Congregations from which they proceed. The authority of the Propaganda is not so ample in this matter as formerly, and this too in relation to countries still subject to it. Questions pertaining to the Papal Privilege fall in every case under the sole competency of the Holy Office, while diocesan faculties, including the portions of the Western Church under its jurisdiction, the Propaganda is obliged to confer with the Congregation of the Sacraments (Cong. of the Consistory, 7 Jan., 1909). Especially through the Sacred Penitentiary does the pope communicate faculties for the internal forum to bishops, and to other persons, conferring on certain confessors, in definite forms or leaflets (paggelle).

Graces thus received from the Holy See do not restrict the prerogatives which the one favoured may already enjoy by virtue of ordinary jurisdiction or other title (gratia non necat gratiam). The purpose of the Holy See is to make a concession, not to lessen one's authority. Hence, for example, a bishop is authorized by the Council of Trent to dispense his subjects from the observance of the intervals prescribed in the reception of orders; consequently he is not obliged to observe the condition laid down in Form I, art. one, to reject, for example, the faculties of a cleric actually outside the bishop's territory. While the recent legislation of the Church has sought to prevent conflict of authority between the various Roman Congregations, tribunals and offices, yet it will happen at times that two or more of these bodies will have jurisdiction in the same case.

A petition which has been rejected by one of the congregations may not be presented lawfully to another; a favour granted by another congregation, the previous refusal of the grant being concealed, is null and void. A petition in writing is not required for the grant of dispensation, but is usually exacted; the same may be said of application by telegraph or telephone. The form of the supplication is not prescribed except in so far as requisite data must be expressed. Petitions addressed to the Propaganda (the same is true of most of the congregations, at least to expedite matters), should be in Latin, Italian, or French. The Sacred Penitentiary will accept communications in any modern tongue. The supplication is made out in the name of the petitioner, but the rescript is sent to the ordinary. The diocesan chancery of the petitioner usually deals directly with the rector of the parishes concerned.

Faculties can only be used in favour of members of the Church who are not disqualified by ecclesiastical penalties or censures. Hence in marriage cases where one of the contracting parties is a non-Catholic, the dispensation is given directly to the Catholic. Hence also in Apostolic rescripts absolution from penalties and censures, as far as necessary for the rescript to be effective, is first given. Apostolic faculties granted to a bishop, which imply an act of jurisdiction in using them, can be communicated and applied only to the subjects of the bishop, and to such determinate persons as are capable of receiving spiritual benefits by means of this faculty. Ordinary faculties may be exercised in behalf of a subject, while both he and the bishop, or other person making the concession, are outside their own territory. When the use of faculties is prohibited (as in Forms I and C), it means that the subject, not the bishop, must be in the diocese when the indulgence is made use of in his behalf. In the United States any matrimonial dispensation may be conceded to one actually outside his own diocese, if he has not acquired at least a quasi-domicle elsewhere (Holy Office, P. Propaganda, 20 Dec., 1874). To dispense validly and lawfully, a grave and just cause existing at the time of the dispensation is required. He who possesses general delegated power may apply it to himself, e.g. dispensing himself from fasting. There is an obligation, especially in dispensations, to be measured by the greater or lesser urgency of the case,
of using faculties possessed. It might be noted that the Apostolic Delegate at Washington, in common with the bishops of the United States, has possessed the Propaganda Forms I, C, D, and E, together with some others, applicable of course throughout the United States. His Eminence, aside from territorial extension, possesses no greater powers in regard to matrimonal dispensations than these diocesan bishops.

A bishop cannot dispense without a special faculty, when two or more matrimonal impediments, diriment or otherwise, exist in the same case, or affect the same persons, though by reason of indults he can dispense separately in each of the impediments involved. The restriction, however, holds good only when the impediments in question are generically different, e.g. consanguinity and affinity, or where the power to dispense is given in different indults. The special faculty covering the cumulation of matrimonal impediments is usually granted with the renewal of faculties and is effective during the duration of the same. The form of this special faculty is not always identical, greater or more restricted powers being contained therein. Moreover, a bishop cannot employ this faculty when he is granting by virtue of an indult a retroactive dispensation to render a marriage valid exterritorialiter (capere, radice). This question of cumulation affects dispensations only, not absolutones: a dispensation inflicts a wound on the law, not so an absoluton. It is necessary for validity that the concession of a favour be made known to the one benefited; and it ought to be made known to the authority in question in such manner as law has established. As faculties depend upon the will of the grantor, the terms of the indult must be carefully studied, and obscure passages rightly interpreted. In this matter the general rules for the interpretation of laws are to be observed with some additional ones. Herein the use of faculties is most important; it must be noted that power to dispense is granted for matrimonal alliances already contracted, or not yet contracted, or for both. A faculty granted for the internal forum only, particularly if jurisdictional, cannot be used in the external forum, and vice versa. Faculties are not to be extended to persons or cases not included in the same. The existing practice, especially of the Roman Curia (stilus curiae Romanae), will serve as a guide in this matter.

Faculties expire by the death of the grantor, his removal from office or loss of jurisdiction (certain disabilities, however, are to be born in mind, as below); by the death of the privileged one; by lapse of time when they are granted for a definite period; when they have been used for the number of cases specified in the grant; by revocation; by renunciation duly accepted; by the completion of the business for which one has received special authorization; by cessation of the formal cause on which the favour was based. Faculties granted absolutely (not revocable at will) by one possessing ordinary jurisdiction, and gratia facie (i.e., the delegate is a necessary executor), do not expire at the death of the grantor; gratia facie (i.e., the delegate is a voluntary executor, viz., commissioned to act, if he judge it expedient) cease at the death of the grantor, when no steps have as yet been taken leading to the concession requested (re adhuc integri); otherwise they do not cease. Faculties granted by one enjoying delegated power cease at the death of the one delegating, unless the Holy See expressly provides their continuance, or unless the matter in question has already been begun (re non integri). The power given personally to a delegate, or subordinate, expires at his death, which is not the case if he is chosen by reason of his dignity or office. When it is stated that faculties are "in" or "of" the Holy See, a diocese, etc., they continue in force after the death of the pope, bishop, etc. Indults consequently found in the Propaganda forms or other general grants as above, since they are gratia factae, do not become ineffective at the death of the pope: the same is true of the faculties conceded by the Sacred Penitentiary, when the prefect of that tribunal loses his jurisdiction through death or other cause. Jurisdiction granted by a bishop to hear the confession of an individual ceases, re adhuc integerr, when the bishop dies, is transferred, or resigns: the contrary is true, when jurisdiction is given to hear causes; in general. Notwithstanding the revocation of faculties, a case already begun may be completed; and by a general revocation of faculties special faculties do not expire. Neglect to use a favour does not destroy its force, as for example, a person dispensed from fasting or the recitation of the Holy Office does not lose the grace, if he meanwhile fast or recite the Office, even for a considerable time.

All special faculties granted habitually (habitualiter), by the Holy See to bishops and others enjoying ordinary jurisdiction within definite territorial limits, remain in force notwithstanding the loss of jurisdiction through death or other cause of the individual to whom they are granted (Cong. Holy Office, 24 Nov., 1897), but pass on to his successor in the same office. They are considered not personal but real favours, granted for the ordinary of the diocese or place, and by the ordinary are understood bishops, their vicars, Apostolic, prelates or prefects Apostolic ruling over territory not subject to a bishop, vicars capillar or other legitimate administrators of vacant sees (Cong. Holy Office, 20 Feb., 1888). It is to be noted that since these indults are granted to the ordinary at his request, the appeal is included in the vicar-general of a diocese, said vicar-general uses these faculties, grants dispensations and other graces contained therein, by virtue of authority received directly from Rome, equivalent to that extended to the bishop himself. The bishop may find these powers, but notwithstanding the prohibition, the vicar-general would act validly, were he to use said faculties, provided nothing else were wanting to render his action invalid. (See JURISDICTION; DELEGATION; RESCRIPTS; EXECUTOR, APOTOLIC; DISPENSATION.)

Andrew B. Meehan.

Faculties of the Soul.—I. MEANING.—Whatever doctrine one may hold concerning the nature of the human soul and its relations to the organism, the following points are beyond the possibility of doubt. (1) Consciousness is the scene of incessant change; its processes appear, now in one sequence, now in another; and, normally, the duration of each is brief. (2) All do not present the same general features, nor affect consciousness in the same manner. They differ on account both of their characters as manifested in consciousness, and of the organ, either external or internal, on which their appearance depends. Yet the features they have in common under this twofold aspect, together with their differences, make it possible and necessary to group mental states in certain more or less comprehensive classes. (3) There is more in the mind than is actually manifested in consciousness; there are latent images, ideas, and feelings, which under given conditions emerge and are recognized even after a considerable interval of time. By reason of their innate or acquired aptitudes, minds differ in capacity or power. Hence, even if it were possible for two minds to experience processes perfectly similar, they would nevertheless differ greatly because one is capable of experiences impossible to the other. (4) Notwithstanding their variety and their intermittent character, these processes belong to one and the same conscious subject; they are all referred naturally and spontaneously to the self or me.

These facts are the psychological basis for admitting faculties (from facere, to do), capacities (capax, from capere, to hold), or powers (from posse, to be able;
the Scholastics generally use the corresponding Latin term *potentia*).

Any attempt, however, to define with greater precision the meaning of faculties, is sure to call forth vigorous protest. In fact, few psychological questions of equal importance have been the subject of so many animated discussions, and it may be added, of so many misunderstandings. One extreme view looks upon faculties as real, though secondary agents, exercising an active influence on one another, and as being scientific explanations of psychological facts. Why does man see and reason? Because he has the faculties of vision and reasoning. The will acts, is free; there is an interaction of the intellect, the will, the senses, the feelings, etc. Sometimes, however, such expressions are understood with the understanding that they are metaphors, and with the explicit or implicit warrant that they must not be taken literally.

At the other extreme are found psychologists—and they are numerous to-day—who refuse to concede any kind of reality whatever to faculties. Processes alone are real; faculties are simply general terms used to label certain groups of processes. Like all abstractions, they will never be looked upon as having any reality outside of the mind, which uses them as logical substitutes to facilitate the classification of mental facts.

That the faculty theory has no essential connexion with Catholic dogma is sufficiently evidenced by the fact that it is found, and still finds, opponents as well as advocates among Catholic theologians and philosophers.

Judging, therefore, the question on its own merits, it may be said that the doctrine of St. Thomas avoids both extremes mentioned above, and is at least free from the absurdities with which the Scholastics, so frequently charge the faculty theory. His expressions, taken apart from their context, and translated without a sufficient acquaintance with Scholastic terminology, might easily be given a wrong interpretation. It is the knowledge of the nature of the soul and its faculties, according to St. Thomas, is partly negative, and, in its positive aspect, analogical, it is necessary to use expressions taken from things which are known more directly. But we are given some principles which must always be kept in mind; for instance, "without the a priori principles, there is in the mind nothing of the intellect but what we have experienced in the body of the soul" (Summa, I, Q. 13, xiiii; I-II, xi: De Veritate, xxviii; I-II, xi: De Malo, vi). This shows that when a real distinction is admitted between the soul and its faculties, or between the faculties themselves, the meaning is not that of a distinction between substances or agents. In Scholastic terminology, distinction does not always mean separation nor even the possibility of separation. And the distinction between a substance and its qualities, attributes or modes, was called a real distinction.

If the soul can originate or experience states which, as everybody admits, may be widely different, it is because there are in the mind various modes of energy or faculties. Since minds differ not only by the actual contents of consciousness, but also, and chiefly, by the power which they have of experiencing different processes, it is clear that if this constitutes a real difference, it must itself be something real. So unavailable is the conclusion, that some of the strongest opponents of faculties are at the same time the strongest defenders of the theory of psychical dispositions, which they postulate in order to explain the facts of memory, mental habit, and in general, the utilization, conscious or unconscious, of past experience. And yet, what is a psychical disposition but an acquired power or faculty? Stuart Mill's "background of possibilities" or Taine's "permanent possibility" are certainly less clear and more objectionable than faculties, for the faculty is not a mere possibility, but a real power of an agent, a *potentia* (see *actus et potentia*).

Psychical dispositions are in the strictest sense psychical facts than are faculties, if by explanation is meant the assigning of an antecedent better known than, or known independently of, the facts to be explained. In both cases, the whole knowledge of the faculty, or the disposition, is derived from the processes themselves, for neither can fall under direct observation. The possibility of an experience or action, if known, is always known by direct inference or by analogy from past experiences or actions. Yet without being a scientific explanation, and without substituting itself for scientific explanations, the faculty, like the disposition, trace, subconscious activity, etc., is a legitimate postulate.

II. Classification.—Plato admits three parts, forms, or powers of the soul, perhaps even three distinct souls: the intellect (nous), the nobler affections (bouleusis), and the appetites or passions (epistimoeis). Aristotle, the soul is one, but recognizes five groups of faculties (*dunameis*): the "vegetative" faculty (peristimoeis), concerned with the maintenance and development of organic life; the appetite (epistimoeis), or the tendency to any good; the faculty of sense perception (adothymoeis); the "locomotive" faculty (koniastikoeis), which controls various bodily movements; and reason (dunastikoeis). The Scholastics generally follow Aristotle's classification. For them body and soul are united in one complete substance. The soul is the *forma substantialis*, the vital principle, the source of all activities. Hence the soul, the general science of which is called theology, is considered as in the provinces of biology and physiology. In more recent times, however, especially under the influence of Descartes, the mind has been separated, and even estranged, from the organism. Psychology deals only with the inner world, that is, the world of consciousness and its conditions. The nature of the mind and its relations to the organism are questions that belong to philosophy or metaphysics. As a consequence, also, modern psychology fails to distinguish between the spiritual faculties of the soul, i.e. those which act only by the use of the powers of the soul, without the intrinsic co-operation of the organism, and the faculties of the *compositum*, i.e. the soul and organism united in one complete principle of action, or of one special animating organ. This distinction was also an essential point in the Aristotelian and Scholastic psychology.

Finally, the Scholastics reduced affective life to the general faculty of appetitus, whereas to-day, especially since Kant, a tripartite division is more commonly accepted, namely into cognitive, affective, and conative faculties. Some, however, still hold a bipartite division. Others, finally, reject both as unsatisfactory, and follow the order of development, or base their classification both on objective conditions and subjective characteristics. Without entering into the discussion, it may be said that, however useful and justifiable the tripartite classification may prove in psychology, the Scholastic reduction of feelings to appetitus seems only to be deeper and more philosophical. For feelings and emotions, pleasurable or painful, result from an agreement or conflict between certain experiences and the mind's tendency.

Faundus of Hermiane, a sixth-century Christian author, Bishop of Hermiane in Africa, about whose career very little is known. His place in history is due entirely to the spirited and protracted opposition which he offered to the condemnation (by the edict of Justinian in 543 or 544) of the "Three Chapters" at the council of Carthage. The three scribes of the "Three Chapters" were condemned to death. Faundus also had two other works at the request of his fellow-bishops, in response to reproaches of insubordination ("Liber contra Mocianum Scholasticum") and "Epistola Fidei Catholici in defense of trium capitulorum". The works of Faundus are in P. L., XVII, 527-878; see Hefele, "Church of the Councils", IV, 229-286.

Patrick J. Healy

Faenza, Diocese of (Faventina), in the province of Ravenna (Central Italy), suffragan of Ravenna. The title for this church is in the report of the victory of Sulla (82 B. C.) over the consul Cæsarius Papirius Carbo, who was compelled to flee from Italy. In A. D. 728 it was seized by the Lombard king, Liutprand, who later restored it to the exarchate. But the same king again attacked it, while the people were assembled in the church of Santa Maria Foris Portas for the services of Holy Saturday; the bishop himself was among the slain. With the exarchate Faenza passed under the authority of the Holy See. About 1000 it was made a commune and from 1100 was governed by the counts of Modigliana. During the struggle of Frederick II against the popes, the city belonged to the Guelph league; in 1241 the emperor took possession of it after a siege of eight months. During the thirteenth century different families, the Accuris, the Manfredi, the Lombartz, the Nor- digi, and others, disputed the possession of Faenza. In 1294 it was governed by the Manfredi. Several times the Avignon popes had to summon these lords to render service as vassals, as in 1328 through Cardinal Bertrand Pogetto and in 1356 through Cardinal Gil d'Albornoz. In 1375 the city was de- stroyed by the famous English condottiere Sir John Hawkwood. In 1501 Caesar Borgia put to death the Manfredi brothers, Astorgio and Giovanni Evangelista. On the death of Cesar Borgia, Francesco Manfredi, a brother of Astorgio and Evangelista, attempted to return to Faenza, but was compelled to flee by the Venetians. In 1509 Julius II brought the city under the direct rule of the Holy See. During the thirteenth and fourteenth centuries Faenza was renowned for its pottery (whence the French faience). The celebrated physicist, Torricelli, was a native of Faenza. Domitia Lucia, a martyr, the widow of Antoninus Pius, is also said to have been born there. The first historically certain bishop is Constantius, present at a council in Rome (313), at

The Cathedral, Faenza

Fagnani, Prospero, canonist, b in Italy, place and date of birth uncertain; d in 1678. Some writers place his birth in 1598, others in 1587 or 1588. It is certain that he studied at Perugia. At the age of twenty he was a doctor of civil and canon law; at twenty-two, secretary of the Congregation of the Council. He held this office for fifteen years. He fulfilled the same functions in several other Roman Congregations. It is not certain that he ever lectured on canon law at the Roman University (Sapienza). He became blind at the age of forty-four. This affliction did not prevent him from devoting himself to canonical studies and from writing a commentary on the Decretals of Gregory IX, which gained for him the title of "Doctor Crescis Oculatisimus", i.e. the blind yet most far-sighted doctor. This commentary includes interpretations of the texts of the most difficult of the Decretals of Gregory IX. It is distinguished by the clearness with which the most complex and disputed questions of canon law are explained. The work is also of great value for the purpose of ascertaining the prac-
tice of the Roman Congregations, especially that of the Congregation of the Council, of which the author quotes numerous decisions. Benedict XIV gave this work the highest praise, and its authority is still continually appealed to in the Roman Congregations. It is included among the Decretals in the Decretalium (Codex Iuris Canonici). The first edition was published at Rome, in 1619, under the title of "Jus canonice seu commentaria absolutissima in quibus libros Decretalium". It has been reprinted several times. Fagnani is reproached with excessive rigor in his commentary on this work, but in fact his work is often justly appreciated by modern historians; in his appreciation of Bishop Laval and of the Jesuits. On the other hand, he is credited for giving prominence to persons and events of Villemarie, less elaborately treated by the Jesuit "Relations" and later histories.

LIONEL LINDSAY.

Faith (πίστις, πίστες, fides).—I. The Meaning of the Word.—In the Old Testament, πίστις means essentially steadfastness, of Exod., xxi, 12, where it is used to describe the strengthening of Moses' hands; hence it comes to mean faithfulness, whether of God towards man (Deut., xxxii, 4) or of man towards God (Ps., cvii, 30). As signifying a trustful attitude towards God, it means trustfulness or fiducia. It would, however, be illogical to conclude that the word cannot, and does not, mean "belief" or "faith" in the Old Testament, for it is clear that we cannot put trust in a person's promises without previously assenting to or believing in them; that a person's claim to such confidence, even if it could be proved that the word πίστις does not in itself contain the notion of belief, it must necessarily presuppose it. But that the word does itself contain the notion of belief is clear from the use of the radical πίστ-, which in the causative conjugation, or Hipil', means "to believe", e.g. Gen., xv, 6, and Deut., xi, 32, in which latter passage the two ideas—viz. of believing and of trusting—are combined. That the noun itself often means "faith" or "belief", is clear from Hab., ii, 4, where the context demands it. The witness of the Septuagint is decisive; they render the verb by πιστεύω, and the noun by πίστις; and here again the two factors, faith and trust, are connoted by the same term. But that even in classical Greek πιστεύω was used to signify "believe", is clear from Euripides (Helen, 710), λόγος ἐκποιήσας πίστευνε τάδε, and that πίστις could mean "belief" is shown by the same dramatist's θεόν ὄφεινα τίποτα πίστευσε (Medeia, 414; cf. Hipp., 1007). In the LXX, the same word occurs (αὐτός, xiv, 21; xxvi, 21), and again in the New Testament, viz. in Matt., vi, 10, where it is translated "faith" (cf. Matt., vi, 10). In Acts it is used objectively of the tenets of the Christians, and is often to be rendered "belief" (cf. xvii, 21; xx, 21; xxvi, 18). In Romans, xiv, 23, it has the meaning of "consience"—"all that is not of faith is sin"—but the Apostle repeatedly uses it in the sense of "belief" (cf. Rom., iv, and Gal., iii). How necessary it is to point this out will be evident to all who are familiar with modern theological literature; thus, for example, Haldane, "Aids to the Christian Life", Oct., 1907, says, "From one end of the Scripture to the other, faith is trust and only trust", it is hard to see how he would explain I Cor., xiii, 13, and Heb., xi, 1. The truth is that many theological writers of the present day are given to very loose thinking, and in nothing is this so evident as in their treatment of faith. In the article just referred to we read: "Trust in God is faith, faith is belief, belief may mean creed, but creed is not equivalent to trust in God." A similar vagueness was especially noticeable in the "Do we believe?" controversy; one correspondent says: "We believe," another says: "We have lost faith, cling more closely to hope and—by the grace of God the greater of these—charity." ("Do we believe?" p. 180, ed. W. L. Courtney, 1905). Non-Catholic writers have repudiated all idea of faith as an intellectual assent, and consequently they fail to realize that faith must necessar-
ily result in a body of dogmatic beliefs. "How and by what influence," asks Harnack, "was the living faith transformed into the creed to be believed, the surrender to Christ into a philosophical Christology?" (quoted in Hibbert, Journal, loc. cit.).

Faith is considered both objectively and subjectively.—Objectively, it stands for the sum of truths revealed by God in Scripture and tradition, and which the Church (see Faith, Rule of) presents to us in a brief form in her creeds; subjectively, faith stands for the habit or virtue by which we assever to those truths. It is with this subjective aspect of faith that we are here primarily concerned. Before we proceed to analyse the term faith, certain preliminary notions must be made clear.

(a) The twofold order of knowledge.—"The Catholic Church," says the Vatican Council, III, iv, "has always held that there is a twofold order of knowledge, and that these two orders are distinguished from one another not only in their principle but in their object; in one we know by natural reason, in the other by Divine faith; the object of the one is truth attainable by natural reason, the object of the other is mysteries hidden in God, but which we have to believe and which cannot be known to us by natural reason.

(b) Now intellectual knowledge may be defined in a general way as the union between the intellect and an intelligible object. But a truth is intelligible to us only in so far as it is evident to us, and evidence is of different kinds; hence, according to the varying character of evidence, we shall have to distinguish between varying kinds of knowledge. Thus a truth may be self-evident—e.g., the whole is greater than its part—in which case we are said to have intuitive knowledge of it; or the truth may not be self-evident, but deducible from premises in which case it is contained—such knowledge is termed reason knowledge; or again a truth may be neither self-evident nor deducible from premises in which it is contained, yet the intellect may be obliged to assent to it because it would else have to reject some other universally accepted truth; lastly, the intellect may be induced to assent to a truth for none of the foregoing reasons, but solely because, though not evident in itself, this truth rests on grave authority—for example, we accept the statement that the sun is 90,000,000 miles distant from the earth because competent, venerable authorities vouch for the fact. This last kind of knowledge is termed faith, and is clearly necessary in daily life. If the authority upon which we base our assent is human and therefore fallible, we have human and fallible faith; if the authority is Divine, we have Divine and infallible faith. If to this be added the medium by which the Divine authority for certain statements is put before us, viz., the Catholic Church, we have Divine-Catholic Faith (see Faith, Rule of).

(c) Again, evidence, whatever its source, may be of various degrees and so cause greater or less firmness of adhesion on the part of the mind which assents to a truth. Thus arguments or authorities for and against a truth may be either wanting or evenly balanced; in that case the intellect does not give in its adherence to the truth, but remains in a state of doubt or absolute suspension of judgment; or the arguments on one side may predominate; though not to the exclusion of those on the other side; in this case we have not complete adhesion of the intellect to the truth in question, but only opinion. Lastly, the arguments or authorities brought forward may be so convincing that the mind gives its unqualified assent to the statement proposed and has no fear whatever of making a mistake; this is termed certitude, and is the perfection of knowledge. Divine faith, then, is that form of knowledge which is derived from Divine authority, and which consequently begets absolute certitude in the mind of the recipient.

(d) That such Divine faith is necessary, follows from the fact of Divine revelation. For revelation means that the Supreme Truth has spoken to man and revealed to him truths which are not in themselves evident to the human mind. We must, then, either reject revelation altogether, or accept it by faith; that is, we must submit our intellect to truths which we cannot understand, but which come to us on Divine authority.

(e) We shall arrive at a better understanding of the habit or virtue of faith if we have previously analysed an act of faith; and this analysis will be facilitated by examining an act of ocular vision and an act of reasoning or intellect knowledge. In ocular vision we distinguish three things: the eye, or visual faculty, the coloured object, and the light which serves as the medium between the eye and the object. It is usual to term colour the formal object (objectum formale quod) of vision, since it is that which precisely and alone makes a thing the object of vision; the individual object seen may be termed the material object, e.g. this apple, that man, etc. Similarly, the light which serves as the medium between the eye and the object is termed the formal reason (objectum formale quod) of our actual vision. In the same way, when we analyse an act of Divine faith, we distinguish the intellect faculty which elicits the act, the intelligible object towards which the intellect is directed, and the evidence whether intrinsic to that object or extrinsic to it, which moves us to direct it. None of these factors can be omitted, each contributes in a special way to the act, whether of ocular vision or of intellectual assent.

(f) Hence, for an act of faith we shall need a faculty capable of eliciting the act, an object commensurate with that faculty, and evidence—not intrinsic but extrinsic to the object—which shall serve as the link between faculty and object. We will commence our analysis with the object:—

III. Analysis of the Object or Term in an Act of Divine Faith.—(a) For a truth to be the object of an act of Divine faith, it must be itself Divine, and this not merely as coming from God, but as being itself concerned with God. Just as in ocular vision the formal object must necessarily be something coloured, so in Divine faith the formal object must be something Divine—in theological language, the objectum formale quod of Divine faith is the First Truth in Prima Veritas in dicendo. Now, we could not make an act of Divine faith in the existence of India.

(b) Again, the evidence upon which we assent to this Divine truth must also be itself Divine, and there must be as close a relation between that truth and the evidence upon which it comes to us as there is between the coloured object and the light; the former is a necessary condition for the exercise of our visual faculty, the latter is the cause of our actual vision. But no one but God can reveal God; in other words, God is His own evidence. Hence, just as the formal object of Divine faith is the First Truth itself, so the evidence of that First Truth is the First Truth declaring itself. To use scholastic language once more, the objectum formale quod, or the motive, or the evidence, of Divine faith is the Prima Veritas in dicendo.

(c) There is a controversy whether the same truth can be an object both of faith and of knowledge. In other words, can we believe a thing both because we are told it on good authority and because we ourselves perceive it to be true? St. Thomas, Scotus, and others hold that once a thing is seen to be true, the adhesion of the mind is in no wise strengthened by reasoning of one who states that it is so; but the majority of theologians maintain, with De Lugo, that there may be a knowledge which does not entirely satisfy the mind, and that authority may then find a place, to complete its satisfaction. — We may note here the absurd expression Credo quae impossibile, which has provoked many sneers. It is not an axiom of the scholastics, as was
stated in the "Revue de Métaphysique et de Morale" (March, 1896, p. 169), and as was suggested more than once in the "Do we believe?" correspondence. The expression is due to Tertullian, whose exact words are: "Natus est Dei Filius; non pudet, quid pudendum est; Dominus, quia inemptum est; et sepultus, resurrection; certum est, quia impossibile." (De Carne Christi, cap. v.) This treatise dates from Tertullian's Montanist days, when he was carried away by his love of paradox. At the same time it is clear that the writer only aims at bringing out the wisdom of God manifested in the humiliation of the Cross; he is perhaps paraphrasing St. Paul's words in I Cor., i, 25.

(d) Let us now take some concrete act of faith, e.g., "I believe in the Most Holy Trinity." This mystery is the material or individual object upon which we are now exercising our faith, the formal object is its character as being a Divine truth, and this truth is clearly invidious as far as we are concerned; it in no way appeals to our intellect, on the contrary it rather repels it. And yet we assent to it by faith, consequently upon evidence which is extrinsic and not intrinsic to the faith assenting. But evidence commensurate with such a mystery save the Divine testimony itself, and this constitutes the motive for our assent to the mystery, and is, in scholastic language, the obiectum formuale quo of our assent. If, then, we are asked why we believe with Divine faith and not with the only adequate answer must be, because God has revealed it.

(e) We may point out in this connexion the falsity of the prevalent notion that faith is blind. "We believe," says the Vatican Council (III, iii.), "that revelation is true, not indeed because the intrinsic truth of the mysteries is clearly seen by the natural light of reason, but because of the authority of God Who reveals them, for God can neither deceive nor be deceived." Thus, to return to the act of faith which we make in the Holy Trinity, we may formulate it in syllogistic fashion thus: Whatever God reveals is true, but God has revealed the mystery of the Holy Trinity; therefore this mystery is true. The major premise is indubitable and intrinsically evident to reason; the minor premise is also true because it is declared to us by the infallible Church (cf. FAITH, RULE OF), and also because, as the Vatican Council says, "in addition to the assistance of grace, promulgating of the same doctrine, the Holy Spirit, is pleased God to give us certain external proofs of His revelation, viz. certain Divine facts, especially miracles and prophecies, for since these latter clearly manifest God's omnipotence and infinite knowledge, they afford most certain proofs of His revelation and are suited to the capacity of all." Hence St. Thomas says: "A man would not believe unless he saw the things he had to believe, either by the evidence of miracles or of something similar." (I I, Q. i, a. 4, ad 1o.) The saint is here speaking of the motives of credibility.

IV. MOTIVES OF CREDIBILITY.—(a) When we say that a certain statement is incredible we often mean merely that it is extraordinary, but it should be borne in mind that this is a misuse of language, for the credibility or incredibility of a statement has nothing to do with its intrinsic probability or improbability; it depends solely upon the credentials of the authority who makes the statement. Thus the credibility of the statement that a secret alliance has been entered into between England and America depends solely upon the authoritative position and the veracity of our informant. If he be a clerk in a government office it is possible that he may have picked up some general information, but if our informant be the Prime Minister of England, his statement has the highest degree of credibility because his credentials are of the highest.

When we speak of the motives of credibility of revealed truth we mean the evidence that the things asserted are revealed truths. In other words, the credibility of the statements made is correlative with and proportionate to the credentials of the authority who makes them. Now the credentials of God are indubitable, for the very idea of God involves that of a superior or extraordinary authority, and God says is supremely credible, though not necessarily supremely intelligible for us. Here, however, the real question is not as to the credentials of God or the credibility of what He says, but as to the credibility of the statement that God has spoken. In other words, who or whom is the authority for this statement, and what credentials does this authority show? What are the motives of credibility of the statement that God has revealed this or that?

(b) These motives of credibility may be briefly stated as follows: in the Old Testament, considered not as an inspired book, but merely as a book having historical value, we find detailed the marvellous dealings of God with a particular nation to whom He repeatedly revealed Himself; we read of miracles wrought in their favour and as proofs of the truth of the revelation He makes; we find the most sublime teaching and the repeated announcement of God's grace that there can be no reconciliation of the world from sin and its consequences. And more than all we find throughout the pages of this book a series of hints, now obscure, now clear, of some wondrous person who is to come as the world's saviour; we find it asserted at one time that He is man, at others that He is God Himself. When we turn to the New Testament we find that the book records the birth, life, and death of One Who, while clearly man, also claimed to be God, and Who proved the truth of His claim by His whole life, miracles, teachings, and death, and finally by His triumphant resurrection. We find, moreover, that He founded a Church which should, so He said, continue to the end of time, which should serve as the repository of His teaching, and should be the means of applying to all men the fruits of the redemption He had wrought. When we come to the subsequent history of this Church we find it speedily spreading everywhere, and this in spite of its humble origin, its unworthiness, and the cruel persecution which it meets at the hands of the rulers of this world. And as the centuries pass we find this Church battling against heresies, schisms, and the sins of her own people—nay, of her own rulers—and yet continuing ever the same doctrine of the Holy Spirit, teaching before men the same mysteries of the life, death, and resurrection of the world's Saviour, Who had, so she taught, gone before to prepare a home for those who while on earth should have believed in Him and fought the good fight. But if the history of the Church since New-Testament times thus wonderfully confirms the New Testament itself, and in the New Testament so marvellously completes the Old Testament, these books must really contain what they claim to contain, viz. Divine revelation. And more than all, that Person Whose life and death were so minutely foretold in the Old Testament, and Whose story, as told in the New Testament, so perfectly corresponds with its prophetic delineation in the Old Testament, must be what He claimed to be, viz. the Son of God. His work, therefore, must be Divine. The Church which He founded must also be Divine and the repository and guardian of His teaching. Indeed, we can truly say that for every truth of Christianity which we believe Christ Himself is our testimony, and we believe in Him because the Divinity He claimed rests upon the concurrent testimony of His miracles, His prophecies, His personal character, the development of His doctrine, and the prophetic agreement with the Old Testament. His teaching in spite of its running counter to flesh and blood, the united testimony of thousands of martyrs, the stories of countless saints who for His sake have led heroic lives, the history of the Church herself since the Crucifixion, and, perhaps more remarkable than
any, the history of the papacy from St. Peter to Pius X.

(c) These testimonies are unanimous; they all point in one direction, they are of every age, they are clear and simple, and are within the grasp of the humblest intellect. And, as the Vatican Council has said, "the Church herself, is, by her marvellous propo-
nition, her wondrous sanctity, her inexhaustible fruit-
fulness in good works, her Catholic unity, and her enduring stability, a great and perpetual motive of credibility and an irrefragable witness to her Divine commission" (Const. "Dei Filiius"). "The Apostles," says Suarez, "saw the divine Body; we see the Body, let us believe in the Head" [Sermo cxiiii, 8 (al. cxiii), de temp., P. L., V, 1143]. Every believer will echo the words of Richard of St. Victor, "Lord, if we are in error, by Thine own self we have been deceived; for these things have been con-
formed by such signs and wonders in our midst as could only have been done by Thee!" (de Trinitate, I, cap. ii).

(d) But much misunderstanding exists regarding the meaning and office of the motives of credibil-
ity. In the first place, they afford us definite and certain
knowledge of Divine revelation; but this knowledge pro-
ceeds from faith; it is not the final motive for our assent to
the truths of faith; as St. Thomas says, "Faith has the
character of a virtue, not because of the things it
believes, for faith is of things that appear not, but be-
cause it adheres to the testimony of one in whom
truth is infallibly found" (De Veritate, xiv, 9); this
knowledge by which we believe which precedes faith
is not beget human faith, it is not even the cause of
Divine faith (cf. Suarez, De Fide, disp. iii, 12), but is
rather to be considered a remote disposition to it. We
must insist upon this because in the minds of many
faith is regarded as a more or less necessary conse-
quence of a careful study of the arguments; a view which the Vatican Council condemns expressly:
"If anyone says that the assent of Christian faith is
not free, but that it necessarily follows from the argu-
ments which human reason can furnish in its favour;
or if anyone says that God's grace is only necessary
for that living faith which worketh through charity,
let him be anathema" (Sess. IV). Nor can the mot-
ives of credibility make the mysteries of faith clear in
themselves, for, as St. Thomas says, "the arguments
which induce us to believe, e. g. miracles, do not prove
the faith itself, but only the truthfulness of him
dwelling in our souls, and consequently they do not
beget knowledge of faith's mysteries, but only faith"
(II Sent., XIII, xxiv, Q. 1, art. 2, sol. 2, ad 4o). On
the other hand, we must not minimize the real proba-
itive force of the motives of credibility within their
true sphere; "Reason declares that from the very
outset the Gospel teaching was rendered conspicuous
by signs and wonders which gave, as it were, definite
proof of a definite truth" (Leo XIII, "Eterni Patris").

(e) The Church has twice condemned the view that
faith ultimately rests on an accumulation of probabili-
ties. Thus the proposition of the "assent of supernat-
rural faith is consistent with merely probable
knowledge of revelation", was condemned by Inno-
cent XI in 1679 (cf. Denzinger, Enchiridion, 10th ed.,
No. 1171); and the Syllabus "Lamentabili sane" (July,
1907) condemns the proposition (XXV) that "the assent
of supernatural faith is an accumulation of probabili-
ties". But since the great name of Newman has been dragged into the controversy regarding this
last proposition, we may point out that, in the "Gram-
mar of Assent" (chap. x, sect. 2), Newman refers
solely to the proof of faith afforded by the motives of
credibility, and he rightly concludes that, since these
are "a demonstrative, this line of proof may be
termed "an accumulation of probabilities". But it
would be absurd to say that Newman therefore based
the final assent of faith on this accumulation; as a
matter of fact he is not here making an analysis of an
act of faith, but only of the grounds for faith; the
question of authority does not come into his argument
121-122).

V. Analysis of the Act of Faith from the Sub-
jective Standpoint.—(a) The light of faith.—An
intellect understands truths which are beyond man's
comprehension; if then a man were called upon to as-
sent to a truth beyond the ken of the human intellect,
but within the grasp of the angelic intellect, he would
require for the time being something more than his
natural light of reason, he would require what we may
call the "angelic light". If, now, the same man were
called upon to assent to a truth beyond the ken of both men and angels, he would clearly need a still
higher light, and this light we term "the light of
faith"—a light, because it enables him to assent to
those supernatural truths, and the light of faith be-
cause it does not so illuminate those truths as to make
them no longer obscure, for faith must ever be the
substance of things to be hoped for, the evidence of
things that appear not" (Heb., xi, 1). Hence St.
Thomas ("De Veritate", xiv, 9, ad 2o) says: "Al-
though the Divinely infused light of faith is more
powerful than the natural light of reason, so, too, assent
in our present state we only imperfectly participated in
it; and hence it comes to pass that it does not beget in us
real vision of those things which it is meant to teach
us; such vision belongs to our eternal home, where
we shall perfectly participate in that light, where, in
fact, "in God's light we shall see light" (Ps. xxi, 10).

(b) The necessity of such light is evident from what
has been said, for faith is essentially an act of assent,
and just as assent to a series of deductive or inductive
reasonings, or to intuition of first principles, would be
impossible without the use of the motives of credibility,
so, too, assent to a supernatural truth would be inconceivable
without a supernatural strengthening of the natural light;
"Quid est enim fides nisi credere quod non vides?"
(i. e. what is faith but belief in that which thou seest
not?) asks St. Augustine, but he also says: "Faith
has its eyes by which it, in some sort sees that to be
true which it does not yet see; and by which, too, it
most surely sees that it does not see what it believes"[
Ep. ad Consent., ep. cxx 8 (al. cexxii), P. L., II,
456].

(c) Again, it is evident that this "light of faith" is a
supernatural gift and is not the necessary outcome of
assent to the motives of credibility. No amount of
study will win it, no intellectual conviction as to the
credibility of revealed religion nor even of the claims
of the Church to be our infallible guide in matters of
faith, will produce this light in a man's mind. It is
the free gift of God. Hence the Vatican Council
(III, iii) teaches that "faith is a supernatural virtue by which
we, with the inspiration and assistance of God's
grace, believe those things to be true which He has
revealed". The same decree goes on to say that
although the assent of faith is in no sense blind, yet
no one can assent to the Gospel teaching in the way
necessary for salvation without the illumination of
the Holy Spirit, Who bestows on all a sweetness in be-
lieving and consenting to the truth". Thus, neither as regards the truth believed nor as regards the motives for
believing, nor as regards the subjective principle by
which we believe viz. the infused light—can faith be
considered blind.

(d) The place of the will in an act of faith.—So far
we have seen that faith is an act of the intellect assen-
ting to a truth which is beyond its grasp, e. g. the mys-
tery of the Holy Trinity. But to many it will seem
almost as futile to ask the intellect to assent to a propor-
tion which is not intrinsically evident as it would be
to ask the eye to see a sound. It is clear, however,
that the intellect can be moved by the will either to
study or not to study a certain truth, though if the

FAITH

755

FAITH
truth be a self-evident one—e. g., that the whole is greater than its part—the will cannot affect the intellect’s adhesion to it; it can, however, move it to think of something else, and thus distract it from the contemplation of that particular truth. If, now, the will moves the intellect, the under- lying phenomenon of the intellect’s adherence or rejection of any given proposition is not dependent on the intellect’s ability to give its partial adherence to one of these views, it must always be precluded from absolute assent by the possibility that the other view may be right. The fact that men hold much more tenaciously to one of these than the arguments warrant can only be due to some extrinsic consideration, e. g. that it is absurd not to hold what the vast majority of men hold. And here it should be noted that, as St. Thomas says repeatedly, the intellect only assents to a statement for one of two reasons: either because that statement is immediately or meditately evident in itself (a first principle), or because the will moves it to do so. Extrinsic evidence of course comes into play when intrinsic evidence is wanting, but though it would be absurd, without weighty evidence in its support, to assent to a truth which we do not grasp, yet no amount of evidence can make any intellect in certain cases show that the statement in question was credible, our ultimate actual assent could only be due to the intrinsic evidence which the statement itself offered, or, failing that, due to the will. Hence it is that St. Thomas repeatedly defines the act of faith as the assent of the intellect determined by the will (De Veritate, xiv, 1; II-II, Q. ii, a. 1, ad 3\(^3\); c.; ibid., iv, 1, c., and ad 2\(^{m}\)). The reason, then, why men cling to certain beliefs more tenaciously than the arguments in their favour would warrant, is to be sought in the will rather than in the intellect. Authorities are to be found on both sides, the extrinsic evidence is not convincing, but something is to be gained by assenting to one view rather than the other, and this appeals to the will, which therefore determines the intellect to assent to the view which promises the most. Similarly, in Divine faith the credentials of the authority which tells us this or that only make certain decretals be binding, for they are always extrinsic to the proposition, “God has revealed this or that”, and consequently they cannot compel our assent; they merely show us that this statement is credible. When, then, we ask whether we are to give in our free assent to any particular statement or not, we feel that in the first place we cannot do so unless there be strong extrinsic evidence in its favour, for to believe a thing merely because we wished to do so would be absurd. Secondly, the proposition itself does not compel our assent, since it is not intrinsically evident, but there remains the fact that the condition of our salvation is what the human soul naturally yearns for, viz., the possession of God, Who is, as both reason and authority declare, our ultimate end; “He that believeth and is baptized, shall be saved”, and “Without faith it is impossible to please God.” St. Thomas expresses this by saying, “The disposition of a believer is that of one who accepts another’s word for some statement, because it seems fitting or useful to do so. In the same way we believe Divine revelation because the reward of eternal life is promised us for so doing. It is the will which is moved by the prospect of this reward; and what is said, the intellect is not moved by something which it understands. Hence St. Augustine says (Tract. xxvi in Joanne, 2): “Cetera potest homonulos credere, nonnisi volens? [i. e., other things a man can do against his will, but to believe he must will]” (De Ver., xiv, 1).

(e) But just as the intellect needed a new and special light in order to assent to the supernatural truths of faith, so also the will needs a special grace from God in order that it may tend to that supernatural good which is eternal life. The light of faith, then, illumines the understanding but the truth itself remains obscure, since it is beyond the intellect’s grasp; but supernatural grace moves the will, which, having now a supernatural good put before it, moves the intellect to assent to what it does not understand. Hence it is that faith is described as “bringing into captivity every thought and understanding unto the obedience of Christ” (II Cor., x, 5).

VI. DEFINITION OF FAITH.—The foregoing analyses will enable us to define an act of Divine supernatural faith as “the act of the intellect assenting to a Divine truth owing to the movement of the will, which is itself moved by the grace of God” (St. Thomas, II-II, Q. iv, a. 2). And just as the light of faith is a gift supernaturally bestowed upon the understanding, so also this Divine grace moving the will is, as its name implies, an equally supernatural and an absolutely gratuitous gift. Neither gift is due to previous study, nor is either of them a condition of either of them being acquired by human efforts, but “Ask and ye shall receive.”

From all that has been said two most important corollaries follow: (a) That temptations against faith are natural and inevitable and are in no sense contrary to faith, "since", says St. Thomas, “the assent of the intellect, if it is not the result of the will, is not the assent of the intellect to the object to which the intellect thus assents: it is the assent of free will, and free will is not moved by the grace of God” (St. Thomas, II-II, Q. iv, a. 2). And just as the light of faith is a gift supernaturally bestowed upon the understanding, so also this Divine grace moving the will is, as its name implies, an equally supernatural and an absolutely gratuitous gift. Neither gift is due to previous study, nor is either of them a condition of either of them being acquired by human efforts, but “Ask and ye shall receive.”

(b) It also follows from the above that an act of supernatural faith is meritorious, since it proceeds from the will moved by Divine grace or charity, and thus has all the essential constituents of a meritorious act (cf. II-II, Q. ii, a. 9). This enables us to understand St. James’ words when he says, “The devils also believe and tremble” (ii, 19). “It is not willingly that they assent”, says St. Thomas, “but they are compelled thereto by the evidence of those signs which prove that what believers assent to is true, whereas devils do not believe anything of faith so evident as to afford what is termed vision of them” (De Ver., xiv, 9, ad 4\(^{m}\)); nor is it faith Divine, but merely philosophical and natural. Some may fancy the foregoing analyses superfluous, and may think that they savour too much of Scholasticism. But if anyone will be at the pains to compare the teaching of the Fathers, of the Scholastics, and of the divines of the Anglican Church in the seventeenth and eighteenth centuries, with that of the non-Catholic theologians of to-day, he will find that the Scholastics merely put into shape what the Fathers taught, and that the divines of the Scholastic school gave their ideas solidity and genuine worth to their vast patristic knowledge and their strictly logical training.
VII. The Habit of Faith and the Life of Faith.

(a) We have defined the act of faith as the assent of the intellect to a truth which is beyond its comprehension, but which it accepts under the influence of the will moved by grace; and from the analysis we are now making of the virtue of faith as a supernatual habit by which we firmly believe those things to be true which God has revealed. Now every virtue is the perfection of some faculty, but faith results from the combined action of two faculties, viz., the intellect which elicits the act, and the will which moves the intellect to do so: consequently, the perfection of faith will depend upon the perfection of both, and with which each of these faculties performs its allotted task; the intellect must assent unhesitatingly, the will must promptly and readily move it to do so.

(b) The unhesitating assent of the intellect cannot be due to intellectual conviction of the reasonableness of faith, whether we regard the grounds on which it rests or the actual truths we believe, for “faith is the evidence of things that appear not” (1 John 3:4); it must, then, be referred to the fact that these truths come to us on Divine infallible testimony. And though faith is so essentially a “life unassailable” it may be that the peculiar function of the light of faith, which we have already stated to be so necessary, is in some sort to afford us, not indeed vision, but an instinctive appreciation of the truths which are declared to be revealed. St. Thomas seems to hint at this when he says: “As by other virtue a man sees what accords with what he has heard, so by the habit of faith a man’s mind is inclined to assent to those things which belong to the true faith and not to other things” (II-II, q. iv, a. 3).

In every act of faith this unhesitating assent of the intellect is due to the motion of the will as its efficient cause, and the same must be true of the actual virtuous habit of faith when we consider it as a habit or a virtue, moral virtue, for, as St. Thomas insists (I-I, q. iv, a. 3), there is no virtue, properly so called, in the intellect except in so far as it is subject to the will. Thus the habitual promptitude of the will in moving the intellect to assent to the truths of faith is not only the efficient cause of the intellect’s assent, but is precisely what gives to this assent its virtuous, and consequently meritorious, character. Lastly, this promptitude of the will can only come from its unsparing tendency to the Supreme Good. And at the risk of repeating what must again call attention to the distinction between faith as a purely intellectual habit, which as such is dry and barren, and faith resident, indeed, in the intellect, but moved by charity or love of God, Who is our beginning, our ultimate end, and our supernatural reward. “Every true motion of the will” says St. Augustine, “proceeds from true love” (de Civ. Dei, XIV, ix), and, as he elsewhere beautifully expresses it, “Quid est ergo credere in Eum? Credendo amare, credendo diligere, credendo in Eum ire, et Eius membris incorporari. Ipsa est ergo fides quam de nobis Deus exigit, et non invent quod exigit, aduersum quod invent, seu voluit Deus quod invent.” (Tract. xxix, in Joannem, 6.) “What, then, is to believe in God? It is to love Him by believing, to go to Him by believing, and to be incorporated in His members. This, then, is the faith which God demands of us; and He does not want what He demands of us as a virtue, but what He has found.” This then is what is meant by “living” or “true” faith, or as theologians term it, fides formativa, viz., “informed” by charity, or love of God. If we regard faith precisely as an assent elicited by the intellect, then this bare faith is the same habit numerically the same as when the informing principle of charity is added to it, but it is not the true character of a moral virtue and is not a source of merit. If, then, charity be dead—if, in other words, a man be in mortal sin and so without the habitual sanctifying grace of God, which alone gives to his will that due tendency to God as his supernatural end which is requisite for super-

natural and meritorious acts—it is evident that there is no longer in the will that power by which it can, from supernatural motives, move the intellect to assent to supernatural truths. The intellectual and Divinely infused habit of faith remains, however, and when charity returns this habit acquires anew the character of “living” and meritorious.

(c) Again, faith being a virtue, it follows that a man’s promptitude in believing will make him love the truths he believes, and he will therefore study them, not indeed in the spirit of doubting inquiry, but in order the better to grasp them as far as human reason will allow. Such a man will render his faith more robust, because, at the same time that he is brought face to face with the intellectual difficulties which are involved, he will necessarily exercise his faith and repeatedly “bring his intellect into submission.” Thus St. Augustine says, “What can be the reward of faith, what can its very nature mean, if you wish to see now what you believe? You ought not to see in order to believe, you ought to believe in order to see; you ought to believe so long as you do not see, lest when you do see you may be put to the blush” (Sermon, xxxvii, 2, P. L., V, 230). And it is in the same sense we must understand his other dictum, “Crede ut intelligas” (Believe that you may understand). Thus, commenting on the Septuagint version of Isaiah, vii, 9, which reads: “nisi credideritis non intelligetis”, he says: “Proficicet ergo nostrum intellectum ex agendorumque agitata credidisse, et fides proficet ad credendum quae a intelligeantur, et eadem ipsa ut magis magisque intelligantur, in ipsa intellectu proficet mens. Sed hoc non fit propriis tanquam naturalibus viribus, sed Deo donante atque adjuvante” (Enarr. in Ps. cvviii, Sermon xviii, 3). “Our intellect therefore is of use to understand whatever things it believes, and faith is of use to believe whatever it understands; and in order that these same things may be more and more understood, the thinking faculty [mens] is of use in the intellect. But this is not brought about as by our own natural powers, but by the gift and the aid of God.” (Ibid. Sermon 3, in Is., iv, 9; P. L., V, 235).

(d) Further, the habit of faith may be stronger in one person than in another, “whether because of the greater certitude and firmness in the faith which one has more than another, or because of his greater promtitude in assenting, or because of his greater doxology of faith, or because of his greater confidence” (II-II, q. v, a. 4).

(e) We are sometimes asked whether we are really certain of the things we believe, and we rightly answer in the affirmative; but strictly speaking, certainty can only be looked for in two standpoints: if we look at its cause, we have in faith the highest form of certainty, for its cause is the Essential Truth; but if we look at the certitude which arises from the extent to which the intellect grasps a truth, then in faith we have not such perfect certitude as we have of demonstrable truths, since the truths believed are beyond the intellect’s comprehension (II-II, q. iv, a. 8; de Ver., xiv, and i, ad 7).

VIII. The Genesis of Faith in the Individual Soul.—(a) Many receive their faith in their infancy, to others it comes later in life, and its genesis is often misunderstood. With the help of the preceding article, we may describe the genesis of faith in the adult mind somewhat as follows: Man being endowed with reason, reasonable investigation must precede faith; now we can prove by reason the existence of God, the immortality of the soul, the origin and destiny of man; but from these facts there follows the necessity of religion, and true religion must be the true worship of the true God not according to our ideas, but according to what He Himself has revealed. But can God reveal Himself to us? And, granting that He can, where is this revelation to be found? The Bible is said to contain it; does in-
FAITH

758

vestigation confirm the Bible's claim? We will take but one point: the Old Testament looks forward, as we have already seen, to One Who is to come and Who is God; the New Testament shows us One Who claimed to be the fulfillment of the prophecies and to be God incarnate in the flesh. He teaches us to keep faith in His life, death, and resurrection, by His teaching, miracles, and prophecies. He further claimed to have founded a Church which should enshrine His revelation and should be the infallible guide for all who wished to carry out His will and save their souls. Which of the numerous existing Churches claims His? It must have certain definite characteristics or "notes". It must be One, Holy, Catholic, and Apostolic; it must claim infallible teaching power. None but the Holy, Roman, Catholic, and Apostolic Church can claim these characteristics, and her history is an irrefragable proof of her Divine mission. If, then, she be the true Church, her teaching must be infallible and must be accepted.

(b) Now what is the state of the inquirer who has come thus far? He has proceeded by pure reason, and, if on the grounds stated he makes his submission to the mystery of the Catholic Church and believing her doctrines, he has only human, reasonable, fallible faith. Later on he may see reason to question the various steps in his line of argument, he may hesitate at some truth taught by the Church, and he may withdraw the assent he has given to her teaching authority. In this case, he has not done faith at all. Divine faith is supernatural both in the principle which elicits the acts and in the objects or truths upon which it falls. The principle which elicits assent to a truth which is beyond the grasp of the human mind must be that same mind illumined by a light superior to the light of reason, viz. the light of faith; and since, even with this light of faith, the intellect remains human, and the truth to be believed remains obscure, the final assent of the intellect must come from the will assisted by Divine grace. as seen above. But both this Divine light and this Divine grace are pure gifts of God, and are consequently only bestowed at His good pleasure. It is here that the heroism of faith comes in; our reason will lead us to the door of faith, but there it leaves us; and God asks of us that earnest wish to believe for the sake of the reward: "I am thy reward exceeding great"—which will allow us to practise the virtues of the new man, and to believe, Lord, help Thou my unbelief." As St. Augustine expresses it, "Ut deficiat ratiocini, uti est fidei velificatio" (Sermon cxlvii, P. L. V, 1157—"Where reason fails, there faith builds up").

(c) When this act of submission has been made, the light of faith floods the soul and is even reflected back upon those very motives which had to be so laboriously studied in our search after the truth; and even those preliminary truths which precede all investigation, e.g. the very existence of God, become now the object of our faith.

X. FAITH IN RELATION TO WORKS.—(a) Faith and no works may be described as the Lutheran view. "Ego peccator, peccavit fortiter sed fortius fide" was the heresiarch's axiom, and the Diet of Worms, in 1521, condemned the doctrine that good works are necessary for salvation.

(b) Works and no faith may be described as the modern view, for the modern world strives to make the worship of humanity take the place of the worship of the Deity "Do we believe?" as issued by the Rationalist Press, 1904, ch. x: "Cred and Conduct" and ch. xv: "Rationalism and Morality". Cf. also "Rationalism and Religious Faith" (Hibbert Journal, July, 1906, p. 727).

Agnostics, again, take refuge in the unknowableness of truths beyond reason, but their argument is fallacious, for surely knowledge has its degrees. I may not fully comprehend a truth in all its bearings, but I can know a great deal about it; I may not have demonstrative knowledge of it, but that is no reason why I should reject that knowledge which comes from faith. To listen to many Agnostics one would imagine that appeal to authority as a criterion was unscientific, though perhaps nowhere is authority applied so unscientifically as by modern science and modern critics. But, as St. Augustine said, "If God's providence govern human affairs we must not despair or doubt but that He hath ordained some certain authority, upon which staying ourselves upon a certain ground or step we may be lifted up to God".
(De uttiate credendi); and it is in the same spirit that he says: "Ego vero Evangelio non crederem, nisi me Catholiche Ecclesie commoveret auctoritas" (Contra Ep. Fund., V, 6—"I would not believe the Gospel if the authority of the Catholic Church did not oblige me to believe").

Naturalism, which is only another name for Materialism, rejects faith because there is no place for it in the naturalistic scheme; yet the condemnation of this false philosophy by St. Paul and by the author of the Book of Wisdom is emphatic (cf. Rom., i, 18–23; Wis., xiii, 1–19). Materialists fail to see in nature what the greatest minds have always discovered in it: "ratio cujusdam artis, selicite divina, indita rebus, quaa ipsae res moventur ad finem determinat"—"the manifestation of a Divine plan whereby all things are directed towards their appointed end" (St. Thomas, Lect. xiv, in II Phys.). Similarly, the vaugaries of Humanism blind men to the fact of man's essentially finite character and hence preclude all idea of faith in the infinite and the supernatural (cf. "Naturalism and Humanism" in "Hibbert Journal", Oct., 1907).

XII. FAITH IS NECESSARY.—"He that believes and is baptized, said Christ, shall be saved; but he that believes not shall be condemned" (Mark, xvi, 16); and St. Paul sums up this solemn declaration by saying: "Without faith it is impossible to please God" (Heb., xi, 6). The absolute necessity of faith is evident from the following considerations: God is our beginning and our end and has supreme dominion over us; we owe Him, consequently, due service which we express by the term religion. Now true religion is the true worship of the true God. But it is not for man to fashion a worship according to his own ideals; none but God can declare to us in what true worship consists, and this declaration constitutes the body of vital truths, whether natural or supernatural. To these, if we would attain the end for which we came into the world, we are bound to give the assent of faith. It is clear, moreover, that no one can profess indifference in a matter of such vital importance. During the Reformation period no such indifference was professed by those who quitted the fold; for them it was not a question of faith or unfaith, so much as of the medium by which the true faith was to be known and put into practice. The attitude of many outside the Church is now one of absolute indifference; faith is regarded as an option, as if by this means each individual were at liberty to regulate his own spiritual life by no known psychological laws. Thus Taine speaks of faith as "une source vive qui s'est formée au plus profond de l'âme, sous la poussée et la chaleur des instincts immédiats"—"a living fountain which has come into existence in the lowest depths of the soul under the impulse and the warmth of the immanent instincts." Indifference in all its phases was condemned by Pius IX in the Syllabus "Quanta cura!"—"In Prop. XV, 'Any man is free to embrace and profess whatever form of religion he reason approves of'; XVI, 'Man can find the way of salvation and can attain to eternal salvation in any form of religious worship'; XVII, 'We can at least have good hopes of the eternal salvation of all those who have never been in the true Church of Christ'; XVIII, 'Protestantism is only another form of the same true Christian religion, and men can be as pleasing to God in it as in the Catholic Church.'

XIII. THE OBJECTIVE UNITY AND IMUTABILITY OF FAITH.—Christ's prayer for the unity of His Church, the highest form of unity conceivable, "that they all may be one, as thou, Father, in me, and I in thee" (John, xvi, 21), has been repeatedly disregarded by the unifying forces of a bond of faith such as that which binds us together as members of the Church. "All Christians have been taught to be "careful to keep the unity of the spirit in the bond of peace, one body and one spirit, as ye are called in one hope of your calling; one Lord, one faith, one baptis-
Faith, Protestant Confessions of. — That the Catholic Church, which claims the prerogative of teaching revealed truth with infallible certitude, should have drawn up articles of faith and demanded for them the internal assent and outward confession of her members, was logical and legitimate; but it was difficult to understand with what logic or consistency Protestantism, which proclaimed the Bible, as interpreted by the private judgment of the individual, to be the sole and sufficient rule of faith, could follow her example. It is said that Protestants look upon their doctrinal standards as authoritative only in so far as they agree with the "word of God"; but each sect so imbues its members from early childhood with its peculiar tenets, that long before they are able to read the Bible intelligently, their religious views are fixed. Stray individuals may change their religion and may be able to gather a sufficient number of followers to form a separate communion; but the bulk of the population remain true to the faith of their parents, or of their native land. In the palmy days of Protestantism, it was not the reading of the Bible that held the denominations together, but their respective Confessions of Faith, inculcated and enforced under severe penalties by the civil power. As a practical result, the "word of God" was interpreted in accordance with formulae devised by men; the Anglican read into his Bible the Thirty-Nine Articles, the Lutheran the Augsburg Confession, the "Reformation" the Heidelberg Catechism. Each sect was obliged to prove its raison d'être by showing just how far it differed from others, a very large number of Confessions appeared, varying in size from a few articles to long theological treatises. As a rule, the later Confessions are merely modified copies of the older ones, altered to suit local circumstances or personal views.

Tyros.—Since the Protestant revolts originated almost independently, and simultaneously, in Germany and in Switzerland, there has been, from the beginning, a sharp distinction between the Lutheran and the "Reformed" tenets of Zwingli, afterwards merged into Calvinism. The cleavage between Lutheranism and Calvinism goes deeper than the divergence of views concerning the real presence in the Eucharist. Luther drifted into heresy gradually. In spite of his hatred of the pope, he preserved a lingering reverence for the Church in which he had been a monk and a pious youth for many years. He inherited ancient beliefs and liturgy as could be made to fit into his peculiar views on sin and justification. So adroitly and tentatively were the changes made in Catholic phraseology and worship, that but few of the Lutheran common people felt they had drifted away from the Church of their fathers. Luther himself, in a famous passage, boasted that the eye of the ordinary layman could detect little or no difference between the Lutheran service and the Catholic Mass. As to the theological opinions, the layman was equally deceived; for it was not new for him to be taught that we are saved, not by the grace of God through the merits of Christ's Blood. That the temporal rulers were zealous in the extirpation of "abuses" rather edified than shocked the common man, for a certain jura reformandi had always been claimed, and had frequently been exercised, by Catholic German princes. Quite different was the case with Zwinglians and Calvinists. Lying no claim to identity or continuity with the ancient Church, the "Reformed Churches" began, generally amidst iconoclastic riots, by rooting out the entire fabric of Catholicism. After the futile attempt of Philip of Hesse, at the Marburg Conference (1-4 Oct., 1525), to reconcile the reformers, these went their several ways, hating and reviling each other little less than they hated and reviled the Church of Rome. It is scarcely needless to add that since the collapse of dogmatic Protestantism, its conflicting creeds possess little more than an historical interest. Even where subscription to a Confession is still exacted as a condition for holding office, the ceremony is regarded as a mere formality.

The Lutheran Confessions. — (1) The oldest and most authoritative of the Lutheran creeds was the Augsburg Confession, drafted at the Diet at Augsburg in 1530, on the basis of Luther's Marburg, Schwabach, and Torgau articles, and bore the signature of seven German princes, Elector John of Saxony, his son John Frederick, Ernest and Francis, Dukes of Lüneburg, Philip, Landgrave of Hesse, Welfang, and prince-electors of Anhalt, and of the representatives of the two imperial cities, Nuremberg and Reutlingen. On 25 June, 1530, copies of it, in Latin and German, were presented to Charles V, at the diet of Augsburg, and the German version was read aloud before the secular and ecclesiastical Estates of the Empire. Charles retained the Latin copy which he brought with him to Spain, giving the other into the custody of the Archbishop of Mainz. Both seem now to be irretrievably lost. The document ought to have retained its original title of Apologia, for it is an artful attempt to persuade the Emperor and the Estates that in the Reformed doctrine, nothing is by the preaching, or the Scriptures, or with the Catholic Church, or with the Roman Church, so far as that Church is known from its writers".

The Luthers teach (Art. I) the Nicene belief in God and the Trinity; (Art. II) Original Sin; (Art. III) The Incarnation; (Art. IV) Justification by Faith. By leaving out the obnoxious word sola (alone), the article might be glossed in a Catholic sense. They believe furthermore (Art. V) in a Divinely appointed ecclesiastical ministry, no mention being made of Luther's universal priesthood of believers. They teach (Art. VI) that "faith should bring forth good works, and that men ought to do the good works commanded by God, because it is God's will, and not on any confidence of meriting justification before God by their works", as if any one had taught differently. In Articles VII and VIII, "On the Church", instead of asserting the heresy of an invisible Church, they define it to be "the congregation of saints [the German version has it the assembly of all the faithful], in which the Gospel is rightly taught and the Sacraments rightly administered". They condemn the Donatists and Arians, and the ministry of the laity as useless and inefficacious. In Article IX, "On Baptism", they teach that it is necessary to salvation, and that infants are to be baptized. The famous Article X reads as follows: "Of the Lord's Supper they teach that the Body and Blood of Christ are truly present and are distributed to those who eat of the Lord's Supper, and they reject the contrary teaching." Here Luther's theory of compunction is sedulously slurried over. Art. XI teaches that private absolution must be retained, though in confession it is not necessary to enumerate all sins committed.

Art. XII, "On Penance", teaches that those who fall, after Baptism, may obtain the remission of sins, whenever they repent, and that it is the duty of the Church to absolve the repentant. Penance, they teach, consists of two parts, confession and faith. In the hazy Article XIII, "On the use of the Sacraments" they condemn those who teach that the Sacraments justify ex opere operato, without teaching that faith in the remission of sins is requisite in the use of the Sacraments", which statement shows how scant was Melancthon's acquaintance with Catholic doctrine. Art. XIV, "On Ecclesiastical Orders", extends itself to the persons holding the power of the Keys, and should publicly teach in the Church, or administer the Sacraments, unless he be rightly called." Art. XV, "On Ecclesiastical Rites", retains such rites "as may be observed without sin", instanceing "fixed holydays, feasts and such like", but "consciences are not
to be burdened by such things, as if necessary to salvation." Art. XVI inculcates the duty of obedience to civil rulers. Art. XVII deals with the Last Judgment. Art. XVIII, "On Free Will," is a bold departure, on the part of Melanchthon, from Luther's fundamental heresy of the enlaved will of fallen man. ""It is absurd to suppose that man's will is limited to work a civil righteousness, and to choose such things as reason can reach unto; but that it hath no power to work the righteousness of God or a spiritual righteousness, without the Spirit of God." This sounds Catholic enough. Art. XX repels the accusation that the ""slight and bloody of the Coarse"", and especially accuses the Catholics of relying on good works for justification. Art. XXI teaches that we should honor the memory of the Saints, but not invoke their aid.

They conclude the doctrinal part of the Confession with the words: "This is about the sum of our doctrine," with the protest of agreement with the Roman Church given above. "We have no dogmas," Melanchthon wrote to the papallegate, 6 July, "which differ from the Roman Church. Moreover, we are ready to submit to the Roman Church, if Rome, with the leniency she has at all times shown to all nations, will consent to overlook and keep silence on the slight matters which we cannot alter, even if we wished to do so. We reverence the authority of the Pope of Rome," etc. Meanwhile Luther was denouncing "the Pope and his crew" as "veritable devils," and Melanchthon styled the pope "an Anti-Christ, under whose rule the Jews would be like the Jews under Pharaoh in Egypt." (Janssen, History of the German People, tr. St. Louis, 1903, V, 254). The "slight matters," which Rome was asked to connive at, are enumerated in seven articles in Part II of the Confession, with such probity that we can scarcely but admire the emperor if during the heading on a horn he fell into a slumber. They are grouped under the headings of (1) Communion under both kinds; (2) The Marriage of Priests; (3) The Mass; (4) Compulsory Confession; (5) Distinction of Meats, and Traditions; (6) Monastic Vows; and (7) The Authority of Bishops. To any one who had followed the course of the Lutheran revolution, it must have been amusing to read the following statement: "Our churches are wrongfully accused to have abolished the Mass. For the Mass is retained still among us, and celebrated with great reverence, yea, and almost all the truth remains, save the omission of the Canon was a slight matter—saving that with the things sung in Latin we mingle certain things sung in German."

We have given this synopsis of a document often spoken of, but seldom read, to show the spirit in which it was drawn up. It has been aptly termed a political campaign document, calculated to impress the Estates that the Lutherans, themselves supremely intolerant towards Catholics, should be permitted to proceed in peace in the uprooting of the ancient Faith. The Confession was accompanied with a Preface, written by Chancellor Bruck of Saxony, in which the engagement was made that should the controversy not be settled at the Diet, the signers were "ready to compare views and defend their cause in a general, free, and Christian Council". While the engagement amounted to was made more test on the when the council convened at Trent. The studied moderation, not to say disingenuousness, of the Augsburg Confession is said to have deceived some members of the Diet, as to the importance of the issue at stake between Catholics and Lutherans; but it could not deceive such men as Eick, Wingenroth, Cochleus, and the other theologians to whom Charles referred the document for discussion.

In a remarkably calm and able "Answer", afterwards called "Conciliation", they analyze the Confessions, giving praise and censure where either is due. Melanchthon retorted with an "Apologia" which Lutherans generally regard as their second symbolic book; Charles refused to accept it, because of the violent language used against the Catholic Church. Since Melanchthon looked on the "Confessio Augustana" as his private property, he continued ever after to commend it on it, and resist any effort to take it from him. Most notorious, and the source of endless controversies amongst Lutherans, was the altered edition of 1540, issued at a time when Melanchthon was under the spell of Calvin. Art. X lost its Catholic tone and was made to read that "the bread and wine are truly exhibited to those who eat in the Lord's Supper," a statement to which a Calvinist might subscribe. We must not, however, throw too much blame on Melanchthon and other preachers; the political magnates have to be considered.

The Smalcald Articles.—Any hopes of a reconciliation which were founded on the studied moderation of the Augsburg Confession were rudely dispelled seven years later when the Protestant Estates, assembled at Smalcald, spurned the pope's offer of that General Council for which, with more than dubious sincerity, they had clamored so long, and condemned the articles. The articles which the Catholics had differed from the Roman Church. Following the general lines of the Augsburg Confession, Luther, by injecting his strongest anti-papal virus into the document, changed it from an olive-branch into an open declaration of war with the Catholic Church. The-ms were identical: the Mass is the dragon's tail, producing all sorts of abominations and idolatries; purgatory is a Satanic delusion, etc., etc. When asked to affix his signature to this insane effusion, Melanchthon did so, with the proviso that "if the pope would admit the gospel, we might permit him, for the sake of peace, to exercise his jurisdiction over the bishops, who are now or may hereafter be under his authority." The princes, resenting this covert attack upon their spiritual sovereignty, compelled the weaker to write a pamphlet denouncing the pope as anti-Christ.

The Formula of Concord.—Scarcely were Luther's remains placed in the tomb than, as he had foreseen, fierce contentions broke out among the preachers, which shook the Lutheran Churches to their foundations. The earliest of these theological battles raged about the person of Melanchthon, who in his later years departed more and more openly from the two most important tenets of his master; on the subject of free will in fallen man, he approached closely to the Catholic position; regarding the Eucharist, he became ever more Calvinistic. He also incurred the reproaches of the orthodox by accepting, with modifications, the "Interim Religion" of Charles V. In course of time, new topics of controversy rose to divide the theologians, until, in 1570, Jacobus Andreae could write that "there were scarcely a couple of preachers among them who did not disagree about some article or other of the Augsburg Confession" (Janssen, op. cit., VIII, 403). Tired of their endless wranglings, which were as destructive of moral and social as of religious order, the Elector Augustus of Saxony proposed to cut the knot "by princely edict." He suggested to the Lutheran princes to convene an assembly to which each would bring his own code of doctrine. From all these different volumes they would then, with the help of a few amiable theologians, construct a general code, which should be considered binding on the whole body of preachers. This convention was held at Torgau, in June, 1576. In addition to twelve Saxony divines, whom the Elector had cowed into submission, there were present, Andreae, Chemnitz, Chytraeus, Musculus and Koeper. A new "Formula of Concord", known as the "For-
gau Book’, was drawn up entirely in the spirit of Luther, eliminating Calvinism and Philippianism. This book not being favourably received by several princes, Augustus summoned a fresh convention in the monastery of Bergen, near Magdeburg, where several alterations were made. The revised confession was sent to the princes to be promulgated and enforced. Augustus of Saxony, John George of Brandenburg, and other princes, gathered their preachers together and compelled them publicly to subscribe to their signatures, “not only with their hands, but with their hearts. Many of the princes repudiated the book; the King of Denmark threw his copy into the fire. The only Lutherans at the present day who attach any importance to it are in Missouri. The "Formula" is divided into two parts (1) the Epitome, and (2) the Solida Declaratio. The Epitome sums up Luther’s ‘pure doctrine’ in succinct form; the second part goes over the same ground more at large. Although the "Formula" begins with the stereotype Protestant declaration that the Bible is "the only rule and norm" of faith, yet, as Dr. Schaff remarks, it quotes Dr. Luther’s "as freely, and with at least as little deference to his authority, as Roman Catholics quote the Fathers.”

Confessions of the "Reformed" Churches.—The so-called Reformed creeds, of which thirty or more are extant, are based on the radical tenets of Zwingli and Calvin. We can only notice the most important of them. The Confession of Strasbourg, Bucer and Capito, inclined to the Zwinglian view of the Eucharist, they were shunned by the Lutherans at the Diet of Augsburg (1530), and were not allowed to sign the Augustana. They therefore drew up a separate Confession, following the general lines of the Lutheran document, a copy of which had been given to them by Philip of Hesse. Bucer touches upon several topics that Melanchthon had cautiously avoided, among them “the invisible church”, the rejection of tradition and of images. The Mass is denounced as "an intolerable abomination." Art. 18, "On the Eucharist" is given so enigmatically that it is impossible to discover the real meaning. After great trouble the Strasburgers were able to secure the adhesion of three Southern German towns, Constance, Memmingen, and Lindau. From these four cities the Confession obtained the name of the "Lindau." It was delivered to the Diet in July. Charles refused to permit it to be read at the Diet, and commissioned the Catholic theologians to confute it. It was printed in the autumn of 1531 at Strasbourg, together with a "Vindication." It did not long remain in authority, for the towns subscribed to the Augsburg Confession in order to join the Smalcald League. Zwingli himself was sent to the Diet, July 1530, a Confession of Faith in which he openly denied the Real Presence, and denounced purgatory as "an injurious fiction which sets Christ's merits at naught." He also, shortly before his death, sent a Confession to France.

The First Confession of Basle, also called of Mühlhausen because adopted by that city, was drafted in 1531 by Ecelampsius and after his death elaborated by his successor, Oswald Myconius. It was promulgated by the city authorities of Basle, 21 Jan., 1534. It is a brief document, moderate in tone and calculated to conciliate the Lutherans. The text, as we now possess it, was revised in a Calvinistic sense in 1561. Of more importance is the Second Confession of Basle, known also as the "Helvetic Prior." In the "Wittenberg Concord" Luther had forced his peculiar views upon the Eucharist, and through Bucer and other mediating preachers. The formula was reluctantly accepted by the Southern German towns, whose only protection was to be admitted into the Smalcald League; but it was rejected by the independent瑞士. At the same time, it was recognized that some means should be devised of healing the dissensions among the Protestants, now that the convening of a General Council was in prospect. It was resolved to draft a new Confession which should be presented to the council as the national creed of the Protestants. On 30 Jan. 1536, composed of the most prominent Swiss preachers and delegates from Zurich, Bern, Basle, Schaffhausen, St. Gall, Müllhausen, and Biel. A committee consisting of Henry Bullinger, Oswald Myconius and Simon Grynæus, was commissioned to draw up the document. It was written in Latin, and a first German translation made by Leo Judá was adopted by the meeting. Its tone is decidedly Zwinglian, but on the disputed points of the sacraments and the Lord’s Supper there is an evident effort to approach as near as possible to the Lutheran phraseology. A copy of the Confession was brought to Luther by Bucer; and it was a great surprise to the Swiss that the Wittenberg reformer declared himself satisfied with it. Luther’s change of attitude was due partly to the political needs and wishes of the Smalcalde princes, and partly to the altered phraseology of the Confession on the subject of the sacraments, due to the influence of Calvin. Whereas the Zwinglian flatly denied the corporal presence of Christ in the Eucharist, Calvin preached His "spiritual presence," which really amounts to the same thing. The "Helvetic Prior" remained for some years the national creed of the Swiss. As an example it was superseded in 1566 by the "Helvetic Posterior" This latter document was originally the private confession of Henry Bullinger of Zurich; but it was formally accepted as a symbolic book by nearly all the Reformed Churches of Europe. It follows the main lines of the earlier confessions, but is much lengthier, and more in the nature of a theological treatise. It is the storehouse from which later framers of Reformed Confessions have copiously drawn. These documents of Calvin have been looked upon as of dogmatic authority, viz. “The Catechism of Geneva" (1541), the “Consensus of Zurich" (1549), which in twenty-six articles expounds Calvin’s views on the sacraments, and the “Consensus of the pastors of the Church of Geneva” (1552), which proclaims the Calvinistic dogma of absolute predestination.

The Gallican, for the use of the French Protestants, was the first of the purely Calvinistic Confessions. It was the result of a conjunction of Calvin himself. It was revised in various synods, from the first of Paris (1559), to the seventh National Synod at La Rochelle (1571), from which latter town it drew its popular name of “the Rochelle Confession." Its Calvinism is undiluted, and it offers all the peculiar doctrines of that innovator. The Roman Church comes in for a fair share of vituperation, for its "corruptions," "superstitions," and "idolatries." "Nevertheless," it says, "as some trace of the Church is left in the papacy . . . we confess that those baptized in it do not need a second baptism." This concession does not imply that "idolaters" are to be tolerated; for it adds, "but just government "has put the sword into the hands of magistrates, to suppress crimes against the first as well as against the second table of the Commandments of God." This Confession remained in authority among French Protestants, until the Voltairianism and Rationalism of the eighteenth and nineteenth centuries deprived it of all value. In the thirteenth General Synod of the Reformed Church of France (6 June to 10 July, 1872), the only approach to a Confession of Faith that could be made was the adoption by the slender majority of sixteen votes of the following words:

"The Reformed Church of France, on resuming her synodical action, which for so many years had been interrupted, desires, before all things to offer her thanks to God, and to testify her love to Jesus Christ, her Divine Head, who has sustained and comforted
her during her successive trials. She declares, through the organ of her representatives, that she remains faithful to her principles of faith and freedom on which she was founded. With her fathers and her martyrs in the Confession of Rocheille, and with all the Churches in the Reformation in their respective counsels, she proclaims the sovereign authority of the Holy Scriptures in matters of faith, and salvation by faith in Jesus Christ, the Only-begotten Son of God, who died for our sins, and was raised again for our justification. She preserves and maintains, as the basis of her teaching of her worship and her discipline, the grand Christian facts represented in her received creeds, solemnities, and set forth in her liturgies, especially in the Confession of sins, the Apostles' Creed, and in the order for the administration of the Lord's Supper.

The Heidelberg Catechism, published in 1563 by order of the Elector Palatine, Frederick III, was generally accepted by Calvinists throughout the world as a faithful and authoritative exposition of the faith of the Reformed Churches. It was written by two professors at the Heidelberg university, Zachary Bär (commonly known as Ursinus) and Caspar Olevig (Oleum). It was drawn up with the twofold purpose of furnishing a manual of Christian doctrine as a service of public profession of faith. In 129 questions and answers, it treats of man's sin and misery (3–11), the redemption by Christ (12–85), and the grudge of the redeemed (86–129). The second part in the explanation of the creeds and the sacraments. The third part deals with the Ten Commandments and the Lord's Prayer. The general tone of the document is moderate, with the exception of the trueness of the 79th question, for which the professors are not responsible; for it did not appear in the first edition and was later inserted, by the fanatical Ester. Since it has been in no small measure the source of Protestant anti-Catholic intolerance, it is worth while to lay it before the reader.

"What difference is there between the Lord's Supper and the Popish Mass? The Lord's Supper testifies to us that we have full forgiveness of all our sins by the one sacrifice of Jesus Christ, which he himself has once accomplished on the cross; and that by the Holy Ghost we are engraven into Christ, who with his true body and soul is now in heaven at the right hand of the Father, and is to be worshipped for ever. But the Mass teaches that the living and the dead have not forgiveness of sins through the sufferings of Christ, unless Christ is still daily offered for them by the priests; and that Christ is bodily under the form of bread and wine, and is therefore to be worshipped in them. And thus the Mass, at bottom, is nothing else than a denial of the one sacrifice and passion of Jesus Christ, and an accused idolatry."

Dr. Schaff doubts the "wisdom of inserting controversial matter into a catechism"; but strangely enough pronounces, that "it must be allowed to remain as a solemn protest against idolatry" (Credo of Christendom, I, 536). If the central dogma of the Catholic worship is really idolatrous, what is the harm in proclaiming it as such in a Confession of Faith? The Heidelberg Catechism was translated into all the languages of Europe, and into several European tongues. It obtained great authority in Scotland and England; but during the following century it was supplanted by the Westminster Confession. It was introduced into America by the Dutch and German Reformed churches, and is said to be more prized by the American Reformed Churches than by the Germans in the Fatherland.

The Confesseo Belgica is venerated as of symbolic authority, together with the Heidelberg Catechism, by the Reformed Churches in Belgium, Holland, and their offshoots throughout the world. This document, consisting of thirty-seven articles, was written in French about 1561, by Guy de Bray, assisted by other preachers. The intentions of the authors, we are told by one of themselves, was not to issue a new creed, but to prove the truth of their belief from the canonical writings. They follow closely the Confesseo Galilana, seeking to support their theses by texts of Scripture. Translations were made into Dutch and Latin, and the document was submitted to Calvin and many other Reformed divines. In 1562 a copy was transmitted to Philip II with a letter protesting the innocence of the innovators from crime and rebellion. In the opinion of Calvinists, the wrecking of churches and maladministration of priests and nuns were not crimes but imperative duties. Art. 36 admonishes of their obligation "to remove and prevent all idolatry and false worship; that the kingdom of anti-Christ (i.e., popery) may be destroyed." The Confesseo Belgica was revised and adopted by the successive synods in the Netherlands, until finally the Synod of Dort, in its 159th session (29 April, 1619), subscribed to it as the public creed of the Reformed Churches. The Synod of Dort, the most representative gathering of the Calvinists, was convened by the authority and at the expense of the States-General. It opened its sessions at Dort, or Dordrecht, 1615, and concluded its labours after 144 sessions, 9 May, 1619. In addition to the Dutch and Belgians, there were delegates from Great Britain, the Palatine, Hesse, and Switzerland. The delegates chosen by the French Huguenots were forbidden by the crown to leave France. The occasion of this international gathering was the defection from pure Calvinism of the Remonstrants (see ARMINIANISM). Since the members of the synod were orthodox on the subject of predestination absolute, the condemnation of the Remonstrants was a foregone conclusion. The canons were framed in the most binding form, and 200 ministers who refused to subscribe were deposed. Although the foreign delegates attached their names to the canons of Dort, yet, outside of the Netherlands, these were never regarded as authoritative. In England, especially, there was fierce opposition, and from rival pulpits the pros and cons of God's (or Calvin's) eternal decree were thundered into the ears of the bewildered people.

The numerous Minor Reformed Confessions, such as the Mariloch (Brandenbourg), the Hungarian, the Bohemian, and the Polish, being of a local and for the most part an ephemeral nature, need not detain us. For an account of the Thirty-nine Articles of the Anglican Church the reader is referred to the article ANGLICANISM. When the American colonists had achieved their independence, the Presbyterian Church of America, until then subject to the Bishop of London, formed themselves into "The Protestant Episcopal Church in the United States of America" and, after lengthy debates, in a General Convention held at Trenton, New Jersey, 8–12 Sept., 1801, adopted the Thirty-Nine Articles, omitting in Art. 8 the Athanasian Creed and making such other alterations as were demanded by the changed political conditions. They retained the offensive coda to Art. 31, in which "the sacrifices of Masses" (i.e., the public worship of the vast majority of Christians) are denounced as "blasphemous sacrifices and dangerous deceits"; but in later editions the milder statement is substituted, that Transubstantiation "hath given occasion to many superstitions". Episcopalians, also, have not yet eliminated from their articles the calumny (Art. 22), that the "Roman Church" sanctions the "Adoration, as well of Images as of Relics."

The Scottish Confession.—By the year 1560, Protestantism in Scotland, through the aid of English gold and troops, had gained complete ascendency. Losing no time, the Protestant Lords of the Congregation, convened a revolutionary Parliament of the estates of the realm, at Edinburgh, 1 Aug., whose first act was to
repudiate the Catholic religion, and commission John Knox and other preachers to compile a new creed. Familiar with the Swiss Confessions, Knox performed his task in four days. The document, amended by the leaders, was submitted to Parliament and with ven. "Confessio Sco- lland and the exercise of the ancient worship was for- bidden under penalty of confiscation, exile, and death. "Confession of the the" arises in "Confession of the Faith and Doctrine beleev't and professit be the Pro- testants of Scotland", begins with a brief preface, in which the writers "take God to reocde in our con- science, that fra our hearts we abhorre all sects of heresie and all teachers of erroneous doctrine." They do not claim to be infallible. "Gif onie man shall note in this our Confession omie Article or sentence re- pugnand to God's halie word" they "do promise unto him satisfaction fra the mouth of God, that is, fr my haly scriptures, or else reformation of that quhile he saul proove to be amisse. This hypothetical admission of one remarkable in a Calvinistic document, was practically harmless; for no one ever convinced John Knox that he was in error.

The Confession presents, in twenty-five articles, a summary of the Christian Faith as held by the Scot- tish Protestants. The articles follow broadly the lines of the Scotch Confession of 1567, and the Confession of the Holy Mass are denounced and misrepresented: "The notes, signs, and assured tokens whereby the innaque Spouse of Christ Jesus is knowen fra the horrible harlot, the Kirk maugnent, we affirme, are nouter Antiquitie, Title usurp. lineal Descence, Place appointed, nor multitude of men approving ane error."

In addition to the usual Protestant notes of the true Church, viz. "the trew preaching of the Word of Grv. the right administration of the Sacri- ments", the Confession assigns a third element peculiar to the Scottish Kirk, i.e. "Ecclesiastical discipline uprichtly ministered, as Godda Wordle prescribes, whereby vice is repressed, and vertu nourished."

The development of Presbyterianism was a lucid commentary on the new principle herein tentatively prop-ounded. In Art. 24, "of the Civil magistrate", the Confession proclaims openly the duty of suppressing the Catholic religion. To Kings, Princes, Rulers and Mgmstaries, wee affirme that most chieflie and most principalie the conservation and purgation of the Re- ligion is apponned, so that ony power appointed for Civil poltie, but also for maintenance of the trew Religion, and for suppressing of Idolatrie and Superstition whatsoever."

After the forced abdication of Queen Mary in 1567, Parliament again proclaimed the Confession as the creed of "the true and holy Kirk of Jesus Christ within this realm"; and it remained the doctrinal standard of the Scots, until superseded by the Westminster Confession. In the estimation of the Presby- terian preachers, the Confession of Knox was sadly defective; it had failed to denounce with sufficient vigour the "Roman Antichrist". This omission was deemed particularly unfortunate about 1580, when the young King James VI had fallen under the spell of his French kinsman, Esme Stuart, upon whom the king had bestowed the earldom of Lennox, and who reigned supreme in his counsels. It was probably at the sug- gestion of this able and unscrupulous politician, that James commissioned the preacher John Craig to draw up the most violent condemnation of Papistry that ever issued from a Calvinistic pen. It is known to historians as the King's Confession, sometimes as the "Confessio Secunda", among others, as the "Confession of the "Catholic religion, and commission John Knox and other preachers to compile a new creed. Familiar with the Swiss Confessions, Knox performed his task in four days. The document, amended by the leaders, was submitted to Parliament and with ven. "Confessio Sco- lland and the exercise of the ancient worship was for- bidden under penalty of confiscation, exile, and death. This omission was deemed particularly unfortunate about 1580, when the young King James VI had fallen under the spell of his French kinsman, Esme Stuart, upon whom the king had bestowed the earldom of Lennox, and who reigned supreme in his counsels. It was probably at the sug- gestion of this able and unscrupulous politician, that James commissioned the preacher John Craig to draw up the most violent condemnation of Papistry that ever issued from a Calvinistic pen. It is known to historians as the King's Confession, sometimes as the "Confessio Secunda", among others, as the "Confession of the
ere condemning the proposed assembly, annulling beforehand all its proceedings, and prohibiting his subjects from taking any part in it. This had the consequence of keeping nearly all the Episcopalians away, thus placing the Puritans in supreme control. The assembly was summoned in King Henry VII's chapel in the historic abbey; but since no matter for discussion was submitted to the divines by the Parliament, and they were inhibited from taking the initiative, an adjournment was taken until the following week, when, as its first task, the assembly was ordered to revise the Anglican "Thirty-nine Articles," "for the purpose of simplifying, organizing, and remoulding the doctrines therein contained." Ten weeks were devoted to this work; the divines had remoulded the first fifteen, when they were ordered to lay aside the "Articles and engage in matters of more pressing importance to the Parliament. The war with King Charles was proceeding with disastrous results to the Parliamentary party. Success seemed possible only through the aid of the Scots.

Now the Scots demanded, as an indispensable condition of alliance, "the reformation of religion in the kingdoms of England and Ireland, in doctrine, worship, and government," as the Word of God, and the example of the best reformed Churches." In other words, they insisted upon the adoption by the English Presbyterians in its integrity, a system repugnant to the national instincts and traditions of Englishmen. But there was no attempt to discountenance the collision. A "Solemn League and Covenant," framed by the Presbyterian preacher, Henderson, was sworn and subscribed by the Scottish and English Parliaments, by the General Assembly of Scotland, and by the Westminster divines, after an afterthought, for the purpose of the lords and the members of both nations. To aid the inexperienced English divines in drawing up Presbyterian formularies, six Scottish commissioners, four preachers and two laymen, were sent to Westminster, with authority to take part in the discussions, but without votes. On 12 Oct., 1643, the Assembly received an order from the Lords and Commons to forthwith confer and treat among themselves, of such a discipline and government as may be most agreeable to God's Holy Word, and most apt to procure and preserve the peace of the Church at home, and nearer agreement with the Church of Scotland and other reformed Churches.

Also, "touching and concerning the Directory of Worship, or Liturgy, hereafter to be in the Church." This order was the signal for protracted and at times bitter disputes between the Presbyterian majority and the Scottish commissioners on the one side, and the Independents and the Erastians, the former of whom argued for the complete independence of each separate congregation (see Congregationalism) while the latter opposed any kind of jurisdiction independent of the civil power. Although the Independent members numbered scarcely a dozen, and the Erastians were fewer still, their influence was vastly in excess of their numerical strength; for the Independents were in close touch with Cromwell's army, and the Erastians could count on the sympathy of the King and his party. Into the details of this debate, we need not enter. While it was still raging, an order was sent down to the Assembly "to frame a Confession of Faith for the three kingdoms, according to the Solemn League and Covenant." This task presented the task presenting the puritans with extraordinary difficulties; all the Puritans divided, of doctrine, more or less strictly Calvinistic, and there was not one Arminian in the assembly. Moreover, the Westminster divines had copious material to work upon in the numerous Reformed symbols already in existence. The Confession occupied their attention from 29 Aug., 1644, until 25 Sept., 1646, when the first nineteen chapters were sent to the Commons, and a few days later a duplicate copy was presented to the House of Lords. The Lords gave their assent to "The Humble Advice of the Assembly of Divines," so the title ran; but the Commons demanded further revision until they had the complete Confession before them. This took place in Dec., 1646. A limited number of copies was printed for the use of the Parliament and the assembly; but the House of Commons, probably to gain time, demanded that each assertion should be supported by Scriptural texts. This was promptly done by the divines (29 April, 1647), when an order was sent for 600 copies, "and no more," to be printed. This edition was received as authoritative by the Scottish Church and Parliament, and was regarded by Presbyterians generally as their authentic Confession of Faith.

But in the eyes of the Erastian Parliament of England, it was simply "The Humble Advice of the Assembly of Divines," convoked by its authority, and valueless without its sanction. After intermittent discussions, which extended above a year, the Parliament, 20 June, 1648, ordered an expurgated edition to be printed by its authority, in which every reference to the spiritual jurisdiction of the Church is carefully eliminated.

As to its contents, the Westminster Confession of Faith, is the most elaborate, as it is the latest of the Reformed creeds. In thirty-two chapters, divided into sections, it labours to give a full exposition of Christian doctrine as understood by the Reformed Churches. Chap. i., "Of the Holy Scripture," gives a list of the inspired books, including the deuterocanonical books of the New Testament and rejecting the "Apocrypha" of the Old. The authority and the infallibility of the Holy Scripture, for which it ought to be believed and obeyed, dependeth not upon the authority of any man or church, but wholly upon God.

"The Supreme Judge by which all controversies of religion are to be determined, and all decrees of councils, opinions of ancient writers, doctrines of men, and private spirits, are to be examined, and in whose sentence we are to rest, can be no other but the Holy Ghost speaking in the Scripture."

Chap. ii. repeats the ancient doctrine "Of God and of the Holy Trinity." Chap. iii., "Of God's Eternal Decree," teaches that God from all eternity did by the eternal counsel of His own will, freely and unchangeably ordain whatsoever comes to pass. The divines strive to ward off the obvious objection to this fatalistic tenet by denying that it makes "God the author of sin," or that violence is offered to the will of the creature. Yet, in the same breadth, they insist, that "He hath not decreed anything because He foresaw it as future," and that "by decree of God, for the manifestation of His glory, some men and angels are predestined unto everlasting life, and others foreordained to everlasting death."

The elect, who fell in Adam, are redeemed by Christ, effectually called and eternally saved; but "neither are any other redeemed by Christ, effectually called, justified, adopted, sanctified and saved, but the elect only. The rest of mankind God was pleased, according to the unsearchable counsel of His own will, whereby He extendeth or withholdeth grace as He pleaseth, for the glory of His sovereign power over His creatures, to pass by, and ordain them to dishonour and wrath for their sin, to the praise of His glorious justice." The "Confession" judiciously warns the preachers that "the doctrine of predestination is to be handled with special prudence and care." In Chap. v., "Of Providence," we find the unintelligible utterance, evidently having in view the Supralapsarians, that God's providence "extendeth itself even to the first fall, and all other sins of angels and men, and the future permission, but such as hath joined with it a most wise and powerful bounding." Chap. x., "Of Effective
Calling" teaches that "all those whom God hath predestined unto life, and those only" are effectually called and saved. "Others, not elected, although they may be called by the ministry of the Word, and may have some common operations of the Spirit, yet their nature turns them unto death, and therefore not saved." Chapter xxi, "Of Religious Worship and the Sabbath Day," differs from the Continental creeds by adding the injunction that the Sabbath is to be kept holy by observing "a holy rest all the day from their own works, words, and thoughts about their worldly employments and their daily business." A man be "taken up the whole time in the public and private exercises of his worship, and in the duties of necessity and mercy." Chapter xxii, "Of the Civil Magistrate" (one of the chapters expounded by the Parliament), states that the "civil magistrate may not assume to himself the administration of the Word and the Sacraments or the power of the keys of the kingdom of heaven; yet he hath authority, and it is his duty to preserve that unity and peace be preserved in the Church, that the truth of God be kept pure and entire, that all blasphemies and heresies be suppressed." In the American revision, this is made to read that "as nursing fathers, it is the duty of civil magistrates to protect the Church of our common Lord and Saviour, giving the preference to the communication of Christians above the rest." Chap., xxiv, "Of Marriage and Divorce," "as professing the true reformed religion" are denounced that they "should not marry with infidels, Papists, or other idolaters." Divorce is permitted on grounds of "adultery, or such willful desertion as can no way be remedied by the Church or civil magistrate." Chap. xxi, "Of the Church," speaks in complimentary terms of the "Pope of Rome," who is denounced as "that Antichrist, that man of sin and son of perdition, that exalts himself in the Church against Christ, and all that is called God." The doctrine of the Sacraments differs in nothing from the earlier Calvinistic creeds. Chap. xxix, "Of the Lord's Supper," proclaims that "the Popish Sacrifice of the Mass," as they call it, "is most abominably injurious to Christ's one only sacrifice;" but the doctrine of transubstantiation is "repugnant to Scripture, and a common sense and reason; overthrowing the nature of the sacrament; and hath been and is the cause of manifold superstitions, yea, of gross idolatries." These are the main features of the "Westminster Confession of Faith," which are of interest to a Catholic. For generations, the "Westminster Standards," viz., the Confession and the Catechisms, have been used as textbooks and controlled the conduct of the Presbyterians of Scotland, Ulster, and America. They were also accepted, with modifications of various sorts, by the Congregationalists, the Regular Baptists, and other newer sects.

Faith, Hope and Charity. Saints, the names of two groups of Roman martyrs around whom a considerable amount of legendary lore has gathered; though the extent of sound historical data possessed concerning them is so slight, that until very recent times the most eminent scholars failed to distinguish between them. However, the extent and antiquity of their cult and the universality with which their names are found not only in the various early martyrologies of the Western Church, but also the Rituums and Menologies of the Greeks, render the fact of their existence and martyrdom unquestionable. Setting aside the purely legendary, and therefore not authenticated, and the entire information we have down to us (see Migne, P. G. CXV, 497; Mombrius, Vitae Sanctorum, II, 204), we find that in the reign of Hadrian, a Roman matron Sophia (Wisdom), with her three youthful daughters, Pistas, Elpis, and Agape (Faith, Hope and Charity), underwent martyrdom for the Faith, and were speedily buried on the Aurelian way, where their tomb in a crypt beneath the church afterwards erected to St. Pancrasius was long a place of resort for pilgrims, as we learn from various indubitable documents of the seventh century, such as an Itinerarium (or guide to the holy places of Rome compiled for the use of pilgrims) still preserved at Salzburg, the list, preserved in the cathedral archives of Monza, of the oils gathered from the tombs of the martyrs and sent to Queen Theodelinda in the time of Gregory the Great, etc.

Later surely than the reign of Hadrian, but at what time is uncertain, another band of martyrs, Sapientia (Wisdom) and her three companions, Spes, Fides and Caritas (Hope, Faith and Charity), suffered death and were buried near the tomb of St. Cecilia in the cemetery of St. Callistus on the Appian Way. Despite the meagreness of these authentic details, the explicit references in the documents cited to a band of martyrs, the mother and daughters, whose names are always given in Greek, and who are buried on the Aurelian Way, and to another band of four martyrs, interred on the Via Appia, whose relationship is not indicated and whose names, though the same as those of the martyrs of the Aurelian Way, are yet always in Latin, certainly point to distinct groups. Nor is the coincidence in names remarkable, seeing that the early Christians so often (according to de Rossi) took in baptism mystical names indicative of Christian virtues, etc. Thus Sophia, Sapientia, Fides and the like are common names in early Christian inscriptions and martyrlogies. The Roman martyrlogies, on 1 Aug., "the holy virgins, Faith, Hope and Charity, who won the crown of martyrdom under the Emperor Hadrian" and, on 30 Sept., "St. Sophia, widow, mother of the holy martyrs, Faith, Hope and Charity," in Rome, places, are fixed, but even Aug. is also celebrated; but generally, owing to the confusion of the two groups, none of the second group receives special recognition. In the Eastern Church the feast is kept on 17 Sept.

JNO. F. X. MURPHY.

Faith, The RULE OF.—The word rule (Lat. regula, Gr. ἐκλαθή) means a standard by which something can be tested, and the rule of faith means something established as normative to our faith, and serves as a measure. Since faith is Divine and infallible, the rule of faith must also be Divine and infallible; and since faith is supernatural, the rule of faith is authoritative, the ultimate or remote rule of faith must be the truthfulness of God in revealing Himself. But since Divine revelation is contained in the written books and unwritten traditions (Vatican Council, I, ii), the Bible and the Divine tradition must be the rule of our faith; since, however, these are only silent witnesses and cannot interpret themselves, they are commonly termed "proximate but inanimate rules of faith." Unless, then, the Bible and tradition are to be professed, we must look for some proximate rule which shall be animate or living.

I. PRIVATE JUDGMENT AS THE RULE OF FAITH.—The Reformed Churches were unanimous in declaring the Bible to be the sole rule of faith. "We believe
that the only rule and standard by which all dogmas and all doctors are to be weighed and judged, is nothing else but the prophetic and apostolic writings of the Old and New Testaments” (Form. Concordie, iii). But men had already perceived that the Bible could not be left to interpret itself, and the Convocation had put forward what was, perhaps unwittingly, a double rule of faith: “preachers”, they say, “shall see that they never teach anything . . . except what is agreeable to the doctrine of the Old and New Testament, and what the Catholic Fathers and ancient Bishops have decreed out of that doctrine” (Wilkins, “Concilia”, iv, 267). Convocation thus not only laid down that the Bible was the rule of faith, but insisted upon its inanimate character as a witness to the Faith, for they declared the early Church to be its acknowledged interpreter; moreover, they were themselves exercising church authority.

A somewhat different doctrine appeared in the Westminster Confession of Faith (1643–7), which declared that the “Books of the Old and New Testaments are . . . given by inspiration of God, to be the rule of faith and life” (art. ii), but that the “authority of the Holy Scripture doth not upon the testimony of any man or church” (art. iv). They add: “We may be moved by the testimony of the Church to an high and reverent esteem of the Holy Scripture . . . yet our full persuasion of the infallible truth and divine authority thereof is from the inward work of the Holy Spirit, bearing witness by and with the word in our hearts” (art. v). This is a clear enunciation of the principle that the judgment of each individual, moved by the assistance of the Holy Spirit, is the proximate living rule of faith. But apart from its solvent effect upon any true view of the Church, it is in itself a rule which could never serve as an infallible interpreter of the inanimate rule, viz., the Bible. For where does the Bible ever testify to the inspiration of certain books? And what limits does it assign to the canon? Moreover, the inward work of the Holy Spirit, being purely subjective, can never be a decisive and universal test of doctrinal diversions or critical views; thus Luther himself termed St. James’s Epistle an “epistle of straw”.

The fruits of this principle are everywhere apparent in Protestant Biblical criticism. “The Reformation theologians treated Paul as if he were one of themselves,—if recent writers of the genera
ter and Godet Paul is a pectoral theologian, in Rückert a pious supernatinalist, in Baur a Hegelian, in Luthardt orthodox, in Ritschl a genuine Ritschelian” (Expository Times, 1904, p. 304). In practice, however, the Reformed Churches have never acted up to the principle of private judgment, but have, in one form or another, urged the authority of the Church in deciding the contents of the Bible, its inspiration, and its meaning.

II. THE CHURCH AS THE RULE OF FAITH.—This follows necessarily from any adequate view of the Church as a Divinely constituted body, to whose keeping is intrusted the deposit of faith, but the grounds for this doctrine may be briefly stated as follows:

1. New Testament.—Christ gave His disciples no command to write, but only to teach: “going therefore, teach ye all nations, . . . teaching them to observe all things whatsoever I have commanded you” (Matt. ii, 20). As the Father hath sent me, I also send you” (John, xx, 21). And in accordance with this, the Church is everywhere presented to us as a living and undying society composed of the teachers and the taught. Christ is in the Church, and is He? What has God promised that should be with it and abide in it. “He will teach you all things, and bring all things to your mind, whatsoever I have said to you” (John, xiv, 26). Hence St. Paul calls the Church “the pillar and ground of the truth” (1 Tim., iii, 15; cf. Mark, xvi, 16; Rom., x, 17; Acts, xv, 28).

2. Tradition.—The same doctrine appears in the writings of the Fathers of every age; thus St. Ignatius (ad Trallii, vii), “Keep yourselves from heretics. You will be able to do this if you are not puffed up with pride, and (so) separated from (our) God, Jesus Christ, and from the bishop, and from the precepts of the Apostles. He who is clear, he who is without is not clear; that is, who acts any way except without the bishop, the priestly body, and the deacons, is not clean in conscience.” And St. Ireneaus (“Adv. Haer.”, III, ii) says, of heretics, that “not one of them but feels no shame in preaching himself, and thus depraves the truth” (τὰς διαθήκας κατωτάτας) and again (III, iv), “it is not right to seek from others that truth which it is easy to get from the Church, since the Apostles poured into it in fullest measure, as into a rich treasury, all that belongs to the truth, so that whosoever desires may drink hence the draught of life”. A little further on, he speaks (V, xx) of the “true and sound preaching of the Church, which offers to the whole world one and the same way of salvation”. Such testimonies are countless; here we can only refer to the full and explicit teaching which is to be found in Tertullian’s controversy against Marcion and in his “De Haeresibus” and St. Vincent of Lérins’ famous “Commontorium”. Indeed St. Augustine’s well-known words may serve as an epitome of patristic teaching on the authority of the Church: “I would not believe the Gospels unless the authority of the Catholic Church moved me themselves; It should be noted that the Fathers, especially Tertullian and St. Ireneaus, use the term tradition not merely passively, viz., of orally bestowed Divine teaching, but in the active sense of ecclesiastical interpretation. And this is the only way to understand the rule of faith in the form of sound words which thou hast heard from me” (II Tim., i, 13). It is in this sense that the various formulæ of faith, of which we have the earliest sample in I Cor., xv, 3–4, became the rule of faith.

3. Theologians.—The teaching of the Church’s Doctors on this point has ever been the same, and it will suffice if we quote two passages from St. Thomas, who, however, has no set treatise on a question which he took for granted. “The formal object of faith”, he says, “is the First Truth as manifested in Holy Scripture and in the Church’s teaching. Hence if anyone does not adhere as to an infallible and Divine rule to the Church’s teaching, which proceeds from the Church’s truth manifested in Holy Scripture, such an one has not the habit of faith, but holds the truths of faith by some other principle” (II-II, Q. v, a. 3). And still more explicitly when (Quodl., ix, art. 16) he asks whether canonized saints are necessarily in heaven, he says, “it is certain that the judgment of the universal Church cannot possibly err in matters pertaining to the faith; hence we must stand rather by the decisions which the pope judicially pronounces than by the opinions of men, however learned they may be in Holy Scripture.”

4. Reason.—If faith is necessary for all men at all times and in all places, and if a true saving faith demands a clear knowledge of what we have to believe, it is clear that an infallible teaching Church is an absolute necessity. Such a Church alone can speak to men of all classes and at all times; it alone can, by reason of its perpetuity and ageless character, meet every new difficulty by a declaration of the sound form of the faith as always held. If the teaching of Christ and His Apostles is distorted, none but the Church can say “This is its true meaning, and not that; I know that it is as I say because the Spirit which assists me is One with the Spirit which rested on Him and on them”; the Church alone can say, “Christ truly rose from the tomb, and I know it, because I was there, and saw the stone
rolled back." The Church alone can tell us how we are to interpret the words "This is My Body," for she alone can say, "He Who spoke those words speaks through me, He promised to be with me all days, He pledged Himself to safeguard me from error at all times.

III. IN WHAT SENSE IS THE CHURCH THE RULE OF FAITH?—(1) All non-Catholic systems have felt the need of some such authoritative rule as that which they regard as having been set up by the Church at the Council of Trent. The Catholic Church, on the other hand, regards the Holy Scriptures alone as having such authority, and it is for this reason that the Church alone is able to interpret the Scriptures. In so doing, the Church has always been guided by the principles laid down in the New Testament, and has been careful to avoid any interpretation that would contradict the clear teaching of the Bible.

(2) Modernism.—There has been a tendency among some modern thinkers to question the authority of the Church, and to hold that the Church is not infallible. This is a dangerous doctrine, for it would tend to undermine the faith of the Church and to lead to a division of the Church. The Church is not a mere organization, but is the body of Christ, and its teachings are the teachings of Christ. The Church has always been guided by the Scriptures, and it is for this reason that the Church is able to interpret the Scriptures correctly.

(3) The Catholic Doctrine Touching the Church as the Rule of Faith.—The Church, in this connection, is not only the teacher, but also the interpreter, of the passages already quoted from the New Testament and the Fathers. But the teaching Church may be regarded either as the whole body of the episcopate, whether scattered throughout the world or collected in an ecclesiastical council, or it may be synonymous with the successor of the Apostle Peter, the Vicar of Christ. Now the teaching Church is the Apostolic body continuing to the end of time (Matt., xxviii, 19–20); but only one of the bishops, viz., the Bishop of Rome, is the successor of St. Peter; he alone can be regarded as the living Apostle and Vicar of Christ, and it is only by his union with himself that the rest of the episcopate can be said to possess the Apostolic character (Vatican Council, Sess. IV, Proemium).

Hence, unless they be united with the Vicar of Christ, it is futile to appeal to the episcopate in general as the rule of faith. At the same time, it is clear that the Church may derive from the teaching of the Pope and the episcopate the knowledge of the Deposit of Faith committed to her, as for St. Augustine pointedly asked, when treating of the re-baptism question, "how could a question which had become so obscured by the dust raised in this controversy, have been brought to the clear light and scope of the present day, if it had not been discussed throughout the world in disputations and conferences held by the bishops?" (De Baptismo, ii, 5).

Thus the appeal of the Ritualist to a future council, that of the Modernist to the conscience of the universal Church, and that of the High-Churchman to the primitive Church, are, besides being mutually exclusive, destructive of the true idea of the Church as the "pillar and ground of truth." If the Church is to exercise her prerogative, she must be able to decide promptly and infallibly any question touching faith or morals. Her conciliar utterances are rare, and though they are weighty with the majesty of ecumenical testimony, the Church's teaching is by no means confined to them. The Vicar of Christ can, whenever necessary, exercise the plenitude of his authority, and when he does so we are not at liberty to say, with the Jansenists, that he has not done justice to the Church of the early Church or to the Church of the Reformation. (Cf. Clement XI, "Vineum Dominii," 1734; and "Lamentabili Sane," 1907, prop. v.) When Newman was received into the Church, he penned those famous lines which form the conclusion of the "Essay on Development." "For not from you who have here found; regard it not as mere matter of present concern; but as from the past, from the future, and from the present, and looking out for the best way of doing so; seduce not yourself by the imagination that it comes of disappointment, or disgust, or restlessness, or wounded feeling, or undue sensibility, or other weakness. Wrap not yourself round in the associations of years past, nor determine that to be truth which you wish to be so; nor make an idol of cherished anticipations. Time is short, eternity is long."

Patriotic Writers.—TRENKUS, Adversus Heres., ed. MOINE, P. C., VII, TERTULLIAN, De prescriptionibus Haereticorum, ed. HURST, Orléans, 1870; CYRIL OF JERUSALEM, C; CYRIL OF ALEXANDRIA, Second Letter to Marcianus, ed. HUMILLER, Paris, 1878; JOHN XXIII, Canon VI of the Council of Trent, ed. HURST, See also SCHOUX, Apologia, tr. (New York, 1892); HAYWICK, History of Doctrine, tr. (New York, 1890).

Writers of the Scholastic Period.—MELCHIOR CANUS, De locis theologicos (Rome, 1900); NOBEL, Defensio Fidelis Catholicae et Apostolicae, ed. VIVAR, Paris, 1878; HELLARMINE, Disputationes de controversiis fidelis (Innsbruck, 1396).
Catholic Writers of the Reformation Period in England.—

CAMPION, Decem Rationes etc.; BRISTOW, Motives (Antwerp, 1583); St John of Matha; A short and plain way to the Faith and Church (1688), reprinted by DOLMAN (1844).

But the most interesting is that of the Seventeenth and Eighteenth Centuries.—THORNHILL, On the Principles of Christian Truth, ed. PARKER (Oxford, 1843); PEARSON, Exposition of the Creed (1865); BELL, On the Principles of Christian Truth, ed. BULL (Oxford, 1827); D. I. E. BURLE (said to have died a Catholic), Analogia of Religion, II, DURRIEZ, The Nineteenth Century—NEWMAN, The Via Media of the Roman Church (revised edition), The Ideal of a Christian Church (1844); R. I. WILDERFORD, An Elementary Manual of Catholic Doctrine (1854); Newman, An Enquiry (Oxford, 1865); J. MANNING, The Rule of Faith (a sermon at Chichester, 1838); L. MUNDI, Art. 9, The Church (Christian Oratory); The Catholic Religion for Members of the Anglican Church; GORE, The Incarnation of the Son of God in Bampton Lectures (1891). See also references under Faith.

HUGH POPE.

Faithful (Lat. fideles, from fides, faith), THO, those who have bound themselves to a religious association, whose doctrine they accept, and into whose rites they have been initiated. Among Christians the term is applied to those who have been fully initiated by baptism and, regularly speaking, by confirmation. Such have engaged themselves to profess faith in Jesus Christ, from Whom they received it as a gift; henceforth they will proclaim His teachings, and live according to the principles of the Church. Hence the term is frequently used in the papal documents, Christi fideles, "the faithful of Jesus Christ". The distinction between Christians and faithful is now very slight, not only because adult baptism has become the exception, but also because liturgically the rite of the catechumenate and that of baptism have merged into one another. On the other hand, in the Latin Church at least, confirmation and first Communion have been separated from the baptismal initiation. In the primitive Church it was otherwise; initiation into the Christian society consisted in two distinct acts, often accomplished years apart from one another. First, one became a catechumen by the imposition of hands and the sign of the cross; this was a kind of preliminary profession of Christian faith—"eos qui ad primum fidei creditulitatis accedit" (Council of Elvira, about 300, can.xiii), which authorized the catechumen to call himself a Christian; and, secondly, by the act of initiation, by baptism itself, was he authorized to call himself one of the faithful, and to participate immediately in all the Christian mysteries, including the Eucharist.

Strictly speaking, therefore, the term faithful is opposed to catechumen; hence, it is not met with in the writings of those early Christian Fathers who flourished before the organization of the catechumenate. It is not found in St. Justin nor in St. Irenaeus of Lyons; Tertullian, however, uses it, and reproaches the heretics for obliterating all distinction between catechumens and the faithful: quasi catechumenus, quasi fideles taceamus (De praescriptione haereticae, c. xii; P. L., II, 56). Henceforth, in the patristic writings and the canons of councils we meet quite frequently the antithesis of catechumens and baptized Christians, Christians and faithful. Thus St. Augustine (Tract. in Joannis Evang., xiv, 2; P. L., XXXV, 17, 18): "Ask a man: are you a Christian? If he be a pagan or a Jew, he will reply: I am not a Christian. But if he say: I am a Christian, ask him again: are you a catechumen, or one of the faithful?" Similarly the Council of Elvira considers the case of a "faithful" Christian baptizing a catechumen; in case of necessity (can. xxxvii); again, of sick persons asking for the imposition of hands of the catechumenate, and thus becoming Christians (can. xxxix); of participation in an idolatrous sacrifice on the part of a Christian, and again by one of the faithful (can. lxx); of betrayal to the pagan magistrate (delato), to which a difference of guilt is attached according as the crime was perpetrated by one of the faithful or by a catechumen (can. lxxiii).

The title fideles was often carved on epitaphs in the early Christian period, sometimes in opposition to the title of catechumen. Thus, at Florence, a master (patronus) dedicates to his catechumen servant (alunno) the following inscription: "Ecce audiendori patronus fideles", i.e. "her master, one of the faithful, to Sozomenes, his servant and a hearer", by which term he means one of the well-known degrees of the catechumenate (Martigny, Dict. des antiq. chrét., Paris, 1857). Even now the baptismal rite provides for a voluntary request of baptism on the part of a non-Christian, i.e. a non-Christian (see INFIDEL); it exhibits venerable vestiges of the primitive scrinium or preliminary examination, the guarantors (sponsors) or godfather and god-mother, the rites of the catechumenate, the communication of the Creed (traditio symboli) and the Our Father, the renunciation of Satan and evil, the adhesion to Jesus Christ, and the triple profession of faith. The candidate for baptism is still asked at the entrance to the baptismal font: "Wilt thou be baptized?" It was voluntarily, therefore, and is so yet, that one entered the ranks of the faithful through the principal initiatory rite of baptism.

Naturally enough, even in Christian antiquity, attention was drawn to the analogous ceremonies of circumcision (the sign, if not the rite, of the admission of proselytes to the profession of Judaism) and of baptism by water; and the Church eagerly adopted them. Thus it was that the faithful of Mithra were initiated (Cumont, Les Mystères de Mithra, Paris, 1902). The obligations of the faithful Christian are indicated by the preparatory rites of his reception and by his actual baptism. He begins by asking for faith (in Jesus Christ) and, through that faith, for eternal life. The Creed is then delivered to him, and he returns it (reddiditio symboli), i.e. repeats it aloud. At the baptismal font he recites solemnly the profession of faith. From all this it is clear that his first duty is to believe (see Faith). His second duty is to regulate his life or conduct with a new Christian faith, i.e., having renounced Satan and evil, he must avoid all sin. "So behave", was it said to him, "that henceforth thou mayest be the temple of God." St. Gregory I says (Hom. in Evang. xxx, 3; P. L., LXXVI, 1215): "Then only are we truly the faithful when by our acts we realize the promises made with our lips. On the day of our baptism, indeed, we promised to renounce all the works and all the pomp of the ancient enemy." Finally, since the faithful have voluntarily sought membership in the Christian society they are bound to submit to its authority and obey its rules. As to the rights of the faithful, they consist chiefly in the fullest participation in all the Christian mysteries, so long as one does not become unworthy of the same. Thus the faithful Christian is entitled to take part in the Holy Sacrifice, to remain in the assembly of the faithful; to receive the Body and Blood of Christ, and to receive the other rites and sacraments. He may also aspire to the highest rank of the clergy. In a word, he is a full member of the Christian Church, and in his spiritual promises, he will obtain eternal life, i.e., his original petition at the moment of baptism. See BAPTISM; CATECHUMEN.

A. BOUDINHON.

Faithful Companions of Jesus, Society of the, a religious institute of women founded by the Viscountess de Bonnaud d'Houet in 1820 at Amiens,
France. It was solemnly approved by Gregory XVI, 5 Aug., 1, 377.

The Faithful Companions of Jesus are devoted to the education of all classes, adapting themselves to the special educational needs of each country. In 1903 the society possessed forty-one convents in France, Italy, Switzerland, England, Ireland, Scotland, Australia, Canada, and the United States. The religious persecution in France, with the consequent closing of the French houses, has been the cause of new foundations in Belgium (at Brussels, Graty, and Namur), also in the S. of Germany and Switzerland. The society is governed by a superior general, who, up to the time of the religious persecution in France, resided at the mother-house in Paris; the home of the superior general is at present in Namur, Belgium. The society numbers about 1,200 religious, who in England, Ireland, Scotland, and Australia, conduct about 60 grammar and high schools, technical schools, science and art schools. The new training college for teachers at Sedgley, near Manchester, England, has met with great success. In the United States the sisters have charge of about one thousand children attending six parochial schools. They also have academy where high school branches are taught. A small foundation has recently been made at Gilbertville, Mass. In the United States there are 46 sisters, 4 novices, 2 schools, and 1 high school. The society now possesses thirty-two convents. The novices are at Namur, Belgium, Upton Hall, near Liverpool, England, Limerick, Ireland, and Fitchburg, Mass.

Sister Mary Philomena.

Falco, Juan Conchillos, painter, b. at Valencia of an ancient noble family in 1614; d. 14 May, 1711. He was a pupil of Esteban March, the eminent but eccentric Valencian painter, and was one of the first Spanish artists to start and maintain a school of design, gathering about him various youthful artists and insisting upon their working in charcoal in order to obtain freedom of draughtsmanship. He was a brilliant sketcher and in his journeys through his native country made some clever and humorous pencil drawings of scenes which took place on the road. Falco is almost the only Spanish artist of whom it can be said that he had a keen sense of humour, but he is further described by his contemporaries as "the most amiable of sages, humble, modest, a model of virtue, and altogether of the stuff whereof angels are made". Two of his most important works were those executed for the church of San Salvador in Valencia; others are the "Immaculate Conception", painted for the Franciscans in the same city, the frescoes in the church of San Juan, and the two altar-pieces of the Cistercian monastery of Valdivia. The close of his life was full of sadness. He was suddenly struck with palsy and became a confirmed cripple. Soon after that he lost his sight and died completely blind.

Faldistorium (Faldstoolium). See Faldstool.

Faldstool (Lat. faldistorium; also facistorum, fadestolus, fadestool), a movable folding chair used in parochial functions by prelates and churchmen, or within if it is not at his throne or cathedral. Other prelates enjoy the privilege of full pontificates also use it. The rubrics prescribe it as a seat in the confessing of baptism and Holy orders, in the consecration of ols on Maundy Thursday; at the ceremonies of Good Friday, etc. It is prescribed as a genuflexorium at the door of the church at the solemn reception of a bishop, at the altar of the Blessed Sacrament, and before the high altar. Red, green, and violet cloths are ordered as a covering to correspond to the season or the rank of the prelate. It may have once been something like a campstool and it accompanied the bishop in his journeys. Materials, even the most costly, were employed in its construction; one wrought of gold and jewelled was presented to Pope Clement IV by Charles, King of Naples. Some were made of silver, of gilt metal, of ebony, or of wood. They were sometimes elaborately carved, ending in clawlike feet, the four corners at the top representing the neck and head of animals. Cloths of silk of a rich texture with gold and silver served to cover them. A faldstool is prescribed by the old English Ritual in the consecration of a bishop. Of Hugh Pudsey, Bishop of Durham (d. 1195), we are told that on taking the cross for the holy war he had a faldstool made among other things to carry along with him a magnificent silver chair.

Falkenberg, John of. See John of Falkenberg.

Falkner, Thomas, b. 6 Oct., 1707; d. 30 Jan., 1794. He was the son of Thomas Falkner, a Manchester apothecary, and obtained his education at the Manchester grammar school. Later on, having studied medicine under the well-known Dr. Richard Mead, he became a surgeon and practised at his native place. In the year 1730, he was invited to take a sea-voyage, and being acquainted with a ship captain on board the "Assiento", a vessel trading with Guinea and carrying slaves thence to Buenos Aires, he accepted an invitation to accompany the vessel as surgeon. This was in or about 1731. On reaching Buenos Aires he was so ill that the captain was compelled to leave him there in the care of Father Mahoney, the superior of the Jesuit College. Here he not only recovered his health, but was received into the Church, and on 15 May, 1732, entered the Society of Jesus, becoming a member of the Paraguay province. Having spent some time at the Jesuit College of Cordoba de Tucuman, he went as a missionary to the Puelches, near Rio Legundo. His knowledge of medicine and mechanics procured for him considerable influence among the Indians, and in 1740 or soon after he was sent to assist Father Nobile in his successful mission to the Patagonian Indians at Cape San Antonio. For more than thirty years he laboured among the Patagonians until 1768 when the Jesuits were expelled from South America. He then returned to England where, in 1771 or 1772, he joined the English province of the Society. He was appointed chaplain to Mr. Berkeley, outside of his ordinary duties, in addition to his priestly labours, he wrote an account of his Patagonian experiences, which was published at Hereford in 1774 under the title "A Description of Patagonia and the adjoining parts of South America, with a grammar and a short vocabulary, and some particulars relating to Falkland's Islands." The book as published was not.
his original work, but a compilation by William Combe, who used Falkner's papers. Kirk (see below) quotes a remark by Rev. Joseph Berington: "Mr. Falkner was a man of a vigorous mind, well exercised in various points of science, and had he been able to tell his story in his own way, stores of principles which were incidental to his mind was with anecdotes and incidents, on which he delighted to dwell, we should have had from him an amusing and interesting performance. But his papers were put into the hands of the late Mr. Robert Berkeley of Spetchley, who extracted from them the whole spirit of the original. He made them what they are."

But though Mr. Berkeley wrote the preface, the responsibility for the taming process must rest with Combe. Even in its emasculated form the book was successful, and was translated into German, French, and Spanish. Another account of the Putagonians due to Father Falkner is found in the works of Thomas Pennant, who described his essay as "formed from the relation of Fr. Falkner, a Jesuit, who had resided among them thirty-eight years". On leaving Spetchley, he became chaplain to Mr. Berington of Winsted in Herefordshire, and afterwards to the Flowdens of Powick in Shropshire. After his death, which occurred at the latter place, the Spanish Jesuits, who had known him in South America, were very anxious to obtain his unpublished works, which included treatises on the botanical and mineral products of America, and American distemper as cured by American doctors. This is stated by Fr. Caballero, S.J., that he had also edited "Volumina duo de anatomia corporis humani".

Edwin Burton.

**Fall, The.** See Sin.

**Fall River.** Diocese of (Riveromensis). U.S.A., a suffragan see of the province of Boston, comprises the counties of Bristol, Barnstable, Dukes, and Nantucket, with the towns of Marion, Mattapoisett and Wareham in Plymouth county, Massachusetts, an area of 1184 square miles. It was created 12 March, 1904, by a division of the Diocese of Providence, of which Rhode Island and a portion of south-eastern Massachusetts, and has the distinction of being the first diocese erected by Pope Pius X. The total population of the diocese is 309,438, of which 151,633 are Catholics. Among the latter are Americans, Irish, French-Canadians, Portuguese, Poles, and Italians, with some few Greeks and Syrians.

The heavy immigration in years past of the Irish and French-Canadian people has caused them to far outnumber the Catholics of other nationalities; but this immigration is now at a standstill, while that of Portuguese and Poles is steadily on the increase. The diocese, by reason of recent creation, has no history of its own, its records being included in the history of the Dioceses of Boston, Hartford, and Providence (q.v.), in each of which its territory has successively been included.

**William Stang**, the first bishop, was born in 1854 in Langenbrücken, in the Grand Duchy of Baden, Germany. His early education was received in the gymnasium of his native land and the petit séminaire at Saint-Nicolas, Belgium. In October, 1875, he began the study of theology at the American College, Louvain, Belgium, where he was ordained priest in 1878. In September of the same year he emigrated to America, to labour in the Diocese of Providence, where his first assignment was to the cathedral. In 1884 he assumed charge of St. Ann's parish, Cranston, Rhode Island. Shortly after he was named rector of the cathedral and chancellor of the diocese, positions which he ably filled until 1895. In April of that year he went to Louvain to become vice-rector of the American College, Georgetown University, in 1887, had conferred upon him the degree of doctor of theology; but a greater recognition awaited him. In August, 1898, the Belgian bishops named him their candidate for the see of Louvain, to which the American College is affiliated, named him professor of fundamental moral theology in the schola minor of the university. In April, 1899, he returned to Providence, to become head of the diocesan Apostolate Band. While still head of the latter, in 1904, he was awarded the S.T.D. at St. Edmund's College, Oxford, and on 12 March, 1904, he was appointed bishop of the newly erected see of Fall River. His consecration took place in the cathedral, Providence, 1 May, 1904. In the short space of two years and nine months he proved himself to be a zealous, indefatigable worker, and charitable to an extreme. He died 2 February, 1907, in St. Mary's Hospital, Rochester, Minnesota. Bishop Stang was the author of a number of works, notably: "Pastoral Theology" (1896); "Historiographia Ecclesiastica" (1897); "Business Guide for Priests" (1899); "Pepper and Salt" (1901); "Christian and Catholic" (1905); "Fundamentals Theologie Moralis" (1906). He also left many pamphlets and essays and contributed frequently to the "American Ecclesiastical Review".

**Daniel Francis Feehan**, the second incumbent of the see, was b. in 1855, at Athol, Massachusetts. His classical and philosophical studies were pursued in St. Mary's College, Montreal, Canada, from which he was graduated in June, 1876. During the three following years he studied theology at St. Joseph's Seminary, Troy, New York, where he was ordained priest 20 December, 1879. Parish work in West Brighton and Fall River in the Diocese of Springfield engaged his energies until 1889, when he was made permanent rector of St. Bernard's, Fitchburg. He was in charge there when, on 2 July, 1907, he was appointed second Bishop of Fall River, and consecrated 19 September following.

The diocese has a well-equipped educational system. There are 28 parochial schools with a staff of 191 teachers and an enrolment of 10,451 pupils, 4464 boys and 5987 girls. There are three convent boarding schools conducted by the Religious of the Holy Union in Providence, the Sisters of the Sacred Hearts, and the Sisters of Jesus and Mary, respectively. A boarding college for boys and young men pursuing classical and commercial courses is under the guidance of the Fathers of the Sacred Heart. The Christian Brothers have a well-established commercial day school system, and there is a small orphan asylum directed by the Sisters of Mercy, the Sisters of Charity (Grey Nuns), and the Sisters of St. Francis, respectively, shelter 600 orphans. In connection with one of these asylums is maintained a home for the aged. Admirable work has also been done by the Sisters of Providence.

There are 108 secular and 20 regular priests labouring in the diocese. Of the secular clergy 57 are English-speaking, 30 French-speaking, 15 Portuguese, 5 Poles, and 1 Italian. The Dominican Fathers of the Sacred Hearts and the Christian Brothers are the chief numerical communities, as also the Sisters of Charity (Grey Nuns), Dominican Sisters of Charity of the Presentation, Sisters of St. Dominic, Felician Sisters, Franciscan Missionaries of Mary, Sisters of the Holy Ghost, Sisters of Holy Cross and Seven Dolors, Religious of the Holy Union of the Sacred Hearts, Sisters of Notre Dame, and Mary, Sisters of Mercy, Sisters of St. Joseph (Le Puy), and Sisters of St. Francis.
Fallope, GABRIELLO, anatomist, "one of the most important of the many-sided physicians of the sixteenth century" (Haeser): b. at Modena, Italy, 1523; d. 9 October, 1562, at Padua. Some writers have placed his birth as early as 1490, but contemporary authority is for the date mentioned. His family was noble but very poor and it was only by a hard struggle he succeeded in obtaining an education. He studied medicine at Ferrara, at that time one of the best medical schools in Europe. After taking his degree he worked at various medical schools and then became professor of anatomy at Ferrara, in 1540. He was called the next year to Padua, then the most important university in Italy. In 1551 Fallope was invited by Cosmo I, Grand Duke of Tuscany, to occupy the chair of anatomy and surgery at Padua. He held also the professorship of botany and was superintendent of the botanical gardens. Though he died when less than forty, he had made his mark on anatomy for all time. This was the golden age of anatomy and Fallope's contemporaries included such great anatomists as Vesalius, Eustachius, and Columbus. It has sometimes been asserted that he was jealous of certain of the great discoverers in anatomy and that this is the reason for his frequent criticisms and corrections of their work. Haeser, whose authority in medical history is very high, declares that Fallope was noted for his modesty and deference to his fellow-workers and especially to Vesalius. His purpose in suggesting corrections was the advance of the science of anatomy. Fallope's own work dealt mainly with the anatomy of the head. He added much to what was known before about the internal ear and described in detail the tympanum and its relations to the ossicous ring in which it is situated. He also described minutely the canal of the cochlea and its branches in the temporal bone and the corresponding parts in the audience. His contributions to the anatomy of the bones and muscles were very valuable. It was in myology particularly that he corrected Vesalius. He studied the organs of generation in both sexes, and his description of the canal of the ovary led to the uterus. He added his name to the structure. At first he proposed a canal with a diameter of the facial canal through which the facial nerve passes after leaving the auditory canal, and he was followed after him the aqueductus Fallopian. It was much more a discoverer in anatomy. His contributions to practical medicine were important. He was the first to use an auricular speculum for the diagnosis and treatment of diseases of the ear. His writings on surgical subjects are of interest. He published two treatises on ulcers and tumors; a treatise on surgery; and a commentary on Hippocrates' book on wounds of the head. His treatise on syphilis is wonderful in its anticipation of what is sometimes thought most modern in this subject. Fallope was also interested in every form of therapeutics. He wrote a treatise on baths and thermal waters, another on simple purgatives, a third on the composition of drugs. None of these works, except his anatomy (Venice, 1561), was published during his lifetime. As we have them, they are from the manuscripts of his lectures and notes of his students. They were published by Koyter (Nuremberg, 1575).

JAMES J. WALSH.
account of ill-health, the law bears his name, and rightly, for it was his work.

The aim of this law was twofold. It dealt with both primary and secondary education. In the first case, to conduct a primary school, a Frenchman had to be at least twenty-one years of age, with ten years’ experience in an elementary school, or a certificate from a commission appointed by the Minister of Education. For members of religious congregations in girls' schools the le\'tres d'ob\'edience took the place of this certificate. In the second case the law required the candidate to be twenty-five years of age, to have had five years of experience, and a degree of Bachelor of Letters, or a diploma from a ministerial commission.

The new council of the university represented the leading philosophical opinions of France; besides a commission composed of university men proper it included 3 bishops, 1 rabbi, 1 Protestant minister, 3 councillors of the high court of appeals (cour\'e de cassation), 3 councillors of state, 3 members of the institute, and 3 members of the board of free education. In two years' time 25 free schools sprang up, and it is from this law, the last remnants of which the French Pope is now (1908) preparing to abrogate, that dates the development of the Catholic teaching orders in France. In a consistorial address (20 May, 1850) Pius IX praised it as a measure of progress. Those Catholics who opposed, as a matter of principle, all State education were disappointed at the passage of the law; and an ardent exponent, Louis Veuillot. In the Constituent and in the Legislative Assembly, as minister and as deputy, de Falloux always maintained that France was obliged to protect Pius IX as a temporal ruler; he was one of the prime movers of the expedition de Rome. During the Second Empire he withdrew from public life. In 1866 he was elected to the French Academy. In the discussions which took place in royalist circles during the early years of the Third Republic, de Falloux invariably declared in favour of the national flag (the tricolor) and in an article in the "Correspondant" (1873) he insisted that neither as a policy nor as a party cry should the monarchists put forth the idea of a counter-revolution. Spuller, however, declared that because of his conspicuous ability as a statesman de Falloux was one of the most dangerous opponents of the Revolutionary party had he lived in the nineteenth century. It was on the basis of liberty that de Falloux desired to combat the false principles of the Revolution. He believed that politics should take into consideration not only the "thesis" or principle, but also the "hypothesis" or actual conditions, and that certain too extreme formulas or too exacting claims were sure to prejudice rather than help the cause of the Church and the monarchy. The posthumous publication of his "Memoirs" (1888) revived earlier controversies between the "Correspondant" and the "Univers" and provoked a sharp reply from Eugène Veuillot.

Georges Goyau.

False Decretals, or the Decretals of the Pseudo-Isidore, is a name given to certain apocryphal papal letters contained in a collection of canon laws composed about the middle of the ninth century by an author who uses the pseudonym of Isidore. This collection was used as an opening prefatory section to the collection. For the student of this collection, the best, indeed the only useful edition, is that of Hinschius, "Decretales Pseudo-Isidorianae" (Leipzig, 1863). The figures in parenthesis occurring during the course of this article refer the reader to the edition of Hinschius. The name "False Decretals" is sometimes extended to cover not only the papyra letters forged by Isidore, and contained in his collection, but the whole collection, although it contains other documents, authentic or apocryphal, written before Isidore's time.

The Collection of Isidore falls under three headings: (1) A list of sixty apocryphal letters or decrees attributed to the popes from St. Clement (67-3), to the anonymous Decretals (311-314) inclusive. Of these sixty letters fifty-eight are forgeries; they begin with a letter from Aurelius of Carthage requesting Pope Damasus (360-384) to send him the letters of his predecessors in the chair of the Apostles; and this is followed by a reply in which Damasus assures Aurelius that the desired letters were being sent. This correspondence was meant to give an air of truth to the false decreals, and was the work of Isidore. (2) A treatise on the Primum Church and on the Council of Nicaea, written by Isidore, and followed by the authentic canons of fifty-four councils. It should be remarked, however, that among the canons of the second Council of Seville (page 438) canon vii is an interpolation aimed against chorepiscopi. (3) The letters mainly of thirty-three popes, from Silvester (314-335) to Gregory II (715-731). Of these about thirty letters are forgeries, while all the others are authentic. This is based on the description of their contents and touches only on the more salient points of a most intricate literary question.

Their Apocryphal Character.—Nowadays every one agrees that these so-called papal letters are forgeries. These documents, to the number of one hundred, appeared suddenly in the ninth century and are nowhere mentioned before that time. The most ancient MSS. of them that we have are from the ninth century, and their method of composition, of which we shall treat later, shows that they were made up of passages and quotations of which we know the sources; and we are thus in a position to prove that the Pseudo-Isidore makes use of documents written long after the times of the popes to whom he attributes them. Thus it happens that popes of the first three centuries are made to quote documents that did not appear until the fourth or fifth century; and later popes up to Gregory I (590-604) are found employing documents dating from the sixth, seventh, and eighth centuries, and the early part of the ninth. Then again there are endless and unrecorded changes. The Church was deceived by this huge forgery, but during the Renaissance men of learning and the canonists generally began to recognize the fraud. Two cardinals, John of Torquemada (1468) and Nicholas of Cusa (1464), declared the earlier documents to be forgeries, especially those by Clement V and Gregory XII. Then suspicion began to grow. Erasmus (d. 1536) and canonists who had joined the Reformation, such as Charles du Moulin (d. 1568), or Catholic canonists like Antoine le Conte (d. 1580), and after them the Centuriators of Magdeburg, in 1539, put the question squarely before the learned world. Nevertheless the official edition of the "Corpus Juris", in 1580, upheld the genuineness of the false decreals, many fragments of which are to be found in the "Decretum" of Gratian. As a partial explanation of this it is enough to recall the case of Antonio Agustin (d. 1580), the greatest canonist of that period. Agustin seriously doubted the genuineness of the documents, but he never formally repudiated them. He felt he had not sufficient proof at hand, so he simply shirked the difficulty. And it is also to be remembered that, owing to the irritating controversies of the time, anything like an impartial and methodical discussion of such a subject was an utter impossibility. In 1628 the Protestant Blondel published his decisive study, "Pseudo-Isidortus et Turrianus vapulantes". Since then the apocryphal nature of the decreals is an established historical fact. The last of the false decreals that had escaped the keen criticism of Blondel

FALSE 773 773 FALSE
were pointed out by two Catholic priests, the brothers Ballerini, in the eighteenth century. The Forgery was done.—Isidore was too clever to invent these documents in toto out of his own head. For the most part he plagiarized them in substance, and often, as he confessed before 852, he made the background he needed for certain data such as the "Liber Pontificalis," a chronicle of the popes from St. Peter onward, which was begun at Rome during the first twenty years of the sixth century. For instance, in the "Liber" it is recorded that such a pope issued such a decree that had been mistaken for a genuine papal bull, or perhaps never existed at all. Isidore seized the opportunity to supply a pontifical letter suitable for the occasion, attributing it to the pope whose name was mentioned in the "Liber." Thus his work had a shadow of historical sanction to back it up. But it was especially in the form of the letters that the forger played the plagiarist. His work is a regular mosaic of phrases stolen from various works written either by clerics or laymen. This network of quotations is computed to number more than 10,000 borrowed phrases, and Isidore succeeded in stringing them together by that logic of his, in which the many forgeries perpetrated either by him or his assistants have an undeniable family resemblance. Without doubt he was one of the most learned men of his day. From Blondel in the seventeenth century to Hinschius in the nineteenth, even up to quite recently, every one who has written of the documents of the Decretals has been forced to use, even if he be an editor, of the false Decretals. They make up quite a library. It is clear that the forger could not have had at hand the entire text from which he drew. He must have had content with extracts, selections, florilegia. But thereon we can only fall back on conjecture.

Isidore who have united the hundred documents he had forged in one single homogeneous collection, which would have been exclusively his work, and then secured its circulation, but, clever man that he was, he chose a different plan. He invented the Breviary and interpolated all his forgeries in an already existing collection. There was a genuine canonical collection which had been drawn up in Spain about 633, and was known as the "Hispana," or Spanish. It contained (cf. Migne, P. L., LXXXIV, 93-348) first of all the texts of the councils from that of Nicaea; secondly the decretals of the popes from Damascus (596-384). Isidore took the volume of manuscripts containing the first sixty of his forged decretals from Clement to Militadias inclusive; these now became the first part of the collection of Isidore. As part II of his collection he retained part I of the Hispana collection, i.e. the genuine collection of councils since Nicaea (520-325). And as part III of his new volume added part II of the old Hispana, i.e. the genuine pontifical letters since Pope Damascus, but he inserted here and there among them the letters he had forged under the names of the various popes between Damascus and Gregory I (590-604). He was not yet, however, so in order to give a more imposing appearance to the work, he inserted other documents not forged by him, but borrowed bodily from other collections of canon laws. Besides all this he interpolated many additions to authentic documents and added several prefaces to complete the fraud. To simplify this description it has been assumed that the forger made use of the undated text of the Hispana. But as a matter of fact he used a French edition, and a very incorrect one at that, of the Hispana, and which was known on that account as the "Hispana Gallica," or French Hispana, which had never been edited, and which is to be found in the MS. 411 of the Latin Decretals in the library of Vienna. Furthermore, the forger tampered with the text of this French Hispana, so that his copy becomes, so to speak, a third edition or revision of the old Hispana. This is known as the "Hispana Gallica Augustodunensis," or "of Autun," so called because the Latin Ms., 1341, of the Vatican, which contains it, came from Autun. This collection likewise has remained unedited.

The Isidorian collection was published between 847 and 852. On the one hand it must have been published after 852, because the decretal of Stephen I (p. 183) among the statutes of a council (Migne, P. L., CXCV, 775), and on the other hand it cannot have been published before 847, because it makes use of the false capitularies of Benedict Levitas, which were not concluded until after 21 April, 847. As to the place where the Decretals were forged, critics are all agreed that it was somewhere in France. The documents used by the forger, and especially those relating more nearly to his own epoch, are nearly all of French origin. And, as we have already pointed out, the frame chosen for the forgeries was the French edition of the Hispana. He also makes use of the "Dionysio-Hadriana" collection, which was the code of the Frankish Church, and of the Quo Vadis collection, which had a French origin. Moreover, he refers to the Councils of Meaux and of Aachen of 836, and to that of Paris of 829, etc. On legal matters he quotes Quo Vadis. When he refers to foreign affairs it is those of France he illustrates by. Lastly, it was in France that his work was first quoted, and therein it had its greatest vogue. But while critics are all agreed that the forgery was done in France, they differ very widely as to the facts of the text. Some incline towards the province of Marseilles, others to the province of Tours; others incline towards the province of Reims. We shall have occasion to refer to these differences later on; for the present we may be satisfied that the false Decretals were forged in the North of France between 847 and 852.

Now, what was the nature of the condition of the Church in France at that time? It was but a few years after the Treaty of Verdun (843), which had put a definitive close to the Carolingian empire by founding three distinct kingdoms. Christendom was a prey to the onslaught of Normans and Saracens; on the other hand the era of civil strife was over. In ecclesiastical circles Church reform was still spoken of, but hardly hoped for. It was especially after the death of Charlemagne (814) that reform began to be considered, but the abuses to be corrected dated from long before Charlemagne's time, and went back to the very beginnings of the Frankish church under the Merovingians. The personal government of the king or emperor had many serious drawbacks on religious grounds. In the mind of the bishops reform and ecclesiastical liberty were identical, and this liberty they required for their persons as well as for the Church. Doubtless Charlemagne's government had been advantageous to the Church, but it was none the less an oppressive protection and dearly bought. The Church was frankly subject to the State. Initiatives which ought to have been the proper function of the spiritual power were usurped by Charlemagne. He summoned synods and confirmed their decisions. He disposed largely of all church benefices. And in matters of importance ecclesiastical tribunals were presided over by him. While the great emperor lived these inconveniences had their compensating advantages and were tolerated. The Church had a mighty supporter at her back. But as soon as he died the Carolingian dynasty began to show signs of ever-increasing debility, and the Church, bound up with, and subordinate to, the political power, was dragged into the ensuing civil strife and disunion. Church property excited the rapacity of the various factions, and many of them were eager to use it as sources of income, and when defeat came the bishops on the vanquished side were exposed to the vengeance of their adversaries. There were charges brought against them, and sentences passed on them, and not canon law, but political exigencies, ruled in the synods. It was the triumph of
the lay element in the Church. Success, even when it came, had its drawbacks. In order to devote themselves to political questions the bishops had to neglect their spiritual duties. They were to be seen more on the forum than on visitations. As supplies in their dioceses they had to call in auxiliaries known as choroepiscopi.

What wonder, then, that these abuses gave rise to complaints? Especially after 829 the bishops were clamouring for ecclesiastical liberty, for legal guarantees, for immunity of church property, for regularity of church administration, for the destruction of the number of choroepiscopi and of their privileges. But all in vain; the Carolingian nobles, whose profited by these abuses, were opposed to reform.

Powerless to better itself, could the Frankish Church count on Rome? At this very time the situation of the papacy was by no means inspiring; the Church at Rome was largely subject to the lay power in the hands of the imperial miss. Sergius II (844-857) has not escaped the reproach of Simony. Leo IV (847-855) had to defend his person just like any simple Frankish bishop. In the face of such a wretched situation the juridical prescriptions of Isidore are ideal.

Can Law According to the FALSE DECRETALS.

We are not here concerned with the whole collection, but only with the laws contained in the forged documents.

At the outset, let it be noted that Isidore’s prescriptions have to do with a very limited number of cases and recur over and over again under slightly varying forms. Yet the forger’s legal system is far from having any perfect cohesion. Inconsistencies and even contradictions, are to be met within it. In the following synopsis, which is necessarily short, no notice is taken of these legal stumbldings of Isidore; we are content to simply sum up the teachings of the false documents under their principal headings.

In matters concerning the relations of the political and ecclesiastical powers, Isidore sets forth the ordinary ideas of his time as to the supremacy of the spiritual over the temporal authority. Of his own authority alone, the ruler cannot assemble a regular synod; he must have pontifical authorization to do so (p. 228).

That is a new requirement. A bishop may be neither accused nor condemned before a secular tribunal (pp. 98, 485). The Theodosian Code, from which the forger borrows in this matter, granted the praetorium fori only for minor faults. In such matters the Frankish law was not less lenient and was open to various interpretations. What is novel in Isidore is the general character of the law withdrawing bishops from the secular courts. Then again he recognizes in bishops a certain jurisdiction in secular matters. Roman law had already recognized this.

He goes on to deal with the immunity of church property, which cannot be divested from its original purpose without sacrilege. The evangelization of Christendom is a complex story which modern criticism has retold for us, by showing the slow onward march of the Faith. But Isidore’s ideas thereon were those of his time, and therefore for the most part legendary.

According to him, the organization of parishes was laid down by Clement of Rome, as early as the close of the first century, and was to be modeled on the ecclesiastical divisions of Rome and of the catacombs. This means that the number of choroepiscopi and that metropolitan divisions also existed in primitive times. The Apostles were thought to have accepted the territorial divisions of the Roman Empire, which had been handed down since then as ecclesiastical provinces. There is not much historical foundation for this. It stands to reason that in Isidore we must clearly distinguish between this fantastic view of history and his explanation of an hierarchical organization. On all essential points the forger reproduces the current ideas of his time. But he deserves attention when he speaks of choroepiscopi, or those auxiliary bishops we have already referred to.

According to him they are usurpers; so far as power of order goes, they have priestly orders and nothing more. Every episcopal function exercised by them is null; all their sacramental acts ought to be reiterated. As a matter of fact, Isidore was wrong; choroepiscopi had full power of order and might validly administer confirmation and ordination. Isidore forged theology as well as letters. He strongly affirms the authority of the bishops. That is his great concern. With him nothing else counts (pp. 77, 117, 145, 243).

The bishop is monarch in his own diocese, but he does not stand alone; bonds unite him to his neighbours, and thus we have the metropolitan idea. The capital of each ecclesiastical province has a judicial function or title to be a centre of assembly for the bishops; this right is derived from the primitive division made by the popes. The province is to be governed by the provincial council, presided over by the metropolitan.

The prerogatives of this dignitary Isidore reproduces the prescriptions of the ancient law prior to the eighth century. After the middle of the eighth century the metropolitans had increased their prerogatives, and Isidore tries to ignore this de facto situation; for him nothing counts but canonical texts; the metropolitans are inferior popes, and he can do nothing without the consent of his colleagues. The forger goes on to mention higher jurisdictions, those of primates and of patriarchs. But on these matters he shows but a slight knowledge of church government in Africa and in the East, and we have one of the most glaring examples of this.

The Authority of the Pope.—In the many texts where the pope is in question Isidore is true to his task of plagiarizing. Very often he copies passages borrowed from ancient sources. This fact alone helps in a great measure to explain his insistence on the rights of the papacy. In many cases Isidore is the mouthpiece repeating the sayings of the earlier popes, and we know how clear and uncompromising those early popes were on the question of their prerogatives. For example, call to mind the popes between Innocent I (401-417) and Hormisdas (514-523) and the series of their declarations. All that was well known in the ninth century, at least in theory. And it was all embodied by Isidore. But on the relations between pope and bishops he shows a certain inconsistency. Following the traditional teaching, he declares that the Apostolate and the episcopate were directly instituted by Jesus Christ. Yet at times he seems to be on the point of denying the potestas ordinaria of the bishops. He makes Pope Vigilius (p. 712) say: "Ipsa namque ecclesia que prima est in eis reliquis ecclesiis vices suas credidit largius ut in partem simplicis sollicitudinis non in plebisdum potestatem."

Taking this passage strictly and by itself, it would seem to deny the potestas ordinaria of the bishops. But nevertheless the sentence is not an intentional forgery; it is merely another case where Isidore is a plagiarist. He had got hold of a famous text by St. Leo (Migne, P. L., LIV, 671), addressed to the Bishop of Thessalonica. From the end of the fourth century this bishop had been named by the popes as their representative in the province of Illyricum. Hence the Bishop of Thessalonica exercised by delegation certain rights both in the popes in these countries by reason of their title of Patriarch of the West. About 446, St. Leo had to find fault with the Bishop of Thessalonica, not in his character of bishop, but as legate, or vicar, of the Holy See. And on that point he says in his treatise De potestate that he had received merely a partial delegation, not a plenitude of power. It is clear, then, that the text in question referred to a peculiar relation between the pope and a special bishop. Addressed to the vicar of Illyricum, St. Leo’s words are quite accurate; but, applied to all bishops, they cease to be so, and might easily create much confusion. Isidore further de-
mands that provincial councils be held at regular intervals. He asserts for the pope the right to authorize the calling of all councils and to approve their decisions. Laid down in this general and imperative manner, these claims were something new. Nothing like it had ever been written before. The laying down of the rules of provincial councils; as for approving the decrees of councils, it was a common occurrence in antiquity. When matters of serious importance were in question the pope claimed the right of approval, but there was no formal or general precept asserting such right. And, in any case Isidore's legislation thereon never became the practice.

Ecclesiastical Trials.—The procedure to be followed in the trial of ecclesiastics is of special interest to Isidore. According to him, the judging of clerics of all ranks up to and including the priesthood belongs as a last resource to the provincial councils and the priates. He says nothing about priests appealing to Rome, and in this he agrees with the fourteenth canon of the Council of Sardica. Apropos of the trials of bishops he shows some inconsistency in his legislation. On the one hand, he upholds the law as it existed in his time, and on the other, he draws down a new law. Hence we find two series of texts which it is not easy to reconcile. The first series agrees with the existing law. A provincial council is the ordinary judge of bishops. The pope intervenes only on appeal made to him by one of the interested parties. However, in the case where the competence of the judge is seriously doubtful, the bishop need not wait for the council to pass sentence, but may take his case straight to Rome. Stated in this general way, the latter provision is new. But as it is based on the idea of plain justice, it is not altogether foreign to the ancient ecclesiastical law. It is mentioned in Roman law, from which Isidore borrowed it. How may the pope set about hearing an appeal? The ancient law did not exclude, but did not make provision for, sentence being passed at Rome itself. It recognized the pope's right to appoint a court of appeal composed of bishops from the neighbourhood of the accused; furthermore, he had the right to be represented there by a legate, who would naturally have a preponderating rôle at the trial. Such were the rulings of the Council of Sardica. But as a matter of fact, from the fifth century we have cases where the pope summoned episcopal appeal courts to Rome itself. So it is not a great surprise that Isidore should leave the pope free to decide where the final trial should take place. But, as we pointed out, side by side with this first series of decisions along the lines of the ancient law, we find another series which lays down a new law. Therein it is said that in the trial of bishops, the function of the provincial council is limited to hearing both sides of the case and referring it to the pope for judgment. Sentence can only be passed with his approbation. This is a new legislation. But once more Isidore is not really inventing; he is merely giving clear and direct expression to the tendencies of his day. In face of the dangers created for the bishops by political disturbances, by the fear of being condemned for party feeling or through motives of revenge, the bishops themselves were eager that charges against them should not be decided without the approval of the pope.

One of the most characteristic peculiarities of the false decreals is the procedure laid down for the trial of bishops. Isidore declares over and over that it was the will of the Apostles that there be as few charges as possible made against bishops, and that, when there are several, a single trial should be held for the finding of proof possible. This is a point worth remembering. The accusation of bishops will be a difficult thing, their defence an easy matter. Isidore's legislation on this head, when systematized, so efficaciously hindered any judicial action against a bishop that the reader is almost inclined to treat it as a joke. However, we must be just; it was not all an invention on Isidore's part. His procedure in the main reproduces the requirements of Roman law; it draws on the decisions of the Roman apocrisapha of the time of Symmachus and Synesius of Cyzicus, and on the laws of the Barbarian kingdoms. In a case of this kind, anything like a careful and thorough criticism requires that great attention be paid to the question of the sources employed. Isidore piles up obstacles against the accusation of bishops, but the obstacles are not all of Isidore's own devising. Any bishop dispossessed of his see by violence, and who is summoned to the courts, has a right to raise the plea of actio spoli, i.e. to fall back on the fact of disposition in order to avoid trial, until he has been provisionally restored to his possessions and dignities. This appeal before trial is one of the main points in the Isidorian procedure. The only one who is competent to bring a charge against a bishop is the council of his province. Foreign tribunals are excluded, and the provincial council must have a full quorum. The charge must be made in the presence of accused and accusers. If one of the interested parties is absent, the whole judicial machinery comes to a standstill.

The following are the rules governing accusations. A layman can bring no charge against a bishop. This rule, which occurs also in the Roman apocrisapha of the time of Symmachus, may be explained by the different judicature and laymen at that time. Clerics were judged according to Roman law, whereas many laymen were subject to Germanic law, and the procedure under these two laws was different and even hostile. Moreover, at times laymen would not recognize clerics as having the rights to accuse them. In the courts thus the clerics may well declare laymen incompetent in their courts. Then, too, it must not be lost sight of that Isidore's principle was never observed in practice; a modus agendi was always found. Isidore's second principle was that a cleric could never bring a charge against his superior. It is evident that thus the number of possible accusers became very restricted. The accusation must be made not in writing, but by word of mouth. Only those might bring charges who fulfilled exceptional conditions in respect to rank and standing. In this way it was easy to get rid of a troublesome accuser. The normal merit with which it took seventy-two witnesses to condemn a bishop. This again is not an invention of Isidore's. It was an old custom that a bishop might only be condemned by a council of seventy or seventy-two bishops. The numbers are an allusion either to the seventy elders of the Jewish people or to the Seventy-Two Disciples. But Isidore managed to complicate the situation by applying the number to the witnesses; though even if it were applied to the judges, the difficulty would not be lessened in practice. It was no easy matter to get together so numerous a tribunal. In the sixth century Photius declared that in his time the two hundred and seventy numbers were not necessary; in any case Isidore's legislation was never enforced. The hearing of the charge follows Roman law, and minute regulations were drawn up to secure all the necessary scope and impartiality to the arguments for and against. Any admission of guilt had to be absolutely spontaneous, and no signature obtained by force was valid.

In his preface Isidore declares the purpose of his work. His aim is to build up a collection of canons more complete than any other by uniting together all the canons dispersed among the various existing collections. What makes his work so difficult? What is the purpose? Isidore's collection is on a character all its own by the fact that it includes a hundred documents forged in Isidore's workshop. He might easily have made that more complete collection, without having recourse to forging documents for it.
And, as a matter of fact, is his collection more complete than any other? Even a summary examination soon shows that there are many lacunae in this collection of canon law. It omits all mention of many important matters, governing of rural parishes, ecclesiastical tithes, simplicity, the monastic life, questions concerning the matrimonial laws, privileges and dispensations, and the pallium. The governing of parishes and the question of benefices were of vital interest when Isidore lived. Though not quite so acute as during the tenth and eleventh centuries, these policies of law became occasional between the Church and the feudal society in progress of formation. They were already preoccupying men's minds, and as Isidore does not refer to them he can hardly claim to have wished to supply a complete ecclesiastical code. So we are driven to conclude that he had a very special object in view in composing his partial code. How are we to discover what this object was? Evidently by examining the documents he forged. There, if at all, are to be found his dominant ideas. And such an examination is by no means difficult after what we have just said concerning the legal side of the false decreals. Isidore's object is so clearly defined that it cannot be very falsely analyzed. His chief aim is to assure the dignity and fruitfulness of the episcopal office. In his view the diocese is the life-giving centre of the whole ecclesiastical organism, and the vitality of this centre is his chief concern. All his legislation has the same object. But perhaps it may be said that, while he was at pains to safeguard the authority of the bishops, he is even more careful to increase that of the pope. This was a view long in favour among both Gallicans and Protestants, but it is no longer the fashion. In our day existing laws are, on the whole, accepted as those of the pope. He touches on the prerogatives of the pope, it is never in the interests of Rome, but always in those of the bishops. It was for this that he tried to facilitate appeals to Rome. But in his idea the rôle to be played by the pope would not restrict the rights of the bishops. It has been observed that Isidore does not mention the temporal power of the popes, and that he never thinks of turning to profit Constantine's pretended donation to the Church of Rome, nor does he seem to aim at increasing the French protectorate at Rome. But, if his object was to assure the Holy See, how differently would he have gone to work. Now, if we compare these aims of Isidore with the actual situation of the Frankish Church when the forger was at work, between the years 847 and 882, it will be evident that false decreals are directly opposed to the chief abuses of which the bishops were the victims at that time: condemnations of a political character, neglect of the episcopal office, and the establishment of chorepiscopi. This explains the lacunae in Isidore's ecclesiastical code. He was fighting against urgent and glaring abuses. A contemporary is always in a disadvantage forming a clear opinion of his age, of those deep causes of which the slow but measured action must inevitably transform society. And hence it was that Isidore confined himself to things that were more or less on the surface in the everyday life around him. The forger, save in the case of the Church, he certainly made no attempt to provide against them.

It remains true, however, that Isidore was a forger. But there are forgers and forgers. Let us not forget that the false decreals are from the same work as those that forged the capitulaires of Angilramus (Angilram, A.D. 910) and the false capitulaires of Benedictus Leviata. When the capitulaires had been forged it was but a natural step to the forging of pontifical letters. For this new work Isidore owed much to the "Liber Pontificalis", or chronicle of the popes. Thus when the Liber tells us that such a pope issued such a decree long since lost, the forger noted the fact and set to work to invent a decree for his collection along the lines hinted at by the "Liber". This is a method well known in diplomatic work, and one that has left us the acta rescripta, of which we have many specimens in theolingua charters. These acta rescripta are documents which, at a date long subsequent to their issue, and because the originals or ancient copies of them had been damaged or lost, were drawn up by the aid of the remnants of the originals, or from extracts therefrom, or analyses of them, or at times from mere tradition concerning their contents (cf. Giry, "Manuel de diplomatie", Paris, 1894, pp. 12, 867, etc.). To this opinion many of the false decreals were merely such acta rescripta. It was not a very honest proceeding, and Isidore was far from being scrupulous. With a faint modification it might be said of him as of another forger in the seventeenth century, the crafty Father Jérôme Vignier, "He was the greatest liar in Paris." But men of the ninth century must not be judged according to modern ideas of literary morality. Neither can the false decreals be looked at as a purely literary work. They are a landmark in the evolution of law. In every society law develops or evolves itself like other things under conditions, and step by step with the social life it regulates, and which it must keep pace with in order to regulate. The state of society, the ensemble of its customs, change more or less according to time and place, and are never stationary. And slight changes, when multiplied to any degree, and by causing a change between the former legislation and the newly born needs of a changed society. The written laws no longer meet the requirements of the social state they ought to regulate, and a readjustment of legal provisions becomes necessary. History shows us that this may take place in many ways, according to the nature of the desired change and the surroundings in which it takes place. It may be effected by the gradual substitution of new laws for those that have grown antiquated or, less courageously, by what is known as a creative interpretation of existing laws, of which we have many examples in Roman law; and again, in desperate cases, the change may be brought about by forgeries, when no other means seems practicable. Now, in the middle of the ninth century, the rules of canonical legislation did not seem to be the best possible, and they had to be improved. The reform councils of the ninth century had tried to bring about the new laws demanded by the situation, but the lay power had blocked the way. And thus the evolution of law, finding an obstacle to its growth on one side, was constrained to seek freedom and further to advance in normal fashion, a canonist whose intentions were more commendable than his acts bethought him of calling in the aid of the forger. It is impossible to condone such forgeries, but the history of the case puts us in a better position to judge them, and even to discover extenuating circumstances in their favour, by emphasizing the powerful forces at work in the society of the period, and which were acting with what one may call historical fatalism. Moreover, the false decreals are the work of private enterprise and have no official character. The theory that they were confined in Italy has been long since abandoned. They are of purely Gallican origin, and if they deceived the Church, the Church accepted them in good faith and without any complicity.

The Spread.—We saw above, in the case of Hincmar, that Isidore's forgeries were known among the Franks as early as 852. In Germany we hear of them a little later. We find traces of them in the Acts of the councils of Germany dating from that of Worms in 898, but in Spain we find no reference to them, and they seem to have been hardly known there. They found their way into England towards the close of the eleventh century, probably through Lanfranc, Arch-
bishop of Canterbury. Their reception in Italy is of greater importance. It occurred probably during the pontificate of Nicholas I (858-867). It seems certain that he knew of the decreals, and it is possible that he may have even possessed a copy of them, and showed copies of them to his successors. If we are to believe the statement of the time, the decreals were used by him in his correspondence, but this is not certain. The authenticity of the decreals is more difficult to establish, and there is no certain evidence of their existence.
Council of Soissons in 863, he wishes to assert his right to intervene in the trials of bishops, even when there was no question of an appeal to Rome. This amounted to an assertion of the absolute power of the Holy See, a claim he might have supported by many solid arguments, which is our object to find him doing in support thereof the canons of the Council of Sardica, which say nothing of the sort. The Council of Sardica (343) intended very particularly to safeguard the legal rights of bishops who were being persecuted; that was its main object, and it by no means intended to define the rights of Rome in matters of the kind. These canons mark one of the early steps in the question of church discipline.

The claim of Nicholas I ought to have been supported by texts from the fifth and sixth centuries; and in the case in question his object was much more creditable than the reasons he gave in support of it. On the whole, then, from the beginning of his pontificate, and before he knew of the Isidorian texts, Nicholas I was in full sympathy with the ideas expressed therein. Acquaintance with those texts did not seriously affect him. Yet, in his letter to the Frankish bishops, dated 26th May, 865, apropos of the canons, he puts the argument on appeals much after the manner in which Isidore had put it; so much so, that one writer speaks of the par juris isidori that letter exhales (Fournier). If the letters of the early popes (i.e. the decretals of Isidore) are not explicitly quoted, they are at least alluded to, and from all that has been said we feel free to conclude that Nicholas I took none of his essential ideas from Isidore, and that any influence he did exercise on that pope was too insignificant to be taken into account in a pontificate so filled with enterprises of daring and of moment. And this conclusion in Nicholas's case gives us more or less the answer to the further question as to how far the apocrypha influence the subsequent history of the Church. As we have seen, even without Isidore, Nicholas I would have brought about the same mode of government. And it has been well said that the principles of Nicholas I were those of Gregory VII and of the great popes of the Middle Ages; that is to say, Isidore or no Isidore, Gregory VII and Innocent III would not have acted otherwise than they did. As a matter of history, such a conclusion is quite justifiable, and as far as apologetics is its question is quite sufficient answer. In the domain of theology and canon law, Isidore's forgeries never had any serious consequences.

Having said this, we are free to confess frankly that in lesser spheres than those of theology and law, the false decreals have not always exercised a fortunate influence. On history, for instance, their influence was beneficent. No doubt they do not bear all the blame for the distorted and legendary view the Middle Ages had of ecclesiastical antiquity. During the Middle Ages it was almost an impossibility to consult all the sources of information, and it was difficult to check and control those at hand. It was not easy to distinguish genuine documents from apocryphal ones. And this difficulty, which was the great stumbling-block of medieval culture, would have been always an obstacle to the progress of historical study. It must be admitted that Isidore's forgeries increased the difficulty till it became almost insurmountable. The forgeries blurred the whole historical perspective. Customs and methods proper to the ninth century stood out in relief side by side with the discipline of the first centuries of the Church. And, as a consequence, the Middle Ages knew very little concerning the historical growth of the rights of the papacy during those centuries. Isidore's view of antiquity was a very simple one, and perhaps it was just as well for the systematizing of theology. In the main, it was no easy matter to develop a historical sense during the Middle Ages. The absence of such a sense is all the more remarkable when we consider what civilization owes the Middle Ages in the realms of philosophy, theology, and architecture.

PLACE OF ORIGIN.—We have purposely reserved this question for the end. In the first place, it is of lesser importance than the others; and in the second, of the decreals are for the most part in agreement concerning the questions we have been treating, they are divided into two parties on this final question. For a time the decreals were thought to have been forged at Mainz, but that theory has been altogether abandoned, and now the disputed honour lies between Reims and Le Mans in the province of Tours. Here are the arguments put forth by each of the authorities of German critics and a section of those in France favour Reims as the place where the decreals originated. According to them, Isidore's legislation concerning the trial of bishops was intended to support the cause of Eibbon, Archbishop of Reims, and to facilitate the retrial of that dignitary. Eibbon had been deposed in 832 for political reasons. He was re-instated at Reims in 840; he had to leave his see in 845 and ended his career in 851 as Bishop of Hildesheim. According to the critics, a comparison between the case and Isidore's procedure at trials shows such agreement that it must have been intentional; thus, for instance, the provisional restoration of the accused and dispossessed bishop, the arrest of the bishop, the possibility of a translation from one see to another (from Reims to Hildesheim). Besides this, it was in the province of Reims that forgeries first appeared, and from there they were carried to Rome by Rothade of Soissons; then, too, it was in this diocese that, ever since Eibbon's time, the struggle against chorepiscopos was most intense. Isidore's opposition to archiepiscopal authority is also very marked; and, in the province of Reims was the birthplace of that opposition during the years that intervened between Eibbon's deposition (838-841) and Hincmar's nomination (845); hence the conclusion that the forgeries were committed between 847 and 852 by partisans of Eibbon, and probably by clerics ordained by him in 841, and against whose ordination Hincmar, Eibbon's successor, raised objections soon after his election. This cumulative mass of argument is impressive; but to be really conclusive it would be necessary to prove that Isidore's legislation was involved by these clerics against their archbishop; or, that he was deposed in 851 or at least before 853, when the Council of Soissons was held, in which the ordinaries held by Eibbon at Reims in 841 after his restoration were declared invalid. No such proof is forthcoming. The documents in favour of Eibbon in which is discovered a similarity to the texts of the decreals are later than 853. At that time Isidore's work had begun to spread. That it was known and used at Reims after 853 is not at all surprising and is no proof of its having been composed in the Province of Reims. Furthermore, if these apocrypha had been composed in favour of Eibbon and of the clerics he ordained, then the question of the validity of ordinances performed by a deposed bishop ought to have been treated of. Yet not a word is said concerning it; though, on the other hand, Isidore submits all questions concerning clerics up to and including priests to the metropolitan and to the priates. No mention is made of an appeal by priests to Rome, an omission that is inexplicable if the documents were written in favour of the clerics ordained by Eibbon, and who are supposed to have been the actual writers. Add to this that the text of the forgery was committed, was for the clerics of Reims, Eibbon's partisans, a period pending appeal and a time of entente with Hincmar. For the moment, they had no reason to need such a weapon against the archbishop. Lastly, P. Fournier points out that the theory which makes Reims the scene of the forgery in opposition to Hincmar is at variance with what we know of Hincmar's attitude.
If Hincmar had the faintest suspicion that the decretales were aimed at him, he would have treated them differently. Though he had a suspicion that one or other document had been forged in part, he offered no objection to the collection as a whole. But it is certain that he made no moves to discard the code or use it as a weapon against him. On the whole, then, this theory is an attractive one; but while no solid proof can be brought in its favour, many solid arguments can be brought against it.

There is another set of critics who fix the province of Toulouse and the north-eastern part of Le Mans as the scene of the forgery. The principal among these critics are Langen, Döllinger, M. S. Simon, Violet, J. Havet, F. P. Fournier, and J. Duchesne. According to them, the forged legislation on the trial of bishops and the organization of dioceses and ecclesiastical provinces aim at a state of things existing in Brittany after 845, when Noménoë, Duke of Brittany, gained a victory over Charles the Bald. At that time Brittany was eager for independence, in the ecclesiastical as well as in the civil order. The bishops in Brittany were subject to the metropolitan of Tours, and theCONNEXOBSERVATION OF THE PREPARATION OF THE DECRETALES AS A PLEDGE OF POLITICAL SUBORDINATION.

On the other hand, the Duke of Brittany was anxious to get rid of four bishops whom he suspected of favouring the Franks. He gave them a quick trial and expelled them from his domains. The affair was carried to Rome about 847. Leo II wrote to the Duke of Brittany reminding him of the claims of canon law. The whole thing caused much commotion among the Franks and at Rome. As it was a matter of public knowledge, and more or less contemporaneous with the appearance of the decretales, nearly all the critics are agreed that Hincmar had this affair in his mind when he wrote, and that many of his laws presupposed such some state of affairs as existed in the province of Tours and the Church of Brittany. These are only appearances, however, and we want precise proofs, something more definite. Now the critics in question think they recognize a family likeness between two documents which were certainly written at Le Mans and the decretales of Isidore. The first of these is the apocryphal Bull of Pope Gregory IV (827–844) in favour of Alfric, Bishop of Le Mans. In this letter (Migne, P. L., CXV, 831) the pope recognizes the authority of the Bishop of Le Mans in Rome whenever a charge is brought against him. The letter is supposed to have been written on 8 July, 833. It is quite after Isidore’s own heart; and its style is wonderfully similar to that of the forger. The forged Bull of Gregory IV is a mosaic of authentic texts, and very often they are texts which Isidore used over and over again.

The critics are all agreed that this forged Bull and the decretales are independent documents; that is, that neither makes use of the other. But the critics we are now considering maintain that both come from the same workshop; that they form a family by methods of composition. They further point out the closeness of their dates. The forged Bull was certainly drawn up at Le Mans, they say, about 850, when Le Mans was in the hands of the Duke of Brittany. The bishop, who favoured the Franks, was in a sorry plight; and to protect him the Bull of Gregory IV was forged. We are certainly very near now to the date of the decretales, and the family likeness between the documents would be explained by the identity of their origin. The same critics argue in the same way in the case of a memoir or story of a dispute that took place in 838 between Alfric, Bishop of Le Mans and the Abbey of St. Calais (Migne, P. L., CXV, 81–2). During the course of the trial the authority of the canons is quoted after the manner of Isidore, i.e. in mosaic fashion made up of those fragmentary passages Isidore was so fond of using. And this docu-

ment belongs to the years between 842 and 846. We are still at Le Mans and about the period when the decretales appeared. Moreover, it is a fact that there were chiroepiscopi at Le Mans at this time. Now, what are we to think of these arguments? They are quite without value unless we discard the theory of a code intended as a weapon against him. On the whole, then, this theory is an attractive one; but while no solid proof can be brought in its favour, many solid arguments can be brought against it.

Thus, we have no proof that the forged Bull of Gregory IV was written during the lifetime of Aldric. The present writer is of the opinion that it was after his time and as a support to Robert of Le Mans, successor to Aldric, in his quarrel with the monks of the monastery. As the question as to the date of the Bull is merely a secondary one. The most important argument is the existence at Le Mans, about the very time when the decretales were forged, not of a document, but of two documents concocted in the very style of the forger Isidore. And there seems reason to believe that Le Mans has most claim to being the scene of the forgery of the decretales. In the interests of fairness we must, however, say one thing. As we have seen, the knowledge of the decretales shown by Pope Nicholas I dates from the visit to Rome of his representative in 864. It is a matter, for us, of some surprise, that the forgery was carried on without the knowledge of Nicholas I. But there is no reason for supposing that the Pope was not fully acquainted with the forgery.

MANUSCRIPTS AND EDITIONS.—The MSS. of the false decretales belong to many classes, but we shall speak of them only three of these MSS. which serve to show the way they spread. The first class comprises twenty-five MSS. All of them are incomplete, yet we are able to restore the full text from them, i.e. the text of the canonical collection described above, and restored in the edition of Hinschius. A second class of MSS. contains only a part of Isidore’s work. This class comprises eighteen MSS., which give Part I of the collection, i.e. the apocryphal decretales up to Melchiades, but omit Part II, and give only a portion of Part III. These MSS. cease at page 508 of the edition of Hinschius. Everything leads to the belief that these MSS. of this second class are taken from manuscripts of the first. A third class of MSS. is represented only by number 1311 of the Latin MSS. in the Vatican Library. This MS. contains the “Collectio Hispana Gallica Augustodunensis”, of which we have already spoken. This collection may be looked on as a first edition, a trial edition of the false decretales. It does not contain Part I, i.e. the apocryphal decretales from Clement to Melchiades, but only those parts which correspond to the genuine Hispana, namely the councils and the decretales of the popes from Damascus. In this latter part the forger has interpolated some of his apocrypha which later were inserted in the completed edition of the false decretales. The principal of these apocrypha are to be found on pages 501–508 and 509–515 of the edition of Hinschius. It should be remembered that the Hinschius edition is a critical edition; i.e. one edited after a thorough study of the manuscripts of the forged texts. The text of the genuine documents has not been subjected to any criticism, the editor contenting himself with reproducing it just as he found it in already extant collections, that is to say, existing previous to Isidore’s treatment of them.

LOUIS SALTET.
Falsity (Lat. Falsitas), a perversion of truth originating in the deceitfulness of one party, and culminating in the damage of another party. Counterfeiting money, or attempting to coin genuine legal tender without due authorization; tampering with wills, codicils, or such-like legal instruments; poisoning the correspondences of others to their prejudice; using false weights and measures; adulterating merchandise, so as to render saleable what purchasers would otherwise never buy, or so as to derive larger profits from goods otherwise marketable only at lower figures; bribing judges or public officers; suborning perjuries; advancing false testimony; manufacturing spurious seals; forging signatures; padding accounts; interpolating the texts of legal enactments; and sharing in the pretended birth of supposititious offspring are among the chief forms which this crime assumes. The punishment determined by the laws of former times for those convicted of it could scarcely savour of greater severity, awaken a deeper horror of the crime itself. In the first place, the Roman law inflicted the death penalty on such evil-doers as were found guilty of falsifying imperial rescripts. Traces of this kind of legislation are to be found in the ‘Bull of Pius IX, Apostolicae Sedis’, wherein the Holy See promulgates the sentence of excommunication specially reserved to the sovereign pontiff against all who dare to forge or interpolate Bulls, Briefs, and Rescripts of all kinds formulated in the name of the Holy Father, and signed of the pope personally, by his vice-chancellor personally, or by his vice-chancellor’s proxy, or by some other individual specially commissioned thereunto by the sovereign pontiff himself.

Moreover, whosoever are guilty of publishing surreptitious or supposititious papal Bulls, Briefs, or Rescripts, of the kind already specified, render themselves amenable to the same ecclesiastical penalty. This sentence of excommunication takes effect as soon as the work of falsification becomes an accomplished fact, even though the false letters never pass into actual use. At the same time it must be noted, in passing, that as often as there is question of forgery of Apostolic Letters, the censure is not incurred prior to the actual publication of such letters. Those who are guilty, not of falsifying Apostolic Letters, but of deliberately using such as are already forged or interpolated in the course of their traffic, incur the censure of excommunication reserved to the ordinary of the diocese. According to D'Annibale (Commentary on the Constitution “Apostolicae Sedis”, n. 81) those who retain forged or interpolated Apostolic Letters in their possession, those who order the production of such letters, their advisers, abettors or co-operators, are not liable to the sentence of excommunication.

In cases other than those here outlined, the enormity of the crime was emphasized by the civil law in confiscating the property of culprits and condemning them to perpetual exile. Though time has by no means lessened the intrinsic heinousness of the crime itself, it has witnessed considerable mitigation in the penalty thereunto attached; the discretion of the judge hearing the case is now the chief factor in determining the nature and the extent of punishment. While vicissitudes of time and place may suggest the expediency of modifications in the exiguities of the preceptive law, there still remains an obligation which conscience always imposes on those guilty of this crime, an obligation founded in justice, and therefore quite independent of changes occurring in time or place. For this reason it is right to claim that as soon as the accomplice ceases to exist; suborning perjuries against another party, the perpetrator of such damage is strictly bound in conscience to make good all such losses caused, or occasioned, by his fraud or deceit. This teaching meets with the unstinted approbation of moralists, notwithstanding the plausibility of a theory purporting to incapacitate those who advance false testimony, but lifting from their shoulders the burden of repairing damages due to such false evidence. (See Forgery.)

Faltonia Proba. See Proba Faltonia.

Famagusta, a titular see in the Island of Cyprus. The name appears to be derived from the Greek Ἀβδομικώρ (a sandy point) rather than from Fama Augusta, the traditional etymology. The history of the city cannot be traced beyond the eighth century of our era. It is not certain, Lequien to the contrary notwithstanding (II, 1605), that it occupies the site of Arsinoe. Famagusta prospered through the destruction of the neighbouring Salamis, the former capital of the island. By the twelfth century its importance was such that Guy de Lusignan chose to be crowned there (1191) King of Jerusalem and Cyprus. The French princes fortified the town, and in the thirteenth century built the beautiful Cathedral of St. Nicholas, transformed since then into a mosque. Famagusta was the seat of a Latin diocese from the sixteenth century and had residential bishops till the end of the sixteenth century. The list is given by Lequien, III, 1219-24; Ducange, “Les familles d’outre-me”, 861-864; Eubel, I, 253-54, II, 108; Hackett, “History of the Orthodox Church of Cyprus”, London, 1901, 577-87.

The prosperity of Famagusta was not affected by the fall of Acre. In 1342, a German writer described it as one of the richest and most beautiful cities of the world, its wealth surpassing that of Constantinople and Venice. (See Mas-Latrie, L’lle de Chypre, Paris, 1919, 234-40.) St. Bridget of Sweden, in her revelations, compares it to Sodom and Gomorrah. Captured by the Genoese in 1374, it fell, in 1389, into the hands of the Venetians, who retained it till 1571. Finally, after a siege of ten months, which cost the enemy 50,000 men, the city surrendered to the Turks, who, despite their treaty, massacred the citizens, burned alive the brave governor, Bragadino, and completely sacked the city. Famagusta, which formerly numbered 70,000 inhabitants, was reduced to a mere village. It is known to-day as Mankosta (1000 inhabitants) and is the chief town of one of the six departments of the island. Its harbour is choked with sand; its palaces, dwellings, highways, ramparts, and churches are all in ruins.

Fame. See Reputation.

Familiars, strictly speaking, seculars subject to a master’s authority and maintained at his expense. In this sense the idea embodies service rendered to masters, as well as wages, board, and lodging provided by the masters. In canon law the term usually signifies seculars residing in monasteries and other religious houses, actually employed therein as servants and subject to the authority of the regular prelate to the same extent as servants are subject to their masters. Many of the privileges and exemptions granted to religious are accorded their familiars. For this reason familiars validly receive absolution from a confessor approved by the regular prelate, or from one approved by the ordinary of the place where the house is located. In like manner, familiars actually dwelling in a monastery in the order of their Easter Communio in the church or chapel of the monastery. Extreme unction and Viaticum may also be administered to them in the monastery. Boys boarding in colleges or academies supervised by religious or by diocesan clergy, and girls boarding in convents conducted by sisterhoods, practically enjoy the same privileges as familiars. Accord-
ing to the Council of Trent (Sess. XXIII, cap. ix, De Reformatione), "a bishop may not ordain one of his own household who is not his subject unless he has lived with him for the space of three years, and he shall really and without fraud of any kind, straightforwardly confess, 1st, that the law of his own household is to be observed and, 2nd, that no contrary custom even immemorial"

J. D. O'NEILL.

Family, a term derived from the Latin, famulus, servant, and famillia, household servants, or the household (cf. Ocean, famill, servant). In the classical Roman period the familia rarely included the parents or the children. Its English derivative was frequently used in former times to describe all the persons of the domestic circle, parents, children, and servants. Present usage, however, commonly excludes servants, and the word familia refers to that fundamental social group formed by the more or less permanent union of one man with one woman, or of one or more men with one or more women, and their children. If the heads of the group comprise only one man and one woman we have the monogamous family, as distinguished from those domestic associations which could not be called familials in conditions of polygamy, polyandry, or promiscuity.

Certain anthropological writers of the last half of the nineteenth century, as Bachofen (Das Mutterrecht, Stuttgart, 1861), Morgan (Ancient Society, London, 1877), McLemore (The Patriarchal Theory, London, 1883), Laqueur (Custodia, London, 1885), and Lubbock (The Origin of Civilization and the Primitive Condition of Man, London, 1895), created and developed the theory that the original form of the family was one in which all the women of a group, and perhaps a tribe, were promiscuously united with the men of the community. The heading of Engels (The Origin of the Family, Private Property, and the State, tr. from the German, Chicago, 1902), some socialist writers have adopted this theory of the family as a materialistic and progressive interpretation of history. The chief considerations in its favor are: 1. The assumption that the property of the family is common, and that this condition necessarily led to community of women; 2. Historical statements by ancient writers like Strabo, Hecataeus, and Strabo, and the practice of promiscuity, as a comparatively late date, by some uncivilized peoples, such as the Indians of California and a few aboriginal tribes of India; 3. The system of tracing descent and kinship through the mother, which prevailed among some primitive people; 4. Certain abnormal customs of ancient races, such as religious prostitution, the so-called jux prima nocesta, the lending of wives to visitors, and the so-called Law, before marriage, etc.

At no time has this theory obtained general acceptance, even among non-Christian writers, and it is absolutely rejected by some of the best authorities of to-day, e. g., Westermarck (The History of Human Marriage, London, 1901) and Letourneau (The Evolution of Marriage, tr. from the French, New York, 1888).

In reply to the arguments just stated, Westermarck and others point out that the hypothesis of primitive communism has by no means been proved, at least in its extreme form; that common property in goods does not necessarily lead to community of women, since family marriage remains restricted to the offspring of a man and a woman; that common property in goods is not necessarily the result of economic conditions; that the family of classical historians in the matter is inconclusive, vague, and fragmentary, and refer to only a few instances; that the modern cases of promiscuity are isolated and exceptional, and may be attributed to degeneracy rather than to primitive survivals; that the practice of tracing kinship through the mother finds ample explanation in other facts besides the assumed uncertainty of paternity, and that it was not universal; that the absence of sexual relations cited the act (in most cases) as unnecessary, as well as more satisfactorily explained, by other circumstances, religious, political, and social, than by the hypothesis of primitive promiscuity; and, finally, that evolution, which, superficially viewed, seems to support this hypothesis, is actually against it, inasmuch as the unions between the male and the female of many of the higher species of animals exhibit a degree of stability and exclusiveness which bears some resemblance to that of the monogamous family.

The utmost concession which Letourneau will make to the theory under discussion is that "promiscuity may have been adopted by certain small groups, more probably by certain associations or groupings under certain circumstances."

The family was either polygamy or polyandry; it was even less worthy of credence or consideration. In the main, the verdict of scientific writers is in harmony with the Scriptural doctrine concerning the origin and nature of the family. "When therefore he shall leave father and mother, and shall cleave to his wife: and they shall be two in one flesh" (Gen., ii, 24). "Therefore now they are not two, but one flesh. What therefore God hath joined together, let no man put asunder" (Matt., xix, 6). From the beginning, therefore, the family was supposed the union of one man with one woman.

While monogamy was the prevailing form of the family before Christ, it was limited in various degrees among many peoples by the practice of polygamy. This practice was universal among the Semitic races, among the Aryans, it was very frequent among the Jews, the Egyptians, and the Medes, among the people of India, the Greeks, or the Romans. It existed to a greater extent among the uncivilized races, although some of these were free from it. Moreover, even those nations which practised polygamy, whether in primitive or civilized form, or both, restricted it to a small minority of the population, as the kings, the chief, the nobles, and the rich. Polyandry was likewise practised, but with considerably less frequency. According to Westermarck, monogamy was by far the most common form of marriage among the ancient peoples of whom we have any direct knowledge" (op. cit., p. 459). On the other hand, divorce was in vogue among practically all peoples, and to a much greater extent than polygamy.

The ease with which husband and wife could dissolve their union constitutes one of the greatest blot upon the civilization of classic Rome. Generally speaking, the position of woman was very low among all the nations, civilized and uncivilized, before the coming of Christ. Among the barbarians she very frequently became a wife through capture or purchase; among even the most advanced peoples the wife was generally her husband's property, his chattel, his labourer. Nowhere was the husband bound by the same law of marital fidelity as the wife, and in very few places was she compelled to concede to her equal rights in the matter of divorce. Infanticide was generally practised, and the patris pecus of the Roman and the other nations was often offered in sacrifice over even his grown-up children. In a word, the weaker members of the family were everywhere inadequately protected against the stronger.

The Christian Family.—Christ not only restored the family to its original type as something holy, per-
manent, and monogamous, but raised the contract from which it springs to the dignity of a sacrament, and thus placed the family itself upon the plane of the supernatural. The family is holy inasmuch as it is to cooperate with God by procreating children who are destined to be the adopted children of God, and by instructing them for His kingdom. The union between husband and wife is to last until death (Matt., xix, 6 sq.; Luke, xvi, 18; Mark, x, 11; 1 Cor., vii, 10; see Marriage, Divorce). That this is the highest form of the conjugal union, and the best arrangement for the welfare both of the family and of society, will appear to anyone who compares dispassionately the moral and material effects with those flowing from the practice of divorce. Although divorce has obtained to a greater or less extent among the majority of peoples from the beginning until now, "there is abundant evidence that marriage has, upon the whole, become more durable in proportion as the human race has risen to higher degrees of cultivation" (Westermarck, op. cit., p. 535).

While the attempts that have been made to show that divorce is in every case forbidden by the moral law have not been convincing on their own merits, to say nothing of certain facts of Old Testament history, the absolute indissolubility of marriage is nevertheless the ideal to which the natural law points, and consequently is to be expected in an order that is supernatural. In the family, as re-established by Christ, there is likewise no such thing as polygamy (see the references already given in this paragraph). Polygamy is, too, in accord with nature’s ideal. Polygamy is not, indeed, condemned in every instance by the natural law, but it is generally inconsistent with the reasonable welfare of the husband and children, and the proper moral development of the husband. Because of these qualities of permanence and unity, the Christian family implies a real and definite equality of husband and wife. They have equal rights in the matter of the conjugal relation, equal claims upon mutual fidelity, and equal obligations to make this fidelity real. They are equally guilty when they violate these obligations, and equally deserving of pardon when they repent.

The wife is neither the slave nor the property of her husband, but his consort and companion. The Christian family is supernatural, inasmuch as it originates in a bond of love. Through the dispensation of matrimony, husband and wife obtain an increase of sanctifying grace, and a claim upon those actual graces which are necessary to the proper fulfillment of all the duties of family life, and all the relations between husband and wife, parents and children, are supernaturally and sanctified. The end and the ideal of the Christian family are likewise supernatural, namely, the salvation of parents and children, and the union between Christ and His Church. "Husbands, love your wives, as Christ also loved the church, and delivered himself up for it," says St. Paul (Eph., v, 25). And the institution of the conjugal union, the identification, almost, of husband and wife, is seen in the injunction: "So also ought men to love their wives as their own bodies. He that loveth his wife, loveth himself" (Eph., v, 28).

From these general facts of the Christian family, the particular relations existing among its members can be readily deduced. Since the average man and woman are not normally complete as individuals, but are rather the two complementary parts of one social organism, in which their material, moral, and spiritual needs receive mutual satisfaction as a primary requisite of the union, it is mutual love. This includes not merely the love of the senses, which is essentially selfish, not necessarily that sentimental love which anthropologists call romantic, but above all that rational love or affection, which springs from an appreciation of qualities of mind and heart, and which impels each to seek the welfare of the other. As the intimate and long association of husband and wife necessarily brings to the surface their less noble and lovable qualities, and as the rearing of children involves great trials, the need of disinterested love, the ability to sacrifice self, is obviously grave.

The obligations of mutual fidelity have been sufficiently stated above. The particular functions of husband and wife in the family are determined by their different natures, and by their relation to the primary end of the family, namely, the procreation of children. Being the provider of the family, and the superior of the wife both in physical strength and in those moral and material qualities which are appropriate to the exercise of authority, the husband is naturally the family’s head, even "the head of the wife," in the language of St. Paul. This does not mean that the wife is the husband’s slave, his servant, or his subject. She is his equal, both as a human being and as member of the conjugal society, save only that when a disagreement arises in matters pertaining to domestic government, she is, as a rule, to yield. To claim for her completely equal authority with the husband is to treat woman as man’s equal in a matter in which nature has made them unequal and has distributed the details of household management of the affairs of the household belong naturally to the wife, because she is better fitted for the obvious tasks than the husband.

Since the primary end of the family is the procreation of children, the husband or wife who shirks this duty incurs the disfavor of the other. All intellectual or moral weakness endangers the family. It can introduce the family to an unnatural and unchristian level. This is emphatically true when the absence of offspring has been effected by any of the artificial and immoral devices so much in vogue at present. When the conjugal union has been blessed with children, both parents are charged, according to the respective functions, with the duty of sustaining and educating those undeveloped members of the family. Their moral and religious formation is for the most part the work of the mother, while the task of providing for their physical and intellectual wants falls chiefly upon the father. The extent to which the different wants of the children are to be supplied will vary with the ability and resources of the parents. Finally, the children are bound, generally speaking, to render to the parents implicit love, reverence, and obedience, until they have reached the majority of age, and improve and respect the family’s authority.

The most important external relations of the family are, of course, those existing between it and the State. According to the Christian conception, the family, rather than the individual, is the social unit and the basis of civil society. To say that the family is the social unit is not to imply that it is the end to which the individual is a means; for the welfare of the individual is the end both of the family and of the State, as well as of every other social organization. The meaning is that the State is formally concerned with the family as such, and not merely with the individual. This distinction is of great practical importance; for while the State ignores or neglects the family, keeping in view only the welfare of the individual, the result is a strong tendency towards the disintegration of the unit in the family. The family is the basis of civil society, inasmuch as the great majority of persons ought to spend practically all their lives in its circle, either as subjects or as heads. Only in the family can the individual be properly reared, educated, and given that formation of character which will make him a good man and a good citizen.

Inasmuch as the average man will not put forth his full productive energies except under the stimulus of its responsibilities, the family is indispensable from the purely economic viewpoint. Now the family cannot rightly discharge its functions unless the parents
have full control over the rearing and education of the children, subject only to such State supervision as is needed to prevent grave neglect of their welfare. Hence it follows that, generally speaking, and with due allowance for particular conditions, the State except for Chief effects it when it prevents the marriage of children, the wants of the child, removes him from parental influence, or specifies the school that he must attend. As a consequence of these concepts and ideals, the Christian family in history has proved itself immeasurably superior to the non-Christian family. It has exhibited greater fidelity between husband and wife, greater reverence for the parents by the children, greater protection of the weaker members by the stronger, and in general a more thorough recognition of the dignity and rights of all within its circle. Its chief glory is undoubtedly its effect upon the position of woman. Notwithstanding the disabilities—for the most part with regard to property, education, and a practically recognized double standard of morals—under which the Christian woman has suffered, she has attained to a height of dignity, respect, and authority for which we shall look in vain in the conjugal society outside of Christianity. The chief factor in this improvement has been the Christian teaching on chastity, conjugal equality, the sacredness of motherhood, and the supernoatural end of the family, together with the Christian model and ideal of family life, the Holy Family at Nazareth.

By intimidation of some writers that the Church's teaching and practice concerning virginity and celibacy, make for the degradation and deterioration of the family, not only springs from a false and perverse view of these practices, but contradicts the facts of history. Although she has always held virginity in high honor, she has never, under any circumstances, sanctified the extreme view, attributed to some ascetical writers, that marriage is a mere concession to the flesh, a sort of tolerated carnal indulgence. In her eyes the marriage rite has ever been a sacrament, the married state a holy state, the family a Divine institution, and family life the normal condition for the great majority of mankind. Indeed, her teaching on virginity, and the spectacle of thousands of her sons and daughters exemplifying that teaching, have in every age constituted a most effective exaltation of chastity in general, and of chastity within as well as without the family. To her it has been combined to convince the wedded, not less than the unwed, that purity and restraint are at once desirable and practically possible. To-day, as always, it is precisely in those communities where virginity is most honoured that the ideal of the family is highest, and its relations pure.

DANGERS FOR THE FAMILY.—Among these are the exaltation of the individual by the State at the expense of the family, which has been going on since the Reformation (cf. the Rev. Dr. Thwing, in Bliss, "Encyclopedia of Social Reform"), and the modern facility of divorce (see Special Report of the U. S. Census, "Women at Work"). This condition implies an increased proportion of the married to the single, that is, an increased proportion of women who are less capable physically of undertaking the burdens of family life, a smaller proportion of marriages, an increase in the proportion of women who, owing to a delusive idea of independence, are disinclined to marry, and a weakening of family bonds and domestic authority. "In 1890, 1 married woman in 22 was a bread-winner; in 1900, 1 in 18" (ibid.). Perhaps the most striking evil result of married women in industry is the high death-rate among infants. For infants under one year the rate in 1900 over the whole United States, was 100 per 1000, but it was at the same rate in the Fall River, where the proportion of married women at work is greatest. As the supreme cause of all these dangers to the family are the decay of religion and the growth of materialistic views of life, so the future of the family will depend upon the extent to which these forces can be checked. And experience shows that there can be no permanent middle ground between the materialistic ideal of divorce, so easy that the marital union will be terminable at the will of the parties, and the Catholic ideal of marriage absolutely indissoluble.

SADDLER (New York, 1896); Contigane, The Ancient City, tr. B. A. Thring, London, 1900); Bousquet, The Family (London, 1906); Thring, The Family (Boston, 1897); Encyclopedia of Social Reform (New York, 1907); Stöckel in Kirchenlexicon.
Fano, Diocese of (Fanensis).—Fano, the ancient Fanum Fortunae, a city of the Marches in the province of Pesaro, Italy, took its name from a celebrated temple of Fortune, which also served as a lighthouse, but the site now occupied by the church of Santa Lucia. Near this city, in 207 a. C., Claudius Nero defeated Hasdrubal; Augustus founded a colony there called Julii Fanens; and, in 371, Aurelian annihilated the Alamanii. Ruins of the Temple of Fortune are still visible, also of a temple of Jupiter, the basilica designed and described by Vitruvius (De aedificiis, VI), and a triumphal arch of Augustus, enlarged by Constantine II in 340. Fano was part of the Pentapolis and with it passed in the eighth century under the domination of the Holy See. The Albeghetti governed it as magistrates during the thirteenth century. From 1306 the Malatesta ruled over it, but in 1465 Federigo di Montefeltro, Duke of Urbino, after having almost destroyed the city, expelled Rodolfo Malatesta. Later the Comneni held almost independent sway.

St. Paternarius is venerated as the first Bishop of Fano and is supposed to have been appointed by Pope Sylvester I. St. Vitalis flourished in the time of Pope Symmachus (498-514). Eusebius accompanied Pope John I to Constantinople (526). Leo and St. Fortunatus belong to the period of St. Gregory the Great. The date of St. Orsus is uncertain. Among the later bishops were Riccardo (1214), persecuted by the magistrates Albeghetti; and the Dominican Pietro Bertano (1537), a distinguished orator and advocate at the Council of Trent. Fano is an exempt diocese (see DIOCES) and has 55,775 inhabitants, 45 parishes, 1 educational institution for girls, 6 religious houses of men, and 8 of women.

Cappellani, Le Chiese d'Italia (Venice, 1844), II, 321-43; Amani, Memorie storiche di Fano (Fano, 1721).

U. BENIGNI.

Fanon, a shoulder-cape worn by the pope alone, consisting of two pieces of white silk ornamented with narrow woven stripes of red and gold; the pieces are made two in number, somewhat unequal in size, and the smaller is laid on and fastened to the larger one. To allow the head to pass through is made in the middle a round opening with a vertical slit running down farther. The front part of the fanon is ornamented with a small cross embroidered in gold.

The fanon is like an amice; it is, however, put on under but above the alb. The pope wears it only when celebrating a solemn pontifical Mass, that is, only when all the pontifical vestments are used. The manner of putting on the fanon recalls the method of assuming the amice universal in the Middle Ages and still observed by some of the older orders (see AMICE). After the deacon has vested the pope with the usual amice, alb, the cinctulum and sub-cinctorum, and the pectoral cross, he draws on, by means of the opening, the fanon and then turns the half of the upper piece towards the back over the pope’s head. He now vests the pope with the stole, tunicle, dalmatic, and chasuble, then turns down that part of the fanon which had been placed over the head of the pope, draws the front half of the upper piece above the tunicle, dalmatic, and chasuble, and finally arranges the whole upper piece so that it covers the shoulders of the pope like a collar.

The fanon is mentioned in the oldest known Roman Ordinal, consequently its use in the eighth century can be proved. It was then called analogiogium (anogoglium), yet it was not at that period a vestment reserved for the pope but the use of the papal fanon did not appear until the other ecclesiastics at Rome began to put the vestment on under the alb instead of over it, that is, when it became customary among the clergy to use the fanon as an ordinary amice. This happened, apparently in imitation of the usage outside of Rome, between the tenth and twelfth centuries; however, the exact date cannot be given. But it is certain that as early as the latter part of the twelfth century the fanon was worn solely by the pope, as is evident from the express statement of Innocent III (1198-1216). The vestment was then called an orale; the name of fanon, from the late Latin fanum, derived from fanus, pater, cloth, woven fabric, was not used until a subsequent age. Even as early as the eighth century the pope wore the fanon only at solemn high Mass. The present usage, according to which the pope is vested, in addition to the fanon, with an amice under the alb, did not appear, at the earliest, until the close of the Middle Ages.

As to the form of the fanon and the material from which it was made in early times no positive information exists. Late in the Middle Ages it was made of white silk, as is shown by the inventory of the year 1295 of the papal treasure, as well as by numerous works of art; the favourite ornamentation was one of narrow stripes of gold and of Ochre color, especially red, woven into the silk. Up into the fifteenth century the fanon was square in shape; the present collar-like form seems to have appeared about the sixteenth century or even later.

Faraud, Henri, titular Bishop of Anémour and first Vicar Apostolic of Athabasca-Mackenzie, Canada; b. 17 March, 1823, at Gigondas, France; d. at St. Boniface, Manitoba, 26 September, 1890. After admission to the juniorate of the Oblates of the Good Shepherd, he was sent to the missions of Northern America, and ordained priest, 8 May, 1847, at St. Boniface, Manitoba. Then he replaced Father (afterwards Bishop) Lafleche at Ile-ala-Crosse, and in 1849 he proceeded further North, establishing the mission of Lake Athabasca, which he inaugurated 8 September, 1851. The following year, he visited Great Slave Lake, where no missionary had ever been, and ministered to the Indians of Peace River (1858-59). On the 13th of May, 1862, he was made titular of the newly created Vicariate Apostolic of Athabasca-Mackenzie; but such was his isolation from the civilized world, that he did not know of it before July of the following year.

Mgr. Guilbert, of Tours, consecrated Bishop of Anémour, 30 Nov., 1864, a title he bore for twenty-five years, during which he evidenced considerable administrative abilities, founding missionary posts as far as the Frozen Ocean, on the one side, and the Peace and Liard Rivers, on the other. In 1835 he repaired to France, for the General Chapter of his Congregation. In 1889 he was one of the Fathers of the Provincial Council of St. Boniface, at the termination of which his growing infirmities prevented him from returning to his distant missions in the North.

Le Manitoba (3 October, 1890), files; Fernand Michel, Dix ans chez les Sauvages (Paris, 1886). A. G. MORICE.

Farfa, Abbey of, situated about 26 miles from Rome, not far from the Faraf Sabina Railway station. A legend in the "Chronicon Farfense" relates the foundation of a monastery at Farfa in the time of the Emperors Julian, or Gratian, by the Syrian St. Laurentius, who had come to Rome with his sister, Susanah, and had been made Bishop of Spoleto. The legend goes on to say that he afterwards became enangoured of the monastic life, and chose a wooded hill near the Fara stream, a tributary of the Tiber, on which he built a church to Our Lady, and a monastery.
Archeological discoveries in 1888 seem to prove that the first monastic establishment was built on the ruins of a pagan temple. This first monastery was devastated by the Vandals in the fifth century, doubtless about the year 457.

In the eleventh century, a wave of monasticism from the North spread over Italy. The foundation of Bobbio by St. Columbanus, and the foundation of Farfa by monks from Gaul, about 681, heralded a revival of the great Benedictine tradition in Italy. The "Consecrato Monasterii Farfense", a writing which dates probably from 857, relates at length the story of its principal founder Thomas de Maurienne; he had made a pilgrimage to Jerusalem and spent three years there. While in prayer before the Holy Sepulchre, Our Lady in a vision warned him to return to Italy, and restore Farfa; and the Duke of Spoleto, Faroaldo, who had also had a vision, was commanded to aid in this work. At a very early date we find traces of this legend in connexion with the foundation by three nobles from Beneventum of the monastery of St. Vincent on the Volturino, over which Farfa claimed jurisdiction. Thomas died in 720; and for more than a century Farfa was ruled by prelates from Beneventum.

The Lombard chiefs, and later the Carolingians, succeeded in withdrawing Farfa from obedience to the Bishops of Rieti, and in securing many immunities and privileges for the monastery. If we may credit the "Chronicon Farfense", Farfa was at this period the most important monastery in Italy from the point of view of worldly possession and ecclesiastical dignity, with the exception of Nonantula. It had one large basilican church and five smaller ones, rich in masterpieces of religious orfevrerie. The greed of the Saracens was excited; and about 890, during the government of Abbot Peter, they swooped down on the place. Peter held out against them for seven years, and then resolved to abandon the monastery. He divided his monks into three sections and shared the abbey's wealth among them—one section he sent towards Rome, one towards Rieti, and one towards the county of Fermo. The Saracens preserved Farfa as a stronghold, but some Christian robbers set fire to it by mistake.

Between 930 and 936, it was rebuilt by Abbot Ratfredus, who was afterwards poisoned by two wicked monks, Camano and Hildebrand, who divided the wealth of the abbey between them, and ruled it until Alberic, Prince of the Romans, called in Odo of Cluny to reform Farfa and other monasteries. Campo was driven out; and a holy monk named Dagibert took his place. At the end of five years, he also died by poison—and the moral condition of Farfa was once more deplorable. The monks robbed the altars of their ornaments, and led lives of unbridled vice.

Abbot John III, consecrated, about 967, by the pope, succeeded, owing to the protection of the Emperor Otto, in re-establishing a semblance of order. But the great reformer of Farfa was Hugues (996-1010). His nomination as abbot was not secured without sinomy—but the success of his government palliates the vice of his election. At this instance, Odo, Abbot of Cluny, and William, Abbot of Dijon, visited Farfa, and re-established there the love of prayer which were the fruits of his labors.

Two of Hugues's successors, Berard, Abbot from 1019 to 1089, made the abbey a great seat of intellectual activity. The monk, Gregory of Catino (b. 1060) arranged the archives. To substantiate Farfa's claims, and the rights of its monks, he edited the "Regesto di Farfa", or "Consuetudines archivi Farfensis" composed of 1324 documents, all very important for the history of Italian society in the eleventh century. Ugo Balzani praised the accuracy and exactness of this work published in 1103, Gregory wrote the "Largitorium", or "Liber Notarius sive emphementricus", a lengthy list of all the concessions, or grants, made by the monastery to its tenants. Having collected all this detailed information, he set to work on a history of the monastery, the "Chronicon Farfense"; and when he was 70 years old, in order to facilitate reference to his earlier works, he compiled a sort of index which he styled "Liber Floriger Chartarum cenobi Farfensis". Gregory was a man of real learning, remarkable in that, as early as the eleventh century, he wrote a history with accuracy of every point, and a great wealth of information.

The monks of Farfa owned 683 churches or convents; two towns, Centumcellae (Civitavecchia) and Alatri; 132 castles; 7 sea-ports; 8 salt-mines; 14 villages; 82 mills; 315 hamlets. All this wealth was a hindrance to the religious life once more, between 1119 and 1171. And Farfa was fragmented by the rivalries between Abbot Guido, and the monk Berard who aimed at being abbot. During the Investiture conflict, Farfa was, more or less, on the side of the Ghibellines. The "Orthodoxa defenso imperialis", written in support of the Ghibelline party, is, according to Bethmann, the work of Gregory, and that of one of his disciples, according to Balzani. The collection of canonical texts contained in the "Regesto", which has been studied by Paul Fournier, seems to omit purposely any mention of the canonical texts of the reforming popes of the eleventh century. But when, in 1262, the victory of the popes over the last of the Hohenstaufen put an end to Germanic sway in Italy, Farfa sought the protection of Urban IV, as we learn from a privilege granted on 23 Feb., 1262, and published by Jean Guiraud. At the end of the fourteenth century the Abbey of Farfa became a cardinalia

Fargo (Farqus), Diocese of (Farquensis), suffragan of St. Paul, U.S.A., embracing the whole of the State of North Dakota, an area of 70,195 square miles. It was established in 1889.

The first Mass, in the territory now comprised in the Diocese of Fargo, was celebrated in Pembina, September 22, 1818, by Rev. Sévere Joseph Norbert Dumoulin, who was one of the missionaries sent to the Selkirk colony by Bishop Plessis of Quebec. Father Dumoulin was born on Montreal, 5 Dec., 1793, ordained priest in the Nicolet Seminary, 23 Feb., 1817, left Quebec for the Selkirk colony, 19 May, 1818, and arrived at Fort Douglas (now St. Boniface, Manitoba), 16 July, 1818. In August, 1823, Father Dumoulin returned to Can-
Quebec, Encyclopedia Farinato and Euvres pitalize, was Montcalm's realized later

in the dominion the which title was suppressed by the Holy See, 6 April, 1897, and changed to Fargo in accordance with the bishop's request. At its formation the diocese contained a population of 19,000, of whom 8000 were Indians and half-breeds. The population (1908) is about 70,000.

With the creation of the diocese the Rev. John Shanley was named its first bishop. He was born at Albion, New York, 4 Jan., 1852, and ordained priest 30 May, 1874, at Rome. His consecration as bishop took place at St. Paul, 27 Dec., 1889. Thereafter he was in the diocese 30 priests, 40 churches, an academy for girls, a hospital, and 3 parochial schools. There are now (1909) in the diocese a mitred abbot, 110 priests, 215 churches, 15 parochial schools, 4 Indian schools, 3 hospitals, an orphanage, a college for boys, and 6 academies for girls. In eighteen years the number of priests quadrupled and the number of churches more than quintupled.

The Benedictine Fathers have an abbey at Richardson, and a priory at Devil's Lake, from which points they attend several missions. Connected with the Pothole Abbey is a college for boys. The Benedictine Sisters are in charge of several schools, and the Presentation Nuns in charge of schools and orphanages. Other communities are: Sisters of Mercy (hospital and schools); Sisters of St. Joseph (hospitals and school); Sisters of Charity, or Grey Nuns (Indian school); Sisters of Mercy of the Presentation (schools).

JOHN SHANLEY.

Faribault, George-Barthelemy, archeologist, b. at Quebec, Canada, 3 Dec., 1789; d. 22 Dec., 1866. He was a first cousin of Jean-Baptiste, founder of the city of Faribault, Minn., U. S. A. After attending a school taught by a Scotch veteran of Wolfe's army, he completed his course preparatory to the study of law and was admitted to the Bar in 1811. In 1812 he served as a militiaman during the invasion of Canada by the Americans. In 1822 he entered the civil service, attaining in 1832 the rank of assistant clerk of the Legislative Assembly, an office he continued to hold after the union of the Canadas (1841) until 1855, when ill-health forced him to resign. Passionately fond of his country and of its past glories, he spent all his leisure in collecting documents and books pertaining to Canadian history. His fine collection (1700) of rare books and original manuscripts perished at the burning of the Parliament House in Montreal (1849). He courageously began a second collection, which he bequeathed to Laval University. Faribault published no original works, merely reproducing and annotating a series of rare historical papers in the transactions of the Quebec Literary and Historical Society, of which he was one of the chief promoters and benefactors. His principal publication is the "Catalogue of Works" relating to the history of America, with bibliographical, critical, and literary notes (Quebec, 1837), which, although superseded by a few later catalogues, ranks among the best. In 1839 he realized the long-postponed plan, conceived in 1761 by Montcalm's companions in arms, of erecting a monument near the spot where nearly 8000 were Indians and half-breed, written by the French Academy at the time the subject was first brought up and approved by William Pitt, was duly inscribed. In private life Faribault was the type of the Christian gentleman, modest, hospitable, and charitable. He counted none but friends, and left his record of a blameless career, devoted to the service of God and country.

MORGAN, Bibliotheca Canadensis (Ottawa, 1867); CABRIN, Œuvres complètes (Quebec, 1873).

LIONEL LINDSAY.

Faribault, Jean-Baptiste, trader with the Indians and early settler in Minnesota, U. S. A.; b. 19 October, 1774, at Berthier, Lower Canada; d. at Faribault, Minnesota, 20 August, 1860. His father Barthélemy Faribault, a lawyer of Paris, France, settled in Canada towards the middle of the eighteenth century, and served as military secretary to the French army in America. After the occupation of the country by the English he retired to private life in Beauce and held the office of notary public. Young Jean-Baptiste received a good school education, and after several years of mercantile employment at Quebec, entered the service of the Northwest Fur Company. In May, 1795, he went with others to the island of Michilimackinac or Mackinac, one of the depots of the company. For over ten years he traded with the Potowatomie Indians at Kankakee, with the Dakota or the Sioux Indians at Redwood, on the Des Moines river, and at Little Rapids, on the St. Peter or Minnesota river. During his residence at Little Rapids, in 1806, he was married to Pelagia Hanse, a half-breed daughter of Major Hanse. In 1809, he settled in the small village of Prairie du Chien, Wisconsin, and commenced trading, on his own account, with the Indian tribes of the Winnebagoes, Foxes, and Sioux. In addition to this, he conducted an exchange of lead with Julien Dubuque, at the post the company occupied under that name. During the war with England (1812-14) Faribault refused to enlist in the English army, and suffered imprisonment and the loss of all his goods in consequence. After the conclusion of the war, in 1816, he became a citizen of the United States, and recommenced his trade at Prairie du Chien. In 1819 he removed to Pike Island in the Mississippi River, and in 1826 to the village of St. Peter, or Mendota, Minnesota, opposite the military post of Fort Snelling. There he remained until the last years of his life, which was spent in the city of Faribault, Minnesota. A county in southern Minnesota was named after him, and the city of that name after his eldest son. Faribault was always kind and generous to the Indians, and tried to elevate them by teaching them the useful arts of life, and by instilling into them the principles of Christianity. He was much attached to the Catholic faith of his childhood and presented a house for a chapel to Father Lucien Galtier, the first resident missionary in Minnesota (1840).

FRANCIS J. SCHLEEF.

Farinato, Paolo, an Italian painter, b. at Verona, 1524; d. there, 1606. He belonged to the old Florentine family of Farinato degli Uberti, the famous head of the Ghibelline party, whom Dante placed in his Inferno. When the Guelfs triumphed, the Uberti were expelled and part of the family settled at Verona; it was to this branch that this painter belonged. In his native town Paolo was a pupil of Giosino, who was carrying on there the artistic tradition of Liberale, the greatest perhaps of Italian miniatiursts, whose wonderful illuminations in the choir books of the Libreria di Siena (1470-1476), his blustering Boreas, his Mass of which the celebrant is his father, and the angelic figure of St. Gabriel, the magician's, his startling view of the Castle of Sant' Angelo, are well known.

It thus came about that in Verona, a town without any great artistic past, a really original school was being formed, unstrammled by traditions and therefore all the more free to indulge in those novel colour schemes in painting which had already found startling expression in the mausoleums of Cane Grande della Scala, and the barons of his family. Towards the close of the fifteenth century, in the neighbourhood of Verona, the Venetian masters, Giovanni Bellini, Giorgione, and Titian, had just brought about a great artis-
tie revolution. They had invented colouring as an essential branch of the painter’s art. But great masters that they were, they were also men of intellectual genius and cared too much for the idea and its expression to give themselves up utterly to the purely sensuous. Only Braida, and not Farinati, had discovered the pure material colourings.

The Veronese School, on the contrary, less concerned with the higher walks of art, and untrained in the quest of lofty ideals, seized straightforwardly on colouring as the language best suited to express its own temperament. Colouring soon became its unique preoccupation and it was from this school the greatest colourist and painter of all time was to come forth, if the measure of greatness among painters is their ability to speak in colouring, Paolo Caliari, of Verona, known as Veronese. It is on this account that Gismondo and his pupils, Brusasorci and Farinati, are of such interest in the history of art. It is in their works that we note the blending of the two styles, and the use of colouring as an exclusive source of pleasure in painting: they were the heralds of Veronese and his immediate precursors. More than one sketch by Brusasorci is even now masquerading as a Veronese. Much later, however, the use of these artist’s paintings generally loses its moral purpose and becomes merely one of the decorative arts, giving promise already of that gaudy evolution that was to end in Tiepolo.

In this transformation Farinati played a very important part. He had a decided talent for fresco, and like his brother he was largely occupied on the decorations of the façades of the houses in Verona, which give that town and its famous Piazza dell’Erbe so winsome and engaging an appearance. Unfortunately, Farinati did not remain faithful to his native genius. At Mantua he fell under the influence of Giulio Romano, who, with his own captivation and his vulgar faults, had inherited all the prestige of the divine Raphael. It was under this influence that Paolo executed his “St. Martin” in the Blessed Sacrament Chapel of the cathedral at Mantua: and from this time onward his works betray for the most part a hybrid compromise between the corrupt Roman style and the light impressionist colouring of Veronese. In Mantua also his principal works are preserved. In Santa Maria in Organo, a “Massacre of the Innocents” (1556), and a “Christ Walking on the Waters” (1558); in San Tommaso, a “Glorification of the B. Virgin” (1569); in Sant’ Anastasia, a “Pentecost” (1598), and in San Giorgio in Braida, a “Multiplication of the Loaves” (1603).

Though four years older than Veronese, Farinati survived him by nearly twenty years, and was over eighty when he died. He was a most prolific painter and many of his works have found their way to other lands. In the United States there are two or three, one at Cleveland, in the Holden Collection, an allegory of “Autumn”; one at New Haven in the Jarvis Collection, “Christ Appearing to Some Saints”; and one at the Historical Society in New York, an “Abraham Driving away Hagar.” The famous painting in the Louvre, representing “The Council of Trent”, and generally attributed to Titian, has been assigned to Farinati by Berenson.

LOUIS GILLET.

Farrati, Daniele, ecclesiastical historian, b. at San Daniele del Friuli in the present Italian province of Udine, 22 February, 1690; d. 25 April, 1773. After having been a priest at Gorizia he entered the congregation of Jesus at Bologna. He was for five years teacher of classics at the Jesuit college in Padua, and then went to Rome, where he completed his theological studies, was ordained priest, in 1722, and was soon sent to Padua, to assist Father Filippo Riceputi in the latter’s historical labours. Riceputi intended to write a complete ecclesiastical history of Illyria, and in 1720 had issued, at Padua, a prospectus of this monumental enterprise. During twenty years they both searched and unwearedly industry in all the libraries and archives of ancient Illyria, for the material for their work; the matter they collected filled three hundred MS. volumes. In 1742, just as two of the larger divisions, the martyrology of Illyria and the life of San Pietro Orsoco, were about completed, Riceputi died. Thus Farrati was left alone to work into presentable shape the prodigious amount of material collected. As co-labourer he chose Father Jacopo Coleti. The first volume of “Illyricum Sacrum” appeared at Venice, in 1751; it contained the history of the Church of Salona up to the fourth century. Three further volumes appeared in rapid succession; while the fifth was in press Farrati died. His assistant Coleti finished the fifth volume, which appeared in 1775, and issued three more, the last being completed in 1818. The whole work fills eight well-executed folio volumes.

Farmer, Ferdinand. See Steinmetz, Ferdinand.

Farnese, Alessandro, the name of two cardinals. For the elder Paul III, pope. The younger, Alessandro Farnese, eldest son of Pier Luigi, first Duke of Parma and brother of Pope Paul III, was born 7 Oct., 1520, and died at Rome, Feb., 1589. While yet a student at Bologna, in 1534, Clement VII appointed him administrator of the Diocese of Parma; Jan. 18 Dec. of the same year, his uncle, Paul III, created him Cardinal-Deacon of the Title of S. Angelo, and conferred on him numerous offices and benefices. Thus, he was Vice-Chancellor of the Holy Roman Church, Governor of Tivoli, Archpriest of St. Mary Major’s, Archpriest of St. Peter’s, Administrator of Jaen, Spain, of Viseu, Portugal, of Wurzburg, Germany, and of Avignon, France. In 1536 he was made Bishop of Monreale, Sicily, where, in 1552, he founded a Jesuit College, and, in 1559, convoked a synod. He was also Bishop of Massa (1558), and Archbishop of Tours (1559), later exchanging this see for that of Cahors, from which he resigned in 1557. Bishop of Parma (1556); of Montefiascone (1571); finally Cardinal-Bishop of Ostia and Velletri (1580). He was papallegate for the province of the Patrimony, and afterwards of the county of Avignon, where he displayed great administrative ability, especially during the plague of 1541.

He was very zealous in behalf of the poor. Farnese was employed by the popes on various legations and embassies. In 1539, he was legatus a latere of Paul III at the court of Charles V, to make peace between the emperor and the King of France, and to sever the alliance with England, as also to arrange for a general council. In 1543 he went again to the court of Charles V, and later to that of Francis I, and was present at the meeting of the two sovereigns in Paris, returning with Charles to Flanders. In the war between his brother Ottavio, Duke of Parma, and Pope Julius III, he prudently held aloof, first at Florence and then at Avignon. In 1545 he went on a special embassy to Charles V in reference to the council, and in 1546 he accompanied the pontifical troops sent to the aid of Charles V against the Smalkald League. In 1580, he was one of the candidates for the papacy. Charles V greatly esteemed his sagacity. Farnese was an ardent promoter of the Tridentine reforms. Above all he was a lover and patron of literature, science, and art, especially ecclesiastical. He used to say that “there is nothing more despicable
than a cowardly soldier or an ignorant priest." He patroonized the architect Vignolo, to whom he entrusted the construction both of the church of the Gesù in Rome, of which he laid the corner-stone in 1568, and of the superb Farnese palace of Caprarola near Viterbo. He restored the monastery of Tre Fontane, where he had the chapel of Santa Maria. Scala Codii erected; and he had the ceiling of San Lorenzo in Damaso magnificently decorated. He was buried in front of the high altar in the church of the Gesù.

U. BENIGNI.

Faro, Diocese of (Pharennis), suffragan of Evora, Portugal, and extending over the province of Algarve. The see was founded at Ossenoba in 306, which place falling into the hands of the Moors, in 688, the see was suppressed. It was re-established in 1188 at Siloes, and in 1218 was made suffragan to Braga, then to Seville, in 1393 to Lisbon and finally, in 1540, to Evora. The title was transferred to Faro, 30 March, 1577. Faro is the chief seaport town of the province, and is located on the Rio Pernoso, near its mouth. The cathedral, an imposing structure, with nave-vaulting springing from lofty cylindrical columns, is anterior by a Roman basilica altered by the Carolingian. Several convents, a hospital, and charitable institutions are well appointed. There are 66 parishes, 214 churches, 112 priests and 228,384 Catholics in the diocese.

THOMAS F. MEEHAN.

Faro Islands.—Geography and Statistics.—A group of Danish islands rising from the sea some four hundred miles west of Norway and almost as far south of Iceland. It embraces fourteen inhabited and several uninhabited islands with an area of 300 square miles. Of this one-third belongs to Strömö. This archipelago is divided by a number of small sounds and consists of dark grey rocks which form plateaux usually about 300 yards high. These plateaux slope towards the sea, are fissured by streams and are here and there surrounded by lofty peaks (Slattaretind, or rock peaks). The sky is usually cloudy, squalls and storms are frequent. The surging waters make navigation dangerous especially in winter. The climate is oceanic, but as the summer heat rarely rises above 10° and the soil is poor, agriculture is possible only in sheltered spots. Trees are few in number, but shrubs flourish in more abundance. The chief wealth and attraction of the islands are found in their flowery pastures, while the herds of sheep which graze upon them have given their name to the archipelago. Upwards of 100,000 of these animals live always in the open air and are famous for their superior quality and wool. A few small, raw-boned horses are employed solely as beasts of burden, for roads are unknown, nor is any shelter provided for them. More attention is paid to the horned cattle, which number about 5000. Besides the above-mentioned quadrupeds, rats and mice are the only land animals or mammals to be found. Many species of birds and in great numbers haunt the islands. The surrounding waters abound in delicious fish and whales and dolphins rich in blubber. The yearly catch of the round-headed dolphin alone (the Grind) amounts to a thousand. Reptiles and frogs are unknown, and there are but few insects.

The 16,000 inhabitants of the Faroe Islands are all Lutherans. They speak a dialect akin to the Old Norse, but Danish is used in public life, the schools, and the churches. The fisheries, cattle-breeding, and the more perilous bird-catching are the chief sources of income. The few local industries scarcely suffice for the needs of the natives. Turf is used for fires, there being no coal. There is considerable commerce. The export are fish, blubber, meat, wool, feathers, and down; the imports are wood, coal, and large quantities of cereals and fruit. Thorshavn on Strömö is the capital and seat of government, and has a real-schule, or technical school. Throughout the rest of this island there are only wooden huts covered with turf.

POLITICAL AND RELIGIOUS HISTORY.—From the work of Dicuil, an Irish monk, "De Mensurâ orbis terre" (ed. Parthey, Berlin, 1872), written in the ninth century, we learn that the islands were discovered by Irish monks. Not long after, the island was colonized by Normans. Harold Schônhaar (872-930) united them with the Kingdom of Norway and this was their political condition during 1814. Olaf Tryggvason converted the people to Christianity; as early as 1076 they had a bishop of their own. The bishops of the Faroe Islands were usually chosen from the canons of Bergen, and were originally suffragans of Hamburg-Bremen, later of Lund (1104), finally (since 1152) of the Primate of Norway in Trondheim. There were in all twenty-three Catholic bishops, from Gudmund to Amund Olafson. The latter was forced to yield to the Lutheran bishop who also took over the episcopal title. Later on only "provosts" were elected. The Catholic clergy remained steadfast in their faith, but were unable to resist the advance of Protestantism. By the end of the sixteenth century the Catholic Faith had disappeared; all late attempts to revive it proved vain. The mission founded some years ago in Thorshavn was abandoned and the few (mostly transient) Catholics on the islands were attended once a year from Copenhagen. In the Catholic epoch, at least, no little attention was paid to the construction and adornment of churches, as may be seen from the ruins of the unfinished cathedral of Kirkebø. The thick basaltic walls broken by high, massive windows are evidence that the original builders meant to erect a noble Gothic church. It remained unfinished because under the "new Gospel" the generosity of the faithful was soon extinguished. A small stone church of the twelfth century serves yet for Protestant worship. It contains sculpture belonging to pre-Reformation times.

Pius Wittman.

Fast, in general abstinence from food or drink, a term common to the various Teutonic tongues. Some derive the word from a root whose primary signification means to hold, to keep, to observe or to restrain one's self. The Latin term ijetium denotes an animal intestine which is always empty. Such abstinence varies according to the measure of restriction circumscribing the use of food and drink. Hence it may denote abstinence from all kinds of food and drink for a given period. Such is the nature of the fast prescribed by the Church before Holy Communion (natural fast). It may also mean such abstinence from food and drink as is dictated by the bodily or mental dispositions peculiar to each individual, and is then known as moral or philosophical fast. In like manner the term compunctiones are common to various religious communities in the Church. Finally, in the strict acceptance of the term, fasting denotes abstinence from food, and as such is an act of temperance finding its raison d'être in the dictates of natural law and its full perfection in the requirements of positive ecclesiastical legislation.

In Christian antiquity the Eustathians (Sozomen,
Hence, Christians, of the Church fasts; they were condemned (380) by the Synod of Gangra (can. xiv), which also asserted incidentally the traditional antiquity of the ecclesiastical fasts (Hefele-Leclercq, Hist. def. of Church, tr. P. J. Fitzpatrick, 1908, 1, p. 1041). Contrary to the groundless assertions of these sectaries, moralists are one in maintaining that a natural law inculcates the necessity of fasting because every rational creature is bound to labour intelligently for the subjugation of concupiscence. As a consequence, rational moralists are logically commensurate with the attainment of this end (see MORIFICATION). Amongst the means naturally subserving this purpose fasting lays claim to a place of primary importance. The function of positive law is to intervene in designating days on which this obligation is to be observed, as well as the manner in which the same obligation is to be discharged on days authoritatively appointed.

What pertains to the origin as well as to the historical development of this obligation in the Church may be gleaned easily from the articles on Abstinence (327) and Fasting (328), in Black's CATECHISM, and Black's FAST. The ecclesiastical in its genius, is unwritten in its origin, and consequently must be understood and applied with due regard for the customs of various times and places. See the corresponding historical-archeological articles in the various modern dictionaries and encyclopaedias. The Christian Archeologist, Kraus, Smith and Cheetham, Cabrol and Leclercq. Details will be found under ADVENT; LENT; FRIDAY, SATURDAY; VIGIL; EMBER DAYS.

In the United States of America all the days of Lent; the Fridays of Advent (generally); the Ember Days; the Dormition of the Virgin; and the Assumption; of all Saints, are now fasting days. In Great Britain, Ireland, Australia and Canada, the days just indicated, together with the Wednesdays of Advent and (28 June) the vigils of Sts. Peter and Paul, are fasting days. Fasting essentially consists in eating but one full meal in twenty-four hours and that about midday. It also implies the obligation of abstaining from flesh meat during the same period, unless legitimate authority grants permission to eat meat. The quantity of food and drink that the meal has never been made the subject of positive legislation. Whosoever therefore eats a hearty or sumptuous meal in order to bear the burden of fasting satisfies the obligation of fasting. Any excess during the meal militates against the virtue of temperance, without jeopardizing the obligation of fasting.

According to general usage, noon is the proper time for this meal. For good reasons this hour may be legitimately anticipated. Grievous sin is not committed even though this meal is taken a full hour before noon without sufficient reason, because the substance of fasting, which consists in taking but one full meal a day, is not imperilled. In like manner, the hour for the midday meal and the collation, may for good reasons be conscientiously inverted. In many of our larger cities this practice now prevails. According to D'Annibale (summulæ Theologicae Moralis, 4 ed., 1812, 134) and Noldin (Syllabus Theologiae Moralis, 674) good reasons justify one in taking a collation in the morning, dinner at noon, and the morning allowance in the evening, because the substance of fasting still remains intact. Nothing like a noteworthy interruption should be admitted during the course of the meal, because such a break virtually forms two meals instead of one. Common sense, taking into consideration individual intention and the duration of the interruption, must finally determine whether a given interruption is noteworthy or not. Ordinarily an interruption of one half hour is considered slight. Nevertheless, an individual, after having commenced the midday meal and meeting with a bona fide interruption lasting for an hour or more is fully justified in resuming and finishing the meal after the termination of an interruption. Finally, unless special reasons suggest the contrary, it is not allowed to give immediate reparation both to the quantity and the quality of viands allowed at this repast. In the first place, about eight ounces of food are permitted at the collation even though this amount of food would fully satisfy the appetites of some persons. Moreover, due attention must be paid to each person's temperament, duties, length of fast, etc. Hence, much more food is allowed in cold than in warm climates, more to those working during the day than to those at ease, more to the weak and hungry than to the strong and well fed. As a general rule whatever is deemed necessary in order to enable people to give more attention to their duties must be allowed. Moreover, since custom first introduced the collation, the usage of each country must be considered in determining the quality of viands permitted thereat. In some places eggs, milk, butter, cheese and fish are prohibited, whilst bread, cake, fruit, herbs and vegetables are permitted. In other places, milk, eggs, cheese, butter and fish are permitted, owing either to custom or to Indult. This is the case in the United States. However, in order to form judgments perfectly safe concerning this point, the Lenten regulations of each diocese should be carefully read. Finally, a little tea or coffee, or water, (14 Aug.) of the Assumption; (31 Oct.) of All Saints., are now fasting days. In Great Britain, Ireland, Australia and Canada, the days just indicated, together with the Wednesdays of Advent and (28 June) the vigils of Sts. Peter and Paul, are fasting days. Fasting essentially consists in eating but one full meal in twenty-four hours and that about midday. Nothing like a noteworthy interruption should be admitted during the course of the meal, because such a break virtually forms two meals instead of one. Common sense, taking into consideration individual intention and the duration of the interruption, must finally determine whether a given interruption is noteworthy or not. Ordinarily an interruption of one half hour is considered slight. Nevertheless, an individual, after having commenced
obligation incumbent on all baptized individuals capable of assuming obligations provided they have completed their twenty-first year and are not otherwise excused. This doctrine is merely a practical application of a universally accepted principle of moralists and theologians that whereby the character of obligation, as human legislation is deemed serious or light in so far as the material element involved in the law bears or does not bear a close and intimate relation to the attainment of a prescribed end. Inasmuch as fasting considered as a function of the virtue of temperance bears such a relation to the promotion of man's salvation, or even to the needs of the soul, it certainly embodies an obligation generally serious. To this a priori reason may be added what Church history unfolds concerning the grave penalties attached to transgressions of this law. The sixty-ninth of the Apostolic Canons (see Canons, Apostolic) decrees the degradation of bishops, priests, deacons, lectors or chanters, failing to fast during Lent, and the excommunication of laymen, who fail in this way. The fifty-sixth canon of the Trullan Synod (692) contains similar regulations. Finally Alexander VII (24 Sept., 1665) condemned a proposition lowering the fasts: “Whoever violates the ecclesiastical law of fasting to which he is bound does not sin mortally unless he acts through contempt or disobedience (Denzinger, op. cit., no. 1123). Though this obligation is generally serious, not every infraction of the law is mortally sinful. When, however, transgressions of the law fallad into the spiritual part of the law, venial sins are committed. Inability to keep the fast and incompatibility with fasting are due to one’s state in life suffice by their very nature, to extinguish the obligation because as often as the obligation of positive law proves extreme burden or inconvenience, the obligation is forthwith lifted. Hence, the sick, the infirm, convalescents, delicate women, persons sixty years old and over, families whose members cannot have the necessities for a full meal at the same time, or who have nothing but bread, vegetables or such like viands; those whom fasting brings loss of sleep or severe headaches, wives whose fasting incurs their husbands’ indignation, children whose fasting arouses their parents’ wrath; in a word, all who cannot comply with the obligation of fasting without undergoing more than ordinary hardship are excused on account of their incapacity to fulfill the obligation. In like manner unusual fatigue or bodily weakness experienced in discharging one’s duty and superinduced by fasting lifts the obligation of fasting. However, not every sort of labor, but only such as is hard and protracted, exhausts from the obligation of fasting. These conditions are not confined to manual labor, but may be equally verified with regard to brain work. Hence bookkeepers, stenographers, telegraph operators, legal advisers and many others whose occupations are largely mental are entitled to exemption on this score, quite as well as daily laborers or tradesmen. While these two causes begetting exemption by their very nature, do not exist, lawfully constituted superiors may dispense their subjects from the obligation of fasting. Accordingly the Sovereign Pontiff may always and everywhere grant valid dispensations from this obligation. His dispensations will be licit with sufficient reasons underlie the grant. In particular cases and for good reasons, bishops may grant dispensations in their respective dioceses. Unless empowered by Indult they are not at liberty to dispense all their subjects simultaneously. Let it be noted that usually bishops issue just before Lent circulars or pastores ioannes, which are read to the faithful or otherwise made public, and in which they make known, on the authority of the Apostolic See, the actual status of obligation, dispensations, etc. Priests charged with the care of souls may dispense individuals for good reason. Superiors of religious communities may dispense individuals of their respective communities provided sufficient reason exists. Confessors are not qualified to grant these dispensations unless they have been explicitly delegated thereunto. They may, however, decide whether sufficient reason exists to lift the obligation.

Those who have permission from the Holy See to eat meat on prohibited days, may avail themselves of this concession at their full meal, not only on days of abstinence but also on fasting days. When age, infirmity or labour releases Christians from fasting, they may at liberty to eat meat as often as they are justified in taking food, provided the use of meat is justified. For this reason a general indult of their bishop (Sacred Penitentiaria, 16 Jan., 1834). Finally, the Holy See has repeatedly declared that the use of lard allowed by Indult comprehends butter or the fat of any animal.

No student of ecclesiastical discipline can fail to perceive that the obligation of fasting is rarely observed in its integrity nowadays. Conscious of the conditions of our age, the Church is ever shaping the requirements of this obligation to meet the best interests of her children. At the same time, no measure of leniency can eliminate in the least the positive and divine positive law imposing mortification and penance on man on account of sin and its consequences.

(Council of Trent, Sess. VI, can. XX.)

Fast among Mohammedans. See Ramadan.

Fasti Siculi. See Chronicon Paschalae.

Fatalism is in general the view which holds that all events in the history of the world, and in particular, the actions and incidents which make up the story of each individual life, are determined by fate. The theory takes many forms, or, rather, its essential feature of an antecedent force rigidly predetermining all occurrences enters in one shape or another into many. Sometimes in the entire course of the world fate was conceived as an iron necessity in the nature of things, overlooking and controlling the will and power of the gods themselves. Sometimes it was explained as the inexorable decree of the gods directing the course of the universe; sometimes it was personified as a particular divinity, the goddess or goddesses of destiny. Their function was to secure that each man’s lot, “share”, or part should infallibly come to him.

Ancient Classical Fatalism. The Greek tragedians frequently depict man as a helpless creature borne along by destiny. At times this destiny is a Nemesis which pursues him on account of some crime committed by his ancestors or himself; at other times it is to compensate for his excessive good fortune in order to educate and humble him. With Eschylus it is the necessity of an unpitiable destiny; with Sophocles, that of an overruling personal will. Still, the most important feature is that the future life of each individual is so rigorously predetermined in all its details by an antecedent external agency that his own volitions or desires have no power to alter the course of events. The action of fate is blind, arbitrary, relentless. It moves inexorably onwards, effecting the most terrible
catastrophes, impressing us with a feeling of helpless consternation, and harrowing our moral sense, if we venture upon a moral judgment at all. Fatalism in general has been inclined to overlook immediate antecedents and to dwell rather upon remote and external events as the agency which somehow moulds the course of events. Socrates and Plato held that the human will was necessarily determined by the intellect. Though this view seems incompatible with the doctrine of free will, it is not necessarily fatalism. The mechanical theory of Democritus, which explains the universe as the outcome of collision of material atoms, logically imposes a fatalism upon human volition. The 

792 792

FATALISM the problem of fatalism thus becomes in Christian theocracy the problem of Divine predestination and the harmonizing of Divine prestation and providence with human liberty. (See Free Will; Predestination; Providence.)

Mohammedan Fatalism.—The Mohammedan conception of God and His government of the world has the vindication of His unity and the absolverence of the method of His rule, as well as the Oriental tendency to belittle the individuality of man, were all favourable to the development of a theory of predestination approximating towards fatalism. Consequently, though there have been defenders of free will among Mohammedan teachers, yet the dominating view which has prevailed most widely among the followers of the Prophet has been that all good and evil actions and events take place by the eternal decrees of God, which have been written from all eternity on the prescribed table. The faith of the believer and all his good actions have all been decreed and all the bad actions of the wicked though similarly decreed have not been approved. Some of the Moslem doctors sought to harmonize this fatalistic theory with man's responsibility, but the Oriental temper generally accepted with facility the fatalistic presentation of the creed; and this appealed to many as the only way to prevent predestination and privation of free choice as a justification for the denial of personal responsibility. Whilst the belief in predestined lot has tended to make the Moslem nations lethargic and insensible to the ordinary industries of life, it has developed a recklessness in danger which has proved a valuable element in the military character of the people.

Modern Fatalism.—The reformers of the sixteenth century taught a doctrine of predestination little, if at all, less rigid than the Mohammedan fatalism. (See Calvin; Luther; Free Will.) With the new departure in philosophy and its separation from theology since the time of Descartes, the ancient pagan notion of an external fate, which had grown obsolete, was succeeded by or transformed into the theory of Necessarianism. The study of physics, the increasing knowledge of the reign of uniform law in the world, as well as the reversion to naturalism initiated by the extreme representatives of the Renaissance, stimulated the growth of rationalism in the seventeenth and eighteenth centuries and resulted in the popularization of the old objections to free will. Certain elements in the mechanical philosophy of Descartes and in the occasionalism of his system, which his followers Malebranche and Gauvinex developed, combining a real action to God, obviously tend towards a fatalistic view of the universe.

Modern Pantheistic Fatalism.—Spinoza's pantheistic necessarianism is, however, perhaps the frankest and most rigid form of fatalism advocated by any leading modern philosopher. Starting from the idea of substance, which he so defines that there can be but one, he deduces in geometrical fashion all forms of being in the universe from this notion. This substance must be infinite. It evolves necessarily through an infinite number of attributes into an infinity of modes. The seemingly individual and independent beings of the world, minds and bodies, are merely these modes of the infinite substance. The whole world-process of actions and events is rigidly necessary in every detail; the notions of contingency, of possible beings other than those which exist, are purely illusory. Nothing is possible except what actually is. There is free will in neither God nor man, though revolutions and decisions follow with the same inexorable necessity from man's nature as geometrical properties from the concept of a triangle. Spinoza's critics were quick to point out that in this view man is no longer responsible if he commits a crime or deserves a raise in recompense for his good deeds, and that God is the author of sin. Spinoza's only answer was that rewards and punishments still have their use as motives, that evil is merely limitation and therefore not real, and that what is real is good. Vice,
however, he holds, is as objectionable as pain or physical corruption. The same fatalistic consequences to morality are logically involved in the various forms of recent pantheistic monism.

Modern Materialistic Fatalism.—Modern materialism in the notion of matter as the sole original cause of all things, endeavours to elaborate a purely mechanical theory of the universe, in which its contents and the course of its evolution are all the necessary outcome of the original collocation of the material particles together with their chemical and physical properties and the laws of their action. The more thoroughgoing advocates of the mechanical theory, such as Clifford and Huxley, frankly accept the logical consequences of this doctrine that mind cannot act upon matter, and teach that man is "a conscious automaton", and that thoughts and volitions exercise no real influence on the movements of material objects in the present world. Mental states are merely by-products of material changes, but in no way modify the latter. They are also described as subjective aspects of nervous processes, and as epiphenomena, but however conceived they are necessarily held by the disciples of the materialistic school to be incapable of interfering with cause or of entering in any way as efficient causes into the chain of events which constitute the physical history of the world. The position is in some ways more extreme than the ancient pagan fatalism. For, while the earlier writers taught that the incidents of man's life were under the inescapable and whelming power against which it was useless as well as impossible to strive, they generally held the common-sense view that our volitions do direct our immediate actions, though our destiny would in any case be realized. But the materialistic scientist is logically committed to the conclusion that while the whole series of our mental states are rigidly bound up with the nervous changes of the organism, which were all inexorably predetermined in the original collocation of the material particles of the universe, these mental states themselves can in no way alter the course of events or affect the movements of a single molecule of matter.

The Refutation of Fatalism of all types lies in the absurd and incredible consequences which they all entail. (1) Ancient fatalism implied that events were determined independently of their immediate antecedents. It implied free will, or that free will could affect the course of our lives. Logically it destroyed the basis of morality. (2) The fatalism resting on the Divine decrees (a) made man irresponsible for his acts, and (b) made God the author of sin. (3) The fatalism of materialistic science not only annihilates morality but, logically reasoned out, it demands belief in the incredible proposition that the thoughts and feelings of mankind have had no real influence on human history.

Mill distinguished: (a) Pure or Oriental fatalism, which, he says, holds that our actions are not dependent on our desires, but are overruled by a superior power; (b) modified fatalism, which teaches that our actions are determined by our will, and our will by our character and the motives acting on us—our character, however, having been given to us; (c) finally determinism, which, according to him, maintains that not only our conduct, but our character, is amenable to our will: and that we can improve our character. In both forms of fatalism, he concludes, man is not responsible for his actions. But logically, in the determinist theory, if we reason the matter out, we are driven to precisely the same conclusion. For the volition to improve our character cannot arise unless as the necessary outcome of previous character and present motives. Practically there may be a difference between the conduct of the professed fatalist, who will be inclined to say that as his future is always inflexibly predetermined there is no use in trying to alter it, and the determinist, who may advocate the strengthening of good motives. In strict consistency, however, since determinism denies real initiative to the individual man, the consistent view of life and morality should be precisely the same for the determinist and the most extreme fatalist (see Determinism).

For bibliography see Fate Will. Michael Maher.

Fate (Lat. fatum, from fari, to tell or predict). This word is almost redundant in the vocabulary of a Catholic as such, for its meaning as the prime cause of events is better expressed by the term Providence, while, as a constant force at work in the physical universe, it is nothing more nor less than natural law. Hence St. Augustine says (De Civit. Dei, c. i.): "If anyone calls the influence or the power of God by the name of Fate, let him keep his opinion, but send his speech." Fate, in its popular meaning, is something opposed to chance, in so far as the latter term implies a cause acting according to no fixed laws. The unseen power that rules the destinies of men was personified by the ancient Greeks under the name of Moira, or, more generally, as three sister Moiras, or Fates, whose names were Clotho, Lachesis, and Atropos. Sometimes fate is described as having unlimited sway over gods and men, while at other times the gods, especially Zeus, are described as the rulers of human destiny, or as having the power to change the course of fate. With the Moiras the Romans identified their own Parcae or Fates.

The idea of fate as a power in the world came, as St. Thomas tells us (C. G., III, xcliil), from the attempt to find a cause for events which appeared to follow no definite law and to be the result of mere chance. Many, who were not satisfied with the explanation of Providence that the ancient mythologists, turned their thoughts to the heavenly bodies, which, acting according to definite and unchanging laws themselves, were supposed to impress their influence upon events in the lower world (see Astrology). St. Thomas, who was no believer in astrology, evidently supposes that, while Providence acts according to fixed laws in the sidereal system, there is no such uniformity in the case of natural phenomena on earth. These latter are therefore often the result of chance, as far as secondary causes are concerned, though not so in their relation to God's Providence.

Early Speculations.—The Greek Philosopher Diodorus of Iassus tried to prove the universality of fate by an argument from the truth of possibilities (τηλετάτα εξισιívων). The contention was that no event can happen unless it was eternally true that it was going to happen. The truth of such a proposition cannot be changed, and therefore the event to which it refers must necessarily take place. It is something like the argument which St. Augustine employs to demonstrate the eternal intellect of God; but the fallacy of it as regards Fate is pointed out by Cicero (De Fato IX, 18, 19), who shows that the truth of the proposition depends on the actuality of the event. The definition which Cicero puts into the mouth of his brother Quintus identifies Fate with the necessity of natural law (De Divinatione, I, 55, par. 125). His words are: "Alum autem id appello quod Greci ἐπανακύκλωσιν, id est, ordinem semelque causarum, quum causa cause nesm ex se gignat", or, as we should say, fate is the result of natural law in the physical world. Cicero himself, however, says further on (ibid., II, 3, par. 6), "What is the use of maintaining the existence of Fate when, without Fate, an explanation of everything may be found in Nature or Fortune?"

The doctrine of fate held an important position in the monistic system of the Stoics. Its universal existence was a logical consequence of their assumptions with regard to the physical universe; for they recognized nothing that was not ultimately reducible to
matter and natural law. In their ethical system, however, the problem of determinism presented greater difficulties; for their favourite commandment, of living according to nature, seemed to imply that "men at some time are masters of their fates," and hence a placing of their actions to that eternity with Nature in which virtue was supposed to consist. The Epicureans stoutly denied the existence of fate, and the unaccountable "swerve" of the atoms, as postulated by the founder of their sect, was intended to preclude the law of necessity, not only in the case of the human will, but even in the elementary movements of primordial matter.

**Fate in the Koran.**—The idea of fate among orthodox Mohammedans is founded on the doctrine of God's absolute decree, and of predestination both for good and for evil. The prophet encouraged his followers to fight without fear, and even with desperation, by assuring them that no timidity or caution could save their lives in battle or avert their inevitable destiny. Disputes about this doctrine have given rise to various sects among the Mohammedans, some explaining away and others denying the absolute nature of the Will. The Koran itself does not convey the impression that Mohammed's own views on the subject were either clear or consistent.

**Buddhism.**—Though Free Will is not entirely ignored in Buddhism (q. v.), it is, at any rate, practically suppressed. According to this system, which is called the Teaching of the Buddha, "during the whole of his life under the weight, not precisely of fatality, but of an ineluctable series of former existences" (The Buddha and His Religion, p. 126).

**Materialism.**—In the theory of those who provide a purely materialistic explanation of the universe, and who regard the Will as just as much subject to unchanging and necessary laws as are all other phenomena, the universal sovereignty of fate is implied in the absolute reign of physical law.

**Catholic Teaching.**—According to Catholic teaching, God, who is the Author of the universe, has made it subject to fixed and necessary laws, so that, where our knowledge of these laws is complete, we are able to predict physical events with certainty. Moreover, God's absolute decree is irrevocable, but, as He cannot will that which is evil, the abuse of free will is in no case predetermined by Him. The physical accomplishment of the free act of the will, as well as its consequences, are willed by God conditionally upon the positing of the act itself, and all alike are the object of His eternal foreknowledge. The nature of this foreknowledge is a matter still in dispute between the opposing schools of Bañez and Molina. Hence, though God knows from all eternity everything that is going to happen, He does not will everything. Sin He does not will in any sense; He only permits it. Certain things He wills absolutely and others conditionally, and His general supervision, whereby these decrees are carried out, is called Divine Providence. As God is a free agent, the order of nature is not a consequence of the sense that it could not have been otherwise than it is. It is only necessary in so far as it works according to definite uniform laws, and is predetermined by a decree which, though absolute, was nevertheless free.

Moreover, in the case of miracles, God interferes with the ordinary course of nature; and the supposition that, at certain periods of the world's evolution, such, for instance, as when man first appeared on the earth, there have been other providential interpositions involving new departures in the world-process, provides for certain facts in the region of organic life and human culture which are not less the conclusions of the materialists. St. Thomas distinguishes fate from Providence, and calls it the order or disposition of secondary causes according to which they act in obedience to the First Cause. It follows from what has been said that, in the Catholic view, the idea of fate—St. Thomas dislikes the word—must lack the note of absolute necessity, since God's decrees are free, while it preserves the character of relative necessity inasmuch as such decrees, when once passed, cannot be altered. Moreover, God knows what is going to happen because it is going to happen, and not vice versa. Hence the futurity of an event is a logical, but not a physical, consequence of God's foreknowledge. See Free Will, God, Miracles, Providence.

**Fathers of the Church.**

**Fathers of the Church,** the congregation of missionary priests first established at Lyons, France, in 1808, and at Paris, in 1814, and finally approved by Pope Gregory XVI, 18 February, 1834. The General Founder, Very Rev. Jean-Baptiste Rauzan, was born at Bordeaux, 5 December, 1757, and died in Paris, 5 September, 1817. After completing his ecclesiastical studies, he taught theology and sacred eloquence, and later was chosen Vice-General of Bordeaux. Here he inaugurated a missionary movement to save the Faith in France. On the recommendation of d'Aviau, Archbishop of Bordeaux, Cardinal Fesch, Archbishop of Lyons, who was especially interested in the project, invited Father Rauzan to Lyons, where, in 1808, he gathered around him a number of zealous and noted preachers. So effective was their preaching that in 1814 they won the favour of Napoleon I, and received from the Government, unsolicited, subsidies to defray the expenses of their missions. This favour, however, was short-lived, for, owing to Napoleon's quarrel with Pius VII, the society, which was called the Missionaries of France, was suppressed. In 1818, at the suggestion of Cardinal Fesch, Father Rauzan rallied his co-labourers, adding others, among whom were the young Vice-General of Chambéry, de Forbin-Janson, afterwards Bishop of Nancy, the Abbé Fraysseinsou, who founded St. Stanislaus's College and instructed the young missionaries in sacred eloquence, Legris Duval, the St. Vincent de Paul of Italy, Le Vasseur, the St. Vincent de Paul of France, and others.

Starting with renewed zeal, the Missionaries of France not only evangelized the cities of Orléans, Poitiers, Tours, Rennes, Marseilles, Toulouse, Paris, and many other places, but established the works of St. Geneviève and the Association of the Ladies of Providence, who still exist in many parts of France, rendering valuable services to the pastors. Father Rauzan founded the Congregation of the Sisters of St. Clotilde for the education of young ladies. He was befriended by the royal family, who not only assisted him financially, but gave him the celebrated Mount Valerian, at that time the centre of piety, and a later one of the principal forts protecting the capital.

In 1830 during the second Revolution the Missionaries of France were dispersed and exiled, and their house in Paris sacked. Father Rauzan went to Rome, where he received a paternal reception from Gregory XVI, who encouraged and authorized him to found a new society, to be known as the Fathers of Mercy. The Brief of approbation, which also contains the constitutions, was given 18 February, 1834, and on the 15th of March of the same year a second Brief, affording the new society to the Propaganda, and the former Missionaries of France accepted these constitutions on the 8th of December following. Among its members have been such influential and eloquent preachers as Mgr. Failllet, Bishop of Orléans, Mgr. Duquesnay, Archbishop of Cambrai, Mgr. Bernadou, Archbishop of Sens, who later became a cardinal. The Fathers of...

FATHERS

Mercy resumed their missionary labours in France, only to meet again the disasters which befell all religious societies through the decree of expulsion in 1880. However, through the influence of their many friends in Paris, and claiming the enforcement of the authorization given to the society by Louis XVIII in 1816, the Fathers of Mercy retained their mother-house in Paris until the separation of Church and State in 1905, when they moved to Belgium.

In 1839, at the suggestion of Bishop Hughes, of New York, Mgr. Forin-Janson introduced the Fathers of Mercy into the United States, their first field of labour being in the Diocese of New Orleans. Bishop Potiers, of Mobile, Alabama, then invited them to take charge of Spring Hill College. Two years later, Fathers Lafont and Aubril were sent to look after the increasing French population in New York City, where the Fathers of Mercy now have charge of the parishes of St. Vincent de Paul, Manhattan, and of Our Lady of Lourdes and St. Frances de Chantal, Brooklyn. They also have a house of studies in Rome, houses in Belgium, France, and other places. By a decree of Propaganda (August, 1906), the Very Rev. Theophile Wucher was named Vicar General of the Institute for three years and took up his residence in New York. In their activities the Fathers of Mercy embrace all works of apostolic zeal. One of their chief characteristics is, that they must at all times consider themselves auxiliaries of the secular clergy, and in every way conform to the will of the bishop in whose diocese they may labour. The end and mode of life the congregation imposes upon its members differs little from that of every good secular priest.
